Including the annual financial report

The world's leading provider in mineral-based specialties for industry, Imerys delivers high value-added, functional solutions to a great number of industries, ranging from process manufacturing to consumer goods. The Group draws on its understanding of applications, technological knowledge and expertise in materials science to deliver solutions by beneficiating its mineral resources, synthetic minerals and formulations. Imerys contributes essential properties to customers' products and their performance, including heat resistance, hardness, conductivity, opacity, durability, purity, lightness, filtration, adsorption and water repellency. Imerys meets ambitious targets to develop responsibly, focusing on people, the environment and corporate governance.

AUTORITÉ DES MARCHÉS FINANCIERS
AMF

The French version of this Universal Registration Document was filed on March 19, 2026 with the AMF (French Financial Market Authority), the competent authority pursuant to regulation (EU) No 2017/1129, without prior approval in accordance with Article 9 of said regulation. The French version of this Universal Registration Document may be used for the purposes of a public offering of securities or the admission of securities to trading on a regulated market if it is supplemented by a securities note and, if required, a summary note, as well as all the updates made to the Universal Registration Document. The whole is approved by the AMF in accordance with regulation (EU) 2017/1129.

This Universal Registration Document is a reproduction in PDF format, translated in English, of the official version of the Universal Registration Document established in ESEF (*European Single Electronic Format*) and in French, filed with the AMF on March 19, 2026 and available on the AMF website www.amf-france.org. This reproduction is available on our website www.imerys.com.

Message from the Chairman of the Board of Directors and the Chief Executive Officer

« Imerys navigated a challenging environment in 2025, characterised by subdued industrial activity and construction demand in Europe and North America. Firm pricing discipline, strict cost management and the continued reshaping of the Group's portfolio limited the market impact on the group's operating results.

The launch of the cost and performance improvement program, Project Horizon, marks an important step in restoring targeted profitability. The Group's financial structure remains sound, with its Investment Grade credit rating confirmed.

Imerys continues to progress on strategic priorities, as in energy transition materials or the EMILI lithium project, recently reinforced by the French State's investment. Timely execution and continued innovation will remain key priorities as the Group navigates the current unstable geopolitical and economic environment.»

PATRICK KRON
Imerys Chairman of the Board of Directors

«Meeting our adjusted EBITDA guidance for 2025 in an unsupportive demand environment is testament to our commercial efforts, disciplined cost approach and the strong commitment of our teams.

While revenue was broadly stable at constant scope and exchange rates, Imerys delivered resilient operating performance and generated solid free operating cash flow. In parallel, we successfully completed our 2023–2025 SustainAgility program, achieving nearly all of our ESG objectives confirming the strength of our commitments. Building on this momentum, we have launched a new SustainAgility 2030 roadmap, setting clear and focused ambitions aligned with stakeholders' expectations.

The launch of the cost and performance improvement program, Project Horizon—which includes structural streamlining of the organization and an adjusted industrial footprint—combined with our diversified portfolio, positions Imerys to capitalize on market improvements should they materialise.»

ALESSANDRO DAZZA
Imerys CEO

Luzenac, France

1.1 Imerys in a nutshell

1.1.1 A world leader

Overview

As the world's leading supplier of mineral-based specialty solutions for the industry, Imerys offers high value-added and functional solutions to a wide range of industries and fast-growing markets, including solutions for green mobility and sustainable energy, sustainable construction and natural solutions for consumer goods.

Imerys leverages its deep understanding of product applications and its technological knowledge and expertise in material science, to deliver innovative solutions, beneficiating its mineral resources or creating synthetic minerals and formulations.

Imerys contributes essential properties to its customers' products, including heat resistance, hardness, conductivity, opacity, durability, purity, lightness, filtration, adsorption, water repellency and many more. As an "Enabler of Tomorrow", Imerys pursues ambitious targets in terms of Environment, Social and Governance (Sustainability) to drive responsible growth.

With €3,384 million of revenue in more than 136 countries in 2025, Imerys' value-added solutions are designed to meet the specific technical requirements of customers and can be split into three categories:

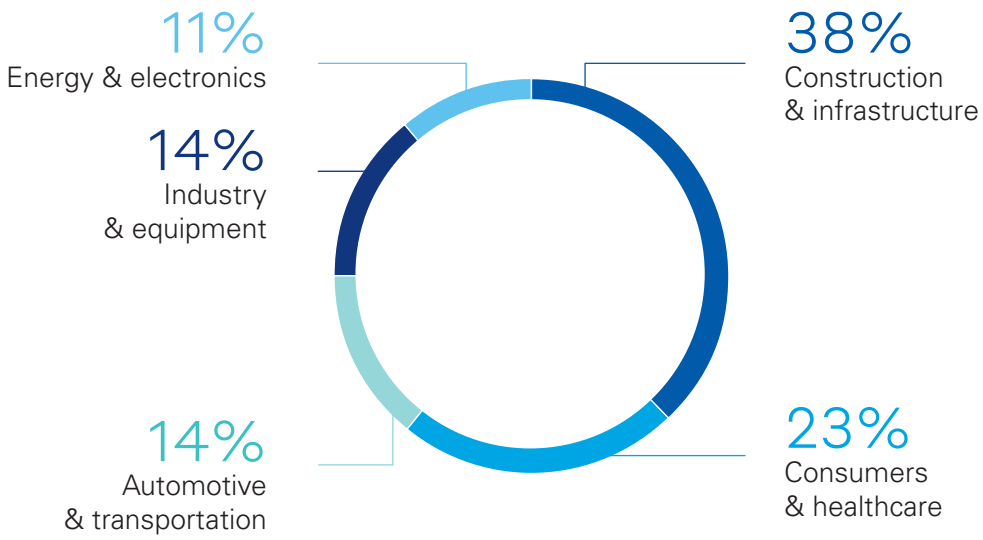

- **Functional additives:** integral part of the formulation of customers' products, but account for only a minor share of the finished product manufacturing cost (e.g. talc improves the rigidity of polymers used in the automotive industry; calcium carbonate makes plastic films breathable for use in baby diapers; calcium aluminate facilitates self-leveling, quick-drying cement floor screeds).
- **Mineral components:** critical constituents in the formulation of customers' products (e.g. mineral solutions for ceramics, or fused alumina for industrial abrasives).
- **Process enablers:** essential in customers' manufacturing processes, but are not found in the end product (e.g. diatomaceous earth used to filter liquids or to extract proteins from blood plasma by fractionation).

High Added-value solutions for different end markets

Imerys' specialty minerals solutions serve five main end markets, supported by three key growth drivers:

- **sustainable construction,**
- **green mobility and sustainable energy, and**
- **natural solutions for consumer goods.**

IMERYS END-MARKET (% REVENUE, 2025)

Source: Imerys estimates.

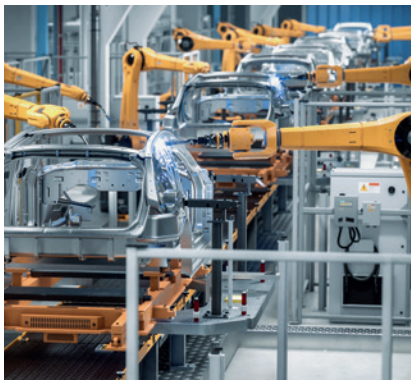

Construction & infrastructure

- Additives for paints (e.g. interior decorative paints) and coatings (e.g. marine protection or façade coating)
- Minerals for technical and traditional ceramics (e.g.floor and wall tiles, large slabs and sanitaryware)
- Functional additives for plastics and thermoset, such as pipes and window frames
- Additives for adhesives, caulks and sealants
- High-performance binders for dry mix mortars and floor screeds in the construction industry

Consumers & healthcare

- Filtration agents for liquids and blood plasma
- Pharmaceutical diluents, coloring agents and processing aids; glidants and lubricants for tablet production
- Engineered minerals for the cosmetics industry
- Food additives to preserve flavor
- Coating agents improving fertilizer flow
- Mineral-based cat litters
- UV protection of crops
- Fillers and coatings for board and packaging

Automotive & transportation

- Functional additives for lightweighting of plastics and thermoset
- Additives for rubber & paints
- Ultra-fine alumina for high-performance abrasives and graphite for brake pads
- Carbon black for conductivity in onboard data systems

Industry & equipment

- Refractory minerals for high temperature applications (e.g. refractory linings)
- Alumina and zirconia for abrasives (e.g. industrial cutting discs and grinding wheels)

Energy & electronics

- Mineral solutions for batteries and energy storage (lithium-ion, alkaline, and lead-acid batteries, fuel cells)
- High purity quarz for the production of high purity silicon metal for electronics and solar panels
- High-purity graphite and carbon-based solutions for industrial applications (polymers, carbon brushes)
- Refractory solutions for power plants

Group History

Transform to perform : the Imerys story

Luzenac, France

1970 - 1990s
IMETAL

1974
Creation of Imetal, a holding company by the Rothschild family, combining its former mining activities and its new acquisitions of a French clay roof tile maker and an American steel and metals processor.

1985
Shift from non-ferrous metallurgical activities to industrial minerals, with the acquisition of Damrec. A new structure is defined around three key sectors: Building Materials, Industrial Minerals and Metals Processing.

1990s
Increased focus on industrial minerals through the purchase of companies in Brazil, France, Canada, Switzerland, South Africa, the UK and the US, producing minerals as such as kaolin, calcium carbonates, refractory minerals, monolithic refractories, ball clays, ceramics, graphite and white pigments.

1999
Further expansion in industrial minerals with additional acquisitions, such as English China Clays, and the strategic divestment of the remaining metal-related assets (Copperwell). Change in strategy reflected by the new company name: Imerys.

2000's
Imerys

2000–2003
Enlargement of the Group's portfolio with new minerals such as clays, feldspar and halloysite, and further expansion in existing minerals (fused alumina and bauxite), while expanding the geographical footprint to worldwide presence. In 2003, Imerys acquired the Willebroek carbon black production plant in Belgium, initially targeting minerals for plastics and rubber applications. It soon became clear the potential of this product as conductive additive for the growing lithium-ion battery market.

2005-2010
New wave of sizeable acquisitions, including:

- Lafarge Réfractaires Monolithiques, enabling Imerys to become the European leader in monolithic refractories,
- World Minerals in the US, a global leader in filtration and performance minerals such as diatomite and perlite,
- Denain Anzin Minerals of France, providing Imerys with feldspar, mica, quartz and kaolin deposits across Europe.

Additional acquisitions at the end of the decade in calcined clays, extensive reserves of high-quality white marble in Malaysia, Vietnam and China, feldspar mines in the US, India and Turkey, and high-quality mica in the US and Canada consolidated Imerys' position as the global leader in industrial minerals.

2010–2019

Substantial acquisitions and organizational change

2010-2019

Imerys became the world leader in talc in 2011 through the acquisition of the Luzenac Group from Rio Tinto. The same year, a joint-venture, The Quartz Corporation, was established to meet increasing demand for high purity quartz in the semiconductor and photovoltaic markets.

Smaller bolt-on and certain larger acquisitions were made in the period, including:

- S&B, a global player in bentonite, casting fluxes, wollastonite and perlite-based solutions (2015),
- Kerneos, the world leader in calcium aluminate binders (2017).

Imerys secured organic growth through significant investments in existing and new production lines, doubling the capacity of the Willebroek carbon black plant, and building Imerys' first industrial facility in the Middle East, a fused alumina production plant in Bahrain.

At the end of the decade, the divestiture of the Roofing division represented a first important step in the positioning of Imerys as a pure specialty minerals company. In 2018, a simpler structure was put in place to make Imerys more customer-centric and foster organic growth.

2023-2025

Following the review of Imerys' portfolio in 2021, two major divestments were completed in 2023 and 2024:

- The disposal of the High Temperature Solutions business area, reinforcing Imerys as a pure specialty minerals player, less cyclical and aligned with global megatrends;
- The divestment of the assets serving the paper market, removing a drag on organic growth and positioning Imerys on more attractive end-markets.

In parallel, Imerys completed its development in the fast growing lithium-ion battery market with over €180 million invested in capacity increases.

Imerys created a new business area named Solutions for Energy Transition to reflect accelerating momentum in critical minerals, and their growing contributions of these activities to the Group's financial performance.

At the beginning of 2025, Imerys acquired Chemviron's European diatomite and perlite assets. This acquisition extends the Group's European footprint and broadens its products portfolio.

On October 30th 2025 Imerys signed an agreement to purchase SB Mineraçao, a Brazilian leading producer of ground calcium carbonate used in applications such as polymers, thermosets, paints and coatings in Brazil. This acquisition reinforces Imerys' position in fast-growing markets and applications.

2020's

The new Imerys

2021

In 2021, Imerys launched a strategic review of its portfolio, leading to the decision to focus on three areas of growth, aligned with today's megatrends:

- Solutions for Green Mobility and Sustainable Energy;
- Sustainable Construction;
- Natural Solutions for Consumer Goods.

2022

Imerys announced two major mining projects to exploit lithium: EMILI at its Beauvoir facility (Allier, France), and Imerys British Lithium in Cornwall (UK). Once implemented, those two projects will contribute to the European Union's ambitious energy transition and represent a great opportunity for the Group.

Imerys' Purpose, Vision and Values

Imerys'"Purpose, Vision and Values" provides the Group and its employees with an aspiration and principles beyond business performance.

Imerys' Purpose, Vision and Values (PVV) continue to define who we are and how we operate. They reflect our shared ambition to unlock better futures for our people, our customers and our planet and to embed sustainability, responsibility and innovation into everything we do.

Since their launch, our PVV have guided decisions across the Group: how we protect health and safety, develop our people, build trusted customer partnerships, and deliver sustainable performance. In 2025, they remain the foundation for our long-term strategy and the inspiration behind the progress we make every day.

Unlocking Better **Futures**

for our people
for our customers
for our planet

Imerys' purpose

"Unlocking Better Futures, For Our People, Our Customers and Our Planet"

reflects Imerys' constant commitments to its employees and its customers. It also strongly reflects and emphasizes Imerys' strategy to fully embed our role in protecting local ecosystems and economies over the long term, whilst combating climate change and preserving biodiversity.

Our vision

"We aim to lead the specialty minerals industry by empowering our people, applying our expertise to serve our customers, leveraging our resources to expand our presence in fast growing markets, innovating the products and technologies of tomorrow and embedding responsible and sustainable thinking into everything we do".

Our values

Every person matters
Creating a safe, healthy, and inclusive environment.

Partner of choice
Helping our customers solve tomorrow's challenges.

Strive for better
Continuously learning, improving and innovating.

One team together
Collaborating for better results.

Enablers of tomorrow
Protecting the planet and the future through its actions.

The true measure of success isn't the launch it's in the living. Across Imerys, our teams are bringing the PVV to life every day proving its strength as a shared foundation.

Discover inspiring stories showcasing our values in action below.

Every Person Matters

Imerys promotes inclusive growth through programs like **Annual Learning Week, DE&I events** (including International Women's Day), and Thailand's "**My Buddy" scheme**. These initiatives, offering global webinars, inspiring activities, and cross-generational mentoring, strive to cultivate a workplace where all employees feel valued, respected, and empowered, fostering a culture where qualifications are prioritized over gender and shared values are strengthened.

Strive for Better

Striving for better drives innovation across our business. **AI is transforming efficiency,** from drafting lab SOPs with our in-house AI platform, to improving mining safety through AI-guided blasting and real-time radar slope monitoring. At the same time in our markets, **Fondag® Aerospace concrete** is setting new standards in durability and heat resistance, meeting the aerospace sector's extreme demands for rocket launchpads. These examples reflect our determination to continuously improve and deliver smarter processes, safer operations, and advanced solutions for tomorrow's industries.

Enablers of Tomorrow

At Imerys, enabling tomorrow means leading the shift to cleaner energy and transparent climate actions. In 2025 **we've established Power Purchasing Agreements (PPAs)** such as a 10-year virtual PPA with Engie in Europe which will cover 24% of our regional operations. In the US a 15-year PPA meets 30% of local needs. Four solar farms are already running, with more to follow. Implementing such concrete actions earned Imerys recognition in the **Financial Times Europe's Climate Leaders 2025 list**, reflecting real progress towards our 2030 carbon-reduction targets.

Partner of Choice

Being a trusted partner means creating opportunities through collaboration. **FenX, winner of the Imerys Start-up Challenge**, is using our minerals to produce fire-resistant insulation panels from mineral waste, and innovation now scaled through turnkey factories worldwide. In China, the **launch of Imerys' official WeChat** channel strengthens engagement with key audiences. Meanwhile, **Eco Material Technologies** is rethinking cement production using our perlite co-products, cutting emissions through local sourcing. Together, these partnerships show how we co-create sustainable solutions.

One Team Together

Working as one team is about uniting people around shared goals. **In Dunkirk,** employees, families, and partners came together to celebrate **50 years of industrial excellence,** a milestone honoring legacy while looking to the future. The success of our **Cash Excellence Program** is another collective achievement through broad employee participation. More than a financial result, it fostered a culture of awareness and responsibility, showing the power of collaboration across the Group.

1.1.2 Business model

Imerys' business model, as described below, integrates the Group's full commitment to sustainability and is based on three key pillars: empowering people, growing with customers and caring for the planet.

Key Figures

Human Resources

12,342 employees in 40 countries

96% of employees have benefited from at least one training course in 2025

People & Society

Signatory of the UN Global Compact and alignment with the Sustainable Development Goals (SDGs)

Environment

2030 targets validated by the SBTi:

- Scope 1 & 2: 42% reduction of GHG emissions (tCO2eq) from 2021 base year compatible with a 1.5° trajectory
- Scope 3: 25% reduction of GHG emissions (tCO2eq) from 2021 base year

Member of Act4nature: International and partnering with PatriNat, a French public scientific initiative for biodiversity preservation

Intellectual

Portfolio of around 270 patented innovations

336 people working in 9 R&D centers

More than 50 new products launched

Industrial & Commercial

153 industrial sites including 71 mines in 33 countries

Capital expenditures in maintenance and development: €317 M

I-Cube industrial improvement program

Financials

Equity: €2,615 M

Net debt: €1,391 M (53.2% of equity and 2.5x adjusted EBITDA)

Investment Grade credit rating: BBB- (S&P), Baa3 (Moody's)

Business Model

01

Beneficiate/synthesize

- Exclusive access to high quality mineral reserves
- Minerals and mineral solutions

02

Transform

- Proprietary processes and technologies
- Highly efficient industrial assets

03

Perform

Contributing key properties to customers' products or processes

04

Design

Innovative, reliable and sustainable solutions

05

Leadership

- Leader in most of its markets
- Supported by 3 megatrends: sustainable construction, natural solutions for consumer goods and green mobility & sustainable energy

2025 Highlights

Human Resources

Safety: 2.62 Total Recordable Injury Rate

Diversity, Equity and inclusion: 28% of women in the Group's senior management team

Local community engagement: 2,500 employees included in Imerys volunteering program

Environment

Fight against climate change:

- 28% reduction scope 1 & 2 GHG emissions (tCO2eq) from 2021 base year, 22% reduction scope 3

Tackle industrial and mineral waste:

- Creation of a JV to reuse mineral waste from various industries

Business Conduct

Responsible purchasing: 75% suppliers assessed

Life cycle analysis (LCA)

62% of operational sites with product eco-profiles completed or updated in the last 5 years

Industrial and commercial

23,000 customers across more than 145 countries

Market leader in 75% of its activities

Financials

Adjusted EBITDA: €546 M (margin on revenue 16.1%)

Net current free operating cash flow: €127 M (before strategic capex)

Dividend per share: €0.75*

**Proposal made by the Board of Directors and submitted for approval at the Shareholders' General Meeting.*

- Industry & Equipment

03

Plant: transformation & processing
- Mechanical treatments
- Heat treatments
- Chemical treatments

01

Supply chain

In order to supply specialty minerals to its customers, Imerys needs to procure raw materials - when not coming directly from its mines-, energy and chemicals for its processes, as well as other services such as maintenance and logistic services.

Imerys believes that high standards in all environmental, social and governance areas are essential for all of its business operations across the globe. Imerys expects its suppliers to adhere to the same principles as elaborated within the Group's Code and Sustainability Charter. The Supplier ESG Standards, which must be acknowledged and complied with, are applicable to all suppliers and form an important part of the Group Purchasing policy since 2018.

02

Mines

High quality mineral resources and industrial assets

Imerys owns a broad portfolio of mineral resources, which effectively underpins a large proportion of its supply of raw materials, as well as highly efficient industrial assets using a wide variety of proprietary industrial technologies and processes.

Imerys operates over 70 mineral deposits throughout the world, and mines and/or processes more than 20 different minerals. The Group continues to replace and develop its mineral reserves and resources, endeavouring to maintain an average of 20 years of mineral reserves. The minerals extracted from mines owned by Imerys, or purchased from third parties, are systematically processed or synthesized by Imerys into mineral solutions designed to enhance the properties required for their end-use applications and meet the specifications of its customers.

03

Transformation and processing

Proprietary industrial processes and technologies

Imerys masters specific expertise and know-how in the following conversion processes:

- **Mechanical treatments:** grinding, purification, refining, micronization, screening, drying, molding, cycloning, elutriation, classification, flotation, mixing, etc.
- **Heat treatments:** high temperature calcination, fusion, sinterization, etc.
- **Chemical treatments:** synthesis, crystallization, precipitation, coatings, etc.

The mineral solutions marketed by Imerys usually account for a relatively small portion of its customers' production costs, but they add key properties to their products or industrial processes. Imerys' solutions are sold as powders, grains, granules, blends, pastes or aqueous dispersions. Depending on the product, production cycles range from a few days to several weeks.

04

"One-stop-shop" for our customers

Imerys' market-oriented organization helps improve proximity to customers and is supported by its Commercial Excellence program. The organization leverages the benefits of a broad portfolio of mineral specialties and the opportunities to cross-sell several complementary mineral products to customers ("one-stop-shop"). Commercial Excellence helps take a personalized approach to key accounts and bolster partnerships with customers, whilst optimizing value selling, pricing and opportunity management. Imerys takes a tailored approach to managing its operations, allocating resources to markets with the most promising outlook for growth.

Circularity

Imerys actively embeds circular economy principles across its global operations by focusing on mineral resources. For example:

Resource Recovery: Polwhite™ LOOP, the first kaolin certified as circular material by ISCC PLUS, offers optimum barrier performance and low air permeability. The ISCC PLUS certification validates the sustainability of alternative feedstocks throughout the supply chain.

Circular Supply: VALuMix contains at least 50% recycled refractories blended with stone wool production waste. This innovative, closed-loop approach allows customers to integrate more recycled content back into their stone wool formulation.

Downstream Circularity: Imerys' calcium aluminate solutions (Sewper® Liner and SewperCoat®) enhance durability and provide long-lasting corrosion protection for concrete. This extended lifespan reduces the need for maintenance and resource consumption.

1.2 Our strategy

1.2.1 A long-term, profitable and sustainable growth

Imerys profitably develops innovative and sustainable solutions for and with its customers while preserving the environment and fulfilling its responsibility towards all stakeholders. In the years 2022-2025, the Group repositioned its portfolio to take advantage of fast-growing markets and has gained strength, focus, and resilience to maximize its growth potential in the future.

Four key strategic objectives to unlock Better Futures

Imerys is committed to Unlocking Better Futures through sustainable solutions and making our planet a better place for future generations, while being a leader in the global specialty minerals industry. This translates into four key strategic objectives for Imerys:

01 **Delivering organic growth** with an increased focus on fast-growing markets aligned with sustainability-related market trends, customer-driven innovation and commercial excellence;

02 **Pursuing bolt-on acquisitions;**

03 **Leveraging our superior sustainability profile as a competitive advantage;**

04 **Generating profitability above the industry average.**

Entering the next phase of growth

Imerys is committed to improving its adjusted EBITDA margin, leveraging operational excellence and a culture of continuous improvement. Three key programmes are supporting Imerys' performance improvement goals: "I-Cube" for continuous improvement in our operations, "Inergize" to enhance energy efficiency at production sites, and "STEP" for optimized purchasing through transversal expertise. The combination of these programmes is supporting the Group's profitability, aiming at delivering savings above 3% of costs of goods sold per year.

With these fundamentals, Imerys has shown remarkable resilience during recent crises (Covid, energy, inflation or recent market downturns). This resilience derives from a few key factors such as integration into mining operations, exposure to diverses applications and regions, innovation and application expertise, leadership in the industry and steadfast commitment to sustainability.

In October 2025, the Group announced the launch of a cost and performance improvement program aimed at achieving targeted profitability. Project Horizon will consolidate the Group's competitive edge, drive efficiencies and facilitate the agility needed in the current ever-changing environment. It focuses on simplifying and streamlining the organization, structurally lowering the cost base, adjusting the industrial footprint, and rationalising production capacity worldwide. This program is subject to the completion of the required social and legal processes. At maturity, Project Horizon targets annual gross cost savings of at least €50–€60 million vs. the 2025 cost base, with more than 50% of the benefits expected in 2026 and full run-rate impact in 2027. Cash implementation costs are expected to represent approximately one year of savings.

Wuhu, China

Perfectly equipped to be the global leader in specialty minerals, with strong growth ambitions

Imerys is:

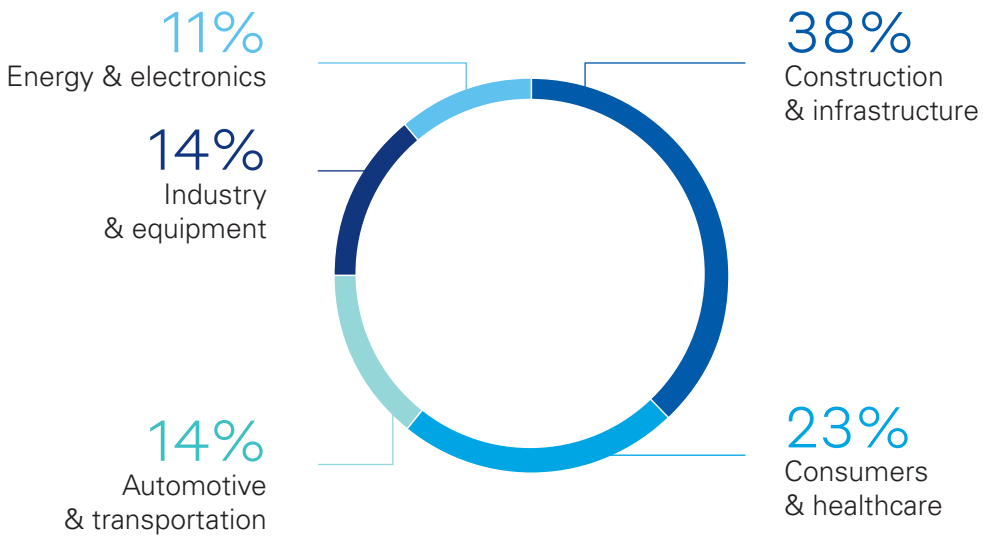

- A market leader, with strong track record of execution, favorable price/cost balance, diversified applications and geographies;
- Focused on long-term growth and well positioned on growing underlying markets;
- Generating solid cash from operating activities;
- A leader in sustainability, the reference in the specialty minerals industry;
- Offering attractive returns to shareholders;
- Creating future growth opportunities thanks to its lithium projects;
- Delivering on bolt-on acquisitions, as proven by the recent acquisition of the diatomite and perlite businesses of Chemviron in Europe.

Imerys is actively managing its business portfolio through a regular review of performance and strategic alignment. Next to few small disposals of non core assets, the divestitures of the High Temperature Solutions business and Imerys' assets serving the paper market have reinforced Imerys as a pure specialty minerals player, less cyclical and aligned with global megatrends.

These moves make the Group more resilient and faster-growing. Imerys is now simplified with most of the Group's end markets aligned with three megatrends which will drive future growth.

Benefiting from megatrends, Imerys is ready to deliver superior growth

REVENUE SUPPORTED BY 3 KEY MEGATRENDS

1.2.2 Investing in fast-growing markets with higher profitability, aligned with megatrends

With solutions used in a number of key industries, Imerys has a central role to play at the heart of the ongoing societal transformation.

Imerys is fully aligned with three megatrends which will drive future growth: green mobility and sustainable energy, sustainable construction and natural solutions for consumer goods.

Sustainable construction

High performance and durable building

Reduced CO_2 emission materials

- Aluminates for mineral foam **insulation**
- Metakaolin as green **supplementary cementitious material**
- Product for **waste water infrastructure**

Natural solutions for consumer goods

Feeding the world

Good health and well being

- Minerals **substituting microplastics & chemicals** in Agriculture, Animal Feed, etc.
- Capacity increase in **high purity filtration for pharmaceuticals**

Green mobility and sustainable energy

Mobile energy

Lightweighting

Green energy

- **Graphite & Carbon black** for energy transition & electric vehicles
- **High performance minerals** for plastic lightweighting in automotive
- **TQC (The Quartz Corporation)** for high purity quartz in semiconductor and photovoltaic markets
- Minerals-based filter aids for **biofuel** purification

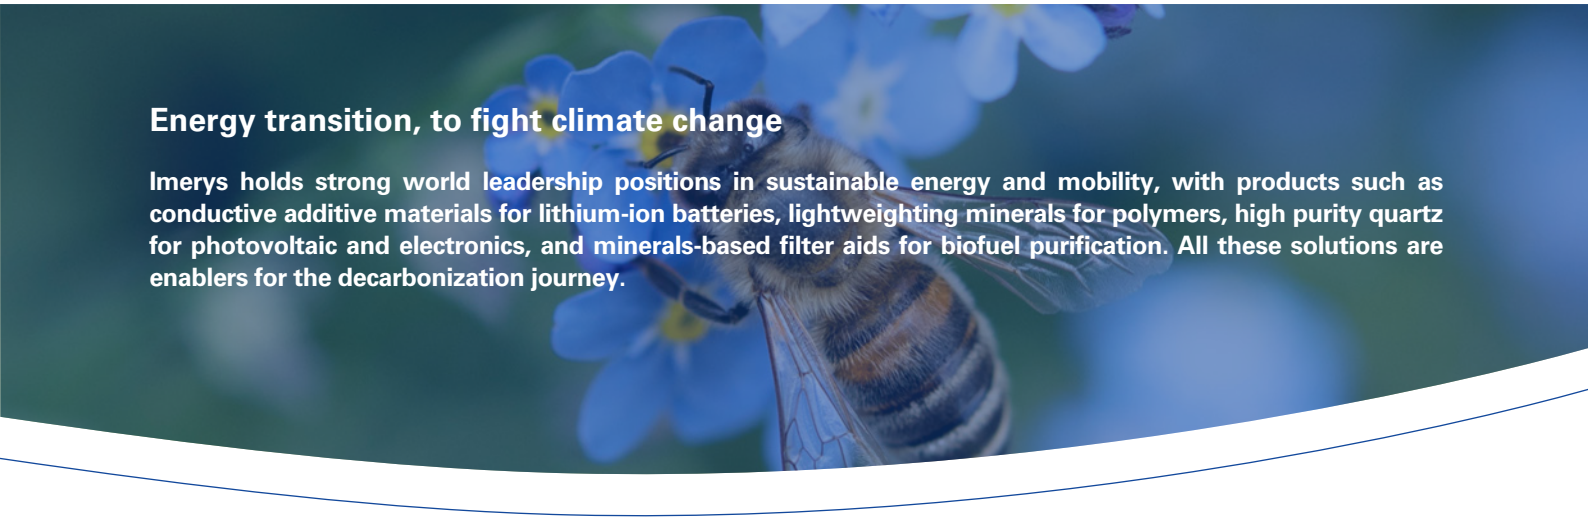

Energy Transition

Energy transition

Mobile energy

- **EMILI & British Lithium** projects
- Production of lithium for **Li-ion batteries for electric vehicles**

Energy transition, to fight climate change

Imerys holds strong world leadership positions in sustainable energy and mobility, with products such as conductive additive materials for lithium-ion batteries, lightweighting minerals for polymers, high purity quartz for photovoltaic and electronics, and minerals-based filter aids for biofuel purification. All these solutions are enablers for the decarbonization journey.

On this megatrend, Imerys benefits from:

- Technological leadership, fueled by a constant R&D effort and continuous industrial investments to support growth;
- Leading market position serving Tier-1 players;
- A promising market environment, as demand for electric vehicles (EV) is supported by stringent regulations and ambitious public decarbonation targets.

Mobile energy

Imerys invested

€170 million

Imerys Graphite & Carbon is a specialty business producing synthetic graphite, carbon black and other graphite-based products. Imerys solutions are used in the production of lithium-ion batteries, where they boost energy density and shorten charging times. Conductive additives are key for the performance of batteries, even though they account for only a small share of the end product cost. Imerys' graphite and carbon products are also essential for the growing fuel cells market which typically find application in heavy duty vehicles using hydrogen as a fuel. Graphites and carbons are also used in thermally conductive polymers for auto parts.

Imerys is strongly positioned to capture future market growth and has continuosly grown its revenues in these applications. Imerys has invested around €170 million for additional production lines for high purity carbon black at its plant in Willebroek, Belgium, as well as a new line for specialty synthetic graphite in Bodio, Switzerland. This ambitious capacity expansion program will allow Imerys Graphite & Carbon to double its revenue over time and support the world's energy transition.

Recently, Imerys announced partnerships with leading players in Mobile Energy. An agreement signed with Cnano would enable to develop synergies between Carbon Black and Carbon Nanotubes, while a partnership with Shanshan aims to address the European market for Graphite dedicated to anodes of Electric Vehicles batteries.

Sustainable energy

Imerys offers a variety of solutions for sustainable energy, such as high purity quartz for photovoltaic and electronics, and minerals-based filter aids for biofuel purification:

- Imerys holds a 50% share in The Quartz Corporation (TQC), a joint venture between Imerys and Norsk Mineral, a private family-owned Norwegian company founded in 1948. TQC provides extremely high purity quartz solutions for crucibles used in the manufacturing of solar panels, semiconductors and optical fibers;
- Imerys is also present in the biofuel purification market. Imerys' solution consists in removing unwanted contaminants from fats, oils and greases used in biodiesel and sustainable aviation fuel plants through filter aids.

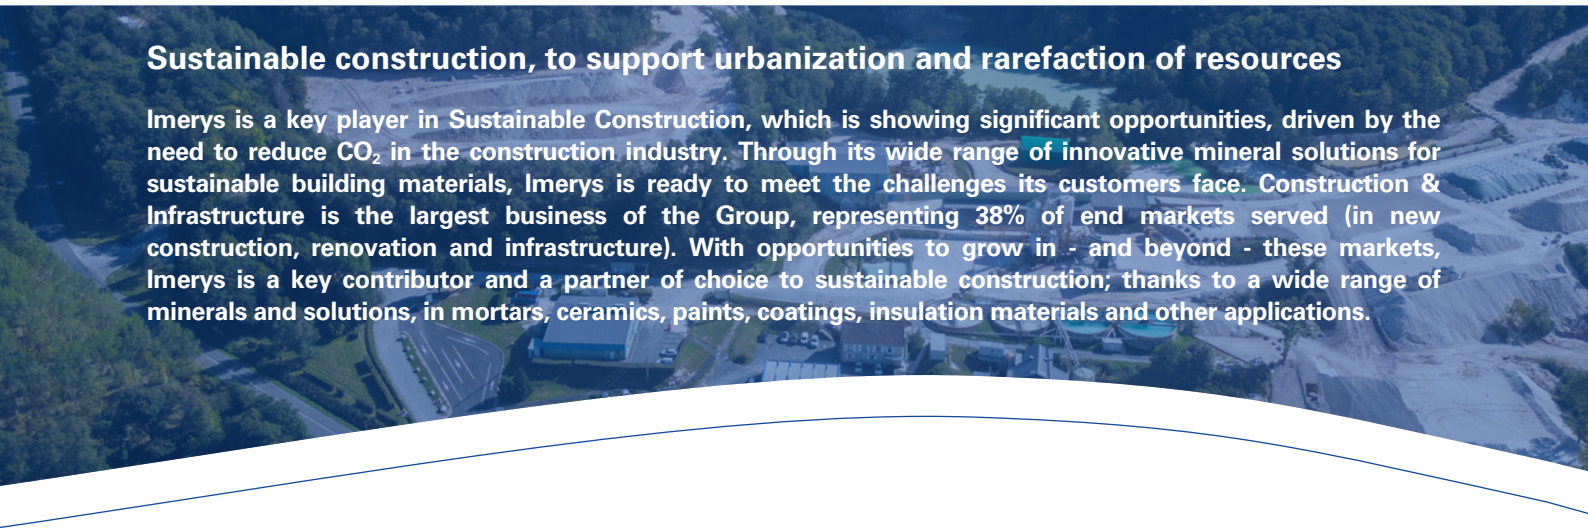

Lightweighting

Imerys invested

€43 million

Imerys serves the Automotive and Transportation end markets in many ways, such as talc in tires, abrasives in brake pads, and carbonates in automotive paints or adhesives. One of the key contributions to safe and sustainable cars comes from high performance lightweighting solutions for plastics. Plastics are essential for making vehicles lighter and for enhancing special functionalities such as electrical conductivity or sound damping. Imerys' minerals, combined with the specific High Aspect Ratio technology, bring solutions to the compounders and automotive OEMs by ensuring high mechanical performance plastics while maintaining safety and other properties.

Imerys is the undisputed leader in this market and has invested €43m to build a new manufacturing facility in China to produce specialty talc grades for polymer lightweighting in the automotive industry. With this investment, which complements the Group's large footprint for lightweighting mineral production in Europe, Imerys is poised to capture the significant growth opportunities offered by the EV industry in Asia. The greenfield plant was inaugurated on October 31 2023 and helps in expanding Imerys' presence in China, the largest car producing country in the world.

Sustainable construction, to support urbanization and rarefaction of resources

Imerys is a key player in Sustainable Construction, which is showing significant opportunities, driven by the need to reduce CO_2 in the construction industry. Through its wide range of innovative mineral solutions for sustainable building materials, Imerys is ready to meet the challenges its customers face. Construction & Infrastructure is the largest business of the Group, representing 38% of end markets served (in new construction, renovation and infrastructure). With opportunities to grow in - and beyond - these markets, Imerys is a key contributor and a partner of choice to sustainable construction; thanks to a wide range of minerals and solutions, in mortars, ceramics, paints, coatings, insulation materials and other applications.

Across the wide range of mineral solutions, Imerys effectively addresses various challenges, thanks to in-depth understanding of customers needs and end markets.

High performance and sustainable building

Imerys offers unique solutions serving various end markets and enabling significant reduction of environmental footprint. Some examples are the following:

- **Drymix mortar market** represents a primary business line for Imerys, a fast growing market driven by renovation demand and advancing flooring technology. This segment excel through safer working conditions, reduced consumption, superior quality, and waste reduction, powered by Imerys calcium aluminates technology; LEAP® (LEan calcium Aluminate binders for sustainable Performance) delivers specialty binders enabling enhanced performance with reduced environmental impact, embodying "more with less," while SEWPER® provides critical infrastructure protection, safeguarding wastewater network from biogenic sulfuric acid corrosion.
- **Insulation solutions**, such as mineral foam insulation for buildings (insulation properties while providing fire resistance and mechanical strength) and expanded minerals (contributing to high performance);
- **Renders for external thermal insulation systems** (bringing lightweight and fast drying properties). In these markets, Imerys is delivering rapid growth driven by capacity additions.

Decarbonization solutions

Imerys has a comprehensive offer to help customers in construction meet their CO_2 emissions reduction target, from concrete to flooring and plastics to paints. Some examples are the following:

- **Low CO_2 cement:** Imerys has a unique portfolio of minerals that contribute up to a 70% substitution of cement clinker, while speeding up hardening time of low carbon concrete. These include minerals such as kaolinite clay, metakaolin, fine grade perlite, and calcium aluminate mineral accelerator. A partnership was concluded with VINCI Construction to develop low-carbon concrete, based on the formulation of a binder composed of different minerals to replace Portland cement. Metakaolin, produced by Imerys in Clérac, has been used by VINCI Construction as part of the construction of the new Nantes University Hospital, France's first lowcarbon building at this scale;
- **Minerals in plastics for construction:** enabling replacement of petrochemical products, while exceeding product performances in pipe, siding and appliances. Calcium carbonates have a higher thermal conductivity than polymers, which leads to shorter cycle times, production efficiency and throughput.

Circularity

The increasing global demand for mineral resources intensifies the pressure on natural ecosystems. To participate in the reduction of this pressure, it is necessary to advocate for mineral resources efficiency but also to integrate circular economy concepts within the Group's business models. Imerys has accelerated in this direction and recent achievements include:

- **VALuMix**, an engineered solution that contains at least 50% reclaimed refractories. VALuMix is then blended with stone wool production waste to form briquettes used in the formulation of stone wool. This innovative solution enables our customer to increase their use of recycled material while integrating waste back into their production process. This comprehensive, closed-loop approach makes VaLuMix a powerful example of customer-centric industrial circularity;
- **ReMined™ products**, a portfolio of 100% LEED (US Certification for Green Building) certified pre-consumer recycled calcium carbonates from one of Imerys' US assets. By offering a product range to industries such as carpet, flooring, mortars and adhesive, Imerys enables its customers to meet reduce carbon footprint;
- **Seitim**, a joint venture between Imerys and Seitiss, which transforms industrial waste into valuable mineral resources. In 2025, more than 15,000 tons have been recycled and valorized in different sectors. Additionally, Imerys should start distributing Seitim's products in 2026, enabling a faster scale-up for the JV activity.

Natural solutions for consumer goods, to support demographics and healthier living

Natural solutions for consumer goods is the second largest end market for Imerys, serving packaging, food and beverage, healthcare, cosmetics, tableware, animal food and agriculture. It tends to be recession resilient and offers above-average growth rates. Imerys' minerals cover several applications and provide strong value while representing a small cost component for customers.

Feeding the world

Imerys provides sustainable solutions to improve food output by increasing crop yields with mineral-based solutions to improve productivity of arable land for organic or conventional farming:

- **Wollastonite and diatomite-based solutions:** biostimulant effects to increase plant' resistance to natural forces such as pests and diseases;
- **Expanded perlite:** exceptional water conservation thanks to its absorbing properties;
- **Perlite and diatomite minerals:** primary ingredients in Imerys' mechanical insecticide solutions, natural alternative to harmful chemical pesticides;
- **Mineral-based coatings:** safely applied directly to fruits and vegetables, preventing crop damage by reflecting UV radiation and infrared heat, which allows the crop to stay cooler and reduce spoilage.

Imerys mineral solutions are also used in diverse applications in animal feed, such as functional additives for adsorbing harmful toxins present in feed, or for replacing chemically produced nutrient carriers.

Good health and well being

Imerys offers various products to improve good health and well being, such as:

- **Celpure ultra-high purity filter aid:** for blood plasma fractionation with Imerys' proprietary technology for mineral purification and a state-of-the-art facility to meet strict pharmaceutical and regulatory requirements;
- **Natural solutions for cosmetics:** replacing microplastics and chemicals in cosmetic formulations, for instance with carbonates as soft-focus agent, kaolin as a mattifying agent or replacement of titanium oxide in bar soap and toothpastes, and perlite in body and face scrubs as microbeads plastic alternative;
- **Filmlink:** an engineered treated ground calcium carbonate that's been designed specifically to promote breathability in plastic film membranes used for roofing and sanitation products;

To complement its offer, Imerys acquired in January 2025 three high-quality mining and industrial assets in France and in Italy, extending and complementing its European diatomite and perlite footprint. This acquisition broadens its filtration and life sciences product portfolio to better serve customers in food, beverage, filtration and pharmaceutical markets.

In all these markets, Imerys is running ambitious development and innovative projects with profitability above the Group average.

Celpure: 2025 capital expenditure for additional capacity

Lithium projects: a strategic opportunity

Overview

Imerys announced two lithium projects, EMILI in France in October 2022, and Imerys British Lithium in the UK in June 2023, lithium being a key mineral for the energy transition

Imerys' projects are a response to the challenges introduced by the energy transition: they offer a long-term solution addressing European and UK decarbonation ambitions, while reducing the European dependency on imports. This is the reason why lithium, a key component of the lithium-ion batteries, was identified as a critical raw material by the European Commission in 2023.

The EMILI and British Lithium projects would represent together - at full production capacity - approximately 8% of the estimated European demand in 2035.

Both projects, based on existing Kaolin mines respectively in Allier (France) and Cornwall (UK), commit at respecting the best standard in terms of sustainability (strictly complying with the "Initiative for Responsible Mining Insurance", IRMA) and have a perfect strategic fit with Imerys' business model.

EMILI project

34,000 tons

of lithium hydroxide per year starting at the end of decade

EMILI project at Beauvoir (Allier, France)

The EMILI project aims to produce 34,000 tons of lithium hydroxide per year starting at the beginning of the next decade, enough to power circa 700,000 electric vehicles per year.

EMILI sits on one of the top lithium hard rock deposits in the world. EMILI is an integrated project; from the extraction in an underground mine and concentration located in an existing site of Imerys in Echassières, to the conversion of mica concentrate into lithium hydroxide in a plant located in the north of Montluçon. The project has committed to respond to the best social and environmental standards, notably in terms of water and waste management as well as carbon emission.

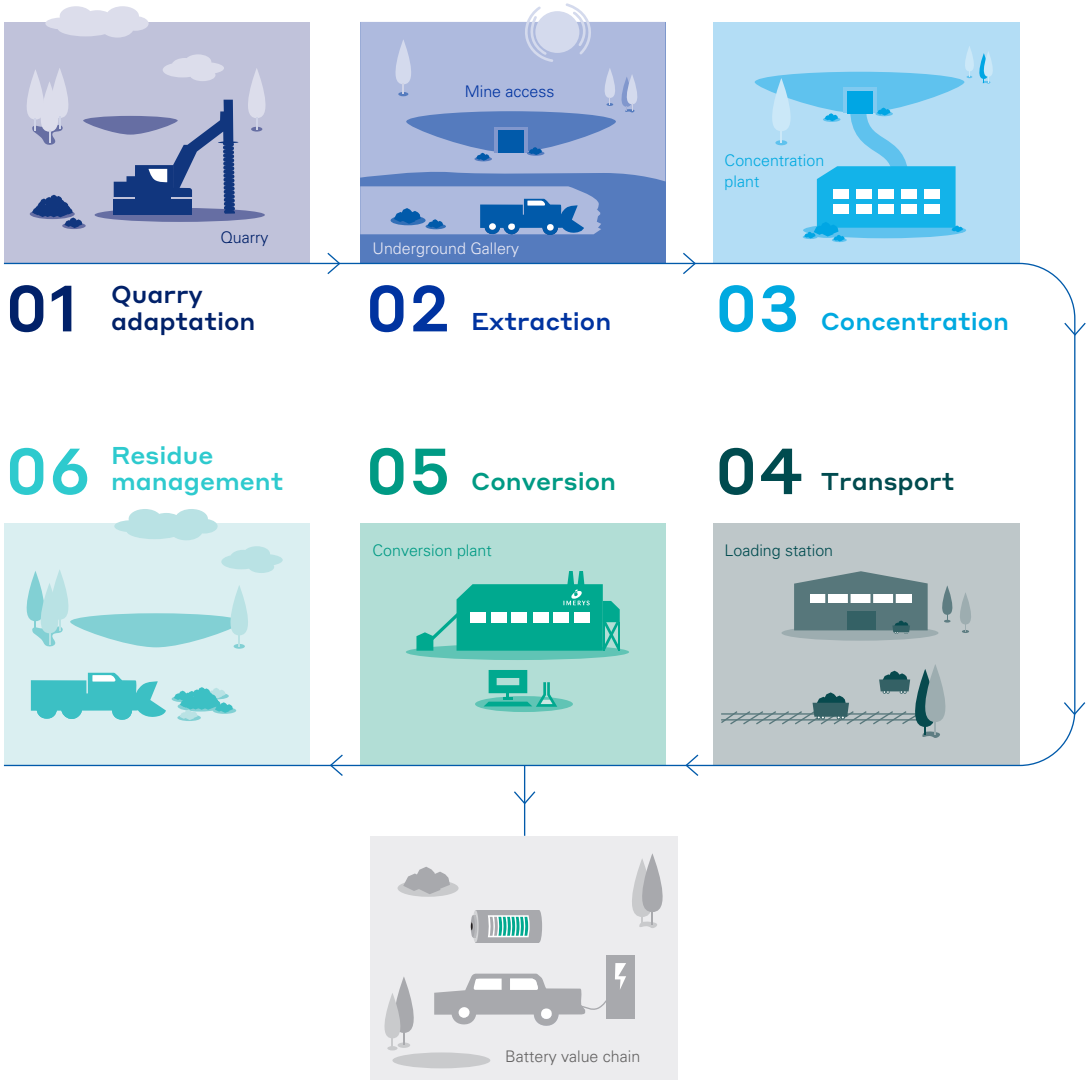

The Pre-Feasibility Study (PFS) was successfully completed in 2025. It confirms strong fundamentals: world-class deposit, for more than 50 years, production process firmed up, competitive operating cash costs and an attractive economic equation.

As announced on February 11, 2026 Banque des Territoires, acting on behalf of the French government, is investing in the EMILI project by acquiring a minority stake in the project. The transaction is expected to be finalised in the coming months[1]. Banque des Territoires is acting as the operator of the 'critical metals' component of France 2030. This investment marks a key milestone in the continued development of the EMILI project, a major project of national interest, recognized as strategic at the European level. The Government's €50 million investment is intended to support the EMILI project in finalizing the definitive feasibility study, a major milestone scheduled for early 2027. This level of study is required before any final investment decision can be made regarding the future lithium production site located in Allier.

1 The investment remains subject to obtaining the necessary regulatory approvals.

EMILI: KEY INDUSTRIAL STEPS OVERVIEW

Beauvoir, France

Imerys British Lithium project in Cornwall

This project is could produce 21,000 tons of lithium carbonate per year, enough to power circa 500,000 electric vehicles per year.

British Lithium was established in 2017 and, since then, have been researching and developing patented methods of extracting lithium and producing lithium carbonate in Cornwall.

The deposit is located within Imerys kaolin mines. The scoping study, completed in 2025, confirms strong fundamentals with 89 MT of inferred resources at 0.55% of lithium oxide, allowing for at least 30 years of life of mine.

As announced on February 19 2026, Imerys has decided to place its Imerys British Lithium (IBL) project on "care and maintenance". While all active development of the IBL project will be suspended, the Group confirms that it remains a strategically valuable project, as has been demonstrated through the recent scoping study finalized early 2026.

1.2.3 Sustainability is an integral part of our strategy

From firm commitment to tangible actions

Increasing urbanization, changing demographics, climate change and rising consumption around the world are resulting in growing demand for natural resources, which puts pressure on natural systems.

« Sustainability is not just our responsibility; it's our opportunity to lead. Through scientific rigor, transparency and collaboration, we transform challenges into innovations and resilience, shaping a future where our products contribute positively to build a better future »

Leah Wilson, Chief Sustainability Officer

As the world's leading supplier of mineral-based specialty solutions, Imerys' technical knowledge and expertise place the Group in the best position to extract and transform minerals responsibly over the long term. Imerys' ambition is simple: to unlock the sustainable potential of minerals to enable better futures for all stakeholders.

Imerys is committed to playing a role in society, beyond meeting its obligations to the countries and communities in which it does business. Imerys aims to foster positive changes and unlock better futures.

Imerys' growth strategy and approach to creating value take into account the challenges and expectations from a wide range of stakeholders from both within the Group and beyond, including panels of experts, professional bodies, local forums and customers.

SustainAgility: vision and ambition

Imerys' teams are engaged to drive sustainability performance, transforming the business and leading the industry responsibly. Imerys adheres to major international framework agreements such as the United Nations Guiding Principles on Business and Human Rights, the Organisation for Economic Co-operation and Development (OECD). Guidelines for Multinational Enterprises, and the International Labour Organization (ILO) Fundamental Conventions.

Launched in 2018, the SustainAgility program is articulated around 3 axes which are in line with, and contribute to, the United Nations Sustainable Development Goals (SDG):

Empowering our people

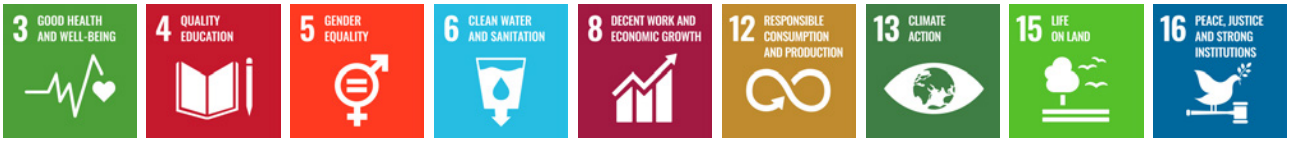

Making sure employees stay healthy and safe, safeguarding human rights and labor practices, nurturing talent, promoting diversity, equity and inclusion and engaging with local communities.

Growing with our customers

Behaving ethically, operating fairly, ensuring responsible purchasing, and advancing sustainable products and processes.

Caring for our planet

Protecting the environment, promoting natural resources efficiency, respecting biodiversity and acting on climate change.

Imerys' sustainability roadmap toward 2030

Imerys is at the forefront of driving transformative change in the industry, fostering strategic partnerships with customers, suppliers, and key stakeholders to pioneer a more sustainable future. This collaborative approach aims to create an innovative sector that not only meets growing global demand but also enhances the well-being of local communities and safeguards the natural environment.

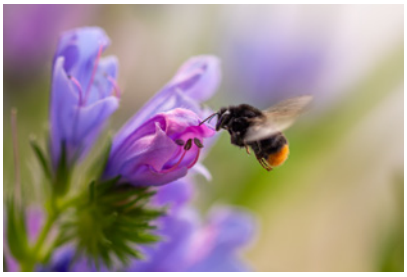

2026 marks a new step in Imerys sustainability journey with the launch of its third mid-term sustainability roadmap (2026-2030) since the launch of SustainAgility in 2018. This new roadmap builds on eight years of steady execution and robust progress. It comes as a continuum towards Imerys long-term ambition.

The Group has focused its new roadmap on ten mid-term objectives associated with clear and ambitious targets. It reflects the expectations shared by Imerys stakeholders during the double materiality assessment conducted in 2024-2025, and is aligned with the CSRD framework.

By 2030 targets

SAFETY

Total recordable Injury rate (TRIR)

-5% vs 2029 or **2.4** compared to 2.62 in 2025

LOCAL COMMUNITIES

100% of action plans related to grievances completed on time

DIVERSITY & INCLUSION (D&I)

Increase the D&I Index score to **100%**

Gender, pay equity, nationality and inclusion are monitored through Imerys D&I Index.

30% of women in senior manager and **30%** of women in manager positions

Increase pay equity percentage of M/E/P+[1] employees with similar level of responsibilities to **95%**[2]

PORTFOLIO SUSTAINABILITY

80% of Imerys' existing product portfolio assessed against the ISO Life Cycle Assessment standard

SUSTAINABLE INNOVATION

80% of new products deliver a sustainability improvement for downstream value chain

RESPONSIBLE PURCHASING

80% of core suppliers achieve at least a moderate sustainability score

WATER QUALITY

90% of priority discharge points monitor continuously water quality

BIODIVERSITY

Fullfill **90%** of the Group external commitments

Through Imerys act4nature commitments 100% of priority sites will have improved their rehabilitation plans

CLIMATE CHANGE

SBTI targets

-42% scope 1 & 2 GHG emissions reduction from 2021 base year

-25% scope 3 GHG emissions reduction from 2021 base year

1 M/E/P+ refers to Managers, Experts and Professionals, as well as Senior Managers.
2 Refers to non significant and explained pay gap.

For further details on Sustainability, see Chapter 3 of the Universal Registration Document.

The three pillars of our innovation strategy

Expanding our numerical simulation capabilities with digital twins

01

Fostering a culture of innovation through excellence in people and technologies including artificial intelligence

- Cultivating an international pool of talent with more than 80 PhDs and scientists from industry and academia
- Showcasing our innovation expertise through publications and presentations at international conferences on industrial minerals
- Implementing robust portfolio management governance with stage-gate processes, business leadership, analytics, and KPI reviews
- Balancing new product development and technical support in our labs with a mix of short-term and long-term projects
- Protecting our technical innovations through patents to ensure long-term profitability of new products
- Piloting thanks to artificial intelligence some applications developments and image analysis and access to R&D databases through generative AI
- Expanding our numerical simulation capabilities with digital twins.

02

Investing in sustainable innovation

- Capitalizing on opportunities to repurpose industrial by-products (e.g., Polwhite™ LOOP, the joint-venture agreement with Seitiss)
- Incorporating reclaimed materials in Imerys' solutions to address ore availability, recyclability, and sustainability challenges (e.g., VALuMix)
- Utilizing our "SustainAgility" product sustainability assessment for each innovation project gate analysis, 94% of market-launched products were rated SustainAgility Solutions, exceeding the 2025 target
- Ensuring product stewardship and REACH compliance (Registration, Evaluation, Authorisation and Restriction of Chemicals) as a license to operate in all markets
- Leveraging process innovation to optimize and develop new processes to reduce the carbon footprint of our products.

03

Embracing a customer-centric approach

- Establishing ourselves as a Partner of Choice by delivering timely differentiated new products to our customers
- Developing synthetic or geomimetic minerals to create tailored solutions for customers, particularly for high-value niche applications
- Organizing Science & Technology teams by markets and applications to develop solutions based on market trends and customer needs
- Fostering development partnerships with customers and startups through innovation challenges
- Adopting an open innovation approach through collaboration with leading experts, research institutes, startups, and universities to drive industry advancements
- Recognizing our customers as key innovation and sustainability partners through frequent collaborative workshops to identify innovative solutions.

Key innovative solutions around the three megatrends and circular economy

We leverage our expertise in natural minerals to assist our customers in transitioning away from oil-based materials. This strategy aligns with identified global megatrends, positioning us at the forefront of sustainable industrial solutions.

Focus on Green Mobility and Sustainable Energy

- Developing improved conductive additives for anodes and cathodes in Lithium-ion batteries and fuel cells for electric vehicles
- Creating new mineral absorbents (Cynersorb®) to purify waste feedstocks for conversion into renewable diesel (biofuels)
- Utilizing High Aspect Ratio minerals (HAR® talc or mica) for lightweighting polymer in automotive electric vehicles, with a new production plant established in Asia in 2023, now starting to deliver high volume to local compounders
- Delivering diatomite and perlite filter aids for biofuel waste feedstock purification used to decarbonize the transportation sector and cynersorb for improved filtration throughput
- Strategic partnership with Shanghai-based company Shanshan to produce high-performance synthetic graphite anode materials in Europe, a critical component for the continent's growing EV and energy storage sectors.

Focus on Sustainable Construction: decarbonization and waste management

- Developing facade ceramics with lightweighting properties and silicates for glass and ceramic industry decarbonization
- Producing aluminates specialty binders ("LEAP products") to enable cement and concrete decarbonization and act as strength boosters
- Developing specific pozzolans (Perlite or Metakaolin) as a low CO_2 component in hydraulic binders for construction hydraulic binders (Argical 1000C)
- Developing mineral foams based on geopolymer and aluminates technology for fire resistant insulation applications
- Advancing mineral diversification for larger and lighter tiles
- Developing innovative processes to reduce the environmental footprint of both our products and those of our customers.

Focus on Natural Solutions for Consumer Goods: sustainability enablers for consumer goods and life science

- Manufacturing clumping and non-clumping cat litters derived from Bentonite, Zeolite, and Moler, leveraging their naturally highly absorbing, safe, and odor-reducing properties
- Developing mineral-based solutions for micropollutant removal in water treatment (Imerpure™ Z)
- Creating natural solutions as biocontrol agents against pesticides in agriculture and as biostimulants as alternative to toxic chemicals
- Launching new Micasilk product for makeup application in cosmetics
- Launching Imercrop as a rheology modifier for liquid ag formulations and Imercare Suntouch for sunscreen formulations.

Focus on circular economy: making the most of minerals

- Implementing reprocessing practices, with a key example in North America at the carbonate Sylacauga operation (ReMined™)
- Providing the first kaolin certified as circular material by ISCC PLUS to the tire industry (Polwhite™ LOOP)
- Incorporating reclaimed refractories materials into stone wool formulation to tackle stone wool waste production (VALuMix)
- Enhancing durability and providing long-lasting corrosion protection for concrete with calcium aluminate solutions (Sewper® Liner and SewperCoat®)
- Exploring other circular opportunities to use less primary materials, in particular through partnerships like the one with Seitiss.

1.3 Our organization

Main activities

The market-focused organization of Imerys is built around three main activities:

01 **Performance Minerals, split in two reporting segments,**
- EMEA & APAC (Europe, Middle East, Africa and Asia Pacific),
- and Americas

serving the plastics, rubber, paints & coatings, board & packaging, adhesives, filtration, life sciences, ceramics, and building products markets.

02 **Solutions for Refractory, Abrasives and Construction**, serving the refractory, abrasives and building & infrastructure markets globally.

03 **Solutions for Energy Transition which include:**
- Graphite & Carbon, serving mainly the mobile energy market;
- Imerys' share in The Quartz Corporation, a joint venture owned 50% by Imerys, serving the solar and electronic industries with high purity quartz solutions.

Other activities such as the lithium projects (EMILI and British Lithium), other joint-ventures than TQC and the holdings are reported under "Others".

This simplified organization with a limited number of management layers brings Imerys closer to its customers and allows it to meet their needs in a more efficient way. The Senior Vice Presidents of the business areas report directly to the Chief Executive Officer.

Support functions (Finance, IT, Human Resources, Sustainability, Legal, Strategy and M&A, etc.) are centralized at Group level and operate as business partners to the different business areas, while Innovation and Operations report directly into the segments.

Imerys' organization will enable it to achieve its full organic-growth potential, further improve its competitive position and create value over the long term.

Packaging

Plastics & rubber

Imerys' wide portfolio of minerals enables to offer a comprehensive range of solutions to make plastics and rubber more resistant, lighter and less expensive. The shape, color, particle size and purity of Imerys' plastics and rubber mineral solutions make them effective additives to bolster the production of lightweight components for vehicles, household appliances, electronics, PVC tubes and cables. They also work effectively in material applications for hygiene, such as medical devices and food packaging. Some minerals are also used for plastic film breathability in the hygiene and medical fields.

The mineral solutions also help to minimize the weight of vehicle plastic parts and therefore reduce fuel consumption and CO_2 emissions.

Minerals

Carbonate / Diatomite / Kaolin / Mica / Talc / Wollastonite

Market positions

World #1

- in minerals for breathable polymer films
- in talc for plastics
- in wollastonite for plastics

Paints & coatings

Paints and coatings meet rigorous standards and growing performance expectations in terms of durability (e.g. weather and corrosion resistance), lightweight renders, facade coatings, aesthetics and a healthy environment. Drawing on the strength of its unique portfolio of minerals and its excellent command of optical, mechanical and rheological properties, Imerys provides manufacturers of architectural paints and industrial coatings with the fillers and functional additives that best suit the various types of paints and coatings (water and solvent-based, powder, etc.).

Minerals

Carbonate / Diatomite / Kaolin / Mica / Perlite / Talc / Wollastonite

Market positions

World #1

- in mica for high-performance coatings
- in perlite for paints & coatings
- in talc for paints
- in wollastonite for paints & coatings

European #1

in kaolin for paints & coatings

Adhesives, caulks & sealants

Imerys offers tailor-made solutions developed by drawing on its profound understanding of manufacturing processes and industrial implementation constraints of adhesives, caulks and sealants. Precipitated calcium carbonates and other minerals are used by the major sealant manufacturers to improve rheological properties, reduce costs, enhance mechanical resistance and hardness, and increase the opacity and whiteness of their end product.

Minerals

Carbonate / Kaolin

Market positions

World #1

in kaolin

World #2

in natural calcium carbonate

Pulp & packaging

The pulp and packaging sectors benefit greatly from Imerys' customized solutions, focusing on improving productivity, as well as the surface durability and suitability for packaging solutions. Imerys offers a unique range of mineral-based solutions to deliver competitive advantages such as cost reduction, enhanced quality, lowered energy and raw material usage, and increased production yield.

Minerals

Bentonite / Carbonate / Talc

Market positions

World #1

- in talc

World #2

- in natural calcium carbonate

Ceramics & building products

From fine dinner plates to stylish kitchen countertops, the design and quality of ceramics influence many parts of everyone's daily life. This is why tableware, sanitaryware, tile and large surfaces manufacturers demand the highest standards for functionalities such as whiteness, mechanical strength and dimensional stability. Imerys is the world leader in mineral solutions for ceramics. The engineered mineral blends are also a key asset for unrivaled quality and high-performance solutions.

Imerys' minerals (such as quartz sand, and gravel, perlite, talc, mica and carbonates) are also highly valued by the building sector for a large range of applications including acoustical ceiling tiles, insulation solutions (thermal, acoustic), roof tiles as well as decorative materials.

Minerals

Ball clay / Bentonite / Ceramic bodies and glazes / Chamotte / Engobes / Feldspar / Halloysite / Kaolin / Kiln furniture / Mica / Molochite™ / Pegmatite / Perlite / Quartz / Talc / Wollastonite

Market positions

World #1

- in raw materials for sanitaryware

World #2

- in kiln furniture for tableware

European #1

- in raw materials and ceramic bodies for tableware
- in kiln furniture for roof tiles

Filtration & life sciences

High quality functional additives are essential for many consumer goods and life science industries, including personal care, pharmaceuticals, food, animal feed, pet litter, crop protection, and for the filtration of beer, wine, sweeteners, edible oils and blood plasma. Imerys' solutions are formed using naturally occurring minerals with exceptional properties such as adsorption capacity, barrier effect, gentle abrasiveness, texturing enhancement, and high level porosity. Innovation capabilities allow fulfilling the latest market trends linked to consumer demands on naturality and eco-responsibility in full compliance with market specifications and regulations.

Minerals

Diatomite / Perlite / Talc / Kaolin / Bentonite / Moler / Mica / Calcium carbonate / Wollastonite

Market positions

World #1

- in diatomite- and perlite-based products for filtration

European #1

- in talc

European #2

- in bentonite

Refractory

Imerys provides the largest product portfolio dedicated to the refractory industry which is essential for all high temperature processes. Each refractory application is unique to withstand high temperatures as well as extreme physical and chemical conditions. Imerys develops minerals, binders and additives that enable continuous improvement in the steelmaking, power plant, incinerator, biomass boiler, glass, as well as the cement and petrochemical industries. Imerys' unique mineral portfolio, treatment processes and technical expertise have enabled it to develop a number of superior and sustainable solutions to answer these industries' needs and future challenges.

Minerals

Andalusite / Ball clay / Bentonite / Calcium aluminate-based binders / Additives / Chamotte / Cordierite / Fused aluminas / Fused silica / Fused zirconia / Graphite / Kaolin / Molochite / Mullite / Silicon carbide / Thermocarbon / Wollastonite

Market positions

World #1

- in alumino-silicate minerals for refractories (i.e. Andalusite, Mullite, Chamotte,etc.)
- in fused zirconia
- in high-performance calcium aluminate-based binders for refractories

Abrasives

Imerys is the world's largest producer of fused aluminum oxide products, known under our trusted brand ALODUR®. Imerys provides high-performance solutions for vitrified, resin-bonded, and coated abrasives across all grinding and cutting applications. Thanks to superior hardness and thermal properties, these abrasive grains serve the automotive, electronics, and construction industries. Imerys materials also cover friction applications, from wet friction paper to brake pads for different vehicles.

Imerys provides materials with outstanding properties for the unique needs of Advanced Ceramics customers. These products play a crucial role in high-performance applications such as electronics and energy generation. Imerys is one of the leading material providers to the Investment Casting industry. These products are used to make ceramic molds designed to manufacture high-precision metal components in industries such as aerospace and automotive.

Minerals

Fused aluminum oxide / Sol-Gel / Silicon carbide / Fused zirconia / Graphite / Wollastonite / Calcined Alumina / Kaolin / Calcium Carbonate / Coke / Mullite / Mica

Market positions

World #1

- in fused minerals for abrasives

Building & infrastructure

Imerys develops cutting-edge solutions that have a wide range of applications, as well as essential properties ranging from rapid setting and drying to aesthetics for the construction and civil engineering industries. Specialty calcium aluminate binders, metakaolin, smart fillers and functional additives like bentonite, perlite and ball clays offer high performance in products to meet our customers' expectations. These highly technical products can be used in a number of applications, such as flooring, tile adhesives and grouts, technical mortars, waterproofing membranes, renders, external insulation as well as mortar and concrete for industrial flooring, wastewater sewage, tunnel boring and mining.

Mobile energy

With a unique portfolio of high purity graphite powders, conductive carbon blacks and tailor-made dispersions, Imerys is the leading provider of highly conductive carbon-based solutions for mobile energy. Imerys carbon black and graphite solutions are valuable for the production of lithium-ion batteries, used to power electric vehicles, energy storage systems (which can store electricity for home, business or power grids) and new-generation consumer electronics, where they boost energy density and shorten charging times. Besides lithium-ion batteries, graphite and carbon black represent the most effective conductive additives for alkaline batteries, advanced and standard lead-acid batteries, zinc carbon batteries, fuel cells and conductive battery case coatings.

Imerys' conductive carbon blacks and high purity graphite are the solution of choice for high-performance conductive polymer compounds and engineering materials. At the core of high-voltage power cable and semiconductor industries, they support meeting the rising demands of modernizing power grids, the transition to renewable energy, and digitalization efforts. Their excellent thermal and electrical conductivity also makes them essential additives for metallurgy, and automotive applications.

Backed by a multi-year investment program in research and development, as well as increased production capacity, Imerys is well-positioned to meet the technological needs of the rapid-growing battery and conductive polymer market for many years to come.

Materials

Carbon black / Synthetic graphite

Market positions

World #1

- in conductive additives for lithium-ion batteries
- in graphite for alkaline batteries

Sustainable energy

Imerys holds a 50% share in The Quartz Corporation (TQC), a joint venture founded in 2011 by Imerys and Norsk Mineral. Norsk Mineral is a private family-owned Norwegian company. TQC extracts and processes high purity quartz into solutions for technical glassware: serving the solar, semiconductor and fiber optic industries.

Only the highest quality quartz can be processed to become the preferred raw material for high-end manufacturing and avoid contamination to the silicon products.

Quartz glassware are a key component in the manufacturing of photovoltaic cells and semiconductor chips.

TQC mines a unique rock deposit in the USA and further beneficiates high purity quartz using a proprietary, cutting edge production process at its manufacturing facility in Norway.

Feldspar and mica are separated in the process and valorized commercially.

Duties of the Board of Directors

It determines Imerys' strategic guidelines, including with regard to ESG matters, and oversees their implementation

In 2025, five meetings were held (plus, one written consultation), with a 96,62% attendance rate.

Directors' skills matrix

Members of the Board are selected on the strength of expertise and experience, among other criteria. The members of the Audit Committee are chosen in particular for their financial expertise. The Appointments Committee and the Board of Directors closely focus on assessing these criteria. For more details concerning ESG / Sustainability skills and experience, **please refer to Section 1.1.2 in Chapter 3**.

1.5 Risk management

An effective risk management

To best manage the risks it faces, Imersys relies on the following key tools:

- a rigorous and effective approach to risk management, which is regularly reviewed by senior management;
- a detailed map setting out the main risks Imerys might be exposed to, identifying in particular any evolution or change of key elements and ensuring the suitability and implementation of actions to mitigate them.

These tools allow Imerys to identify and assess the key risks, as set out in the following pages.

These risks are addressed with mitigating plans, which are detailed in chapter 2 of the Universal Registration Document.

Overview of risk management governance at Imerys

Board of Directors

- Ensures risks are managed effectively.

Audit Committee and Strategy and Sustainability Committee

- Review the assessment and management of risks, including those of a social and environmental nature, in their respective areas and ensure actions are effective;
- Report on their work to the Board of Directors.

Chief Executive Officer and the Executive Committee

- Identify and assess the main risks that could hinder Imerys in implementing its strategy;
- Build on the work of the core committees and report on their work annually to the Audit Committee and the Strategy and Sustainability Committee.

Risk Committee

- Coordinates risk assessment, management and controls within Imerys;
- Monitors the effective implementation of actions to manage risks;
- Makes suggestions to improve risk management.

Foreign Exchange, Interest Rate and Energy Committee
Investment Committee
Cybersecurity Committee
Ethics Committee
Sustainability Committee
Pensions Committee
Safety Committee

- Take decisions regarding the risks they monitor and ensure they are properly implemented;
- Quantify these risks and ensure mitigating measures are effective.

The risk mapping process

The risk mapping process is carried out in accordance with the following principles:

- It is conducted once every three years and includes a detailed review of Imerys' main risks and the mitigation actions put in place to manage them. The assessment of the impact and level of control of the risks is reviewed yearly.
- It involves all internal stakeholders, i.e. the people responsible for Imerys' main risks and the committees tasked with reviewing and validating their work.
- The risk management action plans drawn up are updated and reviewed each year.

The main risks identified by Imerys

The following table sets out the main risks Imerys faces by type and degree:

- Risks are categorized as either strategic (that could impact the structure of Imerys over the medium to long term), operational (that could affect Imerys' ordinary course of business) or legal (that may result in Imerys' liability).
- Amongst the 22 risks identified by Imerys as part of the risk mapping process, eight are deemed priorities.
- These risks are presented taking into account the estimated impact of their occurrence and the effectiveness of their associated mitigation measures.

	Degree		
Type	**Moderate**	**Significant**	**High**
Strategic[1]		Climate change Digital transformation	
Operational[1]	Mineral Reserves and Resources Product stewardship	Human capital Environment	Cybersecurity
Legal[1]		Compliance	

1 The description of the strategic, operational and legal risks can be found in chapter 2, section 2.1 of the Universal Registration Document.

Ipoh, Malaysia

02

RISK FACTORS AND INTERNAL CONTROL

2.1 Risk factors 48

2.1.1 Strategic risks 48
2.1.2 Operational risks 49
2.1.3 Legal risks 52
2.1.4 Insurance – risk coverage 52

2.2 Risk management and internal control 54

2.2.1 Introduction 54
2.2.2 A structure fit for purpose 54
2.2.3 Periodic analysis of the main risks facing the Group 57
2.2.4 Appropriate control activities 58

2.1 Risk factors

The Group operates throughout the world in a constantly changing economic and political climate that is by nature unpredictable. Such uncertainty may lead to major changes that could have a material negative impact on the Group's operations or financial structure, as well as on external stakeholders.

The risks facing the Group that are material and specific are identified by the risk mapping process (described in Chapter 1, paragraph 1.5). The main risks and the methods applied to manage them are summarized in the following table and detailed below:

		Risk category		
Type		Moderate	Significant	High
	Strategic		Climate change[1] Digital transformation	
	Operational	Mineral reserves and mineral resources[1] Product stewardship[1]	Human capital[1] Environment[1]	Cybersecurity
	Legal		Compliance[1]	

1 Risks incorporating non-financial topics (described in Chapter 3, "Sustainability").

These risks are split into broad categories. Within each category, risk factors are ranked in order of importance, based on their probable impact, the frequency with which they are likely to occur and the related risk management actions. Risks are presented in detail below in descending order of importance within each risk category. Each risk is presented along with the key risk control measures. The key risk control measures already applied at the date of the risk mapping have been taken into account to assess the importance of the risk in question.

Other risks which the Group has not yet identified or which are considered to be immaterial could nevertheless exist and, if they were to arise, could potentially have a material negative impact. Additional information on the environmental, social and governance risks for the Group's external stakeholders, as well as the measures taken to mitigate such risks, are presented in Chapter 3 of the Universal Registration Document. Additional information on financial risks is presented in the Group's financial statements in Chapter 6 of the Universal Registration Document.

2.1.1 Strategic risks

Climate change

Description of the risk

Group operations generate greenhouse gas emissions directly through the consumption of energy generated from fossil fuels or through emissions linked to industrial processes. Indirect emissions are generated through purchased energy as well as various other activities within the value chain, in particular by transporting and procuring raw materials. The absence of a commitment to reduce its carbon footprint could reduce the appeal of the Group's products and lead to a loss of trust among some of its stakeholders, in particular investors and customers.

Climate change may also have operational and financial consequences caused by damage to industrial facilities or injury to employees.

Key risk control measures taken

- Measures taken to manage this risk are governed by the Sustainable Development Department, of which the Chief Sustainability Officer is a member of the Group's Executive Committee, and also monitored by the Strategy and Sustainability Committee. Governance focused on climate change has been put in place around decarbonization and adaptation levers.
- The Group has performed scenario analysis of its climate-related risks and opportunities. This scenario analysis was incorporated into the Group's risk mapping process.
- Since 2019, the Group has set targets to reduce its direct and indirect greenhouse gas emissions, which have been approved by the Science Based Target initiative (SBTi); they were updated at the end of 2022 and validated by the SBTi in 2023 to be aligned with a global warming trajectory of 1.5°C. Imerys has thus pledged to reduce its scope 1 and 2 greenhouse gas emissions by 42% in absolute terms and its scope 3 emissions by 25% between the base year 2021 and 2030.
- The Group has rolled out a method to measure the environmental and social impact of its products, including their carbon footprint. Furthermore, Imerys factors an internal carbon price into its decision-making process regarding investment (including decisions about acquiring new entities) and new product development.

For further details about the Group's objectives, targets and programs for climate risk management, see Chapter 3, section 1.2.2 of the Universal Registration Document.

Digital transformation

Description of the risk

Imerys is advancing and successfully executing a multi-year digital transformation program with a view to upgrading its IT and data management systems, tools and, more generally, its operational processes. In particular, the Group has taken a decisive step in its deployment of a single shared ERP (Enterprise Resource Planning) system, by adding all of its most important sites to it. This will enable the rollout of new digital transformation projects, including in relation to artificial intelligence. The Group is therefore exposed to the risk that such projects may be poorly prepared and/or executed. This situation could potentially cause completion to be delayed, certain projects to run over budget, and may even affect operations if the tools stop working.

Key risk control measures taken

- Imerys has put in place a coherent governance structure and a robust management procedure with support from leading specialized consulting firms. A steering committee dedicated to artificial intelligence projects has been formed, and best practices for using artificial intelligence have been communicated to all employees. Regular progress meetings are also held among project steering committees and the Group Executive Committee.
- In addition to the considerable financial resources invested over a period of many years, key people from within the Group (business areas and IT) have been working full time on these projects.
- The shared ERP is being rolled out successfully and on schedule thanks to experienced technical and operational teams. The Group entities use the shared ERP, demonstrating its efficiency.
- Internal audit assignments are performed regularly to ensure that projects are deployed in line with best practice, in terms of both applications and infrastructure.

2.1.2 Operational risks

Cybersecurity

Description of the risk

The day-to-day management of the Group's operations requires reliable technical IT infrastructures, management, and data processing systems, as well as industrial control systems. Cyberattacks are more frequent, sometimes with extremely damaging consequences, with a major risk of core infrastructure or systems malfunctioning or shutting down and affecting Group operational oversight, the protection of its data and the production of its financial and non-financial reporting. Furthermore, the cyberthreat level faced by manufacturing systems is also high and could have a material impact on the Group facilities' production capacity or cause damage to equipment, potentially leading to consequences for the environment, health and safety. The cyberthreat is being exacerbated by the growing use of artificial intelligence by cybercriminals, as well as by new vulnerabilities – such as data breaches or risks relating to the security of software developments – brought about by its integration into business activities. Finally, assessing the level of maturity of third parties in terms of cybersecurity is a significant topic for Imerys, with a view to making its supply chain more reliable but also to providing the necessary visibility for its customers and partners, particularly in the context of implementing the European NIS2 (Network and Information Systems) Directive.

Key risk control measures taken

- Many improvements have been made since a cybersecurity team was put together in 2018, including the deployment of new IT security tools able to withstand the threat of ransomware, as well as improvements to protect the network, various IT equipment and assets, the email system, collaboration tools and security clearance. Programs have been implemented to secure manufacturing systems and cloud environments. Furthermore, a continuous improvement process has been put in place with respect to surveillance capabilities and the response to security incidents.
- The Group's IT Systems Security Policy, which is updated regularly, describes the entire set of measures designed to ensure Imerys' cybersecurity. It includes employee responsibilities, security requirements for third parties, and processes relating to business continuity, vulnerability analysis and incident management.
- Vigilance by employees is enhanced through specific training on cybersecurity issues and attack simulation campaigns.
- The Cybersecurity Committee, chaired by the Group's Chief Financial Officer, monitors the cyber program and reviews its priorities on a quarterly basis in order to factor in emerging threats and supplement the system where necessary. An independent firm conducted a comprehensive assessment of IT security in 2025 and found the Group's level of maturity had improved. Imerys is continuing to roll out the program as per its roadmap.
- These plans are presented to both the Group's Executive Committee and Audit Committee.

Human capital

Description of the risk

In an environment where skills evolve rapidly and employees' expectations change significantly, and against a backdrop of technological and generational transformation, the ability to attract, develop and retain talent is a key concern in the proper conduct of the Group's operations and the achievement of its objectives.

Key risk control measures taken

- The Group is strongly committed to sustainable development and is deploying its strategy accordingly.
- The Group has formalized its vision and values, and promoted them widely throughout the Group to boost cohesion between teams.
- The Group has adopted policies promoting Diversity, Equity and Inclusion.
- The Group has established a process to identify key talents and has deployed retention actions geared toward these employees.
- Formal career paths are established as a means of promoting internal career development. These plans are monitored periodically to ensure their effectiveness.
- Training and leadership programs are in place that foster internal mobility and underpin the managerial culture.
- Feedback and analysis mechanisms are implemented when employees leave the Group in order to identify and adjust remedial measures where applicable.

For further details, see paragraph 2.2.4 of this chapter and Chapter 3, section 1.3.1 of the Universal Registration Document.

Environment

Description of the risk

Mineral mining operations have a direct impact on soil and biodiversity. The Group takes action to avoid, reduce and offset this impact and restore natural environments (over time or at the end of the mining cycle). Although industrial mineral processing techniques are mainly physical (crushing, grinding and sorting) and generally require very few chemicals, industrial mining and mineral processing activities also involve water withdrawal and thermal processes such as calcination and fusion, which may impact the environment (for example, by affecting the water resource or producing atmospheric emissions).

As a result, the Group may incur additional expenses to cover industrial equipment adaptation or upgrades, industrial site rehabilitation or environmental depollution. In addition, failure to comply with environmental regulations applicable to the Group's industrial and mining operations may lead to potential civil or administrative sanctions or even criminal prosecution.

Key risk control measures taken

- An Environmental Management System (EMS) is used to identify, prioritize and roll out checks to manage all potentially material environmental impacts resulting from the Group's industrial operations. It is supplemented by environmental protocols that set out the minimum requirements with which all sites must comply and a maturity matrix to facilitate continuous improvement at every site. It also includes compliance audits (see Chapter 3, paragraph 1.2.3 of the Universal Registration Document).
- A dedicated team has been formed, overseen by the Group Chief Environmental Officer, with representatives in each business area and Environment correspondents at each Imerys site.
- The key potential risks inherent to each site operated by the Group were studied and analyzed and, since 2023, Imerys has had defined priority sites for environmental issues related to biodiversity, water and air. It has also introduced action plans to mitigate risks at said sites.
- A regulatory watch system is deployed at industrial sites in the Group's main operating countries.
- The Group has also made pledges in the area of biodiversity with *Act4nature* and as part of a scientific partnership with the French Natural History Museum. PatriNat, the French center of expertise and data on natural heritage, is supporting the Group in this strategy under an agreement renewed in 2024.

For further details about the Group's objectives, targets and programs for environmental risk management, see Chapter 3, section 1.2 of the Universal Registration Document.

Mineral reserves and Mineral resources

Description of the risk

As the main source of mineral raw materials for the Group's industrial sites, Mineral Reserves and Mineral Resources are among the Group's most important assets. The integrity of Mineral Reserves and Mineral Resources assessments and the proper administration of operating permits are critical to the management and development of Imerys' operations and therefore its profitability. Any unexpected changes in ore quality or depletion of its Mineral Reserves could impact the continuity of some of its activities. As a result, processes and resources are required to ensure the reliability of the assessments of these Mineral Reserves and Mineral Resources that may be impacted by unforeseeable changes in technical, regulatory or economic parameters.

Key risk control measures taken

- The estimates of the Group's Mineral Reserves and Mineral Resources are aligned with the international PERC Reporting Standard (Pan-European Reserves & Resources Reporting Committee).
- The Group has acquired detailed knowledge of its Mineral Reserves and Mineral Resources through its network of experts operating under the supervision of the Mining & Resource Planning Vice-President. These experts compile the annual consolidated review of the Mineral Reserves and Mineral Resources for each site.
- The Mineral Reserves and Mineral Resources estimates carried out at each site are audited over a three-to-six-year cycle by in-house experts. The assessment system also undergoes a third-party audit every five years.
- Regular reviews are conducted to anticipate the drilling investments required to both increase mineral resources inventory and ensure the optimal conversion of Mineral Resources into Mineral Reserves.
- A specific program has been put in place to anticipate and supply the necessary resources to maintain and increase the Mineral Reserves base. Furthermore, the Group adapts its internal procedures to obtain, maintain and renew mining licenses to accommodate the greater technical focus of impact studies and potentially longer application processes.

The processes and resources devoted to improving the reliability of and supplementing the Group's Mineral Reserves and Mineral Resources are reviewed each year by the Executive Committee, followed by the Audit Committee.

For further details, see Chapter 3, section 3 of the Universal Registration Document.

02

Product stewardship

Description of the risk

Imerys manufactures mineral-based products that, in some cases, can contain impurities. In addition, some products use chemicals as processing aids or as additives. These impurities and chemical additives may potentially have an adverse effect on health under uncontrolled use conditions, or if used inappropriately in certain sensitive applications. Exposure to these risk factors can occur through direct contact or inhalation. Uncontrolled exposure to these risk factors could lead to a breach of regulatory compliance and therefore make Imerys liable for fines, trade exclusions or litigation and, ultimately, risks the reputation of the Group. Even in the absence of specific regulations, this risk could make the Group liable to litigation in respect of its stakeholders.

Key risk control measures taken

- The Group has established an in-house product stewardship function. Headed by the Group Product Stewardship Vice-President, it is represented in each business area by an experienced director who leads a team of product stewardship managers and regulatory compliance experts for each region and market. In addition, a Product Stewardship Steering Committee, chaired by the Group Chief Executive Officer, meets regularly to ensure overarching governance of the Group product stewardship program.
- Since 2018, a product stewardship policy and supporting protocols have defined the objectives, roles and responsibilities, guiding principles and specific requirements, as well as continuous improvement processes to be followed.
- The Group employs state-of-the-art analytical methods, equipment, and testing to ensure that product compliance and quality assessments and associated decisions are driven first and foremost by sound science. For minerals that have the geological potential to contain impurities, the Group applies the Mine to Market Mineral Management (M4) program, for both owned and external deposits. The program, which has been developed over a number of years and is regularly reviewed and enhanced, involves strict quality control at all stages of the process, from mining to manufacturing. The Group continually evaluates its quality programs and testing protocols and invests in innovative technologies to ensure state-of-the-art quality control of its products.

Furthermore, product stewardship risks are fully factored into the decision-making process when acquiring or developing new products and analyzed using specially designed tools and check lists.

For further details, see Chapter 3, paragraph 1.3.4 of the Universal Registration Document.

2.1.3 Legal risks

Compliance

Description of the risk

The Group is exposed to a risk of non-compliance given the nature of its operations (in particular the mining of natural resources and its industrial activity, which may require official authorizations such as mining or environmental permits), its geographic footprint and its sourcing and sales in many countries around the world. With the increasing legalization, extensive powers granted to regulatory bodies and extraterritorial application of certain regulations by certain jurisdictions, non-compliance with laws and regulations such as anti-corruption laws, antitrust laws, international economic sanctions and data protection regulations, as well as the duty of care and/or liability claims against the Group and/or its Senior Managers with respect to these regulations, would expose the Group to civil or administrative sanctions or even criminal prosecution, and damage to its reputation and appeal.

Key risk control measures taken

- The Group's Code of Business Conduct and Ethics sets out a firm expectation for all employees and stakeholders to comply with all applicable laws and regulations, and states zero tolerance for behavior that goes against international or national law in matters of anti-corruption and antitrust rules.
- Under the responsibility of the Group's Legal Department, policies and procedures dealing with anti-corruption, antitrust rules, international economic sanctions, duty of care and personal data protection ("Compliance") supplement the Code of Business Conduct and Ethics. They are regularly reviewed and updated as part of the continuous improvement program in order to ensure they meet all applicable national and international standards.
- The Group regularly organizes communication campaigns regarding its Compliance programs and whistleblowing procedure for any suspected breach of the Group's Code of Business Conduct and Ethics as well as mandatory training courses for Group employees considered to be at the greatest risk as regards Compliance. Disciplinary sanctions have been set out in the event that Compliance policies and procedures are found to have been breached.
- The Group Ethics Committee is responsible for ensuring the various compliance programs are both fit for purpose and properly applied.

To the best of Imerys' knowledge, there has been no Compliance breach that could potentially have a material financial impact at the date of this Universal Registration Document.

For further details about the Code of Business Conduct and Ethics, see paragraph 2.2.4 of this chapter and paragraph 1.4.1 of Chapter 3.

2.1.4 Insurance – risk coverage

The Group's policy on the protection of its assets and revenues against identifiable risks aims to seek the most suitable insurance solutions on the market that offer the best balance between cost and coverage provided.

The coverage of major risks that are common to all operating activities is integrated into international Group "All risks, with exceptions" insurance policies, which are taken out by Imerys on the market with reputable insurers that are internationally recognized for their financial soundness. This means the Group benefits from extensive coverage with high limits, while optimizing costs. As part of the active external growth policy implemented by the Group, steps are taken to ensure that acquired businesses are immediately integrated into existing Group insurance policies or benefit from coverage that is at least equivalent. In the latter case, they will be added only to the coverage offered by Group policies that exceeds the local insurance policies for the acquired businesses.

Imerys companies also use the local market, via the services of the brokers in charge of managing the Group's insurance policies, to cover the specific risks inherent to some of their non-recurrent activities or operations or when such insurance is made compulsory by applicable local regulations.

The Group considers its current insurance coverage to be appropriate, in terms of scope, value insured and limits of guarantees, for the most important risks related to its ability to continue conducting business worldwide.

The two main Group insurance policies cover general liability as well as property damage and business interruption.

General liability

The purpose of this first insurance policy is to cover liability claims against the Group in the event of bodily injury, property damage or consequential damages that arise during operations or after the delivery of products.

The Group's business is first and foremost covered by local policies taken out in each country (level one), supplemented by a "master" policy agreed in France and three additional "excess" policies with higher limits of cover than the "master" policy.

The "master" and "excess" policies are also used to extend the limits and coverage of several specific sub-policies, particularly in North America, for automobile liability and employer liability coverage, or in addition to the mandatory employer liability insurance issued in the UK.

The coverage provided by the Group general liability policy, minus the exclusions that are common practice in the insurance market for this type of risk and the sub-limits applied to certain specified events, amounts to €150 million per claim per year.

Property damage and operating losses

This second insurance policy aims specifically to cover sudden and accidental property damage affecting the insured property as well as any resulting business interruption.

The Group's activities are insured against property damage and business interruption under a "master" policy agreed in France that applies directly in most European countries and supplements local policies in other countries, subject to regulations.

Imerys has kept "high-frequency" risks within a captive reinsurance company consolidated in the Group's financial statements with an annual aggregate claims cap of €4 million.

The "master" policy provides the Group, minus the exclusions that are common practice in the insurance market for this type of risk and the sub-limits applied to certain specified events, with coverage for property damage and business interruption of €235 million per claim per year.

For over 20 years, Imerys has assigned its property damage and business interruption program to an insurance provider known for its expertise in loss prevention engineering, and has now implemented an action plan aimed at reducing risks in its operational units. Around 100 of the Group's industrial sites are regularly inspected by loss prevention engineers from this insurance company. Imerys uses the subsequent recommendations to improve its industrial risk management.

The risk prevention program is supplemented by an interdisciplinary working group tasked with identifying and prioritizing key industrial risks as well as defining and monitoring the implementation of risk prevention plans, which is overseen by the Industrial Department.

Other Group-wide insurance

The Group's other main insurance policies aim to cover the following risks, which are common to all its legal entities or several of its businesses, such as directors' and corporate officers' liability; commercial auto fleet insurance (Europe, US); as well as environmental and transportation risks (marine cargo and charterer's liability).

2.2 Risk management and internal control

2.2.1 Introduction

Objectives

The Group uses the framework on risk management and internal control systems in addition to the application guide published by the French financial markets authority (Autorité des marchés financiers (AMF)) to define its risk management and internal control systems and structure its approach.

The Imerys risk management and internal control system covers all controlled entities within the Group's scope of consolidation, including newly acquired companies. By implementing this system in all its businesses, Imerys ensures it has the means, behaviors and procedures needed to manage the different risks that may arise and provide reasonable assurance that its:

- financial information is reliable;
- activities comply with the laws and regulations in force;
- processes are efficient;
- assets are protected, in particular against the risk of fraud.

These systems therefore help the Group protect its value for shareholders and employees and achieve the strategic, financial, compliance and operational goals it sets.

However, by definition, this type of system cannot provide an absolute guarantee that the risks facing the Group are completely under control, nor that it will reach its goals.

Risk management and internal control principles

In line with the objectives outlined above, the Imerys internal control mechanism is based on the following core principles:

- a structure fit for purpose and made up of skilled, accountable professionals;
- periodic analysis of the main risks facing the Group;
- appropriate control activities.

2.2.2 A structure fit for purpose

Organizational model

Imerys' internal control system is underpinned by the Group's operational structure and support departments that are directly or indirectly responsible for managing the risks faced by the Group or that may impact external stakeholders associated with Imerys' operations. The Executive Committee ensures the internal control mechanisms are correctly implemented throughout the Group.

The control system put in place within the Group guarantees that information circulates effectively and that decisions are transparent and traceable, while conserving the principles of subsidiarity and decentralization that are deemed essential to the optimal management of Group industrial and commercial operations. It requires a high level of commitment and accountability from all operational and support managers, who must adopt the policies and procedures defined at business area and Group level, make sure they are implemented and followed, and enrich them with appropriate measures given the distinct nature of their operations or areas of responsibility.

The Board of Directors exercises control over the way in which the Chief Executive Officer manages the Group. To assist in this task, the Board has created four specialized committees – the Strategy and Sustainability Committee, the Appointments Committee, the Compensation Committee and the Audit Committee – which carry out their duties under the Board's responsibility.

The Strategy and Sustainability Committee and the Audit Committee are responsible for identifying and managing risks, as well as for monitoring certain internal control mechanisms, as presented in Chapter 4, section 4.1 of the Universal Registration Document.

People involved in the internal control system

Executive Management and the Executive Committee

The Chief Executive Officer has the operational and functional responsibility to implement the strategy defined by the Board of Directors in all the Group's operations. In particular, they are responsible for effectively implementing control mechanisms within the Group.

The Chief Executive Officer is supported by an Executive Committee, which is made up of the Chief Executive Officer, the Senior Vice Presidents of support departments and the Senior Vice Presidents of the Group's business areas. The Executive Committee, under the authority of the Chief Executive Officer, is in charge of implementing the strategic directions set by the Board of Directors and ensuring that all its members comply with the main decisions that fall within their individual scope of responsibility in relation to the Group's organization or general conduct of its business (see Chapter 4, section 4.2 of the Universal Registration Document).

Operational departments

In accordance with the Group's decentralized operating principles, the directors of each business area have the necessary powers to organize, manage and oversee their internal control mechanism at all times and delegate these operations in similar conditions to the operating managers reporting to them.

The directors of each business area are responsible for adopting internal control mechanisms that are consistent not only with its organization but also with the Group's principles and rules.

Support departments

The role of the Group's support departments is to both:

- organize and oversee the Group's operations in their respective areas of expertise; and
- provide technical assistance to the operating activities in these areas when necessary.

These departments enable the Group to not only benefit from economies of scale as a result of its size and better skill sharing, but also ensure all operations related to their areas of expertise are conducted in a common framework of secure, consistent management and control processes and systems. The Group experts or shared support services that constitute the support departments significantly contribute to the Group's internal control mechanisms. These Group support managers have hierarchical or functional authority over the operating managers whose responsibilities come under their area of expertise.

Support departments	Main internal control responsibilities
Finance & IT Systems	– Implement tools to continuously monitor the Group's results and operating performance – Participate in preparing the budget and quarterly progress review – Oversee financial performance at all operating levels of the organization – Analyze and approve capital expenditure requests made by business areas or other similar investment projects – Define the Group-wide policy applicable to financing, market risk control and banking relations. Of the financing tools available, the Group may make use of sustainability-linked bonds – Ensure local tax regulations are properly applied in each country in which Imerys operates – Define Group policies and best practice for IT systems, including IT network security – Manage Group-wide IT projects, monitor and check IT networks and infrastructure (servers, telecoms, etc.) – Use IT tools to develop standardization, automation and efficiency of certain shared internal control processes within the Group
Legal	– Identify and assess the main legal risks for the Group and each of its business areas – Define and implement suitable policies and controls to manage these legal risks and compliance with applicable laws and regulations and in particular implement anti-corruption and antitrust compliance programs, as well as ensure compliance with international economic sanctions, duty of care and personal data protection. The Group General Counsel is the Group Chief Compliance Officer and chairs the Group Ethics Committee – Provide legal advice to operating and support managers to (i) safeguard the rights and interests of the Group and its business areas and comply with legal obligations and (ii) assist them in achieving their objectives with appropriate legal solutions – Identify needs and define, implement and manage Group insurance policies to cover or mitigate potential losses resulting from major incidents or liabilities
Strategy, Mergers-Acquisitions	– Identify and assess Group-wide strategic, marketing and commercial risks, including those relating to climate change – Identify and assess – with support from relevant internal or external experts – the main potential risks or liabilities associated with proposed acquisitions or disposals of assets or businesses, and factor them into the value and terms and conditions of the proposed transactions – Assist with any of the Group's international expansion plans, especially when opportunities are identified in at-risk countries

Support departments	Main internal control responsibilities
Industrial and Health & Safety	– Lead and coordinate the Group Purchasing Department by selecting suppliers, negotiating and renegotiating contracts, implementing optimization initiatives and enhancing internal organization – Support, review and approve all material industrial projects proposed by the business areas – Lead and coordinate execution of the Imerys industrial improvement program in all operating plants, ensure energy efficiency and reduce greenhouse gas emissions – Lead and coordinate Group standards in managing mineral reserves and mineral resources – Identify and assess the main industrial risks of the Group by mapping risks on a regular basis – Verify application of Group standards by performing audits – Lead and coordinate Group standards in health and safety
Human Resources and Communication	– Develop policies to ensure employees have the required skill levels for their responsibilities – Put in place checks to ensure the integrity of salary setting and payment processes and supervise the implementation of employment benefits – Monitor compliance with applicable labor laws, regulations and agreements – Develop policies for international mobility and employee travel – Protect the Group's people, assets and industrial operations by adding structure to its ability to anticipate and respond to security risks
Sustainable Development	– Define the Imerys sustainable development roadmap in liaison with all the functions concerned, including in particular the roadmap related to the Group's decarbonization – Identify the material Environmental, Social and Governance (ESG) issues, define, implement and manage the Group's sustainable development programs – Promote and coordinate Group initiatives in the areas of the environment, sustainable business portfolio management and product stewardship – Ensure the Group's overall compliance with its sustainable development obligations and objectives – Implement tools to continuously monitor the Group's non-financial outcomes and performance and ensure compliance with regulatory sustainability reporting requirements

Risk Committee

The Risk Committee coordinates risk analysis, management and controls within the Group. It is mostly made up of representatives from the specialized committees and from operating and support activities. It is headed by the Internal Audit & Control Director. The Risk Committee contributes in particular to the identification and assessment of the main risks for the Group by drawing up a risk map every three years. The most recent risk identification exercise was completed in December 2024, and the risk map was presented to the Audit Committee. The risk assessment is updated every year taking into account any material event.

Internal Audit & Control Department

The role of the Internal Audit & Control Department is to regularly check the quality and efficiency of the Group's internal control mechanisms and make recommendations to improve them if needed. It alerts management of any internal control failures and produces recommendations to correct them. These reviews are also conducted for newly acquired entities, usually 6 to 18 months after they are incorporated into Imerys.

The Internal Audit & Control Department is a management support function, independent of the operating and support activities that it audits. The Internal Audit & Control Director therefore reports directly to the Chief Executive Officer and the Audit Committee. A complete report on the activities of the Internal Audit & Control Department is presented and discussed every six months with the Executive Committee, then at an Audit Committee meeting attended by the Statutory Auditors.

The Internal Audit & Control Department has 9 staff working in the areas of internal audit, risk management and internal control.

Internal Audit & Control Department	Main responsibilities	Reference framework and/or procedures
Internal audit	– Ensure operating entities comply with the principles and rules defined by the Group – Perform IT system audits – Identify and share best practice within the Group – Investigate incidents of fraud – Monitor the implementation of action plans following audits – Review the reliability of self-assessments	– Audit cycle of four to seven years – Annual audit plan approved by the Audit Committee – 19 audits conducted in 2025 – Structured audit methodology – Fraud investigation reports – Dashboard for quarterly follow-up of action plans
Internal control	– Define and maintain Group internal control standards – Provide internal control training	– Group policies and procedures – Internal control training material – Anti-fraud training and awareness-raising – Self-assessment questionnaires
Risk management	– Develop the risk management methodology – Define and update the Group's risk universe – Map the main risks for the Group – Review the execution of action plans defined during the risk mapping process – For further details, see paragraph 2.2.3 of this chapter	– Update of the risk identification exercise in 2024 and approval from the Audit Committee – Annual assessment of the impact and level of control of risks – Annual review of risk management action plan

2.2.3 Periodic analysis of the main risks facing the Group

Objectives

By analyzing risk, Imerys is able to identify the events that could seriously threaten the achievement of its strategic, financial and operational goals and/or pose a risk of non-compliance of its operations with applicable local laws and regulations. Risk analysis also makes it possible to identify the events that, if they were to come to pass, could have a negative impact on the Group's external stakeholders.

Through a structured process designed to enable the Group to understand and analyze its main risks, Imerys can assess the suitability of its existing internal control mechanisms, set up relevant action plans to improve their efficiency and, more generally, better protect the Group's value in compliance with applicable laws and regulations and the expectations of its stakeholders.

Structure

The risk analysis process is split over three levels:

- all operating and support managers must constantly seek to identify, analyze and manage risks in their areas of responsibility. The identification and management of these risks are periodically reviewed and discussed by the Chief Executive Officer and the Chief Financial Officer as part of the budget process, quarterly results reviews and monthly management reporting;
- furthermore, the Group follows a formal, recurrent process to analyze its main risks by preparing a map showing the potential impact of the identified risks and the extent to which they are managed. Key central support and operating managers take part in this process. The results are reviewed and approved by the Executive Committee and presented to the Audit Committee. In view of the results, new actions are set out to reinforce the Group's management of certain identified risks. The main risks to which the Group is exposed and the methods employed to manage and control them are detailed in section 2.1 of this chapter;
- lastly, the Risk Committee reviews and coordinates risk analysis and management activities and action taken to manage risk within the Group, and suggests potential measures to improve said activities (see paragraph 2.2.2 of this chapter). The Internal Audit & Control Director regularly reports on their work to the Executive Committee and the Audit Committee.

2.2.4 Appropriate control activities

Control activities are intended to ensure that the risks related to a given operating or support process are correctly covered. They are adapted to the goals set by the Group.

Framework

Internal rules

Imerys' internal control system is formally referred to in the Code of Business Conduct and Ethics and the Ethics Committee Charter, as well as in a number of other charters (including the Charter of the Board of Directors, Sustainability Charter, Health & Safety Charter and Diversity, Equity & Inclusion Charter) that apply to the whole Group. These sets of rules aim to create a positive control environment, based on robust principles and experience in Corporate Governance as well as behavior that complies with laws, regulations, ethics and the Group's strategic objectives.

Moreover, the Group's policies developed by the central support departments define the specific organization, responsibilities and operating and reporting principles for their respective areas of expertise.

Lastly, the Group's internal control manual defines the main internal control principles and core control activities to be carried out as part of the Group's operating and financial processes.

The Group's charters, manuals, policies and procedures are grouped together in the "Blue Book", which all employees can consult on the Group Intranet, OneImerys. This fundamental set of rules forms the framework for the Group's operating activities. It applies to all the companies Imerys controls. Certain communications are subject to electronic certification, through which Imerys employees must certify they have read the information and undertake to enforce the internal controls in their area of responsibility.

A second set of rules applies to the Group's operating activities and defines their specific procedures and reporting principles. In line with Group policies, procedures are adapted to each setup, the management of mining, industrial and commercial activities and any risks related to these activities. They take into account specific requirements set out in applicable local laws and regulations.

Code of Business Conduct and Ethics

The Imerys Code of Business Conduct and Ethics summarizes the ethical behavior that the Group expects from all its employees and Senior Managers, as well as its contractors, suppliers and other partners with whom it maintains close relations. It is designed so that everyone not only complies with local legislation in their daily work, but also adopts an attitude in line with the Group's values, principles and rules with respect to responsibility, integrity, transparency, fairness and openness. All newly recruited employees at Imerys attend an introductory class on the Code of Business Conduct and Ethics as part of their induction to ensure all Group employees are aware of and follow these rules. Furthermore, Group employees regularly complete mandatory training on this subject and monthly communications on compliance are published on the Group's Intranet, which is available to all employees.

The Code of Business Conduct and Ethics reflects Imerys' firm commitment to ethical business conduct, aligning the Group with the most rigorous international standards. The Group has also put in place a whistleblowing system through an online platform and a reporting hotline, accessible free of charge in all 30 languages used within the Group, managed by an independent organization, ensuring confidentiality throughout the process.

For further details, see Chapter 3, paragraph 1.4.1 of the Universal Registration Document.

IT systems

Effective IT systems help ensure reliable and improved management of support and operating processes.

The Group's policy consists of integrating and monitoring as much of its value chain as possible (particularly sales, distribution, purchasing, inventory, inventories, production, supply chain and finance) with its enterprise resource planning (ERP) system. Imerys strives to use integrated ERP control systems to ensure an optimal level of control while meeting the specific requirements of how to best manage its operating activities.

As described in paragraph 2.1.1 of this chapter, Imerys has completed the streamlining and harmonization of its information systems. The Group has deployed a shared ERP for the vast majority of its sites to replace the oldest and most outdated systems. This migration ensures a high level of homogenization between operational processes and maximizes synergies across the Group. The deployment of the shared ERP is in its final phase, materializing the goal of standardization with a single system.

Imerys uses a single software package in all its entities to report and consolidate its accounting and financial information.

In addition, tools for consolidating and monitoring the most important non-financial data have been set up across the Group. They help to:

- gain a clearer view of the performance of the Group's different operations, prevent or resolve difficulties and promote or measure improvement (e.g. reporting and consolidating human resources or sustainability management indicators);
- improve the accuracy of data processing and help monitor operational compliance with applicable legal or regulatory obligations, contractual commitments and Group rules (e.g. reporting and consolidating legal and administrative information related to the Group's subsidiaries, equity interests and corporate officers, as well as managing and monitoring the approval and fulfillment of contractual commitments).

Human resources management

Recruitment and development

To make sure recruitment is consistent and appropriate, the Human Resources Department defines standards and regularly checks the quality of its practices.

In order to develop employee skills in line with its operational needs, the Group has rolled out several processes described in Chapter 3, paragraph 1.3.1 of the Universal Registration Document, including an annual individual assessment (Performance Appraisal and Development - PAD) and succession plans for key persons.

The recruitment and career development processes are managed through a single system, which simplifies and standardizes human resources processes while also improving the Group's ability to identify its global talent pool and develop talent internally.

The results and main analysis of human resources and skills management are regularly presented to the Executive Committee.

Training

To supplement the training courses organized by the operating activities, Group training sessions are arranged by the Imerys Learning Center (see Chapter 3, paragraph 1.3.1 of the Universal Registration Document). These sessions give employees an opportunity to deepen their expertise in certain business areas (finance, geology, marketing, project management, etc.) and promote the sharing of best practice.

Compensation & benefits

Compensation is reviewed annually, focusing mainly on base salary and annual bonuses.

In addition, the key components of social security – especially health and life insurance (death, long-term illness or disability) – are continuously assessed and improved in line with local or regional market practices.

Detailed information on both principles is provided in Chapter 3, paragraph 1.3.1 of the Universal Registration Document.

Reliable accounting and financial information control activities

The same control mechanism and procedures for preparing accounting and financial information are used throughout the Group. This mechanism is made up of a Group-wide accounting setup, consistent accounting standards, a single consolidated reporting system and central quality control of the internal and external financial and accounting information produced.

Organization of the accounting and finance function

Accounting and financial operations are managed by the Group Finance Department. Its central structure includes:

- an Accounting, Consolidation and Reporting team, responsible for preparing and presenting the Company's financial statements, the monthly management reports and the Group's consolidated financial statements;
- a Management Control and Budgetary Control team, which prepares and consolidates budget data and analyzes operating performance in relation to budget targets and prior year comparatives;
- a Cash and Finance team, in charge of preparing and consolidating data on the Group's financial debt and financial income in particular. Its main duties include centrally managing and optimizing the Group's debt and financial resources, as well as managing liquidity, interest rate, exchange rate and local energy supply price volatility risks, primarily through hedging instruments;
- a Tax team, whose responsibilities include monitoring the local tax consolidation applied within the Group, estimating the subsequent amount of tax payable and checking overall consistency.

Furthermore, shared service centers have been set up in Europe and the Americas to manage all accounting transactions.

Accounting framework

The general accounting rules are described in the "Blue Book" (see paragraph 2.2.4 of this chapter). They apply to all the Group's entities. In accordance with the IFRS adopted within the European Union, they include:

- a reminder of the general accounting principles and recommendations to follow;
- a single detailed financial statements template adapted to the Group's size and the materiality of its transactions;
- a definition of the Group's accounting methods that apply to the largest items and/or transactions.

These documents are updated regularly – whenever an amendment is made or new accounting standards are applied – by the Accounting, Consolidation and Reporting team, after being reviewed by the Audit Committee and approved by the Statutory Auditors. This team also has an advisory role within the Group and is responsible for providing periodic training to the local financial controllers.

Multi-year strategic plan

The long-term strategic focus of each business area and the subsequent financial forecasts are formally defined and monitored as part of a multi-year strategic plan for the Group and periodic strategy reviews for each business. They are drawn up under the control and supervision of the Chief Executive Officer. The conclusions are reviewed by the Executive Committee before being presented to the Strategy and Sustainability Committee and submitted to the Board of Directors for approval.

Annual budget and monitoring its execution

Imerys has put in place an annual budget process and monthly report cycle for all Group entities to ensure management information is reliable and consistent. Consistency between accounting data and reporting information is key to ensuring accurate accounting and financial information.

The Group uses the reporting system to accurately monitor monthly results (income and cash flow statement) and financial data for operating activities and compare them with the budget and results for the corresponding period of the prior financial year. The management indicators are reviewed and commented on by the Vice Presidents Finance for each business area, as well as by their teams and the Group Control team.

Consolidation process

A single accounting consolidation system processes all information from across the Group's operating and legal entities.

To guarantee the quality and accuracy of its financial information, Imerys has set up a unified reporting and consolidation system to collect budget and management information and produce consolidated financial statements. The system is deployed across the entire Group. It uses local accounting data, either retrieved via an interface with the ERP system or input manually. This system makes it possible to check some reported and/or consolidated data automatically.

Earnings review

Every month, each business area examines its management results and analyzes any significant variations on the prior year or budget, deciding any corrective actions that it deems necessary and monitoring their implementation. The Executive Committee reviews and checks the performance of each business area, as well as the comments provided by their financial controllers to explain the main changes.

Earnings are also reviewed at quarterly meetings, where business area directors present their results to the Chief Executive Officer and the Chief Financial Officer. A summary of each of those reviews may also be presented to the Strategy and Sustainability Committee and, if necessary, to the Board of Directors.

Lastly, the consolidated financial statements, accounting procedures and complex financial transactions are systematically reviewed by the Executive Committee. The half-yearly and annual consolidated financial statements are then approved by the Board of Directors after the Audit Committee has reviewed them and issued an opinion. The Audit Committee also reviews the quarterly consolidated results prior to publication.

PART 1 SUSTAINABILITY REPORT [CSRD]

1.1. AN INTEGRATED APPROACH TO SUSTAINABILITY [ESRS 2]

1.1.1. General information related to the Sustainability Statement

1.1.1.1. General basis for preparation [BP-1]

The Group's sustainability reporting has been prepared on a consolidated basis, and covers all the activities over which it exerts operational control, referring to the same scope as the financial statement presented in chapter 6, note 1 "Significant items for the period" of the Universal Registration Document. It includes each legal entity owned by Imerys and fully consolidated (i.e. Imerys directly or indirectly owns 50% or more interest with operational control) and the reporting structure generally[1] mirrors the business and finance organizations as well as the Group's legal structure. Furthermore, legal entities are normally split into various sites for the relevant indicators. Some exceptions described hereafter are occasionally made to this general framework to accommodate special operational circumstances. Policies and guidelines exist at the Group level to regulate the collection of environmental and social data from the Group's operations.

Consistent with our 2024 disclosure, the Group's sustainability reporting includes information on the material impacts, risks and opportunities related to the Group's operations and connected with Imerys through its direct and indirect business relationships in the upstream and downstream value chain following the outcome of the materiality assessment.

1.1.1.2. Disclosures in relation to specific circumstances [BP-2]

Reporting obligations and frameworks

Imerys sustainability report has been prepared as part of the application of the legal and regulatory requirements following the transposition of the European directive on the publication of corporate sustainability information (Corporate Sustainability Reporting Directive) ("CSRD Directive") and in accordance with the ESRS issued by the European Financial Reporting Advisory Group (EFRAG) and adopted by the European Union for the reporting period from January 1, 2025 to December 31, 2025. This consolidated sustainability report has been prepared under the responsibility of the Management and approved and authorized for issue by the Board of Directors.

As a result of implementing the green taxonomy and the quick-fix amendments included in the Omnibus I package, adopted by the Commission respectively on 4 and 11 July 2025, the Group has :

- omitted the disclosure of most anticipated financial effects related to environmental topics;
- utilized certain phased-in options for environmental and social related disclosure requirements within ESRS E4, S1, S2 and S3;
- implemented a materiality threshold, the new summary table templates for Key Performance Indicators (KPIs), and the simplification of the DNSH Pollution criterion related to the disclosure of the green taxonomy present in section 1.2.1 of the present chapter.

For a comprehensive overview of published information and phased-in disclosures, please consult the list of disclosure requirements present in the report as detailed in section 1.5 [ESRS 2, IRO-2].

The Group sustainability program and reporting approach is coherent with frameworks such as the International Financial Reporting Standards (IFRS), the Financial Stability Board Task Force on Climate-related Financial Disclosures (TCFD) recommendations, the Taskforce on Nature-related Financial Disclosures (TNFD), the Sustainability Accounting Standards Board (SASB) standards for Metals and Mining, the Global Reporting Initiative (GRI) Sustainability Reporting Guidelines ("Core" option), the UN Global Compact, the UN Guiding Principles on Business and Human Rights, Organization for Economic Co-operation and Development (OECD) Guidelines, International Organization for Standardization (ISO) 26000 and the International Labour Organization (ILO) Fundamental Conventions.

In addition, Imerys' Group Sustainability Statement relies on information published in accordance with article L. 225-102-1 of the French Commercial Code requiring the publication of a Vigilance Plan setting out the reasonable measures of vigilance put in place within the Group to identify risks of and prevent severe impacts on human rights, fundamental freedoms, human health and safety and the environment resulting from the activities of the Group, its subsidiaries and its subcontractors and suppliers, in France and abroad. The Vigilance Plan is presented in Part II of the present chapter.

1 For more information, refer to section "*Scope accommodation related to special circumstances*" in disclosure requirement [ESRS 2 BP-2]

Time horizons definition

The Group's sustainability reporting includes information based on defined time horizons as described in the following table. Time horizons on Climate change disclosure are aligned with the stress test on the risks and opportunities scenario analysis presented in [ESRS E1] of the present chapter, which covers transition risks (industrial risks, market-related risks and opportunities) as well as physical risks.

Time horizon	Climate Change	All other themes[1]
Short-term horizon	From the reporting period to 2030	Reporting period
Medium-term horizon	From 2030 to 2040	From the reporting period to five years
Long-term horizon	From 2040 to 2050	More than five years from the reporting period

Uncertainties related to the recent implementation of ESRS standards

The sustainability reporting framework under the CSRD continues to evolve following the first year of implementation. The second year of reporting has been notably impacted by the adoption of the "Quick Fix" amendments included in the Omnibus I package and by the ongoing revisions of the amended ESRS, which give rise to uncertainties, in particular regarding the possible removal of certain data points and the phasing-in or deferral of specific disclosure requirements.

In this context, Imerys has applied the Quick Fix provisions, notably through the omission of data points related to anticipated financial effects related to environmental topics, the use of phased-in options for certain disclosure requirements and the new template models and the simplification of the "Do No Significant Harm" (DNSH) Pollution criterion in relation to EU Taxonomy disclosures. Imerys has, for reasons of consistency and comparability, continued to disclose nearly all of the data points published in the previous reporting period.

Accordingly, the preparation of the sustainability report is based on the knowledge, data, regulatory texts, normative interpretations and information available at the date of its preparation.

Sources of estimation and outcome uncertainty

When preparing the sustainability statement, Imerys makes a certain number of estimates and judgments regarding the recognition and measurement of impacts, risks and opportunities. Certain quantitative indicators, notably Scope 3 GHG emissions and water indicators, are subject to measurement uncertainty due to the limitations in industry standard estimation methodologies, numerical modeling and the availability and quality of data, including the reliance on third-party data. As methods and data sources may evolve, some figures may become outdated, and updates to methodologies and assumptions might lead to different results or conclusions. The disclosure requirement [MDR-M] of the present chapter details data collection processes, assumptions and calculation methodologies of the indicators provided within this report.

The Group's transition plan for climate change mitigation explains past, current, and future efforts to align its strategy and business model with a sustainable economy. Setting climate-related targets and implementing actions require forward-thinking and long-term planning. Future projections are based on current understanding, expectations, and estimations, and carry uncertainty due to evolving scientific knowledge, emerging methodologies, differing standards, future market conditions, technological advancements and the Group's future financial situation and capacity to invest. These assessments will evolve and should not be seen as projections of future performance.

Data points partially or not available

As of December 31, 2025, some metrics are not or only partially disclosed, notably related to :

Metrics related to pollutants [ESRS E2]: Pollutants in the European Pollutant Release and Transfer Register (E-PRTR) and identification of individual sites that exceed E-PRTR thresholds, which may differ from the legal thresholds applicable to Imerys locations worldwide have been partially disclosed. In 2025 the Group continued to enhance the reporting processes for identified pollutants and improve their quantification to ensure comprehensive and accurate disclosure. For this year of reporting, the published indicators for air emissions include NOx and SOx emissions as well as CO for two sites. With regards to emissions to water, the published indicators include Ni and Cl for two sites. The Group continues to work on the collection and consolidation of relevant qualitative indicators in the context of the roadmap established for water quality.

Recyclability of mining waste and mineral products [ESRS E5]: The disclosure requirement highlights the current lack of comprehensive and harmonized data regarding the recyclability and recovery of mining waste and mineral products. In line with its circular economy strategy, Imerys will continue to work in a coordinated manner with relevant stakeholders to improve the identification, characterization and valorization of mineral by-products and waste streams.

1 The time horizon on other themes are based on the CSRD time horizon definitions.

As of the end of the 2025 reporting period, certain data points have not been reported or are partially reported. The Group continues to strengthen its data collection processes and improve the granularity of its sustainability reporting. These not reported DP do not materially affect the transparency or interpretability of the present Sustainability Statement. The Group remains committed to prioritizing the disclosure of the most relevant information to support stakeholders' understanding of its material impacts, risks, and opportunities, as well as its related management practices.

Value chain estimation

Scope 3 greenhouse gas (GHG) emissions are calculated by multiplying activity data by specific emission factors. The GHG Protocol outlines recommended Scope 3 calculation methods. Each method corresponds to a certain level of precision and the minimal requirements depend on the level of materiality assessed for each emission category. Within a GHG emissions category, several approaches can be used for subcategories (from the least specific and accurate calculation method used by Imerys to the most):

- **Spend-based:** a combination of primary activity data on the amount spent on purchased products and secondary emission factors for purchased products per monetary value.
- **Average data (physical unit) method:** this methodology results from a combination of primary activity data on the mass or quantity of products purchased by Imerys (e.g. kg, MWh) and secondary emission factors for purchased products per unit.
- **Distance-based:** to calculate emissions linked to the transport in the value chain, Imerys identified the mass, the distance, and the mode of transport, and subsequently applied the appropriate mass-distance emission factors for the vehicles used.
- **Hybrid method:** this methodology results from a combination of supplier-specific activity data (when available) and secondary data to fill in the gaps. It has not been used in the mapping.
- **Supplier-specific method:** this methodology results from a combination of primary activity data on the mass or quantity of purchased products from specific suppliers and primary product and supplier-specific emission factors per unit.

Scope accommodation related to special circumstances

The scope of the environmental disclosure integrated from [ESRS E1] to [ESRS E5] of the present chapter includes all mining and production assets/facilities operated by Imerys. The term "assets operated by Imerys" excludes commercial activities, sales and administrative offices, and projects on customers' sites.

Incorporation by reference

Some of the information required by the CSRD is incorporated by reference in accordance with ESRS 2, to provide greater readability, avoiding redundancies, and ensure the overall cohesiveness of the reported information. Therefore, details on the Group's Sustainability Statement appear in the four following chapters of this Universal Registration Document :

- Chapter 1 presents the Imerys Group, its business model, its value chain and its Purpose, Vision and Values;
- Chapter 2 provides detailed information on risk factors and internal controls of the Group;
- Chapter 3, Part I is the Sustainability Statement, describing the Group's sustainability policies, objectives, targets and performance;
- Chapter 3, Part II is the Vigilance Plan in which the Duty of Care mapping used in the double materiality assessment is described.
- Chapter 4 details the Corporate governance structure and role of administrative, management and supervisory bodies, as well as the description of sustainability-related performance incentive schemes.

The complete overview of the Sustainability Statement structure following the ESRS and the list of disclosure requirements are available in disclosure requirement [IRO-2] of the present chapter.

Specific circumstances in 2025

In 2025, the Group experienced significant events which affected the present Sustainability Statement :

- The update of the double materiality assessment methodology and outcomes (refer to disclosure requirements [IRO-1] and [SBM-3] of the present chapter) has resulted in certain impacts, risks and opportunities pertaining to ESRS S1, S3, and G1, previously considered as material impacts, being reclassified as non-material.
- While details on the performance evolution of various topics are elaborated throughout the report, the divestiture of assets serving the paper market in June 2024 and the acquisition of Chemviron in December 2024 makes it challenging to compare 2025 data with 2024 data (refer to Chapter 6, note 1 "Significant items for the period" of the Universal Registration Document for additional information related to 2024 acquisitions and divestitures).
- The publication of the new roadmap 2026-2030, presenting mid-term quantitative targets and associated action plans (refer to "Toward Imerys 2030 sustainability ambition" section of disclosure requirements [SBM-3] of the present chapter)

GHG emission recalculation policy

In order to accurately track progress toward the Group's greenhouse gas emissions targets, the base year emissions inventory may be recalculated in case of a recalculation event, as defined below, driving a significant increase/decrease[1] in emissions:

- A significant structural change in the organizational or operational scope as a result of an acquisition, a merger, a demerger or other restructuring, an amalgamation, a consolidation, a spin-off, a disposal or a sale of assets;
- An amendment to any applicable laws, regulations, rules, guidelines and policies relating to the business of the Group and relevant to greenhouse gas emissions, if such amendment has a significant impact on the level of the base year emissions or targets;
- A change of methodology for the calculation of the greenhouse gas emissions, to reflect changes in market practice or relevant market standards, including updated emission factors, improved data access or updated calculation methods or protocols, if such amendment has a significant impact on the level of the base year emissions or targets;
- Discovery of a significant error, or a number of cumulative errors that together are significant.

Changes in preparation or presentation of sustainability information

In 2025, Imerys implemented methodological changes to its emissions calculation. These changes include the incorporation of FLAG (Forest, Land, and Agriculture) emissions for Scope 1 and the utilization of residual electricity country mix for Scope 2 market-based calculations. Regarding Scope 3, the calculation was refined to accurately capture the impact of perimeter changes (divestitures), the inclusion of previously unmapped flows and entities, and the update of emission factors (refer to **disclosure requirement [MDR-M] of the present chapter** for more details on methodological changes).

In accordance with Imerys' recalculation policy **(refer to the paragraph above)**, the cumulative impact of the methodologies and perimeter changes on the 2021 baseline was assessed for all scopes and found to be below the defined threshold of 5%; therefore a recalculation of the 2021 baseline was unnecessary. Likewise the impact of the aforementioned changes did not trigger a recalculation of the 2018 baseline, which is the base year of reference for the 2021 Sustainability-Linked Bond (SLB) issued by Imerys.

These changes are further explained in **disclosure requirement [ESRS E1-6] of the present chapter**, ensuring stakeholders have a clear understanding of the impacts on the Group's emissions trajectory and performance.

Limited assurance over the Sustainability Statement

The Group has structured the processes for data consolidation and quality control to ensure the reliability and auditability of the reporting. Deloitte and PricewaterhouseCoopers Audit provided the verification services for sustainability reporting and issued **a limited assurance** report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852 relating to the year ended 2025. The limited assurance report is available in **section 1.9 of the present chapter.**

1 *The trigger threshold value is set at +/- 5% of the Group greenhouse gas emissions (Scopes 1, 2 and 3) as per the SBTi criteria and recommendation on recalculation.*

1.1.2. A robust governance

Note : Chapter 4 of the Universal Registration Document provides more information related to the Corporate governance structure, the role and diversity of administrative, management and supervisory bodies, and the integration of sustainability-related performance in incentive schemes as presented in disclosure requirements [GOV-1], [GOV-2], and [GOV-3].

1.1.2.1. Role of the administrative, management and supervisory bodies [GOV-1]

Governance structure

Board of Directors

The Board of Directors takes into consideration Sustainability issues in the determination and review of the Group's strategy. More specifically, it determines multi-year strategic directions, including those relating to social and environmental responsibility, and reviews the results obtained. In line with the Compensation Committee's recommendations, it incorporates sustainability indicators in the performance criteria used to determine the Chief Executive Officer's annual variable compensation as well as the sustainability indicators in the criteria for the performance conditions of the long-term incentive plan which benefits the Chief Executive Officer as well as the Group's executive managers and certain key employees. At least twice a year, the Board of Directors agenda covers Sustainability-related items during its meetings.

Board-level Committees

Strategy and Sustainability Committee

The Strategy and Sustainability Committee makes recommendations to the Board on the Group's strategic directions, including industrial, commercial, financial and innovation strategies, as well as those relating to social and environmental responsibility, including climate change. It controls the methods used by Executive Management to implement this strategy, with the action plan and the time frames within which these actions will be carried out.

Audit Committee

The Audit Committee monitors the process of preparation and control of sustainability information, encompassing impacts, risks, and opportunities, to ensure compliance and quality throughout the process. The Committee examines the results of work conducted by internal and external auditors, as well as the internal control department. It follows up on recommendations, particularly those related to risk analysis, corrective measures, and the development of the Group's risk map. The Committee focuses on material sustainability impacts, risks, and opportunities, while also overseeing sustainability reporting. The Audit Committee provides recommendations to Executive Management on identifying, measuring, and monitoring key potential impacts, risks, and opportunities within defined areas.

Compensation Committee

The Compensation Committee makes recommendations to the Board concerning the compensation policy for the Chief Executive Officer as well as the long-term performance share incentive plans for the Group's, including sustainability criteria.

Appointments Committee

The Appointments Committee makes recommendations to the Board concerning the proposed appointment of Corporate Officers, the structure and chairs of the Committees in line with the Diversity policy laid down by the Board.

ESG Referent Director

The ESG Referent Director assists the Strategy and Sustainability Committee and the Board in ensuring sustainability integration into strategic decisions, monitors strategy alignment with Board-set sustainability guidelines, supports the Audit Committee in sustainability reporting and impacts, risks and opportunities management oversight. She also ensures the inclusion of relevant sustainability criteria in executive compensation, aids in reviewing sustainability disclosures and coordinates efforts across Board committees. More generally, the ESG Referent Director coordinates and ensures consistency between the work of committees on sustainability. In that view, the ESG Referent Director has the authority to make recommendations on sustainability matters, particularly on main potential impacts, risks and opportunities for the Group in the areas defined and propose related agenda items for Board meetings, thereby ensuring comprehensive integration throughout Imerys' governance structure and decision-making processes.

Executive-level Committees

Executive Committee

Imerys' Executive Committee, under the stewardship and validation of the Board of Directors, relies on the Sustainability Committee to define the ambition and objectives of the Group with respect to Sustainability matters in order to promote long-term value creation through its sustainability program SustainAgility.

Sustainability Committee

The SustainAgility program, led by the Chief Sustainability Officer, is overseen by a Sustainability Committee that is chaired by the Group CEO. The Sustainability Committee meets quarterly and is responsible for establishing the Group's sustainability ambition and targets, monitoring sustainability reporting, validating key milestones and guiding and monitoring implementation of progress toward the Group's objectives.

Risk Committee

The Risk Committee coordinates risk assessment, management and controls within the Group. It is made up of representatives from the specialized committees and from operational and support departments. It is headed by the Internal Audit & Control Vice-President. The Risk Committee contributes in particular to the identification and assessment of the main risks facing the Group within the Group risk map.

Thematics committees

The roles and responsibilities of the following committees are described in detail in various sections of the present chapter. These committees ensure the implementation of dedicated policies, procedures and controls to manage the impacts, risks and opportunities of the themes under their responsibility. Please refer to the **sections** of the below table for more information.

Thematic committees	Sustainability matters covered by the committee	Section
Sustainability Committee	Definition of the sustainability ambition and validation of the roadmap. Oversight of all environmental matters including climate change, biodiversity and land rehabilitation, circular economy, management of waste, water conservation, pollution prevention	[ESRS 2 GOV-1], section 1.1.2.1
Ethics Committee	Antibribery, antitrust, Duty of Care, international sanctions, personal data protection and protection of whistleblowers	ESRS [G1-1, G1-3], section 1.4.1.3 & 1.4.1.4
Health and Safety Committee	Occupational health & safety of Imerys employees, non-employees and other workers	[ESRS S1], section 1.3.1.4
Climate change Committee	Climate change mitigation and adaptation	[ESRS 2 GOV-3 - E1], section 1.2.2.1
DE&I Committee	Diversity, equity and inclusion encompassing gender and nationality equity, disability, and inclusion awareness for minority and/or vulnerable populations	[ESRS S1-1], section 1.3.1.5
Product Stewardship Committee	Product safety of consumers and/or end-users	[ESRS S4-1], section 1.3.4.2
Sustainable Purchasing Committee	Responsible purchasing encompassing environmental, social and business ethics management of the suppliers	[ESRS S2], Vigilance Plan Part II

SustainAgility Operational Committee

The SustainAgility Operational Committee helps to build on the progress achieved over the past years and to accelerate the implementation of a consistent and comprehensive approach to sustainability. This SustainAgility Operational Committee, chaired by the Group Chief Sustainability Officer and composed of functional leaders as well as sustainability directors and sponsors of each Business Area, is responsible for coordinating the implementation of the SustainAgility program.

SustainAgility organization in the Business Areas

Sustainability program implementation is within the operational responsibility of each Business Area, which works with its sustainability experts and the sustainability department to set business area specific targets in line with Group policies and objectives.

Board members sustainability competencies and training

The process for evaluating Board members skills and expertize is described in section **Chapter 4, section 4.1.1, paragraph *Expertise and experience of Board members* of the Universal Registration Document.** The specific skills and competencies of Board members related to sustainability matters are presented in the **table below**, based on their self-assessment. This evaluation encompasses material impacts, risks and opportunities on environmental (including climate change and biodiversity and ecosystems), social and governance topics.

The training of Board members is an ongoing process. Access to targeted online training via Imerys Learning Hub is promoted to Directors on the following main themes: environmental management, climate change, biodiversity, and ethics and compliance. In addition to online training courses, a dedicated 2-hour climate training session was organized in 2024, in which seven Board members participated. Furthermore, several Directors have indicated that they attended training courses during the year in particular related to climate change and business ethics.

Sustainability skills / experience	Social / Human Resources	Ethics and Business Conduct	Corporate Governance	Climate change	Biodiversity and ecosystems

1.1.2.2. Information provided to and sustainability matters addressed by the administrative, management and supervisory bodies [GOV-2]

Consideration given by the Board, its Committees and by the ESG Referent Director to sustainability issues - Activities in 2025

During 2025, the main responsibilities and work handled by the Board, its Committees and the ESG Referent Director with regard to sustainability matters were as follows:

Board and/or Committee	Summary of sustainability related work addressed during the reporting period
Board of Directors	Review of key sustainability performance indicators at the end-2024
	Review of the results of the double-materiality analysis update concerning the potential and actual impacts as well as financial risks and opportunities
	Review of progress of the sustainability roadmap and associated medium-term objectives to 2025
	Review and validation of the 2024 Climate Transition Plan as updated
	Review and validation of the new 2026-2030 SustainAgility roadmap
Strategy and Sustainability Committee	Review of the Group water analysis and roadmap
	Review of the Group sustainability performance benchmark
	Review of the Group low carbon electricity strategy
	Review of climate change mitigation performance and action plans
Audit Committee	Review of the 2024 Sustainability statement and non-financial auditor report and statement
	Review of the 2025 Sustainability statement advancement
	Review of the auditor's mission, report and statement for 2025
Compensation Committee	Review and validation of sustainability performance criteria and targets (including climate-related) applicable to (i) annual variable compensation of the Chief Executive Officer, and (ii) the long-term performance share incentive for members of the Group's Executive Committee, in line with the SustainAgility roadmap
Appointments Committee	Review of the sustainability-related skills and expertise of Board members as part of the annual Board evaluation.
ESG Referent Director	Review and coordination of the presentation of all sustainability topics to the Board and Committees

Consideration given by the Executive-level Committees to sustainability issues - Activities in 2025

Executive-level committees	Summary of sustainability related work addressed during the reporting period
Sustainability Committee	Review of key sustainability performance indicators at the end-2024
	Review and validation of CSRD implementation timeline and progress
	Review of the results of the double-materiality analysis update concerning the potential and actual impacts as well as financial risks and opportunities
	Review and validation of the 2024 Climate Transition Plan and review of the climate change mitigation and adaptation plan performance and action plans
	Review of progress of the sustainability roadmap and associated medium-term objectives to 2025 as well as detailed review of circular economy, environmental management system, and associated roadmap progress, including water, biodiversity etc.
	Review of internal sustainability initiatives (SD Challenge planning and results)
Risk Committee	Review and update of the Group risk map
Ethics Committee	Review of compliance program implementation
	Review and validation of Duty of Care program and publication of the Group Vigilance Plan
Health and Safety Committee	Review of health and safety performance, program key initiatives, audit findings
	Review and validation of health and safety roadmaps for 2026-2030
Climate Change Committee	Review of GHG emission reporting, climate workstream planning and progress
	Review of climate project pipeline and associated Capex and Opex
	Review of Climate Transition Plan
	Review of climate physical and transitional risk assessment results
Diversity, Equity & Inclusion Committee	Review of diversity, equity and inclusion program performance
	Review of progress on priority action implementation
	Review and validation of diversity, equity and inclusion roadmaps for 2026-2030
	Review and validation of communication and training campaigns
Product Stewardship Committee	Review of program implementation and prioritization of actions
	Review of responsible purchasing program performance
Sustainable Purchasing Committee	Review and prioritization of supplier audit program
	Review and validation of responsible purchasing roadmap for 2026-2030
	Review of GHG emission Scope 3 estimation methodology and reporting
	Review of progress on Scope 3 emission reduction initiatives and prioritization of actions

1.1.2.3. Integration of sustainability-related performance in incentive schemes [GOV-3]

Note : the key characteristics of incentive schemes, the specific targets, the inclusion of sustainability-related performance metrics in remuneration policies as well as the approbation process are described in sections 4.3.1 and 4.3.2 of the Universal Registration Document.

The variable compensation of the Chief Executive Officer and the members of the Executive Committee is based partly on sustainability performance indicators, and included in remuneration policies. These indicators are all specific to Imerys except KPIs related to climate change and percentage of women within the Executive Committee. The compensation structure for executive officers is consistent with the structure that applies to the Group's main managers, comprising fixed compensation and variable compensation (annual and long-term).

The aim is to align the compensation with the Group's strategy, of which sustainability is an integral part. This approach applies to both short- and long-term variable plans, with sustainability indicators linked to environmental, social and governance objectives set in line with the targets of the Group's SustainAgility program.

In 2025, the short-term incentives (STI) included in the annual variable compensation of the Chief Executive Officer are linked to 10 specific sustainability objectives and targets. The long-term incentive (LTI) plan is linked to 6 specific sustainability objectives and targets, all of which are strictly aligned to the Group public commitments and targets.

The number and specific nature of sustainability criteria for 2026 as well as the overall weigh, applicable to both STI and LTI, have been reviewed by the Compensation Committee and are presented in greater detail in section 4.3 of the Universal Registration Document.

Methods for assessing achievement of performance criteria set out in annual variable compensation (STI)

In 2025, the quantifiable sustainability performance criteria, accounting for **15% of annual variable compensation**, were taken from the Group's "SustainAgility" roadmap (as detailed in section 1.1.4.2, paragraph *"Imerys' Sustainability Roadmap"* of the present chapter). The targets are set in line with the Group's 2025 objectives. The sustainability criteria are set out in greater detail in note (A) available in section 4.3.2.1 of the Universal registration Document.

Methods for assessing achievement of performance criteria for long-term incentives (LTI)

The eligible beneficiaries of the LTI include the Corporate Officer, Executive Committee members and Senior Managers of the Group. It represents 246 beneficiaries in 2025, i.e. 2% of the Group, in the form of performance shares, indexed to the Group's financial and sustainability performance targets.

The 2025 performance share plan incorporates quantifiable criteria relating to the Group's financial performance and sustainability performance. The quantifiable sustainability performance criteria include a climate criterion as well as other sustainability targets and are defined in accordance with the objectives of the Group's SustainAgility roadmap. In the 2025 plan, these criteria account for 15%.

1.1.2.4. Statement on due diligence [GOV-4]

The table below presents the mapping of the main aspects and steps of due diligence of the information provided in the present report.

Core elements of due diligence	Reference section and related disclosure requirements
Embedding due diligence in governance, strategy and business model	– Section 1.1.2.1 [ESRS 2 GOV-1] – Section 1.1.2.2 [ESRS 2 GOV-2] – Section 1.1.2.3 [ESRS 2 GOV-3] – Section 1.1.4.2 [ESRS 2 SBM-3]
Engaging with affected stakeholders in all key steps of the due diligence	– Section 1.1.2.2 [ESRS 2 GOV-2] – Section 1.1.3.2 [ESRS 2 SBM-2] – Section 1.1.4.1 [ESRS 2 IRO-1]
Identifying and assessing adverse impacts	– Section 1.1.4.1 [ESRS 2 IRO-1] – Section 1.1.4.2 [ESRS 2 SBM-3]
Taking actions to address those adverse impacts	– Section 1.2.2.4 & 1.2.2.5 [ESRS E1-3] – Section 1.2.3.3 [ESRS E2-2] – Section 1.2.4.3 [ESRS E3-2] – Section 1.2.5.4 [ESRS E4-3] – Section 1.2.6.3 [ESRS E5-2] – Section 1.3.1.4, 1.3.1.5 & 1.3.1.6 [ESRS S1-4] – Section 1.3.2.5 [ESRS S2-4] – Section 1.3.3.6 [ESRS S3-4] – Section 1.3.4.3 & 1.3.4.4 [ESRS S4-4]
Tracking the effectiveness of these efforts and communicating	– Section 1.2.2.4 & 1.2.2.5 [ESRS E1-4] – Section 1.2.3.4 [ESRS E2-3] – Section 1.2.4.4 [ESRS E3-3] – Section 1.2.5.5 [ESRS E4-4] – Section 1.2.6.4 [ESRS E5-3] – Section 1.3.1.4 & 1.3.1.5 [ESRS S1-5] – Section 1.3.2.6 [ESRS S2-5] – Section 1.3.3.7 [ESRS S3-5] – Section 1.3.4.5 [ESRS S4-5] – Section 1.7 [ESRS 2 MDR-M]

Before proceeding with any acquisition, the Group carries out due diligence on the sustainability practices of the Company in question in accordance with the Group Merger & Acquisition (M&A) policies and procedures. The due diligence process covers business, legal, compliance, financial and tax, operational, purchasing, IT, human resources, environment, health and safety, climate and local stakeholder topics. Through this process the Group aims to assess that the Company's business is consistent with Imerys' social and environmental commitments and that its practices are in line with the Group's sustainability roadmap. The process is carried out under the responsibility of topic owners, by means of questionnaires, interviews, document reviews and site audits, where necessary.

The review of the findings are coordinated by a due diligence task force. They are included in the target's assessment and taken into account when deciding whether or not to proceed with the acquisition. The process of approval and internal authorization levels for such decisions are defined in the Group Management Authority Rules. The results of the due diligence process are also taken into consideration when developing the integration plan upon the successful closure of an acquisition.

The companies acquired in 2025 are described in Chapter 6, note 1 "Significant items for the period" of the Universal Registration Document.

1.1.2.5. Risk management and internal controls over sustainability reporting [GOV-5]

Risk oversight & control mechanism

Imerys has disclosed its sustainability performance publicly for more than 10 years and commissioned a third party auditor to perform annual verification, ensuring a self-evaluated **compliance-based maturity level**[1] of the disclosed information, with a limited assurance over the sustainability report.

The Group applies a risk management framework and internal control systems based on the application guide published in 2010 by the French financial markets authority (Autorité des marchés financiers, AMF). The Imerys risk management and internal control systems cover all controlled entities in the Group's scope of consolidation, including newly acquired companies. By implementing this system across all its businesses, Imerys ensures it has the governance, policies, procedures, means, and behaviors needed to manage the different risks related to operating, industrial, environmental, health and safety, human resources and other topics that are efficient and effective.

In addition, Imerys works to continuously improve the quality and accuracy of its reporting. The reporting process with data contributors and validators, as well as the annual automatic checks and comparisons in Imerys' internal reporting platforms, enables the Group to verify data quality internally on an ongoing basis. Processes for data consolidation and quality control ensure the reliability and auditability of the reporting.

√ *For more information on risk management and internal control,* refer to section 2.2 of the Universal Registration Document.

Reporting internal control framework

In the short term, the Group plans to implement a **risk-based** approach to govern sustainability reporting, which shall consist of the implementation of:

- an internal control strategy applied across the sustainability reporting framework;
- a risk-based approach to sustainability metrics supported by internal controls in the data collation process; and
- proper documentation of both regulated (mandatory) and unregulated (voluntary) metrics.

The goal in the midterm horizon is to implement an **integrated** system of internal controls based on the internationally recognized COSO (Committee of Sponsoring Organizations of the Treadway Commission) framework. This strategic initiative aims to integrate sustainability controls seamlessly into the Group's risk management and governance structure.

In 2025, Imerys took a significant step forward in its sustainability journey by defining a set of immediate and priority actions for phased implementation towards 2030. Imerys plans to establish an internal control roadmap in 2026, charting its course through to 2030. This roadmap will be built using a methodology ensuring alignment with global best practices and emerging sustainability reporting standards. By adopting this structured approach, Imerys aims to enhance the reliability, accuracy, and transparency of its sustainability disclosures. The phased implementation strategy allows for flexibility and continuous improvement, enabling the Group to adapt to changing regulatory landscapes and stakeholder expectations.

Risk assessment

Scope prioritization

This Sustainability Statement covers a broader scope of information compared to Non-Financial Performance Statements prior to 2024, and its preparation has involved many functional departments of the Group such as Finance, Human Resources, Sustainability, Legal, IT, Purchasing and Mining Resource & Planning. Some information has also required the collection of data across the organization, from site level to Corporate level. Therefore, the heterogeneity of materiality of topics, the ownership structure, the reporting structure and the use of the information has required prioritization of internal controls implementation.

The risk analysis undertaken in 2024 was applied in priority on **quantitative, mandatory and material** indicators. The materiality of information was determined through the double materiality analysis in accordance with the CSRD requirements. Alignment between this analysis and the Group's risk mapping was carried out to ensure consistency between the two approaches. The methodology used for the double materiality assessment is described in the disclosure requirement [IRO-1] of the present chapter, while the results of the Group risk mapping are presented in chapter 2 section 2.1.1 and section 2.1.2 of the Universal Registration Document.

1 The compliant-based maturity level refers to the definition provided by KPMG in p5 of the document "strengthen internal controls to navigate the "SOXification" of ESG reporting", published in 2023.

Risk assessment criteria

Each of the topical categories mentioned above were assessed at Group level according to the following criteria :

- **Breakdown of existing versus new indicators :** the implementation of new indicators is more likely to result in reporting errors compared to historical indicators for which training, experience, tools, and internal controls exist.
- **Breakdown of centralized versus decentralized indicators** : due to the significant number of sites included in the reporting for some indicators, the collection of primary data at decentralized level is subject to uncertainties compared to indicators collected centrally.
- **Internal and external usage of indicators, covering the risk of fraud :** some indicators used directly or indirectly in Sustainability-Linked Bond(s) (SLB), short term or long term incentive schemes, and other public commitments are potentially subject to specific risks, including fraud risks, and therefore require reinforced internal controls.
- **Historical findings of audits** : the self-assessment surveys and external verifications performed within the last few years provide a basis and a good understanding of the current maturity of the reporting. It gives a clear view on categories for which the accuracy of the reporting is satisfactory and the ones which require additional internal controls.

Outcomes of the risk assessment

The results of the risk assessment highlighted the following conclusions :

- Due to the significant number of sites within the Group's consolidated perimeter, the major risk of uncertainty and reporting errors on decentralized information is located in the **upstream reporting process**, from data collection step prior to the reporting into dedicated IT systems.
- Around **70% of the quantitative requested information is reported through a unique IT system** specifically developed for the purpose of collecting and consolidating the operational data. Ensuring a good administration of the platform is key to reducing risks of errors and fraud.
- While the Group operates ~150 sites across the world**, a reduced number of sites generally account for more than 80% of the consolidated value at Group level**. Therefore, a close monitoring of the reporting of these sites significantly increases the accuracy of the reported indicators.
- Certain **highly material topical categories are more sensitive to errors and potential fraud risks**, based on all criteria mentioned above. They must therefore be subject to specific priority monitoring through appropriate and dedicated internal controls. The concerned categories are in order of priority: energy & GHG emission, water, health & safety and human resources data.

Taking action to reinforce control measures

Concrete improvements of the internal control framework have been progressively implemented over the last few years.

Since 2023, a yearly automated control measure is performed to identify potential discrepancies in the reporting by comparing data from the current year with data from the past period. If the variation is above the defined threshold[1], it triggers a deeper analysis at centralized level and a justification at site level. The priority status of this request depends on the contribution to the Group value.

In 2024, two internal experts were appointed as internal control referents for the sustainability department and ensure the communication of the findings with relevant internal functions when necessary. Quarterly reporting of the major indicators is presented to the Sustainability Committee and bi-annual updates on reporting are made to the Board Audit Committee.

In 2025, one of the key measures taken to strengthen the internal control framework has been to progressively formalize the roles and responsibilities of stakeholders involved in collecting and validating sustainability information, using a RACI matrix (Responsible, Authority, Consulted, Informed). This clear definition of roles helps ensure accountability and effective communication among all parties. The defined roles and responsibilities are being progressively integrated into reporting policies.

The Group focused its efforts in 2025 on improving reporting on the relevant energy data and new initiatives have enhanced the energy reporting system (and GHG emissions indirectly). One of the main enhancements concerns the introduction of over 60 new control indicators to improve the reliability and traceability of data across different energy flows. These indicators compare input quantities (flows) with corresponding energy consumption values to highlight discrepancies, thereby strengthening internal controls and promoting consistent sustainability reporting. This initiative is part of a broader effort, coordinated by the Sustainable Energy team, to improve the transparency and accuracy of energy data management within the organization.

Within the next few years, the Group will pursue its effort to improve its internal control environment dedicated to sustainability reporting based on a continued analysis of risks, lessons learned from audit findings, reinforced documentation and dedicated internal controls through a structured roadmap toward 2030.

1 For the year 2025, a threshold of ±15% variation was established in comparison to the previous year's figures. This range allows for a reasonable fluctuation in performance metrics, while still maintaining accountability and tracking progress effectively.

1.1.3. A clearly defined sustainability strategy

1.1.3.1. Strategy, business model and value chain [SBM-1]

Note : Chapter 1 of the Universal Registration Document provides more information related to the strategy of the Group, its business model, and its product offering as presented in the disclosure requirement [SBM-1].

Vision & ambition

The growing demand for the minerals that are essential to peoples lives, homes and economies means pressure on natural systems. The Group's purpose and core values are presented in Chapter 1, section 1.1.2 of the Universal Registration Document, and in full alignment with this Imerys aims to extract and transform minerals and materials responsibly over the long term and deliver sustainable solutions that benefit society.

The Group is committed to playing a role in society, to meeting its obligations to the countries and communities within which it does business, to acting as a responsible environmental steward and to contributing to sustainable development through its operations and portfolio of solutions.

In 2018, the Group launched its sustainability program, SustainAgility. The SustainAgility program was developed with due consideration for the 2030 Agenda for Sustainable Development[1] and major international framework agreements such as the United Nations Guiding Principles on Business and Human Rights, the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and the International Labour Organization (ILO) Fundamental Conventions.

The SustainAgility program is articulated around three axes:

Empowering our people

Making sure employees stay healthy and safe, safeguarding human rights and labor practices, nurturing talent, promoting diversity, equity and inclusion and engaging with local communities

Growing with our customers

Behaving ethically, operating fairly, ensuring responsible purchasing, and advancing sustainable products and processes.

Caring for our planet

Protecting the environment, promoting natural resources efficiency, respecting biodiversity and acting on climate change.

SustainAgility articulates the Group's comprehensive approach to doing business in a way that creates value for internal and external stakeholders. This approach is supported by a series of dedicated programs that are developed and rolled-out in an iterative fashion. The ultimate goal to be achieved through SustainAgility is to further embed sustainability within the Group strategy and drive systematic continuous improvement of environmental, social and economic aspects in all Group activities, thereby continuing to reduce risks, create new opportunities and build capacity for long-term shared value creation to Unlocking Better Futures.

A continuous improvement approach, new projects, and scientific studies continue to be developed and deployed based on a reinforced framework of solid policies, procedures, improved tools, training, as well as a series of maturity matrices against which Group sites are assessed and based on which action plans are developed.

1 *The 2030 Agenda for Sustainable Development, with the Sustainable Development Goals (SDGs) at its core, was adopted by Member States of the United Nations in September 2015. The 2030 Agenda is a commitment to eradicate poverty and achieve sustainable development by 2030 worldwide.*

Key milestones in Imerys' sustainability journey

2004
First edition of the SD Challenge

2008
First publication of an annual Sustainability report

2016
Imerys became a signatory member of the United Nations Global Compact

2017
The Group became a signatory of the French Business Climate Pledge

2018
Launch of the SustainAgility program

Imerys joined act4Nature

2019
Climate change strategy aligned with 2°C trajectory validated by the SBTi

2020
Launch of the first midterm sustainability objectives (2020-2022)

2021
Signature of the Women's Empowerment Principles (UN WEPs)

Integration of a Sustainability-Linked Bonds (SLBs) in its financing strategy

2022
Unveiling of the Purpose, Vision and Values

Public commitment toward climate change strategy aligned with 1.5°C trajectory

2023
Launch of the new midterm sustainability objectives (2023-2025)

2nd SLB issued

Climate change strategy compatible with 1.5°C trajectory validated by the SBTi

Scope 1, 2 & 3 targets in tCO_2eq

2024
Publication of the 1st climate change transition plan

Imerys submitted its new Act4nature commitments

2025
Publication of the 1st biodiversity report

Publication of the 2nd climate change transition plan

Contribution to the UN Sustainable Development Goals

In 2016, Imerys became a signatory member of the United Nations Global Compact (UNGC) and has committed to supporting and basing its business approach on the 10 Principles of the UNGC derived from the Universal Declaration of Human Rights, the International Labour Organization's Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development, and the United Nations Convention Against Corruption. In accordance with these Principles, the Group is committed to publishing its annual Communication on Progress (COP).

In September 2015, 193 Member States of the United Nations adopted 17 Sustainable Development Goals (SDGs) with the aim to end extreme poverty, protect the planet and ensure prosperity for all within a new universal agenda. Imerys supports the ambitions of this global program and has duly identified within the SustainAgility program policies and practices within its operations that directly or indirectly contribute to the

The Group is specifically focusing on making a direct and material contribution to the nine SDGs listed below, which indirectly also contribute to the rest of the other SDGs.

Within this chapter, the Group's sustainability commitments, objectives and targets for 2025/2030, are presented in the context of continuous progress made toward the UNGC Principles and the nine UN SDGs that Imerys is focused on. The numbers in the table below refer to the specific UN defined SDG targets where Imerys' own objectives, programs and targets may contribute to the collective goals.

1.1.3.2. Interests and views of stakeholders [SBM-2]

Fostering constructive dialogue and engagement

The Group depends on the solid long-term relationships it develops with its key stakeholders, respecting the countries, communities and environments where it has operations across the globe. As such, Imerys considers itself accountable to a wide variety of stakeholders, both internal and external. Identifying stakeholders and gaining an understanding of their needs and expectations is a critical step to foster constructive dialogue and engagement.

The list of stakeholder groups with which Imerys engages in various capacities across the globe includes, but is not limited to: customers; employees and employee representative bodies; government authorities; local communities; non-governmental organizations (NGOs) and associations; rating agencies, experts and analysts; scientific research and educational institutions; shareholders, investors and banks; and suppliers and subcontractors.

The interests and views of Imerys' stakeholders provide rich insights to guide the development of the Group strategy, as well as on local improvement action plans. The double materiality assessment has been conducted in collaboration with Imerys' stakeholders through several means of consultation described in **the disclosure requirement [IRO-1], paragraph *"Stakeholder Engagement"* of the present chapter**. The results are taken into consideration in the determination and review of the Group's strategy in accordance with regulatory requirements. Refer to **section 1.1.4.2, paragraph *"Objectives and performance"* of the present chapter** for more information about the sustainability midterm objectives.

Imerys faces both risks and opportunities in its interactions with the communities surrounding its sites, which need to be continuously identified, assessed and managed. More generally, Imerys contributes to a multitude of regional, national and international economies and through local employment and purchasing, it creates material socio-economic benefits to employees, to suppliers and subcontractors, thus, helping to fight poverty and contribute to sustainable development. Refer to **[ESRS S3] of the present chapter** for more information about local community engagement.

The table below represents the major dialogue channels with stakeholders. It is not exhaustive.

Stakeholder	Main Dialogue Channels	Main Departments Involved
Customers	Co-innovation programs Online publication of environmental information on products Customer meetings Customer service assistance	Quality, Customer service, Science & Technology, Operations, Sales, Sustainability
Educational and scientific research institutions	Partnership programs Research collaboration Internships and research grant projects Sponsorship and charitable projects Employee volunteering	Science & Technology, Human Resources, Sustainability, Operations, Businesses, Finance
Employees & employee representative bodies	Periodic employee satisfaction survey Regular communication and dialogue (in-person and digital) Social dialogue with employee representation bodies Communication on Progress *via* the United Nations Global Compact	All functions, Communications, Human Resources
Government authorities	Periodic meetings with public authorities, legislators Contribution to public policy through open consultations (via professional associations)	Sustainability, Legal, Operations,
Local communities	Consultation meetings Community programs Open days Grievance mechanisms	Sustainability, Operations, Human Resources
NGOs & associations	Consultation meetings Local and national partnerships Employee volunteering	Sustainability, Health and Safety, Operations
Rating agencies, experts & analysts	Quarterly conference calls analysts to present financial and sustainability information Response to non-financial rating questionnaires Periodic meetings to discuss performance	Sustainability, Finance, Investor Relations
Shareholders, Investors & banks	Capital Market Day Quarterly press release and conference calls with investors and analysts to present financial and sustainability information Regular meetings with shareholders and institutional investors to present strategic developments	Finance, Investor Relations, Sustainability
Suppliers and subcontractors	Purchaser/supplier meetings Suppliers' Day Supplier visits and audit Supplier corrective action plans	Purchasing, Science & Technology, Businesses, Operations, Sustainability, Legal

External and internal recognition

Imerys aligns its strategy on key issues under the United Nations Sustainable Development Goals (SDGs) and global climate scenarios in a manner consistent with its business model and global footprint. This holistic approach to sustainability allows the Group to mitigate risks and also brings tangible value added through greater attractiveness to its internal and external stakeholders. The Group's firm commitment to sustainability has been recognized by leading ESG rating agencies. A selection of the non-financial ratings most recently achieved by Imerys is presented below.

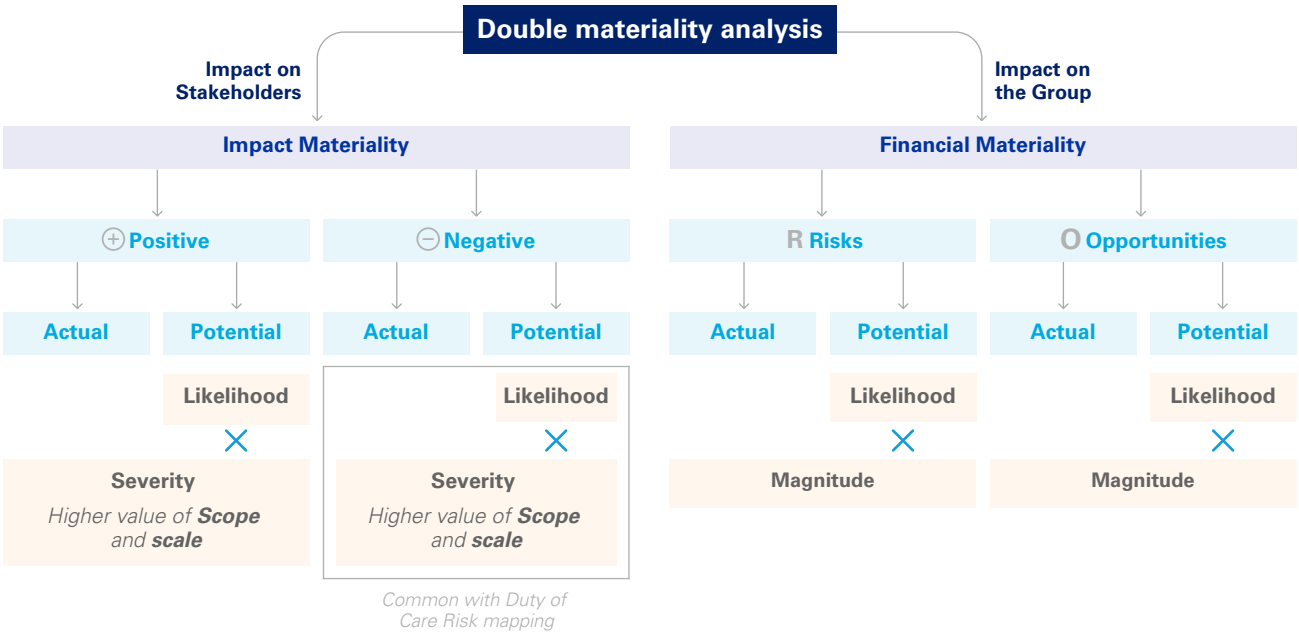

For the past 22 years the Group has been organizing a Group-wide internal competition called the Sustainable Development Challenge (SD Challenge), which gives impetus to developing and sharing best practices, innovations, and technological solutions, each contributing to the Group's sustainability commitments and supporting progress toward several UN Sustainable Development Goals. In total, over 2,681 initiatives have been submitted since the competition was launched. To be considered for the SD Challenge, a project must have made a material contribution to the Sustainable Developments Goals, be aligned with the Group Purpose, Vision and Values, and achieve, together with relevant stakeholders, sustainable results in line with the objectives presented in **section 1.1.4.2, paragraph** *"Objectives and performance"* **of the present chapter**. Imerys is committed to ensuring that the Group SD Challenge continues to inspire greater awareness and understanding of material sustainability themes and continues to support the achievement of the Group's long-term sustainability ambition. Refer to **Chapter 1, section 1.1.1, paragarph** *"Imerys' Purpose, Vision and Values"* **of the Universal Registration Document** for more information about Imerys Purpose, Vision and Values.

1.1.4. Impact, risk and opportunity management

1.1.4.1. Process to identify and assess material impacts, risks and opportunities [IRO-1]

Every year since 2018, the Group has published the results of its materiality assessment, which aimed to identify material negative impacts and risks and was conducted based on the methodological standards available at the time. In 2024, Imerys aligned its double materiality assessment methodology with CSRD requirements and the most recent EFRAG[1] *guidelines for assessing double materiality*[2]. The revised assessment comprises two dimensions as follows:

- The **impact materiality assessment** is to consider the actual or potential, positive or negative, impacts on people and/or the environment over the short, medium and long term, taking into account the Group's operations and value chain. In 2023, the Group focused on revising its process for assessing material impacts on people and the environment in the context of its Duty of Care risk mapping process. In 2024, preliminary work on the negative impact materiality assessment for the Duty of Care-related scenarios was updated and summarized in the Vigilance Plan presented in part II of the present chapter. Additional sustainability-related matters not part of the Duty of Care risk mapping process were also assessed.
- The **financial materiality assessment** considers the risks and opportunities triggering or reasonably expected to trigger financial effects on the Group over the short, medium or long term. The financial assessment is aligned with the **Group risk mapping process** (presented in Chapter 2, section 2.2.3 of the Universal Registration Document), aimed to identify the most material business risks including specific sustainability-related risks, as presented in chapter 2, section 2.1 of the Universal Registration Document.

1 The European Financial Reporting Advisory Group. EFRAG's mission is to serve the European public interest in both financial and sustainability reporting by developing and promoting European views in the field of corporate reporting (source : https://www.efrag.org/About/Facts).
2 The concept of double materiality, as defined by EFRAG, requires that both impact materiality and financial materiality perspectives be applied in their own right without ignoring their interaction.

Identification of sustainability matters

In 2023 and 2024, the list of sustainability matters identifying actual or potential impacts, risks and opportunities was assessed internally by experts from sustainability, compliance and responsible purchasing departments and approved during workshop sessions covering all geographies and business activities as well as the value chain. In addition to the exhaustive list of applicable sustainability matters at topic, sub-topic and sub-sub-topic level as defined in point (24) of Article 2 of Regulation (EU) 2019/2088, the Group considered further topics related to its own activity - and already integrated in previous assessment - as well as themes described in the GRI Sustainability Reporting guidelines.

The list of sustainability matters, called Sustainability Matter Register, includes 41 matters related to Imerys' operations and 12[1] matters related to its upstream value chain. Each Sustainability Matter has been assessed from an impact and financial materiality perspective, following the methodology described below.

Note : in 2025, based on comprehensive benchmark and in alignment with Imerys' Group Risk Map, the potential inclusion of cybersecurity as an entity-specific sustainability issue was thoroughly evaluated. While cybersecurity is not traditionally categorized as a direct sustainability concern, its far-reaching implications can potentially impact both people and the environment.

The causes of cybersecurity risks and the action plans to mitigate them are appropriately detailed in Chapter 2, section 2.1.2 of the Universal Registration Document, and the potential material impacts resulting from these risks are already covered in the present report under relevant sustainability topics.

Impact Materiality assessment

An impact materiality matrix was developed by identifying and hierarchizing the impacts based on their **severity** and **likelihood**. Materiality was determined by defining a threshold based on severity for actual impacts and as a combination of severity and likelihood for potential impacts.

- **The severity** of a risk scenario results from the scale[2] of its impact on people or the environment (as assessed by workshop participants) and the scope of its impact (based either on objective quantitative data reflecting Imerys' risk exposure or internationally recognized country risk indexes[3]).
- **The impact's likelihood** was assessed by workshop participants considering existing controls and current mitigation measures[4]. Qualitative information gathered during workshops was also used to interpret the results, prioritize impacts and design action plans.

The process accounts for all business activities and geographies.

Financial Materiality assessment

In the financial materiality assessment, financial risks related to sustainability matters were identified and assessed in order to determine the potential negative financial impact on the business. Alignment between this analysis and the Group's risk mapping (**presented in chapter 2, section 2.2.3 of the Universal Registration Document**) was carried out to ensure consistency between the two approaches and, in particular, the proper consideration of material sustainability challenges in the Group's risk management. The financial opportunities related to sustainability matters emanate from the Group business strategy presented in **chapter 1, section 1.2 of the Universal Registration Document.**

When scoring financial risks and opportunities, a matrix - integrating a threshold[5] as a combination of the two axes - was drawn considering the potential magnitude of financial effects based on different triggers (including EBITDA, Capex and Opex) and the likelihood of occurrence. The financial risks and opportunities were assessed based on short, medium and long-term time frames and long trends were also discussed.

Stakeholder Engagement

Throughout these steps, discussions were held with subject-matter experts from both the Business Areas and Group functions including Sustainability, Environment, Human Resources, Health, Safety, Purchasing, Legal, Compliance, Risk, Finance. European Work Council members were also involved in the impact assessment. Consolidated overviews of the assessment were presented to and discussed with internal stakeholders and Management.

Consultations to review the double materiality assessment process and results were also held with external stakeholders, such as customers, educational and scientific research institutions, banks, investors and shareholders, and peers from the mining industry.

The results of the double materiality assessment were validated by the Executive Committee and the Strategy and Sustainability Committee.

1 In 2025, Occupational Health and Occupational Injury in the upstream value chain were merged into a single impact scenario due to the interconnected nature of these two aspects of workplace safety and health, while also recognizing the challenges in conducting a more granular analysis due to data constraints. Therefore, the number of matters has decreased from 13 in 2024 to 12 in 2025.
2 Scale is defined in such a way to include Remediability (ex: whether the victim could be restored to an equivalent position before the event causing the impact occurred).
3 *Indexes include, but are not limited to, the Yale University Environmental Performance Index, the International Labour Organization Child Labour Index, the Global Slavery Index, the Ecovadis Country Risk Score, the World Resources Institute Aqueduct Index.*
4 The assessment of an incident's actual impact severity takes into account mitigation activities implemented before and during the event, such as pollution containment or immediate operational cessation. These measures are evaluated based on their effectiveness in mitigating the impact or its severity, influencing the overall assessment of the incident.
5 For the 2025 assessment, Imerys established a materiality threshold for risks and opportunities at 1% of the Group's 2024 EBITDA, which remains unchanged compared to 2024 assessment.

Update 2025 of the double materiality assessment

The DMA performed should be sufficiently robust and proportionate to capture the possible changes from the previous period, including in the value chain. Therefore in 2025, Imerys conducted an update of its DMA both in terms of methdological aspects and result, following the steps described hereafter. By combining three approaches, the Group efficiently refined its DMA, ensuring that its sustainability strategy remains aligned with the most current and relevant issues affecting both the Group and its stakeholders. The updated results are presented in **disclosure requirement [SBM-3] of the present chapter.**

1. Challenging existing result

This step entailed thoroughly examining the results, involving discussions with the original experts or a panel of new experts to validate or adjust the level of materiality based on any shifts in perspective or new information that has come to light since the last assessment. To accomplish this, the following steps were implemented:

Sustainability matters list

Imerys undertook a thorough evaluation of the Group's existing sustainability matters list to ensure its completeness and relevance, drawing insights from a benchmarking exercise against industry peers.

The comprehensive review process confirmed the robustness of Imerys' initial sustainability matters list, as no additional topics were identified for inclusion.

Impact description and characteristics

This steps consits in the reassessment of impact, risk, and opportunity descriptions through a detailed review of each element, including the verification of time horizons and probability assessments associated with various impacts and risks. The Group examined all descriptors to guarantee they accurately reflect current conditions and future projections.

The review process resulted in only minor adjustments to the 2024 assessment. These refinements, where applicable, are indicated in the table of Impacts, Risks, and Opportunities (IRO) presented in the **disclosure requirement SBM-3** below.

Scales and thresholds review

Imerys conducted a review of its scales and thresholds to ensure their continued relevance and accuracy. This process involved a thorough reevaluation of existing scales, with particular attention given to updating magnitude metrics, especially those based on EBITDA.

A bias was identified in the scales used for assessing the severity and likelihood of both negative and positive impacts, that were not aligned with the thresold scale. This discrepancy led to an overestimation of the impact materiality for various sustainability matters. As a consequence, all impact materiality scores were systematically recalibrated. This adjustment has resulted in **the reclassification of certain impacts from material to non-material status** (refer to **discosure requirement [SBM-3]** for more information).

Score recalibration

Internal subject matter experts conducted a critical examination of existing scores and rankings, reviewing each element to identify any potential misalignments. Where discrepancies were found, Imerys reevaluated and adjusted the scores accordingly.

As a result, despite the recent recalibration resulting in water depletion falling just below the materiality threshold, the Group has decided to maintain it as a material matter, recognizing the increasing significance of water-related issues, and alignment with growing global expectations for water conservation.

Impacts that were reclassified from material to non-material status due to the methodological adjustments in scales, as previously described, underwent thorough scrutiny by subject matter experts. After careful consideration, these experts endorsed the reclassification.

2. Identifying new influencing factors

Simultaneously, the Group undertook a comprehensive scan of both internal and external environments to identify any significant events or developments that could potentially impact the current results. This included changes in regulatory landscapes, emerging industry trends, shifts in stakeholder expectations, or internal organizational changes that could alter the materiality of various topics.

After conducting this thorough evaluation, no significant internal or external events have occurred that would materially impact or alter the double materiality assessment results.

3. Benchmark market practices

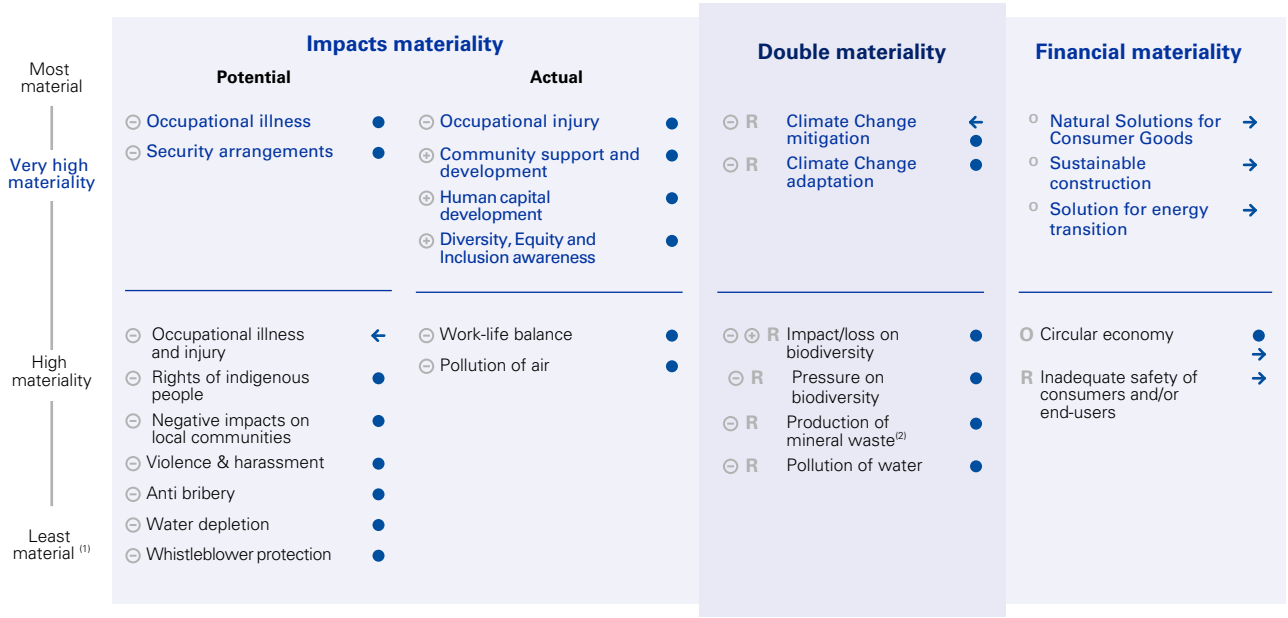

In addition, the Group performed a benchmark review to ensure that the results are aligned with its peers and competitors, as well as industry-leading practices. This benchmarking exercise provided valuable context and helped identify any areas where the Group's assessment may diverge significantly from industry norms or best practices, allowing refinement and validation of the results.

Despite the diverse nature of business activities across industries, the benchmark revealed common patterns emerging in materiality assessments. These patterns reflect global future challenges and the varying maturity levels of different sustainability topics, providing insight into the evolving landscape of corporate sustainability reporting. Imerys' identification of Impact, Risk, and Opportunity topics aligns well with the outcomes of the benchmark analysis.

1.1.4.2. Material impacts, risks and opportunities [SBM-3]

Results of the double materiality assessment

The figure below summarizes the sustainability matters associated with negative (-), positive (+) material impacts, risks (R) and opportunities (O) as per the assessment carried out and updated in 2025 by the Group (described in the previous section).

(1) The non-material topics are not presented in this figure

(2) Sustainability matters specific to Imerys

The 2025 update of Imerys' double materiality assessment has resulted in several refinements and insights, ensuring the present sustainability reporting remains current, accurate, and aligned with industry best practices. A significant outcome of this update was the recalibration of impact materiality scales, which led to a more precise evaluation of the sustainability landscape. This recalibration, along with expert consultations, resulted in a reduction of material Impact, Risk, and Opportunities (IRO) topics from 43 to 34, reflecting a more focused and accurate representation of the most significant sustainability matters. The IROs reclassified as non-material are the following :

- Within **ESRS S1** : inadequate working time, Non-inclusion of persons with disabilities, child and forced labor;
- Within **ESRS S3** : unfair access to land and resource rights, and violation of the civil and political rights among local communities;
- Within **ESRS G1** : opaque political and lobbying activities, and unfair management of suppliers (including payments practices).

Imerys maintains however dedicated policies and implements targeted actions to monitor these topics internally. More detailed information about material impact, risks and opportunities and their localization in the value chain is available in the tables below.

ESRS E1. Climate change

Materiality	Location within the value chain	Description of the IRO	Time horizon[1]
SUB-TOPIC : CLIMATE CHANGE ADAPTATION			
⊖ Potential negative impact	● Own operations (all activities)	Group activities may adversely **affect the adaptation efforts or the level of resilience** to physical climate risks of people and of the environment.	●●● Medium
R Risk	● Own operations (all activities)	The Group may be exposed to **financial risks** due to : 1) increased severity and frequency of **extreme weather events** such as cyclones and floods and/or; 2) **changes in precipitation patterns** and extreme variability in weather patterns.	●●● Short
O Opportunity	→ Downstream value chain	**Solution for energy transition** : the Group's development strategy aims to grow it annual revenue in activities related to solutions for the energy transition.	●●● Medium
O Opportunity	→ Downstream value chain	**Sustainable Construction :** the Group's development strategy aims to grow it annual revenue in activities related to sustainable construction.	●●● Medium
SUB-TOPIC : CLIMATE CHANGE MITIGATION			
⊖ Actual negative impact	● Own operations (all activities)	**Group activities** contribute to climate change through the **release of greenhouse gases** during extraction and processing activities.	●●● Medium
⊖ Actual[2] negative impact	← Upstream value chain (Raw materials, Mining, Energy, Transport, Packaging, Chemicals, Industrial services and General services categories)	The activities of Imerys **subcontractors and suppliers** contribute to climate change through the **release of greenhouse gases**, with varying intensity based on their activity.	●●● Medium
R Risk	● Own operations (Extractive activities)	The Group may be exposed to **financial risks** associated with current or emerging **regulatory requirements**, increasing **tax or carbon quotas**, or **costs of energy** and raw materials in the market, and shifting customer preferences.	●●● Short

1 The time horizons on climate change IROs is described in ESRS 2 [BP-1 & BP-2] of the present chapter
2 Climate Change in the upstream value chain, initially categorized as a potential impact in 2024, has been reassessed as an actual material impact for the Group. This reclassification reflects a more comprehensive understanding of climate-related risks and their immediate effects on Imerys supply chain.

ESRS E2. Pollution

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : POLLUTION OF AIR			
⊖ Actual negative impact	● Own operations (SET[1] and RAC[2] business areas)	Group activities **cause air pollution and may deteriorate local air quality** as a result of the various air emissions generated during production processes.	●●○ Medium
SUB-TOPIC : POLLUTION OF WATER			
⊖ Actual negative impact	● Own operations (all activities)	Group activities **impact water quality** (surface and/or ground) in the event of **accidental release of effluents** containing hazardous substances or suspended matter.	●○○ Short
R Risk	● Own operations (all activities)	The Group may be exposed to **financial risks** related to increasingly **stringent pollution prevention and control requirements** or reputational damage in case of pollution incident or non-compliance with new pollution regulations.	●○○ Short

ESRS E3. Water and marine resources

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : WATER DEPLETION			
⊖ Potential negative impact	● Own operations (all activities)	Group activities **may have an impact on water reserves in the event of inefficient water management** (excessive consumption, withdrawal or lack of recycling), potentially contributing to water scarcity or tension over water availability.	●●● Long

1 SET refers to Solution for Energy Transition as described in chapter 1 of the present report
2 RAC refers to Solutions for Refractory, Abrasives and Construction as described in chapter 1 of the present report

ESRS E4. Biodiversity and ecosystems

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : PRESSURE ON BIODIVERSITY			
Actual negative impact	Own operations (Extractive activities)	Group activities contribute to the **drivers of biodiversity loss**, including land-use change, **introduction of invasive alien species, pollution, and climate change.**	Short
R Risk	Own operations (Extractive activities)	The Group may be exposed to **financial risks** related to increasingly **stringent nature-related regulations and/or requirements**, including rehabilitation, or to reputational damage in case of damage to biodiversity.	Short
SUB-TOPIC : IMPACT/LOSS OF BIODIVERSITY			
Actual positive impact	Own operations (Extractive activities)	Group activities **have positive impacts** on local biodiversity in the event that **rehabilitation and restoration efforts** result in land uses with **greater biodiversity value** than the initial land uses.	Long
Potential negative impact	Own operations (Extractive activities)	Group activities **may have negative impacts on the state of species** and/or on the **extent and condition of ecosystems** as a result of quarrying operations.	Medium
R Risk	Own operations (Extractive activities)	The Group may be exposed to **financial risks** related to increasingly **stringent nature-related regulations** and/or requirements, including rehabilitation, or to reputational damage in case of damage to biodiversity.	Short

ESRS E5. Resource use and circular economy

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : PRODUCTION OF MINERAL WASTE (ENTITY-SPECIFIC)			
Actual negative impact	Own operations (Extractive activities)	Group activities **have negative impacts on resource use in the event of inefficient mineral resources** extraction, generation of excessive mineral waste and/or improper mineral waste management, despite continuous effort on improving processing efficiency	Short
R Risk	Own operations (Extractive activities)	The Group may be exposed to **financial risks** related to **emerging circular economy regulations** and / or increasingly stringent mineral **waste management requirements** or management costs.	Short
SUB-TOPIC : CIRCULAR ECONOMY			
O Opportunity	Own operations → Downstream value chain	The Group's development strategy aims to develop **new business opportunities** linked to the development of products associated with the **circular economy** (resource recovery, circular supply, downstream circularity	Long

ESRS S1. Own Workforce

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : WORKING CONDITIONS			
Actual negative impact	Own operations (all activities)	**Inadequate work-life balance** : Group activities **have negative impacts** on employees in the event that working conditions **prevent employees from balancing their work and private lives**.	Medium
Potential negative impact	Own operations (all activities)	**Occupational illness** : Group activities **may have negative impacts** on employees in the event that it does not provide adequate protection to employees to prevent occupational diseases.	Long
Actual negative impact	Own operations (all activities)	**Occupational injury** : Group activities **have negative impacts** on employees in the event that it does not provide adequate protection to employees to prevent occupational injuries, life changing accidents or fatalities.	Short
SUB-TOPIC : EQUAL TREATMENT AND OPPORTUNITIES FOR ALL			
Actual positive impact	Own operations (all activities)	**Human capital development and local economic benefits** : Group activities **have positive impacts** on local employees as through **training and skills development** employees gain new competencies, professional experiences, career opportunities and increased lifetime earning potential as a result of their employment with Imerys. Indirectly this **contributes to local, regional and/or national economies** and can likewise **support the development of infrastructure in remote areas** given that most Imerys sites are located away from main employment areas where employment options are relatively limited.	Short
Actual positive impact	Own operations (all activities)	**Diversity, equity and inclusion awareness** : Group activities **have positive impacts** on local employees and local communities as through proactive diversity, equity and inclusion programs inclusion **awareness for minority and/or vulnerable populations may increase amongst employees as well as local communities.**	Short
Potential negative impact	Own operations (all activities)	**Violence and harassment** : Group activities **may have negative impacts** on employees in the event that it **neither prevents, nor sanctions violence and harassment** in the workplace.	Medium

ESRS S2. Workers in the value chain

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : OCCUPATIONAL ILLNESS AND INJURY[1]			
Potential negative impact	Upstream value chain (Raw materials, Mining, Energy, Transport, Packaging, Chemicals, Industrial services and General services categories)	The activities of Imerys subcontractors/suppliers **may have negative impacts** on their employees in the event that they do not provide adequate protection to employees to **prevent occupational diseases or occupational injuries, life changing accidents or fatalities.**	Short

1 In 2025, Occupational Health and Occupational Injury in the upstream value chain were merged into a single impact scenario due to the interconnected nature of these two aspects of workplace safety and health, while also recognizing the challenges in conducting a more granular analysis due to data constraints.

ESRS S3. Affected communities

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : COMMUNITIES' ECONOMIC, SOCIAL AND CULTURAL RIGHTS			
⊕ Actual positive impact	● Own operations (all activities)	**Community support and development** : Group activities **have positive impacts** on local communities through local stakeholder engagement programs, **community development initiates and donations** focused on education and skill development, environmental stewardship, social development, health, and culture.	●○○ Short
⊖ Potential negative impact	● Own operations (all activities)	**Negative impacts on local communities** : Group activities **may have negative impact**s on local communities in the event that it **fails to adequately manage environmental or social topics**, communicate effectively or remediate negative impacts	●○○ Short
⊖ Potential negative impact	● Own operations (all activities)	**Inappropriate security arrangements** : Group activities **may have negative impacts** on local communities in the event that security arrangement for employees and physical assets do not respect the human rights of local populations	●●○ Medium
SUB-TOPIC : RIGHTS OF INDIGENOUS PEOPLES			
⊖ Potential negative impact	● Own operations (Extractive activities)	Group activities **may have negative impacts** on local communities in the event that it **does not respect the rights of indigenous people** and/or communities near its sites	●●● Long

ESRS S4. Consumers and end-users

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : SUSTAINABLE PORTFOLIO			
O Opportunity	→ Downstream value chain	**Natural Solutions for Consumer Goods** : the Group's development strategy aims to **grow it annual revenue** in activities related to natural solutions for consumer goods	●●● Long
SUB-TOPIC : INADEQUATE SAFETY OF CONSUMERS AND/OR END-USERS			
R Risk	→ Downstream value chain	The Group may be exposed to **financial risks** related to fines, lawsuits, reputational damage, product recalls, potential market value decline and/or **increasingly stringent regulations limiting product sales in particular markets.**	●○○ Short

ESRS G1. Business Conduct

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : INADEQUATE WHISTLEBLOWERS PROTECTION			
⊖ Potential negative impact	● Own operations (all activities)	Group activities **may have negative impacts** on employees or other stakeholders in the event that its internal reporting channels and or **protection of whistleblowers are not adequate or effective.**	●●● Long
SUB-TOPIC : CORRUPTION AND BRIBERY			
⊖ Potential negative impact	● Own operations (all activities)	**Ineffective antibribery compliance program** : Group activities **may have negative impacts** on multiple stakeholders in the event that its **management system** to prevent, detect, investigate and address incidents of corruption and bribery **is ineffective.**	●●● Long

Imerys' Sustainability Roadmap 2023-2025

The results of the materiality assessment conducted in 2022 enabled Imerys to define its strategic 3-year roadmap, focusing on key priorities that align with stakeholder expectations and the Group's long-term sustainability goals. This roadmap is primarily focused on:

- Cultivate a safe, healthy, and inclusive environment
- Sustain business ethics in the whole value chain
- Accelerate the development of sustainable solutions
- Intensify climate change mitigation and adaptation actions
- Mitigate the Group local environmental footprints

In 2024, Imerys conducted a comprehensive update of its double materiality assessment in alignment with the Corporate Sustainability Reporting Directive (CSRD) requirements, as presented in the section above. This rigorous process not only reaffirmed the significance of the existing focus areas within the Group's sustainability roadmap but also highlighted the need to incorporate an additional strategic dimension :

- Fostering sustainable prosperity in local communities

By expanding its Sustainability roadmap to encompass this newly identified strategic area, Imerys further strengthens its approach to sustainable value creation and risk management. This proactive adjustment ensures that the Group's sustainability strategy remains comprehensive, forward-looking, and aligned with both internal objectives and external stakeholder priorities.

Empowering our people

01

Cultivate a safe, healthy, and inclusive environment for our people

02

Fostering sustainable prosperity in our local communities

Growing with our customers

03

Sustain business ethics in the whole value chain

04

Accelerate the development of sustainable solutions

Caring for our planet

05

Intensify climate mitigation and adaptation actions

06

Mitigate our local environmental footprints

01

Cultivate a safe, healthy, and inclusive environment for our people

Health and safety stand as the cornerstone of Imerys' operations, deeply embedded in the Group's Purpose and guiding the daily behaviors and decisions of its workforce. While Imerys has made significant strides in its pursuit of world-class health and safety standards, the Group remains steadfast in its commitment to continuous improvement. To this end, Imerys is cultivating a more robust health and safety culture that permeates every level of the organization. The Group is actively empowering its employees to adopt a proactive stance toward health and safety, encouraging personal responsibility, fostering a culture of mutual care, and prioritizing safety above all other considerations. This unwavering focus on health and safety stems from Imerys' genuine concern for the well-being of its workforce, ensuring that employees can perform their duties effectively while maintaining a high quality of life. Ultimately, Imerys recognizes that a safer working environment directly correlates with enhanced operational strength and efficiency, enabling the Group to excel in its mission of providing essential mineral resources to the global market.

Diversity, Equity and Inclusion (DE&I) are recognized as core Imerys values that empower people to thrive in a safe and inclusive environment. Ensuring a diverse, equitable and inclusive environment is part of the same core value as safety and health and is crucial to the Group's long-term strategy. The Group is committed to nurturing an inclusive culture where every person matters, where differences are appreciated and people listen to each other, unlocking collective potential. Imerys does not tolerate any discrimination in any form toward employees, contractors or candidates for employment. In keeping with this commitment, the Group strictly prohibits sexual or any form of harassment or discrimination of any kind, including gender, age, nationality, religion, sexual orientation, marital, parental and family status, social origin, ethnicity, disabilities, sensitive medical conditions, political or trade union affiliation or any other dimension. The Group is fully committed to accelerating and pursue its efforts in this field.

02

Fostering sustainable prosperity in our local communities

Imerys recognizes effective **community engagement** as a cornerstone of sustainable practices and a key driver of long-term success. The Group's global presence offers a unique opportunity to create lasting, positive impacts in diverse communities worldwide, which is crucial for maintaining its social licence to operate and ensuring operational stability. Imerys employs a systematic approach to community engagement, founded on mutual trust, respect, and constructive partnerships. This approach is characterized by a long-term commitment to creating shared value, informed by a detailed understanding of local needs and sensitivities. The Group's strategy emphasizes transparent communication, measurable impact, and employee involvement, encouraging all members of the Imerys team to contribute to local community initiatives. Through these efforts, Imerys strives to be a responsible corporate citizen, fostering sustainable development and economic growth in the communities where it operates, while aligning with its broader sustainability goals and corporate values.

03

Sustain business ethics in the whole value chain

Imerys is unwaveringly committed to conducting business with the highest standards of integrity, recognizing that ethical behavior is not merely about protecting reputation, but is fundamental to its core operations. The Group acknowledges its obligation to act in an ethical, fair, and transparent manner, actively addressing issues such as corruption, discrimination, and forced labor. Imerys fully embraces its responsibilities to stakeholders and society, **adhering to fair practices** and supporting evolving Duty of Care regulations. This commitment extends **throughout its value chain,** with the expectation that partners, suppliers, and customers align with these principles. The Group's dedication to exemplary business conduct is rooted in the belief that upholding fair operating practices and ethical behavior is essential for maintaining a well-managed, stable business. By tackling these issues head-on, Imerys not only mitigates risks to its business and stakeholders but also positions itself as a leader in corporate responsibility, fostering trust and long-term success in the modern business landscape.

04

Accelerate the development of sustainable solutions

Imerys is fully aware of stakeholder expectations for the Group to reduce the environmental footprint of its products while at the same time providing sustainable solutions aligned with global megatrends. Managing **Portfolio Sustainability** by incorporating environmental and societal criteria contributes to the creation of sustainable business opportunities. With its technological expertise, Imerys is in an excellent position to continuously improve the process efficiency and production methods of its operations. At the same time, the Group's innovation capacity together with its awareness of global megatrends enables it to harness opportunities for new product developments, duly considering sustainability drivers and stakeholder expectations.

05

Intensify climate mitigation and adaptation actions

Imerys recognizes the urgent need for global action to address the climate crisis and is committed to playing a pivotal role in leading the mineral industry's response. The Group has embraced this challenge as both a responsibility and an opportunity, implementing a comprehensive strategy to **combat climate change** across all aspects of its operations. This commitment is manifested through concerted efforts to dramatically reduce greenhouse gas emissions throughout its value chain, develop innovative low-carbon products and solutions for customers, and drive the transition toward a sustainable, low-carbon economy. Imerys' approach is systematic and far-reaching, touching every facet of its business and engaging all employees in this crucial mission.

06

Mitigate our local environmental footprints

Imerys recognizes the unprecedented environmental challenges facing the planet and acknowledges its crucial role in driving positive change within the industrial minerals sector. The Group is committed to responsible environmental stewardship, reimagining its approach to **resource extraction** and utilization to minimize the ecological footprint of its operations, products, and supply chain. This commitment is manifested through the implementation of innovative production methods and optimized mineral deposit usage. Imerys' strategy encompasses a holistic understanding of its impact on natural habitats, ecosystems, **water resources, and air quality**, driving a systematic and transparent approach to environmental care. The Group is actively engaged in **biodiversity preservation and restoration**. Responding to increasing stakeholder expectations, Imerys aspires to lead its sector in environmental stewardship, recognizing this as fundamental to preserving the planet for future generations and ensuring the long-term sustainability of its business.

Objectives and performance

In 2022, the Group defined midterm sustainability objectives based on the double materiality assessment process and results presented in disclosure requirements [IRO-1] and [SBM-3] of the present chapter. These objectives are translated into Imerys-specific quantitative targets to be achieved by 2025 and on targets related to GHG emissions reduction to be achieved by 2030. The Group's sustainability commitments, specific objectives for each of the **sustainability priority themes** as well as the performance indicator and timeline to achieve the objective are presented in the following table and sections together with their alignment to UNGC Principles and the UN Sustainable Development Goals to which they contribute. The Group's sustainability midterm objectives have been translated to objectives by Business Area where appropriate, with a dedicated action plan and monitoring in place. These midterm objectives and targets likewise serve as the basis for individual performance targets linked to variable compensation for the Group CEO, Executive Committee, senior management as well as other managers across the organization. Additional details can be found in chapter 4, section 4.3 of the Universal Registration Document.

Theme	Group Objectives	Baseline	Performance 2025	Target
Empowering our people				
Safety	Improve Group Safety Culture Maturity[1] across all Business Areas	2022 3.0	3.3	2025 3.3
Health	Increase the global Occupational Health action plan improvement rate	2022 0%	93%	2025 75%
Diversity, Equity & Inclusion	Increase the score of the Diversity, Equity & Inclusion Index[2] (including KPIs related to Gender, Nationality, Disability and inclusion)	2022 0%	93%	2025 100%
Local communities	Improve stakeholder engagement by ensuring pilot sites[3] identify and assess potential impacts on local stakeholders as per Group requirements	2024 74%	100%	2025 100%
Growing with our customers				
Ethics and Compliance	Improve the external sustainability rating of the Group compared to 2022 assessment	2022 69%	79%	2025 74%
Responsible Purchasing	Deploy a sustainability rating scheme of Group suppliers (by spend)	2022 53%	75%	2025 75%
Product sustainability	Assess the Products in Application Combinations (PAC) of Imerys product portfolio (by revenue) according to sustainability criteria[4]	2022 55%	78%	2025 75%
	Ensure the Group New Product Developments are scored as SustainAgility Solutions[5]	2022 75%	94%	2025 75%

1 Maturity Level 3 (out of 4) corresponds to Proactive level on the Imerys Safety Culture Maturity Matrix where Imerys Safety System is "fully implemented, employees are engaged and contribute actively".
2 Imerys' Diversity, Equity & Inclusion Index is a composite metric used to track diversity, equity and inclusion across a range of dimensions including gender balance, pay equity, nationality, disability, as well as inclusion.
3 The 23 pilot sites were defined based on the five criteria, including financial, grievance, media, permitting and operational indicators.
4 The Group portfolio is assessed using the SustainAgility Solutions Assessment methodology, which is based on the World Business Council for Sustainable Development's Portfolio Sustainability Assessment framework.
5 Based on the SustainAgility Solutions Assessment framework a "SustainAgility Solution" is a product in an application that has scored within the two highest categories of the four possible categories.

Theme	Group Objectives	Baseline	Performance 2025	Target
Caring for our planet				
Environmental Management	Reduce environmental impacts by assessing the maturity level of sites against environmental management requirements[1]	2022 0%	100%	2025 100%
	Reduce the risk of air pollution by ensuring priority sites[2] define site specific air emission management plans	2024 0%	100%	2025 100%
Natural resources efficiency	Improve water management by ensuring priority sites[3] comply with new water reporting requirements	2022 0%	99%	2025 100%
	Improve mineral resources efficiency by ensuring priority[4] sites (by mineral waste volume) comply with new mineral waste reporting requirements	2022 0%	87%	2025 80%
Biodiversity & land rehabilitation	Reduce impact on biodiversity by filling Imerys Act4nature commitments and conducting biodiversity audits at the priority sites[5]	2022 0%	107%	2025 100%
Climate Change Strategy	Reduce Group Scope 1 & 2 greenhouse gas emissions (tCO_2eq) by 42% by the end of 2030 from 2021 base year ; compatible with a 1.5°C trajectory	2021 0%	-28%	2030 -42%
	Reduce Group Scope 1 & 2 greenhouse gas emissions by 36% relative to revenue (tCO_2eq/€ million) by 2030[6]	2018 0%	-27%	2030 -36%[7]
	Reduce Group Scope 3 greenhouse gas emissions (tCO_2eq) by 25% by the end of 2030 from 2021 base year (from purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting, and investments)	2021 0%	-22%	2030 -25%
	Improve resilience to physical climate risks by assessing Group operations according to climate scenarios and developing adaptation strategies for the three most significant risks	2024 0%	100%	2025 100%

Toward Imerys 2030 sustainability ambition

In 2025, Imerys unveiled its third medium-term sustainability roadmap, marking a significant evolution in its approach since the program's inception in 2018. This new roadmap extends over a five-year period to facilitate more substantial progress, particularly in environmental domains where change often requires longer timeframes. The roadmap's development was underpinned by four key elements:

- A comprehensive update of the double materiality assessment in 2025;
- An extensive benchmark analysis of over 20 companies, including mining sector peers and sustainability leaders, to identify market best practices
- Critical evaluation of lessons learned from the previous roadmap, ensuring continuity and advancement in established focus areas
- A thorough assessment of Imerys' maturity across various sustainability topics, enabling the setting of ambitious yet achievable 5-year targets.

This strategic approach underscores Imerys' commitment to long-term sustainability progress and its agility in addressing evolving environmental, social, and governance challenges. By extending the roadmap's timeframe and grounding it in rigorous analysis and past experiences, Imerys aims to achieve more profound and enduring improvements across its sustainability initiatives. The ten objectives of the roadmap 2026-2030 are presented in the figure below and are further detailed within the dedicated topical sections of the present sustainability statement.

1 Environmental management requirement as defined by Imerys policies and measured by the environmental maturity matrix, which is based on leading international environmental management system standards.
2 The list of priority sites with respect to air emissions is based on (1) Instances where substance threshold exceedances affect more than two sites within the Group (2) sites that exceed the thresholds specified in the European Pollutant Release and Transfer Register (E-PRTR) list.
3 Priority sites refer to water withdrawal and/or discharge > 1 M m^3/year and/or located in extremely high water stress zones.
4 Priority sites for mineral waste are defined by volume.
5 Priority sites for biodiversity audits have been defined as sites with a quarry that extracts more than 1 million tonnes per year, or are located within a radius of 5 km of an area classified as International Union for Conservation of Nature (IUCN) category I, II or III, or are located in a biodiversity hotspot within a radius of 5 km of an area classified IUCN category IV.
6 This objective refers to the SBTi Target from 2019 and is linked to the Sustainability Linked Bond (SLB) issued in 2021, thus even though superceeded in 2023 with a new, more ambitious target, it shall continue to be reported until 2030.
7 The Group has defined an intermediate target to reduce greenhouse gas emissions as a proportion of revenue (tCO_2eq/€ million) by 22.9% by 2025, in line with the initial Group target approved by the SBTi.

EMPOWERING OUR PEOPLE

Objective	2030
Safety Reduce the Group Total Injury Frequency Rate annually	**-5%** vs 2029 **or 2.4**
Diversity & Inclusion (D&I) Increase the Diversity & Inclusion Index score	**100%**
Local Communities Complete the action plans related to local community grievances on time	**100%**

GROWING WITH OUR CUSTOMERS

Objective	2030
Existing Portfolio Sustainability Assess Imerys' existing product portfolio against the ISO Life Cycle Assessment (LCA) standard, using primary data from Imerys operating sites	**80%**
Sustainable Innovation Ensure that New Product Developments launched deliver a sustainability improvement for downstream value chain	**80%**
Responsible Purchasing Ensure core suppliers (by spend) achieve at least a moderate sustainability score	**80%**

CARING FOR OUR PLANET

Objective	2030
Water quality Monitor continuously water quality of priority discharge points	**90%**
Biodiversity Reduce impacts on biodiversity by fulfilling the Group external commitments	**90%**
Climate change	
Reduce Group scope 1 & 2 greenhouse gas emissions (tCO_2eq) from 2021 base year in alignment with a 1.5°C trajectory	**-42%**
Reduce Group scope 3 greenhouse gas emissions (tCO_2eq) from 2021 base year	**-25%**

1.2. CARING FOR OUR PLANET

1.2.1. EU Sustainable Finance Taxonomy

1.2.1.1. Reporting scope

Turnover, Capital Expenditure (Capex) considered for this reporting cover the full array of Imerys' activities and correspond to the scope of consolidation of its financial statements. In accordance with the EU Taxonomy Regulation's materiality exemptions, Imerys has not reported on the Operating Expenditure (OpEx) related to eligible activities for the 2025 period. This decision is based on the fact that the amount of taxonomy-eligible OpEx is considered non-material relative to the Group's consolidated OpEx.

1.2.1.2. Eligibility of Imerys Activities

The analysis of the eligibility of Imerys' activities was carried out with regard to the European Regulation 2020/852 of June 18, 2020 on the establishment of a framework to facilitate sustainable investment within the European Union ("the Taxonomy Regulation") and its subsequent Delegated Acts. For the 2025 fiscal year closing, the Group has opted to apply the provisions of Delegated Regulation (EU) 2026/73 (the RD Omnibus") published on January 8, 2026. In accordance with FAQ1 of the European Commission's guidance issued on December 17, 2025, this choice is explicitely disclosed here as the basis for the current reporting cycle. Consequently, the eligibilty assessment integrates the criteria established by:

- the Delegated Act 2021/2139 of 4 June 2021 and amendment 2023/2485 of 27 June 2023 on Climate Change mitigation and adaptation
- the Delegated Act 2023/2486 of 27 June 2023 on Sustainable use and protection of water and marine resources, Transition to a circular economy, Pollution prevention and control, Protection and restoration of biodiversity and ecosystems.
- the aforementioned RD Omnibus for updated technical and disclosure specifications.

Following the Disclosures Delegated Act framework, the Group has identified two activities as eligible under the Climate Delegated Act: manufacture of carbon black (CCM 3.11) and manufacture of cement clinker, calcium aluminate cement, or alternative binder (CCM 3.7).

Both of the aforementioned eligible activities are considered to contribute significantly to the environmental objective related to climate change mitigation. The Group considers that these two eligible activities do not contribute substantially to the climate change adaptation objective and the Group has therefore focused exclusively on reporting toward the climate change mitigation objective.

As per Article 10 (2) of Regulation (EU) 2020/852, these activities are classified as transitional activities, insofar as they are activities for which there are no technologically and economically feasible low-carbon alternatives, but that support the transition to a climate-neutral economy in a manner that is consistent with a pathway to limit the temperature increase to 1.5 degrees Celsius above pre-industrial levels.

Following an analysis of the activities listed in the Environmental Delegated Act (EU) 2023/2486, the Group evaluated its activities, along with its related CapEx. The Group confirmed that it has no revenue-generating activities that contribute substantially to the four non-climate environmental objectives. Consequently, the CapEx identified as eligible are strictly those associated with the two activities already identified under the Climate Change Mitigation objective.

Manufacture of Carbon Black[1]

Classified under NACE code C20.13, the manufacture of carbon black is an essential component in the value chain to transition to electric vehicles for the mobile energy market. Transitioning to electric vehicles is a key priority in the fight against climate change. Imerys is the leading supplier of highly conductive carbon-based solutions for lithium-ion batteries used in electric vehicles. These value-added solutions contribute to the transition from fossil fuel based energy to sustainable energy, by providing crucial materials that boost energy density and shorten charging times for lithium-Ion batteries.

Manufacture of Calcium Aluminate Cement (Cement clinker, cement or alternative binder[2])

Classified under NACE code C23.51, the manufacture of these products is part of the Refractories, Abrasives and Construction business activity. They support the transition to sustainable construction by providing building chemicals solutions. Building chemicals are experiencing strong growth today, as they reduce the carbon footprint of calcium aluminate cement and concrete – an essential point when the building sector alone represents 40% of CO_2 emissions. Imerys produces calcium aluminates for the building industry, where these additives improve the productivity of concrete, in particular by accelerating its hardening. Imerys also manufactures calcium aluminate-based mortar to protect sewer systems against biogenic corrosion, offering an extended service life, and as a consequence lowering the consumption of raw materials, reducing labor and trucking needs reducing the utility owner's greenhouse gas emissions, as well as reducing asset downtime increasing productivity and lowering the risk for untreated water to be released into the environment.

1 *Section 3.11 of the annex 1 of the Commission Delegated Regulation (EU) 2021/2139 and Appendix II of the Commission Delegated Regulation (EU) 2021/2139.*
2 *Section 3.7 of the annex 1 of the Commission Delegated Regulation (EU) 2021/2139 and Appendix II of the Commission Delegated Regulation (EU) 2021/2139.*

1.2.1.3. Non-eligible Activities – Imerys Mining and Transformation activities

The Taxonomy Regulation defines activities capable of substantially contributing to the six environmental objectives as those having the highest environmental impact. While the initial focus was primarily on climate change mitigation and the reduction of greenhouse gas emissions, the publication of the Environmental Delegated Act has expanded the scope of eligible activities to address broader environmental challenges, including the transition to a circular economy, the protection of biodiversity, and the prevention of pollution. Currently, these include, in particular, the production and sale of energy, means of transport and transportation services, and real estate development and renovation.

Imerys' main activities—mining and quarrying—are not currently listed as eligible under the Climate and Environmental Delegated Acts. In particular, green Capex related to the preliminary studies for Imerys' lithium project in France and in the United Kingdom, are not yet eligible to the European green taxonomy.

However, the June 2019 Taxonomy Technical Report recognized the contribution that the sector must play in meeting the objective of a climate-neutral Europe by 2050 and recommended analysis of the sector's role in the delivery of raw materials in a sustainable and responsible way. As a matter of fact, mineral exploration can provide a significant contribution to the achievement of the European Green Deal. It is considered that mineral exploration, when conducted according to international best practices, can play a significant role in the future sustainability of the continent when measured against the four criteria specified in the Taxonomy Regulation:

- reaching the goals of the Paris Agreement[1] requires a quadrupling of mined mineral raw material required for clean energy technologies by 2040;
- Responsibly conducted mineral exploration of the resource potential has a direct impact on climate adaptation by reducing dependence on trans-global supply chains;
- Recycling may relieve some of the pressure on primary supply. Nevertheless, given increasing demand for mined raw materials recycling will not eliminate the need for continued development of new resources;
- The discovery of resources and development of new mining operations, will, for example, have a global impact on the promotion of best practices and the adoption of the best available technologies.

The Platform on Sustainable Finance (PSF), which succeeded the EFRAG TWG in 2020, provides recommendations to the European Commission on the applicability of Technical Screening Criteria (TSC). In its April 2025 report, the PSF analyzed the potential inclusion of mining activities - specifically for lithium, copper, nickel, and cobalt - as Taxonomy-eligible activities. This alignment with the Critical Raw Materials Act is designed to ensure a secure, sustainable supply of materials essential for Europe's 2030 climate and digital goals.

As such, the Group's mining-related economic activities are not reflected in the financial figures presented below. These figures are likely to evolve in line with the eligibility scope.

√ *For additional details on the sustainable solutions within Imerys' portfolio, refer to* [ESRS S4] of the present chapter.

1.2.1.4. Financial indicators and methodology

In accordance with Article 8 of the Taxonomy Regulation (EU) 2020/852, Imerys' disclosure covers the taxonomy eligibility of the activities described in section 1.2.1.2. For the quantification of eligible activities as well as alignment the revenue and Capex resulting from products or services associated with eligible economic activities have been determined as per the definitions of Annex I of the Delegated Act supplementing Article 8 of the Taxonomy Regulation.

The present chapter quantifies Imerys' activities related to climate change mitigation. The Group's eligible activities have not been reported as substantially contributing to the climate change adaptation objective and are not listed in the eligible activities for the other four environmental objectives, thus there is no risk of double counting of the Revenue and Capex indicators reported below. Likewise, Imerys' two eligible economic activities are separate business activities as indicated above in section 1.2.1.2, and as such there is no risk of double counting of the reported taxonomy KPI.

- **Revenue:** Revenue recognized in accordance with IFRS standard (IAS 1).
- **Capex:** Capex constituting expenses related to eligible activities calculated based on the increases in tangible and intangible assets for the year before revaluation, depreciation and amortization and excluding changes in fair value, goodwill and increases related to business combinations (IAS 16, IAS 38, IAS 40, IAS 41, IFRS 16).

Revenue and capital expenditure presented in this chapter have been retrieved directly from financial statements and reporting systems, without estimations.

- **Revenue and Capex reconciliation with Consolidated Financial Statements**

For the denominator, Group revenue and capital expenditures are reported as per section 6.1.1 of the Universal registration Document.

1 The Paris Climate agreement in 2015 saw 195 of the world's governments commit to prevent the worst impacts of climate change by limiting global warming to below 2 degrees Celsius, often referred to as the "2° C scenario".

Total **Revenue** (numerator) is computed by eligible/aligned activity on the basis of the revenue (excluding intra-group sales) as published in the Consolidated Financial Statements on the "Revenue" line of the consolidated income statement.

The **Capex** (numerator) reported is related to assets or processes that are associated with Taxonomy-eligible/aligned economic activities, and to some Capex plan that will enable some eligible activity to be aligned within 5 years.

The allocation rules applied are:

- For dedicated entities (100% of revenue from eligible activities): all CapEx is included in the numerator.
- For trading entities with only a share of eligible revenue: no CapEx is allocated to the numerator due to the inability to separate the flows.

Only two individual capital expenditure have been identified, related to the transport by motorbike, passenger cars and light commercial vehicles (code 6.5), as well as the Acquisition and ownership of buildings (code 7.7). However, in application of the simplification provisions amended by the 'Omnibus' Regulation, Imerys has not performed an alignment assessment for those capex. This exclusion is justified as these activities are considered non-core to the Group's industrial operations and their aggregate value represents less than 10% (3.7%) of the total capex reported for the period.

The lines in the Consolidated Financial Statements that correspond to the total Capex KPI are included in Note 20 - "Intangible Assets" in line "Acquisitions" of the table of changes and Note 21 "Property, Plant and Equipment" on lines "Acquisitions" and "Acquisition costs and subsequent adjustments".

- **Opex:**

In accordance with the EU Taxonomy Regulation's materiality exemptions, Imerys has not reported on the Opex (Operating expenses) related to eligible activities for the 2025 period. This decision is based on the fact that the percentage of taxonomy-eligible OpEx (7%) is considered non-material relative to the Group's consolidated opex, which amounts to €3,162 million at the end of 2025.

1.2.1.5. Summary of Eligibility and Alignment Key Performance Indicators

Proportion of turnover and Capex from products or services associated with Taxonomy-eligible or Taxonomy-aligned economic activities

(According to Template 1 required by the European Commission in the Annex II of the Annex to the Commission Delegated Regulation (EU) 2021/2178), modified by the Commission Delegated Regulation (EU) 2026/73, as regards the simplification of the content and presentation of information to be disclosed concerning environmentally sustainable activities and Commission Delegated Regulations (EU) 2021/2139 and (EU) 2023/2486 as regards simplification of certain technical screening criteria for determining whether economic activities cause no significant harm to environmental objectives).

Financial Year (N)	2025															
					Breakdown by environmental objectives of Taxonomy aligned activities											
	Total	Proportion of Taxonomy eligible activities	Taxonomy aligned activities	Proportion of Taxonomy aligned activities	Climate Change Mitigation	Climate Change Adaptation	Water	Circular Economy	Pollution	Biodiversity	Proportion of enabling activities	Proportion of transitional activities	Not assessed activities considered non-material	Taxonomy aligned activities in previous financial year (N-1)	Proportion of Taxonomy aligned activities in previous financial year (N-1)
	€M	%	€M	%	%	%	%	%	%	%	%	%	%	€M	%
Turnover	3,383.7	17.6%	375.8	11.1%	11.1%							100%	0.0%	428.7	11.9%
CapEx	350.2	9.3%	19.6	5.6%	5.6%							100%	3.7%	30.0	7.1%
OpEx	222.5														

PROPORTION OF TURNOVER FROM PRODUCTS OR SERVICES ASSOCIATED WITH TAXONOMY-ELIGIBLE OR TAXONOMY-ALIGNED ECONOMIC ACTIVITIES

(According to Template 2 required by the European Commission in the Annex II of the Annex to the Commission Delegated Regulation (EU) 2021/2178, modified by the Commission Delegated Regulation (EU) 2026/73).

Reported KPI			Turnover												
Financial year (N)			2025												
					Environmental objective of Taxonomy aligned activities										
Economic Activities	Code	Taxonomy eligible KPI (Proportion of Taxonomy eligible Turnover)	Taxonomy aligned KPI (monetary value of Turnover)	Taxonomy aligned KPI (Proportion of Taxonomy aligned Turnover)	Climate Change Mitigation	Climate Change Adaptation	Water	Circular Economy	Pollution	Biodiversity	Enabling activity	Transitional activity	Proportion of Taxonomy aligned in Taxonomy eligible
		%	M€	%	%	%	%	%	%	%	E	T	%
Manufacture of calcium aluminate cement	CCM 3.7	13.4%	375.8	11.1%	11.1%						0%	100%	83.2%

1.2.1.6. Alignment of eligible activities

The assessment of compliance was based on the criteria set out in Article 3 of Regulation (EU) 2020/852 and the Technical Screening Criteria (TSC). These TSCs are defined by the Climate Delegated Act (EU) 2021/2139, specifically within Annex I, in relation to the climate change mitigation objective.

The tables presented in the previous section show the results of eligibility and alignment of Imerys' activities with the Taxonomy Regulation. The formats correspond to the templates for non-financial undertakings as required by Annex II of the Disclosure Delegated Act (EU) 2021/2178, as amended by the Omnibus Delegated Act (EU) 2026/73.

Substantial Contribution criteria

Internal reporting systems and data were used to verify compliance with the corresponding limit values at the plant level for defining whether a substantial contribution to climate change mitigation is made.

Calcium Aluminate Cement activities

According to the Delegated Regulation (EU) 2021/2139 of June 4, 2021, calcium aluminate cement activities contribute to the climate change mitigation objective if their specific GHG emissions are lower than 0.722 tCO_2eq per tonne of product. The other technical criteria on CO_2 transportation and storage is not applicable to Imerys manufacturing process of aluminate cements.

The GHG emissions of eight plants out of a total of nine plants manufacturing **calcium aluminate cement** are below this threshold and therefore contribute substantially to climate change mitigation.

- Only one production site is marginally above the threshold of 0.7222 tCO_2eq per tonne of product. Therefore, only the 8 manufacturing plants have been reviewed for the rest of the alignment study.

Carbon black activities

According to the Delegated Regulation (EU) 2021/2139 of June 4, 2021, carbon black activities contribute substantially to the climate change mitigation objective if the GHG emissions from the carbon black production processes are lower than 1.141tCO_2eq per tonne of product.

Imerys' **carbon black activities** are eligible but not aligned with the European Taxonomy on the climate change mitigation criteria, since the GHG emissions of Imerys' manufacturing facilities are above this threshold.

- However, it is to be noted that the Technical Screening Criteria are based on the EU Emission Trading Scheme (ETS) product benchmark for the manufacture of "furnace carbon black" used for the tire industry.
- Imerys' high value added "conductive carbon black" has different properties to furnace carbon black and is not generated through the same process.
- However, in line with its efforts to continuously reduce greenhouse gas emissions, Imerys is pursuing an energy recovery project in Willebroek (Belgium) scheduled for completion at the beginning of 2026. This project is built in partnership with E.On, at Imerys Willebroek site to capture feedstock energy contained in syngas. Once completed, the plant is expected to supply all the electricity required to produce carbon black at the site, in addition to feeding some surplus energy to the local grid. This project should allow the Group to reduce its scope 1 emissions to meet the taxonomy GHG emissions threshold criteria.

– Imerys started work on the energy recovery project in 2022. Consequently, while no revenue associated with the carbon black activity is aligned, the Capex related to the energy recovery project (€0.3 million in 2025, out of the €11.2 million invested in 2025 for carbon black activities) is considered part of a "Capex plan" to allow Taxonomy-eligible economic activities to become Taxonomy-aligned within a period of five years. Therefore, this portion of the Capex has been isolated and reported as "aligned". In total, the capex allocated to this project should amount to €7.7 million by the end of 2026.

Do No Significant Harm Criteria

With regard to the "Do No Significant Harm" (DNSH) criteria set out in Article 3 of Regulation (EU) 2020/852 for the applicable environmental objectives, Imerys has verified and validated that all its eligible activities comply with the DNSH criteria, local and internal requirements on the following environmental objectives:

– Climate change adaptation;
– Sustainable use and protection of water and marine resources;
– Pollution prevention and control;
– Protection and restoration of biodiversity and ecosystems.

The table below explains Imerys' methodology to validate those DSNH criteria for the calcium aluminate cement activities.

DNSH	Description of the validation procedures for calcium aluminate cement activities
Climate change adaptation	A physical climate risk assessment of all sites of the Group for the current situation and 2050 time-horizon has been carried out and complemented by a risk identification analysis by the Group's global insurance provider. Based on the recommendations of the Group's global insurance provider, an adaptation plan was set up to mitigate each material risk identified in 2025, with the implementation of actions on a rolling basis within the next five years.
Sustainable use and protection of water and marine resources	An assessment was carried out at all the sites concerned, based on the environmental analyses carried out each year, as well as on compliance with the environmental regulations in force in the various countries. For example, to mitigate the risk of water use during drought periods, the Le Teil site in France has made significant optimization for the clinker cooling process in the past years and significantly reduced the corresponding water consumption.
Pollution prevention and control	For pollution prevention along the value-chain: the Group has checked that activities related to the manufacturing of calcium aluminate cement do not lead to the manufacture, placing on the market or use of raw materials containing substances listed in the regulations related to the DSNH pollution prevention. Only one site is not compliant with this DNSH pollution criteria and its revenue and associated capex have been deducted from the aligned corresponding amounts. For emissions control: the eligible sites are operating with a valid licence and under regular inspection by authorities for emissions control. To date, none of the eligible sites in Europe are in the management scope of the European BAT (Best Available Techniques) for air emissions control. When necessary, the eligible sites are investing to maintain or upgrade the emissions control facilities for compliance.
Transition to a circular economy	The DNSH criterion related to the "Transition to a circular economy" objective is not applicable to the manufacture of calcium aluminate cement as per the Disclosure Delegated Act.
Protection and restoration of biodiversity and ecosystems	Imerys has validated this criterion for all its calcium aluminate eligible activities by ensuring that the permits had been delivered for each site and that the eligible sites are not located near biodiversity sensitive areas, according to the mapping of IUCN categories.

Minimum Safeguards

As defined in Article 3 of the Taxonomy regulation, an activity shall qualify as environmentally sustainable only if it is carried out in compliance with the specific minimum safeguards detailed in the regulation. The Final Report on Minimum Safeguards by the Platform on Sustainable Finance identifies four core topics for which compliance with Minimum Safeguards should be defined, namely: human rights (including workers' rights), bribery, taxation and fair competition.

Human Rights: Imerys is committed to respecting internationally recognized human rights and standards, in particular the International Bill of Human Rights, the Guidelines of the Organization for Economic Co-operation and Development (OECD), the provisions of the fundamental conventions of the International Labor Organization (ILO) and the UN Guiding Principles on Business and Human Rights. Within Imerys' Duty of Care Program the risk of severe impacts on human rights, fundamental freedoms and health and safety resulting from the activities of the Group and those of its subcontractors and suppliers, have been identified and assessed and are managed in line with the French Law on Duty of Care. This program is defined in the Group Duty of Care Protocol. Furthermore, the Group maintains robust policies, most notably a public Human Rights Policy including its commitments on child labor, forced labor and human trafficking to ensure these standards are strictly respected across all Imerys sites.

Bribery: Imerys has adopted a comprehensive Antibribery Compliance Program to prevent, detect and remediate bribery incidents or allegations in compliance with the requirements of the French Sapin II Law. This program is defined in the Group Antibribery Policy and supported by several procedures. In 2025, Imerys refreshed its bribery risk mapping through a series of dedicated workshops, resulting in an enhanced action plan presented to the Ethics Committee. Additionally, the Group updated its internal training modules to reflect these latest developments and ensure continued compliance.

Taxation: The Group Tax Policy is fully in line with the best international standards with respect to anti-tax avoidance and tax evasion practices. The Group operates in countries chosen solely for industrial or commercial purposes and does not enter into artificial arrangements for tax planning purposes, neither transfer value created to low tax jurisdictions, nor use secrecy jurisdictions or so-called "tax havens" for tax avoidance. It is committed to full compliance with its tax obligations, paying the right amount of tax in the right country at the right time.

Fair Competition: Imerys has adopted a comprehensive Antitrust Compliance Program to prevent, detect, and remediate potential antitrust law violations. It is defined in the Group Antitrust Policy and is supported by several procedures, including a dedicated training campaign deployed in 2025 to reinforce these standards across the organization.

In addition, no convictions or violations were recorded during the reporting year, likely to call into question compliance with the minimum safeguards.

1.2.2. Climate change [ESRS E1]

Imerys recognizes that climate change is a global, systemic, and urgent challenge. Since 2017, Imerys has remained a fully committed member of the French Business Climate Pledge[1]. Through it, Imerys publicly affirms its engagement to contribute to the collective efforts, drawing up a roadmap compatible with the international commitments formulated in the Paris Agreement and working toward SDG 13 to take urgent action to combat climate change and its impacts.

The Group has aligned its 2025 climate disclosure with the recommendations of the TCFD[2]. For the past 16 years, Imerys has participated in CDP[3]. The Group 2025 CDP performance score is ranked as Level A, which places the Group in the highest band, corresponding to leadership of climate issues with best practices in transparency and performance. Imerys' comprehensive climate reporting through CDP is publicly available.

Note : Imerys is part of the EU Paris-aligned Benchmarks. In accordance with Commission Delegated Regulation (EU) 2021/2178, the disclosure of taxonomy-aligned Capex and associated Capex plans supporting the implementation of the transition plan is described in section 1.2.1.5 of the present chapter. *Moreover, Imerys does not invest any Capex amounts on economic activities related to coal, oil and gas.*

1.2.2.1. Climate Change Governance [GOV-3]

Note : Chapter 4 of the Universal Registration Document provides more information related to the Corporate governance structure, the role of administrative, management and supervisory bodies, and the integration of sustainability-related performance in incentive schemes as presented in disclosure requirements GOV-1, GOV-2, and GOV-3.

As part of its mission to promote long-term value creation, **the Board of Directors, with the support of its Committees and the ESG Referent Director** dedicated to sustainability-related issues, provides specific oversight with regard to climate risks and opportunities. The Group's climate strategy, including its Climate Transition Plan, is reviewed by the Strategy and Sustainability Committee and validated by the Board of Directors. Progress toward established targets is included within the regular Board sustainability updates. The Audit Committee has oversight of climate-related risks and data verification through the review of the Group risk mapping exercise and external audit reports.

The Board oversight is complemented by the inputs of the Chief Executive Officer, **the Executive Committee and the Sustainability Committee**, led by the Chief Sustainability Officer. The latter's mission is notably to establish the level of the Group's commitment, initiate and review climate-related risk and opportunity assessments, steer the climate change strategy development and monitor progress on implementation within the Business Areas and the Group financial planning.

The Climate Change Steering Committee bridges management and operations, reviewing and approving decarbonization projects based on financial, technical, and sustainability criteria. Made up of representatives and experts from various departments such as Sustainability, Operations, Purchasing, Strategy, Finance, IT, and Science & Technology, specialized working groups focus on specific decarbonization levers, as described in disclosure requirements [E1-1] and [E1-4] in section 1.2.2.4 below. These groups are responsible for conducting feasibility studies, evaluating which existing or future technologies can be applied to Imerys' operations and identifying pilot sites for implementation.

On an operational level, Imerys delivers on its climate change commitments through a dedicated organization, with defined roles and responsibilities, a solid management system, time-bound action-plans, performance monitoring indicators, audit procedures and a continuous improvement program.

Implementation involves collaboration across various operational and functional groups. Group energy efficiency managers and BA energy managers play a crucial role, supporting plants with efficiency methodologies, defining analysis frameworks, and providing training to ensure consistent and reliable reporting.

To support the Group's shared decarbonization ambition, the annual variable compensation of the Group Chief Executive Officer and the long-term compensation shares are linked to the Group's GHG emissions reduction targets. In the same way, the Group's Executive Committee, senior managers and many functional and operational managers have annual variable compensation linked to GHG emissions reduction KPIs.

1 The French Business Climate Pledge is a public commitment made by French companies to reduce greenhouse gas emissions.
2 The Financial Stability Board Task Force on Climate-related Financial Disclosures (TCFD) Recommendations published in 2017 are a widely adopted and accepted reference for disclosing clear, comparable and consistent information about the risks and opportunities presented by climate change.
3 The CDP is a global environmental impact non-profit organization, providing a platform for all companies and cities to report information on their climate impacts.

1.2.2.2. Processes to identify and assess material climate-related IROs [IRO-1]

At Group level, Imerys conducted a high-level identification of its material impacts, risks and opportunities related to climate change, in the context of the double materiality analysis (refer to **disclosure requirement [ESRS 2 SBM-3] of the present chapter**). Imerys also completed a detailed climate risks and opportunities assessment for its operations in 2024, based on end-markets trend analysis in the perspective of a low-carbon economy, and leveraging the Climanomics® tool in collaboration with external climate experts. Additional risks associated with Imerys value chain will be addressed in the future. The updated analysis replaces the initial analysis conducted in 2021 and addresses both transition risks and physical risks. It assesses the Group's additional financial exposure across a range of combined scenarios, based on different temperature rises projections for the year 2100 (RCP scenarios) and alternative futures for socio-economic development (SSP scenarios from IPCC), covering three time horizons (2030, 2040 and 2050). The results of the transition and physical risks study have been presented to the Sustainability Committee (including the CEO, Chief Sustainability Officer, Industrial Vice President and Chief Financial Officer) to ensure they are properly integrated in the Group's Business Strategy. These results were also presented to the Group Board's Strategy and Sustainability Committee.

√ *For more information on Imerys' climate risk and scenario analysis, see Imerys' 2025 CDP Report.*

√ *Additional details on the Group's roadmap to achieve the targets set are provided in* **section 1.1.4.2, paragraph** *"Imerys' Sustainability Roadmap"* **of the present chapter.**

√ *These analyses were also used in the context of Group financial planning and impairment tests, see* **chapter 6, section 6.1.2, note 6 "Estimates and Judgements" and note 22 "Impairment Tests "of the Consolidated Financial Statement.**

Transition risks assessment

Transition risks are those associated with transitioning into an economy that limits global warming, in the optimal scenario, to 1.5°C above pre-industrial levels. Given the stringent climate policies and carbon pricing needed to drive this shift toward a drastically decarbonizing global economy, and the necessary transformation in technologies and markets, Imerys faces various potential legal, technological, reputational, and market-related transition risks. The most significant risk which is described in the following chapter is due to emerging regulations and carbon pricing mechanisms.

For Imerys, the manufacturing sites are the most important assets that bind CO_2 emissions. The emissions are mainly caused by the energy consumption resulting from the mineral processing and process emissions. These emissions are accounted for in the Group's climate targets and therefore do not represent a transition risk **(refer to section "Taking action through decarbonization levers [E1-1 & E1-3]")**

Transition risks due to emerging regulations and carbon pricing mechanisms

Risk description and assessment methodology

Imerys defines transition risks due to emerging regulation and carbon pricing mechanisms as those that have an impact on its production costs, considering:

- projected evolution of CO_2 prices over time across different geographies;
- risk to Imerys' own operations (Scope 1 & 2), in addition to the risk of rising prices for raw materials, due to new carbon taxes;
- GHG emissions reduction expected from Imerys mitigation actions.

A model has been developed to assess different scenarios in terms of future financial impacts for Imerys depending on projected production levels of Imerys sites, trends in sites' GHG emissions and carbon price projections under the International Energy Agency's (IEA) latest scenarios:

- Stated Policies Scenario (STEPS) - scenario that provides a granular, sector-by-sector evaluation of the policies that have been put in place to reach stated goals and other energy-related objectives, taking account not only of existing policies and measures but also those that are under development.
- Net Zero by 2050 Scenario (NZE) – a normative scenario that shows a pathway for the global energy sector to achieve net-zero CO_2 emissions by 2050, with advanced economies reaching net-zero emissions ahead of others.

Imerys assessment includes three time horizons: 2030 (short-term), 2040 (medium-term) and 2050 (long-term), and it considers the financial risk before and after climate mitigation actions. Twelve Imerys' plants in Europe, the UK and the US (8% of total industrial sites worldwide) are under the EU ETS, UK ETS and California Cap and Trade ETS schemes.

Imerys' transition risks related to its upstream value chain - i.e. impact on Imerys' spending due to increasing costs of purchased goods and services (primarily energy, raw materials and transportation) and thus the final cost of products - are currently under evaluation. This assessment is not limited to carbon prices within a specific geography, but it will also cover carbon tariffs according to the newly established EU Carbon Border Adjustment Mechanism (CBAM).

This assessment does not cover the evolving market trends due to the transition to low-carbon economy as showed in the Climate risk & opportunity study conducted with the support of external experts in 2021, this risk is expected to be counterbalanced by new opportunities, as described in **disclosure requirement [ESRS 2 SBM-3 - E1] of the present chapter**.

Mitigation plan and financial incidences

A strategy has been put in place in order to mitigate identified transition risks related to the current uncertainty associated with emissions-trading schemes and carbon taxes. The process includes: tracking emissions, market intelligence on legislation, emissions and allowances forecast modeling to evaluate short or long positions and a carbon allowances trading strategy. The sites concerned by ETSs are integrated and prioritized within the Group's decarbonization strategy.

Under STEPS scenario, results from Imerys' transition risks assessment indicate its production costs could increase annually by €63-98 million in the short-term (2030) within its own operations (Scope 1 & 2).

This value range represents an application of carbon price projections across multiple geographies and sectors, some of which may not apply specifically to Imerys' activities. Higher range values correspond to Imerys' theoretical risk without any mitigation actions, while lower range values consider Imerys achieves its SBTi-approved GHG emissions reduction targets (i.e. it achieves a reduction of 42% in its Scope 1 & 2 GHG emissions). Positive financial impact due to carbon prices passed on to customers is not taken into account in any scenario. Imerys continues to refine its modeling of potential financial impact due to transition risks after 2030.

Physical risks assessment

Physical risks refer to the direct impact of climate change on Group operations, potentially resulting in costs due to asset damages, production stoppages and operating losses. They are typically classified into **acute risks**, such as short-term extreme weather events that cause immediate disruptions and financial losses, and **chronic risks**, which involve gradual, long-term climate changes that degrade assets, affect resources, and raise operational costs.

An assessment of Imerys' exposure to climate-related physical risks has been carried out for Group-owned assets and facilities across the globe. The inherent risk has been quantified against climate change hazard maps resulting from the Coupled Model Intercomparison Project model developed by the Intergovernmental Panel on Climate Change (IPCC). The main dataset used comes from the WWF Risk Filter Suite v2.0. Climate change hazards maps represent the relative level of vulnerability for various acute and chronic physical indicators (hurricanes, flooding, heat waves, sea level rise, water stress, wildfire and landslides). The study includes scenario analysis considering three time horizons (2030, 2040 and 2050) versus a low (RCP 2.6), moderate (RCP 4.5) and a high scenario (RCP 8.5). The results of this assessment were subsequently translated into a risk level (*Low*, *Medium*, *High*, *Very high*) and allocated to each Imerys asset for each climate hazard.

The results of the climate-related physical risks scenario analysis were used as primary input information within the Group's overall risk management approach, which was reviewed in 2025. In addition to that, as in the previous year, S&P Global Sustainable Climanomics® platform has been used to estimate the potential future financial impacts of physical risks due to climate change. For each Imerys site, geographical coordinates, insured asset value and asset type (production plants, quarries, underground mines, ports and R&D laboratories) were input to obtain the asset value at material risk before climate adaptation actions. The analysis includes flooding (coastal, fluvial, pluvial), heat waves, drought, wildfire, cyclones (hurricanes, typhoons) and water stress. Results are provided in percentage of total insured asset value at risk for each of these extreme weather events, due to additional and unforeseen costs, asset damages and operating losses. Imerys assessment includes the following scenarios for the 2030, 2040 and 2050 time horizons: low (SSP1-2.6), moderate (SSP2-4.5), medium-high (SSP3-7.0) and high (SSP5-8.5).

As Imerys gains a better understanding of these results, it continues to refine its analysis; hence, only preliminary results of this initial assessment are presented.

Water stress, heat waves, and flooding are the three risks potentially affecting the greatest number of assets at Group level; thus, a special focus for each of these risks is provided below.

Chronic physical risks

Risk description and assessment methodology

Chronic physical risks are longer-term shifts in precipitation and temperature, as well as increased variability in weather patterns. As such, the following chronic physical risks were assessed under the four SSP-RCP scenarios and the three time horizons described above: water stress, sea level rise and changes in precipitation patterns. Given its potentially negative financial impact, water stress is the most material chronic physical risk at Group level.

Water stress:

Water stress occurs when the demand for water exceeds the available amount during a certain period or when poor quality restricts its use. Water stress causes deterioration of water resources in terms of quantity (aquifer overexploitation, dry rivers).

Water is required in various steps of Imerys' operations, for instance for cooling, dust suppression and cleaning. Imerys may be further exposed to this risk through its supply chains, as they may rely on energy and input from water-dependent industrial sectors. Water stress is considered as one of the potential material risks to Imerys, particularly for sites located in water depletion areas, in which physical shortage of water resources are identified.

Currently, 22 Imerys industrial sites withdrawing more than 10,000 m^3 per year have been identified as being at very high risk of water stress. Under the RCP2.6, RCP4.5 and RCP8.5 scenarios, up to 24 industrial sites could be at very high risk of water stress.

Refer to disclosure requirement [ESRS E3] for detailed information on resources management for sites with current water stress risk.

Mitigation plan and potential financial impact

To respond to this risk, for the sites located in water stressed areas withdrawing more than 10,000 m3 per year, Imerys required that a comprehensive Water Management Plan (WMP) be developed, including a description of current water use, water balance analysis, water accounting, water risk assessment and a pertinent action plan to manage high priority water issues. Imerys is conducting an intensive process improvement plan to measure and report water consumption for each of its sites at high risk in order to set water reduction targets in the future. In addition, various Imerys sites have implemented projects linked to water recycling or water efficiency, especially as part of the continuous improvement program.

Using S&P Global Sustainable Climanomics® platform, Imerys has estimated the level of financial impact based on the percentage of its total insured asset value at risk of water stress ranging from 1.1% in 2030 (under the SSP1-2.6 scenario) to 2.1% in 2050 (under the SSP5-8.5 scenario). These figures do not account for any existing or future adaptation actions.

√ *For more information on water management, refer to* **disclosure requirement [ESRS E3] of the present chapter.**

Acute physical risks

Risk description and assessment methodology

Acute physical risks are those that are event-driven, including increased severity of extreme weather events. As such, the following acute physical risks were assessed under the four SSP-RCP scenarios and the three time horizons described above: pluvial and fluvial flooding, heat stress, wildfire and tropical cyclone or hurricane. Among all acute physical risks, two of them are considered to be material at Group level given their potentially high negative financial impact: heat waves and flooding.

Risks, once identified and assessed are managed site by site. Local management is assisted by the Group Insurance and Corporate Industrial Risk Department.

Heat waves:

Heat wave is a period of prolonged abnormally high surface temperatures relative to those normally expected. Heat waves may span several days to several weeks. Such weather phenomena may be characterized by low humidity, which may exacerbate drought in temperate latitudes, or high humidity, which may exacerbate the health effects of heat-related stress in tropical regions.

Heat waves can affect Imerys' employees' productivity, in addition to their health and well-being. They may have consequences for all workers, whether working indoors or outdoors.

Currently, the risk of heat waves has been assessed as moderate for over half of Imerys industrial sites. Under the RCP4.5 scenario, 77 industrial sites could be potentially at high risk. Under the RCP 8.5 scenario, 63 industrial sites could potentially be at very high risk of heat waves, with another 87 industrial sites potentially at high risk.

Flooding:

Flooding occurs when water overflows or soaks land that is normally dry.

Floods can potentially disrupt or stop, Imerys' operations by damaging its assets as well as interrupting access to its supply chain.

Currently, none of Imerys industrial sites have been identified as being at very high risk of flooding. Under the RCP2.6, RCP4.5 and RCP8.5 scenarios, 22 industrial sites could be at very high risk of flooding. All of these sites are within the Group's risk prevention program for the management of this risk.

Mitigation plan and potential financial impact

Regarding the management of risks that may cause property damage or operating losses associated with extreme climatic events, a specific process has been put in place by the Industrial Risk and Insurance Departments. The process integrates the study of the vulnerability of industrial sites to extreme weather events and natural disasters and includes regular on site inspections. These risks are subsequently integrated into Business Continuity Planning (BCP) exercises, which focus on its most important assets in terms of contribution to the Group's gross margin. The Business Impact Analysis identifies and evaluates potential effects of events on operations, including the implementation of appropriate preventive, adaptation and recovery plans.

Heat waves:

Using S&P Global Sustainable Climanomics® platform, Imerys has estimated the level of financial impact based on the percentage of its total insured asset value at risk of heat waves ranging from 2.7% in 2030 (under the SSP1-2.6 scenario) to 4.4% in 2050 (under the SSP5-8.5 scenario). These figures do not account for any existing or future adaptation actions.

Flooding:

Using S&P Global Sustainable Climanomics® platform, Imerys has estimated the level of financial impact based on the percentage of its total insured asset value at risk of flooding ranging from 0.1% in 2030 (under the SSP1-2.6 scenario) to 0.2% in 2050 (under the SSP5-8.5 scenario). These figures do not account for any existing or adaptation actions.

Climate-related opportunities

Development and/or expansion of low emission goods and services

In 2019, Imerys launched its SustainAgility Solutions Assessment framework, which is embedded in key Group processes and was designed in line with the World Business Council for Sustainable Development (WBCSD) guidelines for Portfolio Sustainability Assessments (PSA), to objectively measure the sustainability of Imerys' current portfolio, identify its environmental and social impacts and help continue to steer the Group portfolio toward low-carbon solutions. As part of this process, Imerys has deepened its understanding of climate-related risks and opportunities that could impact customers and end markets, in the perspective of a low-carbon economy.

Based on the Group's most recent Portfolio sustainability assessment study, the expansion of a low-carbon economy would have no or a very limited impact on many of the products manufactured by Imerys. Performance Minerals are relatively low carbon products as most of them require limited energy processing before being delivered to the market. Their various physical properties enable them to compete with chemical-based products in many applications. Some products, which represent approximately 10% of consolidated revenue, have measurable and direct positive contributions in the downstream value chain to reduce climate change impact. Among the main markets addressed by Imerys, plastics for automotive and life sciences for agriculture present significant climate opportunities for Imerys products. The drive toward a more circular economy is also providing opportunities across markets for Imerys products that can favor recycling. Imerys' graphite and carbon product offering is driven by the strong growth of the electric vehicle automotive market, mainly for Li-Ion batteries but also for thermoplastics, which represent great climate opportunities, combined with other mobile energy opportunities in electricity and energy storage. The calcium aluminate cement products in the Group's portfolio also contribute to improving the CO_2 performance of building materials during the "use phase" in the construction market (doubling lifetime or requiring less material). The broad diversity of the Group's markets and locations, as well as its customer-centric and market-driven organization are considered strengths, decreasing dependency on specific markets and allowing easier adaptation to market evolutions. Some products, which represent approximately 29% of consolidated revenue, serve markets that offer significant climate-related opportunities. The latest assessment was carried out in 2021 based on 2040 projections.

Development of new products or services through R&D and innovation

In addition to the opportunities for the development and expansion of existing low emission goods and services quantified above, the Group has identified opportunities linked to the innovation of new products beyond the current portfolio. These opportunities, while identified, have not yet been quantified.

The Group has positioned innovation at the heart of its strategy and considers it an effective way to address risks and opportunities for its operations and portfolio related to climate change. Imerys' SustainAgility Solutions Assessment framework is embedded within the innovation process, thereby ensuring that all projects in the innovation pipeline are thoroughly reviewed against defined environmental criteria, including climate change, prior to approval. As of the end of 2025, the Group achieved its target of 75% of new product launches rated as "SustainAgility Solutions", meaning a product in a given application that brings high social and environmental contribution to the downstream value chain and, at the same time, demonstrates a low environmental impact in its production phase. Innovation in this context includes Imerys' investment in adequate technology, development of new products to meet market needs and investment in industrial facilities using new manufacturing processes or new product lines. The Group's Science & Technology (S&T) experts and specialists develop innovative solutions and products based on identifying global megatrends, and customers' expectations and needs, including developing solutions that support the transition to a low-carbon economy.

1.2.2.3. Description of material climate-related IROs [SBM-3]

As described above, the main climate-related risks and opportunities identified are associated with **transition risks** linked to current or emerging regulatory requirements, increasing taxes or carbon quotas, increasing costs of energy and raw materials in the market, and shifting customer preferences. These may lead to the development of existing products and services with lower emission options and/or opportunities for new products and services. The Group is also exposed to potential **physical risks** due to climate change. The type and level of each risk determines the management method to mitigate, transfer, accept, adapt or control it.

These material risks and opportunities, their potential impacts as well as how they are taken into consideration within the business strategy and financial planning are described in the following sections.

ESRS E1. Climate change

Materiality	Location within the value chain	Description of the IRO	Time horizon[1]
SUB-TOPIC : CLIMATE CHANGE ADAPTATION			
⊖ Potential negative impact	● Own operations (all activities)	Group activities may adversely **affect the adaptation efforts or the level of resilience** to physical climate risks of people and of the environment.	●●● Medium
R Physical risk	● Own operations (all activities)	The Group may be exposed to **financial risks** due to : 1. Increased severity and frequency of **extreme weather events** such as cyclones and floods and/or; 2. **Changes in precipitation patterns** and extreme variability in weather patterns.	●●● Short
O Opportunity	→ Downstream value chain	**Solution for energy transition** : the Group's development strategy aims to grow it annual revenue in activities related to solutions for the energy transition.	●●● Medium
O Opportunity	→ Downstream value chain	**Sustainable Construction :** the Group's development strategy aims to grow it annual revenue in activities related to sustainable construction.	●●● Medium
SUB-TOPIC : CLIMATE CHANGE MITIGATION			
⊖ Actual negative impact	● Own operations (all activities)	**Group activities** contribute to climate change through the **release of greenhouse gases** during extraction and processing activities.	●●● Medium
⊖ Actual[2] negative impact	←| Upstream value chain (Raw materials, Mining, Energy, Transport, Packaging, Chemicals, Industrial services and General services categories)	The activities of Imerys **subcontractors and suppliers** may contribute to climate change through the **release of greenhouse gases**, with varying intensity based on their activity.	●●● Medium
R Transition risks	● Own operations (Extractive activities)	The Group may be exposed to **financial risks** associated with current or emerging **regulatory requirements**, increasing **tax or carbon quotas**, or **costs of energy** and raw materials in the market, and shifting customer preferences.	●●● Short

1 The time horizons on climate change IROs is described in ESRS 2 [BP-1 & BP-2] of the present chapter.
2 Climate Change in the upstream value chain, initially categorized as a potential impact in 2024, has been reassessed and is now recognized as an actual material impact for the Group. This reclassification reflects a more comprehensive understanding of climate-related risks and their immediate effects on Imerys supply chain.

1.2.2.4. Transition plan, actions, and resources regarding climate change mitigation [E1-1, E1-3 & E1-4]

Imerys transition plan aims to reach ambitious near-term climate targets that are in line with the level of decarbonization required to keep global temperature increase below 2°C compared to pre-industrial temperatures, with efforts to limit warming to 1.5°C as advocated by the Intergovernmental Panel on Climate Change. These targets, drawn up on the basis of climate science, obtained SBTi[1] approval in 2023. Group progress on its climate roadmap is regularly updated in Imerys Transition Plan report which follows the guidelines of the French Autorité des marchés financiers (AMF), as well as CDP technical note[2]. The plan is publicly available on Imerys.com.

Climate change mitigation targets [E1-4]

In 2023, Imerys committed to reduce its scope 1 and 2 emissions by 42% in absolute terms by 2030 (from a 2021 base year). SBTi has classified Imerys Scope 1 and 2 target ambition as in line with a 1.5°C trajectory. Imerys also committed to reduce its scope 3 indirect emissions from purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting and investments by 25% by 2030 (from a 2021 base year). This GHG emissions reduction target covers more than 80% of Imerys overall Scope 3 emissions and is compatible with a well-below 2°C trajectory according to SBTi guidance.

Group Objective	Baseline	Performance 2025	Target
Reduce Group Scope 1 & 2 greenhouse gas emissions (tCO2eq) by 42% by the end of 2030 from 2021 base year; compatible with a 1.5°C trajectory [3]	2021 0%	-28%	2030 -42%
Reduce Group Scope 3 greenhouse gas emissions (tCO2eq) by 25% by the end of 2030 from 2021 base year (from purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting, and investments)	2021 0%	-22%	2030 -25%
Reduce Group Scope 1 & 2 greenhouse gas emissions by 36% relative to revenue (tCO2eq/€ million) by 2030 compared to a 2018 baseline[4]	2018 0%	-27%	2030 -36%

Taking action through decarbonization levers [E1-1 & E1-3]

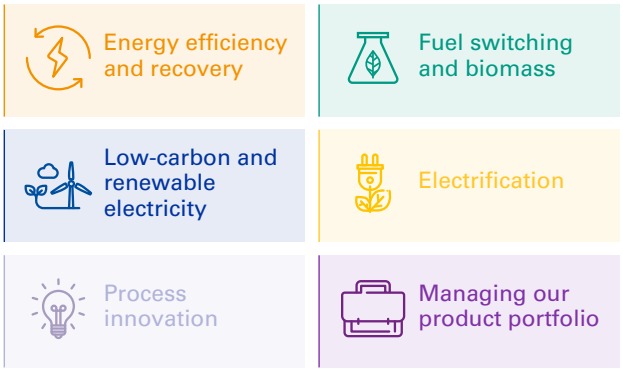

Reducing Scope 1 & 2 emissions

The Group's Scope 1 emissions considered as direct emissions are generated both from the combustion of fuels to produce thermal energy and from chemical reactions of certain processes. Scope 2 emissions considered as indirect emissions are related to purchased electricity and steam consumption. Combined Scope 1 and 2 emissions represent approximately a third of the Group's total emissions.

Imerys has identified **six key levers** to help decarbonize the Group's operations, reduce Scope 1 and 2 emissions and meet its 2030 targets. In 2025, the Group Capex related to climate mitigation actions amounted to nearly €11 million, mainly due to energy efficiency & recovery and fuel switching projects.

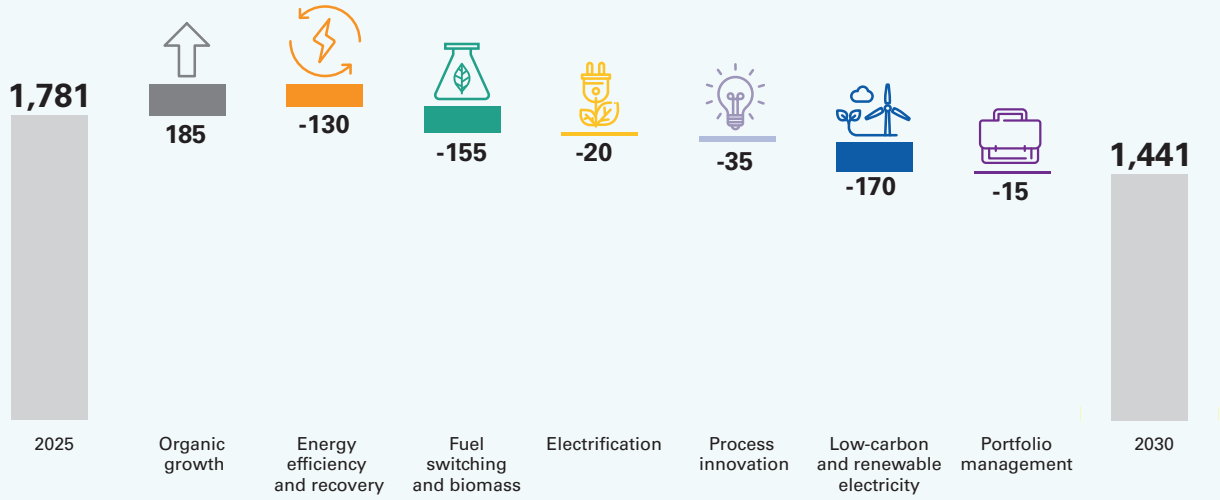

The execution of the Group's climate transition plan depends on the availability and allocation of critical resources, including funding, mature low-carbon technologies, and human capital. The ability to scale decarbonization levers, such as biomass substitution, electrification or innovative processes with Carbon Capture and Storage, is contingent on these factors. Imerys prioritizes capital allocation through a dedicated envelope and strategic financial planning to ensure the effective deployment of its roadmap.

In 2025, the Group has discontinued the separate disclosure of operating expenses related to the transition to low-emission energy solutions ("Fuel switching and biomass" opex). These costs are immaterial for both 2024 and 2025, representing a negligible portion of the Group's total energy expenditure, €8.1 million compared to a total bill of €361 million in 2024, and a similarly an estimated insignificant amount against the €328 million total in 2025.

1 The Science Based Targets initiative (SBTi) is aligned with the goals of the Paris Agreement.
2 CDP Technical Note: Reporting on Climate Transition Plans.
3 100% of Imerys Scope 1 and 2 GHG emissions are covered by this reduction target.
4 This objective refers to the SBTi Target from 2019 and is linked to the Sustainability Linked Bond (SLB) issued in 2021, thus even though superseded in 2023 with a new, more ambitious target, it shall continue to be reported until 2030.

Decarbonization levers to reduce Scope 1 & 2[1] GHG emissions by 42% by 2030 ($ktCO_2eq$)

As shown on the diagram above, Imerys adapts and grows its business to support the transition to a low-carbon economy. Given the 30-to-50-year lifespan of its mineral processing and mining assets, the Group recognizes that current capital investments can "lock in" a carbon trajectory that is taken into account in the "organic growth" figures presented on the graph at 2030 horizon. These expected future emissions have been incorporated into the decarbonization trajectory; they will be counterbalanced by additional efforts and projects from decarbonization levers as described below. Imerys is then ensuring that these assets do not impede the achievement of its reduction targets.

The expected reduction potential of each of the decarbonization levers was estimated using a bottom-up approach.It is reassessed on an annual basis to consider the change in levers maturity and progress in reduction project execution Since 2021, over 140 Scope 1 and 2 decarbonization initiatives have been identified and evaluated.

The GHG emissions reduction potential of individual future projects (post 2025) have been consolidated to obtain the figures shown in the diagram above. Fuel switching, electrification of thermal processes, and energy recovery (for scope 1 emissions) and purchasing of low-carbon and renewable electricity (for scope 2) are the most mature levers and will deliver most of the reduction by 2030. For scope 1 emissions from the process, Imerys prepares the transition on a longer term (post 2030) through research work on new technologies and CCUS (Carbon Capture, Utilization and storage).

In addition, by integrating an internal carbon price into its capital allocation, the Group proactively identifies and manages stranded asset risks, ensuring that the Capital resource dependency mentioned previously is actively countered by a shift in its product portfolio toward high-growth in low-carbon solutions.

1 Scope 2 emissions reductions presented in these levers are calculated using the market-based values.

Energy efficiency and recovery

Imerys has an operational energy demand, especially in its mineral transformation processes that use thermal technologies and its mining/quarrying activities that use heavy equipment. The Group's energy efficiency strategy aims to optimize productivity while contributing to climate change mitigation.

In 2019, Imerys launched the "I-Nergize" program to evaluate and improve site energy performance, focusing on the top 60+ energy-consuming sites that represent nearly 80% of the Group's consumption. This program employs an assessment methodology covering six key areas: vision, process, maintenance, purchasing, renewables, and Energy Management System (EMS). The goal has been to create three-year roadmaps of energy actions for each plant to enhance energy efficiency and reduce GHG emissions. Additional initiatives are generated by local teams through the Group's internal Continuous Improvement program (I-cube) or specific studies. In 2025, I-Nergize evolved to prioritize EMS implementation, while introducing the 'I-Nergize Light' approach to support efficiency across smaller assets.

Action	Expected outcome	Results at end 2025
I-Nergize program		
Energy performance assessment program to identify energy efficiency & recovery improvement areas, with site-specific action plans. EMS implementation. Scope : all Imerys sites, with top 60 energy-consuming sites to be covered first representing: – 80% of the Group's energy consumption; and – 80% of the Group's GHG emissions	**105 $ktCO_2eq$** Expected reduction compared to baseline by 2030	**62 sites** Assessed **~60 $ktCO_2eq$** Already reduced from ~1,700 actions identified
Local Initiatives	**116 $ktCO_2eq$**	**~21 $ktCO_2eq$**
Local site teams engagement to propose energy reduction initiatives.	Expected reduction compared to baseline by 2030	Already reduced from local initiatives

In 2025, the energy efficiency and recovery Capex amounted to €8.7 million.

01 CASE STUDY
Focus on one of 2025's flagship initiatives

Heat-recovery in Germany

In 2025, Imerys implemented a heat-recovery system at one of its sites in Germany to recover and valorize waste steam from the spray-drying process into usable process heat. By capturing this unused thermal energy and redirecting it to preheat slurry and combustion air, the site reduces gas consumption by more than 5,200 MWh per year and avoids almost 1,000 tCO_2eq annually. This approach strengthens energy efficiency and improves the plant's long-term competitiveness, especially in an environment of rising energy costs. Building on these results, this initiative offers strong potential for deployment at other Imerys sites to help them reduce GHG emissions and further improve resource efficiency.

Fuel switching and biomass

Biomass waste and residues, when feasible, are the preferred option within the Group to replace fossil fuels. Several Imerys plants currently consume biomass waste: sunflower husk, sawdust, landfill gas, olive seeds and peanut hulls. Feasibility studies have been launched to identify other sites with potential projects of fuel switching to biomass to be deployed.

For sites where biomass residues are unavailable, natural gas has been selected as the transition fuel to replace more carbon-intensive fossil fuels. In addition, conventional diesel has been replaced with renewable diesel derived from animal fats, used cooking oils and other food waste to power heavy mobile equipment across a few sites in the United States.

Action	Expected outcome	Results at end 2025
Switch from fossil energy to biomass residues Increase share of biomass into energy mix to progressively replace historical fossil fuels (coal, fuel oil and natural gas) used for thermal processes Scope : 1 potential sites	**95 $ktCO_2eq$** Expected reduction compared to 2021	**~9 $ktCO_2eq$** reduced on one site in the US (switch from coal to peanut ground hulls)
Switch from fuel oil energy to natural gas Transition from energy sources with high greenhouse gas (GHG) emissions, like coal or fuel oil, to cleaner alternatives such as natural gas, where biomass residue sources are not available or not technically feasible Scope : 2 potential sites	**56 $ktCO_2eq$** Expected reduction compared to 2021	**4 $ktCO_2eq$** Investment done on one site see Case study 2
Switch from diesel to renewable diesel for mobile equipment Scope : All operational sites	**20 $ktCO_2eq$** Expected reduction compared to baseline by 2027	**~6 $ktCO_2eq$** reduced on two sites in the US

In 2025, the Capex amounted to €1.2 million, mainly related to the switch from fuel to natural gas in one site located in France.

02 **CASE STUDY**
Focus on one of 2025's flagship initiatives

Switching from RFO to natural gas in France

Imerys is in the process of replacing Recycled Fuel Oil (RFO) with natural gas to fuel one of its furnaces at its Dunkirk site in the north of France. The first phase began in October 2024 and will be concluded by mid-2026. Once completed, the project is expected to avoid ~15 ktCO2eq of GHG emissions annually. Imerys is conducting further studies to implement this fuel switch in a second furnace, as well as three other furnaces in a second industrial site, which could provide an additional annual reduction of ~40 $ktCO_2eq$.

Low-carbon and renewable electricity

The Group continues to support the transition to renewable energy. Different business models have been developed to promote the purchase of low-carbon electricity from nuclear and renewable sources, including solar, hydro and wind power: onsite and offsite Power Purchase Agreements (PPA), direct investment for small scale projects and Energy Attributes Certificates (EACs) to top up. Low-carbon and renewable electricity consumption was higher in 2025 than in 2024 with an increase from 21% to 27% as this is considered to be one of the key levels in the Group's overall decarbonization efforts.

Action	Expected outcome	Results at end 2025
Produce renewable electricity at Imerys' own sites (on-site PPA) Installation of solar photovoltaic (PV) farm to generate renewable electricity on-site Scope : **Phase 1**: 7 sites (Bahrain, Malaysia, US, India, China, South-Africa, Belgium) **Phase 2:** 15 sites (EU, China, UK, Mexico, US)	**36 ktCO$_2$eq** Expected reduction compared to baseline	**7 sites** with on-site PPA signed **~7 ktCO$_2$eq** GHG emissions reduction
Sign off-site and virtual PPAs to supply renewable power Switch to an electricity mix based on renewable and low-carbon sources Scope : **Phase 1**: US, EU **Phase 2:** other countries	**140 ktCO$_2$eq** Expected reduction compared to baseline	**2 regions** with virtual PPAs contract signed (US and Continental Europe)

03

03 CASE STUDY
Focus on one of 2025's flagship initiatives

Solar PV installation in Malaysia

Inaugurated in February 2025, the 1,800 solar panels installed on the roof of the Ipoh processing facility in Malaysia are expected to generate an estimated 1,400 MWh of renewable electricity annually. The initiative will bring an annual reduction of ~790 tCO$_2$eq. The 25-year project was deployed under the terms of a Power Purchasing Agreement (PPA) with TotalEnergies ENEOS.

Electrification

Electrification of different processes (e.g. dryers, heat pumps, electrical boilers and solar heat) to switch from fossil fuel sources to electricity is currently being studied; preliminary studies show that this lever can contribute 5 to 10% of emissions reductions potential up to 2030.

Action	Expected outcome	Results at end 2025
Pilot for Electrification Assess potential of electrification lever by conducting feasibility studies and implementing electrification technologies on pilot sites. Scope : pilot sites in EMEA	Proof of concept for three technologies : heat pumps, concentrated solar heat and electric dryer **4-8 $ktCO_2eq$** Expected reduction compared to baseline	**2 sites** with investment approved and heat pump pilot under construction

In 2025, the Capex related to electrification projects amounted to €367 thousands.

04 CASE STUDY
Focus on one of 2025's flagship initiatives

Heat pump installation in France

Imerys site in Aixe-sur-Vienne is currently implementing a project to install a heat pump on-site. Waste heat recovery can be boosted by the heat pump in order to preheat an atomizer's intake air, reducing the site's energy consumption by ~30% (~2 $ktCO_2eq$). Furthermore, Imerys can also reduce fresh water withdrawals from a nearby river by 5,000 m3/year by recycling the condensates, representing 15% of the permit threshold. This pilot project can be replicated in other Imerys' sites wherever existing heat losses can be recovered from effluents or flue gas and boosted using low-carbon electricity to operate the heat pump.

Process innovation

Dedicated process innovation teams within each of the Group's science and technology organizations are conducting process technology research, laboratory testing and pilot studies to develop solutions to tackle the more challenging process-related emissions. A working group of experts oversees an incubator of promising technologies which feed into all the other levers - e.g. radiative heat recovery & heat pumps may feed the energy efficiency lever, while dielectric heating and thermal battery technologies will feed electrification. The incubator includes many additional levers such as circularity, carbon capture & mineralization, hydrogen, plasma torches, nuclear microreactors, and alternative bio-feedstocks. As these new technologies will mostly deliver results after 2030, this experts' working group is further studying key unknowns, including expected future carbon taxes, future energy costs, ability to earn green premiums and potential funding opportunities.

Action	Expected outcome	Results at end 2025
Study various potential innovative decarbonization technologies Identification of innovative decarbonization technologies to be adopted and eventually brought to industrial scale Scope : All Imerys research centers	**up to 35 $ktCO_2eq$** Expected reduction compared to baseline	**1 site** Hydrogen test completed at pre-industrial scale

In 2025, the Capex (R&D) related to development of a new furnace technology using hydrogen amounted to €565 thousands.

05 CASE STUDY
Focus on one of 2025's flagship initiatives

Decarbonizing through Project PRECIZE

Imerys is undertaking a major emissions reduction project in France to help enhance the sustainability of key downstream markets. The goal is to eliminate 100% of Scope 1 emissions from calcium aluminate cement production by two methods: firstly by capturing CO_2 and using it as a raw material for the construction market, and secondly, by displacing the existing fossil fuel with green hydrogen.

The project PRECIZE (*PRocédé ÉCologique et Innovant de liants de spécialité Zéro Émission*) – funded by the French government was officially launched in September 2024, following the completion of consortium validation. Imerys' current objective is to evaluate whether hydrogen can replace fossil fuels in its furnaces to achieve emissions-free combustion. After a first preparation phase, Imerys began hydrogen testing at preindustrial scale in May 2025, using the Furnace Innovation Technology (FIT pilot furnace) located in its Dunkerque site.

Managing the product portfolio

Imerys is currently estimating the GHG emissions associated with producing the main product families in the Group's portfolio. The objective is to identify and direct specific emission reduction actions to specific products in Imerys product portfolio. This will help steer production toward a low-carbon portfolio, and manage growth while reducing emissions. This transversal lever is also activated to reduce Scope 3 emissions (see **section 1.2.2.4, paragraph** *"Reducing Scope 3 emissions"* **of the present chapter**).

Reducing Scope 3 emissions

Scope 3 is considered an indirect source of emissions, which based on Imerys' estimation as described below, represents about 69% of total Group emissions. In 2024, Scope 3 emissions from categories included in SBTi target[1] were estimated to represent about 3,637 $ktCO_2eq$ i.e. around 82% of the Group's total Scope 3 emissions.

Three key decarbonization levers have been identified to help reduce Imerys' Scope 3 emissions across the value chain and meet the 2030 target. Additional reductions in Scope 3 emissions at the Group level will be achieved by reducing waste, business travel and employee commuting (grouped under "other levers").

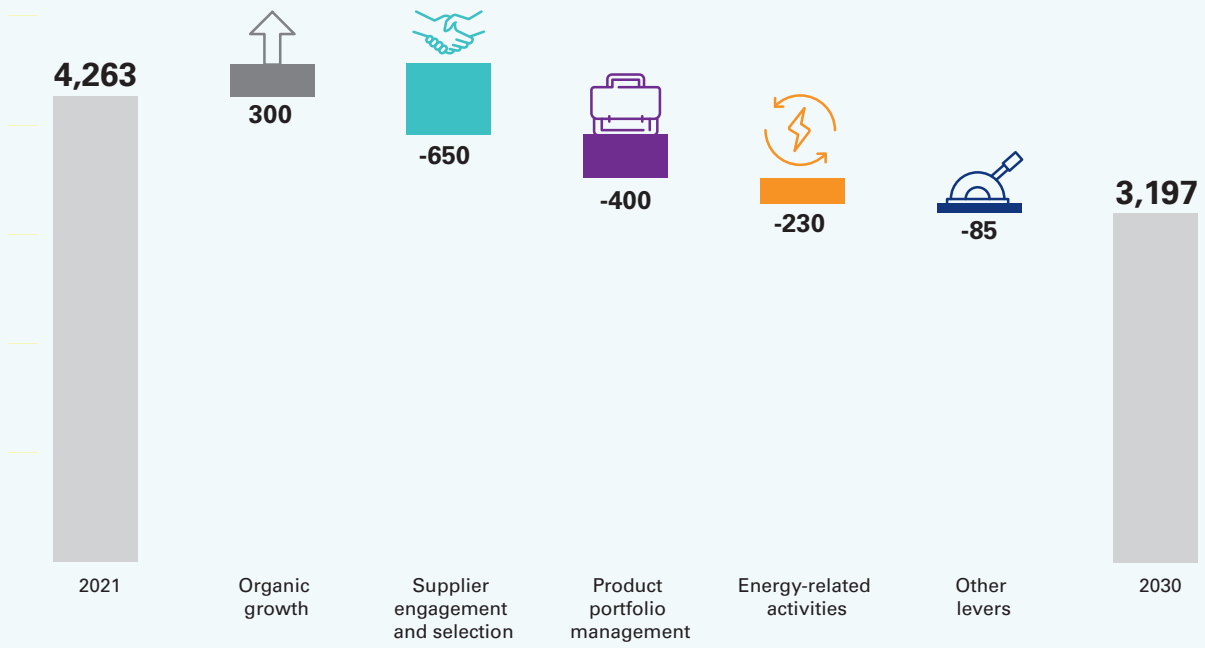

The figure below illustrates the evaluation of the expected reduction potential of each of these decarbonization levers using a top-down approach based on assumptions performed in 2023. The Group will, over the coming years, update this evaluation to visualize the evolution of these levers. It should be noted that the 2025 Scope 3 emissions results indicate that the Group remains on track to achieve its target, in particular with the future reduction expectation for the main scope 3 categories (purchase goods and services, downstream transportation and energy).

Energy-related activities

Managing our product portfolio

Working with suppliers

Decarbonization levers to reduce Scope 3 GHG emissions by 25% by 2030 ($ktCO_2eq$)

1 Purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting, and investments.

Working with suppliers

Imerys is taking action to reduce Scope 3 emissions, focusing as a priority on purchased goods and services, as well as transportation, as these categories accounts for nearly 64% of the total Scope 3 emissions estimated in 2025.

Imerys has engaged with suppliers to commit to science-based targets (SBTs) and develop decarbonization roadmaps for their products. 824 suppliers, representing 57% of the Group's suppliers by spend, currently have emissions reduction targets.

Imerys prioritizes supplier engagement on environmental issues and collaboratively identifies GHG emissions reduction initiatives. Imerys has planned workshops with key suppliers to understand their emission reduction goals and provide support via carbon footprint calculation assistance. This approach ensures focusing resources on suppliers with the highest environmental impact and the greatest potential for positive change through collaboration.

Actions	Expected outcome	Results at end 2025
Identify suppliers which offer less emissions-intensive goods or services Organize suppliers regional workshops on sustainability issues to identify a list of Scope 3 reduction initiatives Scope : Imerys most emissions-intensive purchased goods and services (mainly raw material and chemicals)	**Up to 100 initiatives** implemented	**14 initiatives** implemented **32 ktCO$_2$eq** GHG emissions reduction
Identify low-carbon transport solutions Prioritize low-carbon transport routes, such as switching frorm road to barge transportation Scope : main upstream and downstream transportation routes		**15 initiatives** implemented **11 ktCO$_2$eq** GHG emissions reduction

06 CASE STUDY
Focus on one of 2025's flagship initiatives

Switching to more sustainable waterway transport in Northern Europe

Imeys has partnered with inland shipping company NPRC to use renewable fuel-powered barges to transport minerals from the Group's Antwerp terminal in Belgium to its customers in Northern Europe. NPRC's barges, which Imerys has been using since July 2024, are powered by a Hydrotreated Vegetable Oil (HVO) made from 100% waste oils and fats. The impact compared to traditional fuel represents an 85% reduction of GHG emissions generated by shipments using waterway transports in the Benelux and Germany regions. Imerys is also in the process of implementing similar renewable fuel agreements with trucking companies in France and the UK, and studying electric truck solutions in the US.

Managing Imerys product portfolio

As well as managing the transition to a low-carbon product portfolio, Imerys is changing the specifications of existing products so that more local and bio-based raw materials, and more second-hand or recycled materials from the circular economy may be used (refer to **disclosure requirement [ESRS E5] of the present chapter**). This lever will also help to reduce Scope 1 and 2 emissions, as highlighted in **section 1.2.2.4, paragraph** *"Reducing Scope 1 & 2 emissions"* **of the present chapter.**

Action	Expected outcome	Results at end 2025
Develop innovative and eco-design products Reformulate Imerys most emissions-intensive products by substituting raw materials and production processes Scope : Imerys most-emitting product families	**Scope 1 & 3: ~40 ktCO$_2$eq** full potential quantification ongoing	**20 initiatives** identified

07 **CASE STUDY**
Focus on one of 2025's flagship initiatives

HAR talc production with lower emissions

High Aspect Ratio (HAR) talc is one of the Group's most innovative products to date, enabling the production of lighter and thinner automotive plastic parts that deliver excellent impact resistance and dimensional stability for Imerys customers. In response to the growing demand for materials with a lower GHG footprint, the production of HAR talcs was moved to a different site that is capable of producing it with 58% lower GHG emissions. The switch to the new production site is completed for one of the Group's key customers, resulting in a reduction of 1.2 ktCO2 eq.

Energy-related activities

Scope 3 emissions from fuel and energy-related activities are expected to decrease due to Imerys' energy-related decarbonization projects, such as reducing energy consumption via energy efficiency or using organic waste when sourcing bioenergy, ensuring that the carbon-intensity of its pre-treatment and transportation is as low as possible.

1.2.2.5. Targets, actions and resources regarding climate change adaptation [E1-3, E1-4]

Imerys' long-term ambition is to strengthen all its sites' operational resilience and adaptive capacity to climate-related physical risks and natural hazards, which are developed under **section 1.2.2.2 above**. To achieve this, the Group has set a short-term objective to assess 100% of its operations according to climate scenarios and to develop adaptation plans for the three most significant risks (heat waves, flooding and water stress) by the end of 2025.

Implementing Imerys new climate adaptation action plan, which will enable to adapt the Group's operations in response to climate change and help build its operational resilience, consists of three phases. The climate adaptation roadmap involves a preliminary phase to map and update physical risk assessments using the latest climate data and models, and identifying sites at significant risk. Then, the implementation phase includes identifying potential adaptation actions and developing comprehensive strategies, starting with a few pilot sites, then formulating standardized guidelines for all other Imerys sites based on these insights. Finally, the monitoring phase continuously evaluates the implementation and efficacy of site-specific adaptation measures.

Group Objective	Baseline	Performance 2025	Target
Improve resilience to physical climate risks by assessing Group operations according to climate scenarios and developing adaptation strategies for the three most significant risks	2024 0%	100%	2025 100%

Action	Expected outcome	Results at end 2025
Climate Physical risks assessment Scope: all Imerys operational sites	Site's mapping for climate physical risk	**100%** of sites assessed
Adaptation Plans for significant climate risks Heat waves, water stress, wildfire, flooding and hurricanes are the main risks covered Scope: 23 industrial sites with at least one very high risk	Adaptation measures planned by 2030	**3 pilot sites** with completed adaptation plan

08 CASE STUDY
Focus on one of 2025's flagship initiatives

Awareness workshop on Climate Resilience

Climate resilience was the key focus of Imerys Connect Day (ICD) environmental workshop in 2025. ICD is an annual event organized by the Group that brings together Imerys employees from around the world to foster connection, collaboration, and engagement within the Group. The event aims to strengthen the Group culture and promote a sense of unity across the global organization, with a focus on health, safety and environmental topics. The main objectives of the workshop were to raise awareness on natural hazards that may impact Imerys' operations as well as the health & safety of its employees; use examples to illustrate potential damage caused by extreme weather events; and engage discussion at site level on adaptation measures.

In 2025, the Capex related to climate change adaptation actions amounted to €182 thousands.

1.2.2.6. Metrics related to climate change [E1-5 to E1-8]

Energy consumption and mix [E1-5]

Energy consumption and mix	Unit	2025	2024	% variation (2025/2024)
Fuel consumption from coal and coal products	MWh	283,090	280,353	1%
Fuel consumption from crude oil and petroleum products	MWh	1,198,028	1,258,625	-5%
Fuel consumption from natural gas	MWh	2,640,393	2,706,720	-2%
Fuel consumption from other fossil sources	MWh	5,010	6,078	-18%
Consumption of purchased or acquired electricity, heat, steam, and cooling from fossil sources	MWh	1,440,377	1,708,182	-16%
Total fossil energy consumption	**MWh**	**5,566,898**	**5,959,957**	**-7%**
Share of fossil sources in total energy consumption	**%**	**87.8%**	**89.6%**	**-2%**
Consumption from nuclear sources	MWh	249,985	274,593	-9%
Share of consumption from nuclear sources in total energy consumption	**%**	**3.9%**	**4.1%**	**-5%**
Fuel consumption for renewable sources, including biomass (also comprising industrial and municipal waste of biologic origin, biogas, renewable hydrogen, etc.)	MWh	282,689	246,959	14%
Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources	MWh	242,619	168,162	44%
The consumption of self-generated non-fuel renewable energy	MWh	185	85	118%
Total renewable energy consumption	**MWh**	**525,493**	**415,206**	**27%**
Share of renewable sources in total energy consumption	**%**	**8.29%**	**6.24%**	**33%**
Total energy consumption	**MWh**	**6,342,376**	**6,649,756**	**-5%**

In 2025, Imerys' total energy consumption decreased by 5% year-on-year, driven by Group-wide energy efficiency initiatives and favorable changes in the product mix. Since 2018, the Group has progressively increased its renewable energy share, which reached over 8% in 2025. Consequently, fossil fuel consumption fell by 7%, displaced by a shift toward renewable fuels, primarily biomass. Similarly, consumption of renewable electricity rose by 27% in 2025, supported by the inauguration of a new solar photovoltaic installation and the strategic use of Energy Attribute Certificates (EACs).

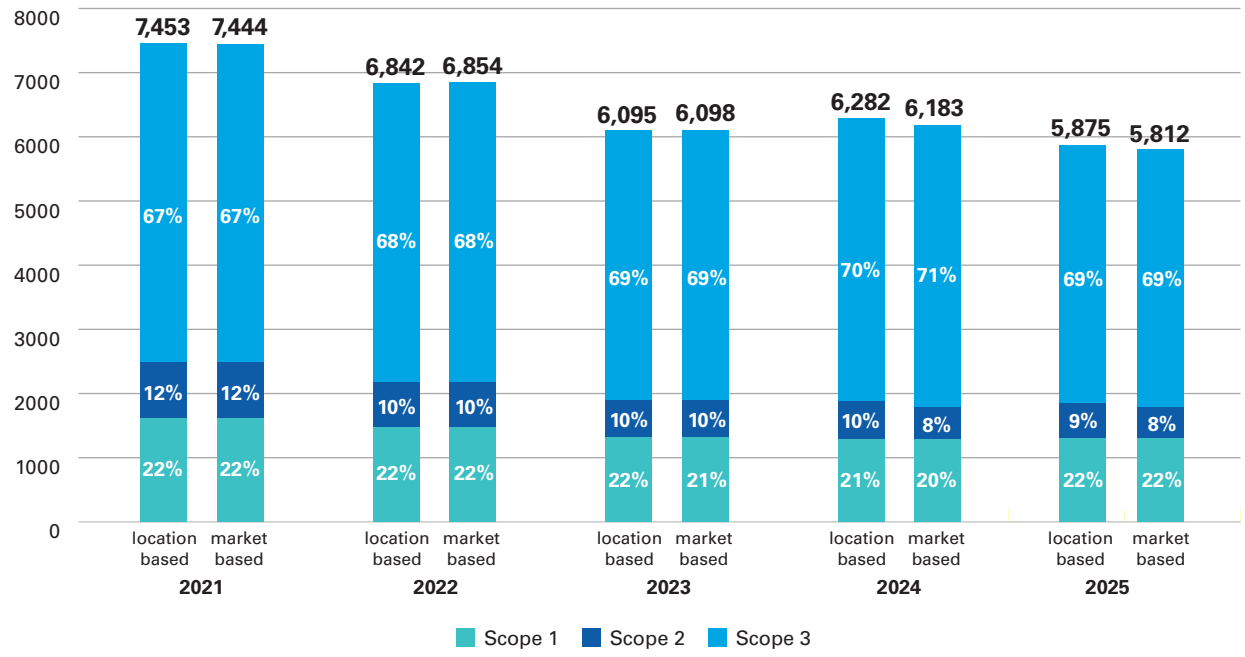

Energy intensity per net revenue	Unit	2025	2024
Total energy consumption per net revenue (from activities in high climate impact sectors[1])	MWh/€ million	1,874	1,845
Net revenue (from financial statements) from activities in high climate impact sectors used to calculate energy intensity[2]	€ million	3,384	3,605

The energy intensity per net revenue increased by nearly 1.6% due to adjustments in the product and price mix.

1 The Group's activities are classified under NACE codes. The CSRD defines NACE codes from A to H as a "high climate impact sector".
2 Refer to chapter 6, section 6.1.2, note 8 "Revenue" for more details on the Group's revenue.

Gross Scopes 1, 2, 3 and Total GHG emissions [E1-6]

GROSS SCOPES 1, 2, 3 AND TOTAL GHG EMISSIONS (KTCO2EQ)

Total GHG emissions (Scope 1, 2, 3)	Unit	2025	2024
Total GHG emissions (Scope 1, 2 & 3 location-based)	$ktCO_2eq$	5,875	6,282
Total GHG emissions (Scope 1, 2 & 3 market-based)	$ktCO_2eq$	5,812	6,183

SCOPE 1 AND 2 EMISSIONS

				Retrospective		Milestones and target years	
Metric	Unit	2025	2024	Baseline 2021	% variation (2025/2024)	2030[1]	Annual % target / base year
SCOPE 1 GHG EMISSIONS							
Gross Scope 1 GHG emissions	$ktCO_2eq$	1,307[2]	1,281	1,609	2%	-30%	-3.3%
Percentage of Scope 1 GHG emissions from regulated emission trading schemes[3]	%	36%	34%	32%	6%	-	-
SCOPE 2 GHG EMISSIONS							
Gross location-based Scope 2 GHG emissions	$ktCO_2eq$	537	601	886	-11%	-	-
Gross market-based Scope 2 GHG emissions	$ktCO_2eq$	474[4]	502	877	-6%	-64%	-7.1%
TOTAL GHG EMISSIONS (SCOPE 1 & 2)							
Total Scope 1 & 2 GHG emissions (location-based)	$ktCO_2eq$	1,844	1,882	2,494	-2%	-	-
Total Scope 1 & 2 GHG emissions (market-based)	$ktCO_2eq$	1,781	1,783	2,485	0%	-42%	-4.7%

1 Imerys does not currently have specific separate Scope 1 and Scope 2 GHG emissions reduction targets. The 42% reduction target covers both Scope 1 & 2 combined. Estimated reductions per Scope are provided in the table, yet they are not fixed figures and could potentially change as decarbonization projects continue to be studied and deployed across the Group.
2 FLAG emissions have been added in the total of scope 1 GHG emissions (representing 5.7% of total scope 1GHG emissions).
3 In 2023, Imerys submitted a new climate target for validation by SBTi. Minor adjustments have been made on historical data presented here (2021 baseline and 2022) compared with that presented in 2021 and 2022 to comply with the updated methodology for non-CO2 emissions as well as corrections for minor reporting errors that were not significant at Group level. To properly follow Imerys baseline and trajectory, it was decided to correct this data prior to the SBTi submission.
4 The residual mix represents the average emissions from all unclaimed electricity within a national grid and is provided by the Association of Issuing Bodies (AIB) for European countries.

In 2025, Imerys included Forest, Land and Agriculture (FLAG) emissions within its GHG emissions inventory for the first time. FLAG emissions include those due to *land use change* (CO_2 emissions only) as well as *land management* (CO_2, CH_4 and N_2O emissions). *Carbon removals* are natural solutions that enhance carbon sequestration in a land sink, thus taking CO_2 out of the atmosphere and storing it permanently. Due to its mining activities as well as land restoration, mine rehabilitation and land compensation actions, Imerys is concerned with both *land use change* emissions and *carbon removals* and thus monitors the related CO_2 scope 1 emissions. Imerys is not involved in any *land management* activities within its own operations. Therefore, the Group does not generate any CH_4 nor N_2O FLAG-related emissions. Overall, Imerys' FLAG GHG inventory includes *land use change emissions* and *gross biogenic land CO_2 removals* only.

The Group's Scope 1 and 2 GHG emissions were equal to 1,781 ktCO2eq in 2025, which represents a 28% decrease since the base year 2021. As of December 31, 2025, the Group's Scope 1 and 2 GHG emissions equalled 526 tCO2eq per € million of revenue. Based on these results, Imerys has successfully achieved the first Sustainability Performance Target by reaching a reduction in GHG Emissions Intensity (Scopes 1 and 2) of 27% relative to the 2018 Baseline, thereby meeting the minimum 22.9% reduction threshold required under the terms of the Sustainability-Linked Bond Prospectus dated May 11, 2021 . This achievement is formally validated by the External Verifier and confirmed in the SPT Verification Assurance Certificate, which is available on Imerys.com.

The change in volume and product mix, along with the implementation of decarbonisation projects, contributed to a reduction of ~70 ktCO2eq in absolute terms, i.e. a 4% reduction compared to 2024. Key decarbonisation initiatives include energy efficiency measures, substitution of emissions-intensive fossil fuels with biofuels or natural gas when biomass is unavailable, as well as the purchase of low-carbon and renewable electricity. Despite this reduction, Scope 1 and 2 GHG emissions remain stable at Group level due to changes in the reporting methodology. Beginning in 2025, residual mix emission factors were applied to all European sites without specified electricity purchases, replacing previously-used country-grid emission factors. Moreover, FLAG GHG emissions were included for the first time in Imerys' GHG emissions inventory, representing an additional 74 ktCO2eq. Finally, the acquisition of Chemviron and the divestment of some Imerys sites accounts for a cumulative GHG emissions reduction of 1.4% in 2025 compared to 2024.

GHG intensity per net revenue	Unit	2025	2024
Total GHG emissions (scope 1 , 2 market-based) per net revenue (tCO2eq/ million euros)	tCO2eq/€ million	526	495
Total GHG emissions (Scope 1, 2 & 3 location-based) per net revenue	tCO_2eq/€ million	1,736	1,743
Total GHG emissions (Scope 1, 2 & 3 market-based) per net revenue	tCO_2eq/€ million	1,718	1,715
Total net revenue (Financial statements) used to calculate GHG Intensity[1]	€ million	3,384	3,605

1 Refer to chapter 6, section 6.1.2, note 8 "Revenue" for more details on the Group's revenue.

Scope 3 Emissions

Scope 3 GHG emissions are calculated on a cradle-to-gate basis by multiplying activity data by specific emission factors. The GHG Protocol outlines recommended Scope 3 calculation methods. Each method corresponds to a certain level of precision and the minimal requirements depend on the level of materiality assessed for each emission category. Within a GHG emissions category, several approaches can be used for subcategories. The GHG Protocol methods used by Imerys to calculate Scope 3 emissions are presented in the disclosure requirement [ESRS 2 BP-2] of the present chapter. For more details about the calculation of each category, please refer to section 1.7 [MDR-M] of the present chapter.

Significant Scope 3 GHG emissions			Retrospective			Milestones and target years	
Metric	Unit	2025	2024	Baseline 2021	% variation (2025/2024)	2030	Annual % target/base year
Total significant gross indirect (Scope 3) GHG emissions	**$ktCO_2eq$**	**4,031**	**4,400**	**4,959**	**-8%**	**-**	**-**
1. Purchased goods and services	$ktCO_2eq$	1,456	1,660	2,105	-12%	-	-
2. Capital Goods	$ktCO_2eq$	250	263	210	-5%		
3. Fuel and energy-related activities (not included in Scope1 or Scope 2)[1]	$ktCO_2eq$	344	355	514	-3%	-	-
4. Upstream transportation and distribution	$ktCO_2eq$	293	355	346	-18%	-	-
5. Waste generated in operations							
6. Business traveling	$ktCO_2eq$	53	58	58	-9%	-	-
7. Employee commuting							
8. Upstream leased assets	$ktCO_2eq$	NS[2]	NS	NS	-	-	-
9. Downstream transportation and distribution	$ktCO_2eq$	821	773	784	6%	-	-
10. Processing of sold products[3]	$ktCO_2eq$	568	593	552	-4%	-	-
11. Use of the sold products	$ktCO_2eq$	NS	NS	NS	-	-	-
12. End-of-life treatment of sold products[4]	$ktCO_2eq$	139	170	144	-18%	-	-
13. Downstream leased assets	$ktCO_2eq$	NS	NS	NS	-	-	-
14. Franchises	$ktCO_2eq$	NS	NS	NS	-	-	-
15. Investments	$ktCO_2eq$	107	173	248	-38%	-	-
Total significant gross indirect (Scope 3) GHG emissions included in SBTi target	**$ktCO_2eq$**	**3,324**	**3,637**	**4,263**	**-9%**	**-25%**	**-2.8%**

Scope 3 emissions represent about 69% of total Group GHG emissions. The Group's overall Scope 3 GHG emissions equalled 4,031 ktCO2eq in 2025, out of which 3,324 ktCO2eq were part of categories covered by Imerys' scope 3 emissions reduction target, which represents a 22% decrease, since the base year 2021.

Focussing on scope 3 categories covered by the reduction target, GHG emissions decreased by 313 $ktCO_2eq$ in absolute terms in 2025, i.e. a 9% reduction compared to 2024. This decrease was explained by the following main drivers: 2.5% of reduction was due to lower purchasing volumes and reduction in global spend due to change in production volume, combined with a 3.4% reduction related to perimeter variations in Group owned assets and JVs. Methodology and data accuracy improvement accounted for a further decrease of 0.8%. Finally, decarbonization efforts and supplier performance drove a 1.9% decrease, reflecting an improved purchasing mix favored by products with lower carbon intensity within procurement, alongside enhanced supplier performance. The integration of supplier-specific Product Carbon Footprints (PCFs) helped substantiate this positive shift in the mix.

Imerys continues its monitoring actions within the value chain. As of the end of 2025, 57% of the Group's suppliers by spend, representing 824 suppliers, had emissions reduction targets. This translates into more than 60% of Imerys' Scope 3 emissions from purchasing categories covered by reduction targets.

1 This category's emission factors were updated for the estimation of 2023 and 2024 figures, as to include the latest available data published by the International Energy Agency (IEA).
2 NS : Non Significant.
3 This category does not fall within the Scope of the Scope 3 SBTi objective.
4 This category does not fall within the Scope of the Scope 3 SBTi objective.

Internal carbon pricing [E1-8]

Since 2020, Imerys has set a shadow price for carbon as part of its commitment to tackling climate change. The aim is to define a value, voluntarily set, in order to quantify the economic risk of its greenhouse gas emissions and to establish this value as a criterion in project decisions. This shadow price is applicable to: (i) all projects related to changes in energy consumption or energy efficiency; (ii) all projects worth more than €150,000 which have an impact on GHG emissions to the tune of +/-1,000 tCO_2eq. This price is integrated into project profitability analyses and is used to highlight the risks or capital gains associated with them, and to guide investment decisions toward the most virtuous projects. The same approach is used for mergers and acquisitions together with the prospect's tCO_2eq/sales ratio so as to favor acquisitions that serve the Group's emissions reduction target. It has demonstrated its relevance and usefulness for several projects, and has another advantage: by requiring that the associated emissions be calculated for each project, it encourages the upskilling of teams in this area, and sets the reduction of greenhouse gas emissions at the heart of all decision-making processes.

The internal carbon shadow price was originally set at €50/tCO_2eq in 2020, and it was further increased to €80/tCO_2eq in 2022, in line with global market trends.

For research and development projects, the carbon shadow price has been determined based on the future CO_2 prices estimated by the International Energy Agency (IEA) in its World Energy Outlook published in 2021, following different scenarios. The value of €100/tCO_2eq has been selected to be aligned with Imerys' commitments on climate change, i.e. following the 1.5°C trajectory with a medium term time horizon (5-10 years).

Types of internal carbon prices	Prices applied (€/tCO_2eq)	Scope description
Capex	**80**	– all projects related to changes in energy consumption or energy efficiency; – all projects worth more than €150,000 which have an impact on GHG emissions to the tune of +/- 1,000 tCO_2eq; – mergers and acquisitions
Research and Development (R&D) investment	**100**	– all new product development projects requiring Science & Technology resources and scored according the Group SustainAgility Solutions Assessment (SSA) framework

1.2.3. Environmental management and pollution prevention [ESRS E2]

The Group's industrial activities have environmental implications, particularly when it comes to air and water quality. Production processes generate various air emissions potentially degrading local air quality in the vicinity of operational sites, and may affect local communities living nearby areas. This potential impact on air quality is a direct result of the diverse pollutants released during production operations.

Similarly, the Group's activities pose risks to water resources. In the event of accidental discharges, effluents containing suspeneded matter or potential pollutants can be released, this may compromise both surface and groundwater quality.

These environmental negative impacts underscore the importance of implementing robust pollution control measures and maintaining stringent environmental policies to mitigate the effects on air and water resources in the areas where the Group operates.

Imerys is committed to complying with relevant environmental laws and regulations, to implementing an Environmental Management System (EMS) to minimizing negative environmental impacts, to continuously improving environmental performance associated with its operations, to ensuring an environmental conservation approach with defined objectives and targets and to raising internal and external awareness of environmental impacts through training and other efforts.

Note: the following disclosure describes Imerys commitments related to the management of water quality, as outlined in [ESRS E2]. The water conservation is detailed in [ESRS E3] of the present chapter, and provides more information on this matter.

1.2.3.1. Processes to identify and assess material pollution impacts, risks and opportunities [IRO-1]

Imerys has initiated a comprehensive process to identify material impacts, risks, and opportunities related to pollution across its operations and value chain. The Group has launched a specific, annual site-level survey to screen its locations and business activities, focusing on pollutants listed in Annex II of the E-PRTR[1] for air, water, and soil. This screening process aims to acquire a thorough understanding of the particular stakes at each site. The methodology involved establishing an initial baseline, taking into account the multiple standards and metrics that exist worldwide for assessing and measuring pollutants. Imerys has recognized the need to implement a harmonized method to assess each substance consistently across all sites. This approach supports the implementation of an accurate and reliable information reporting while preventing potential consistency discrepancies. Imerys acknowledges that this baseline is a starting point and plans to progressively refine and improve it over time, demonstrating a commitment to ongoing enhancement of its pollution-related impact assessment and reporting processes. The results of this assessment were used in the double materiality analysis described in the disclosure requirement [ESRS 2 SBM-3] of the present chapter. The material impact and risks related to pollution of air and water are presented in the table hereafter.

Note: although Imerys has not conducted specific, targeted consultations with local affected communities on this matter, the Group aims to establish constructive dialogue with its stakeholders living nearby. The Group takes into account potential complaints linked to air and water pollution through the established grievance mechanism, as described in the disclosure requirements [ESRS 2 IRO-2 S3].

ESRS E2. Pollution

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : POLLUTION OF AIR			
⊖ Actual negative impact	● Own operations (SET[2] and RAC[3] business activities)	Group activities **cause air pollution and may deteriorate local air quality** as a result of the various air emissions generated during production processes.	●●○ Medium
SUB-TOPIC : POLLUTION OF WATER			
⊖ Actual negative impact	● Own operations (all activities)	Group activities **impact water quality** (surface and/or and ground) in the event of **accidental release of effluents** containing hazardous substances or suspended matter.	●○○ Short
R Risk	● Own operations (all activities)	The Group may be exposed to **financial risks** related to increasingly **stringent pollution prevention and control requirements** or reputational damage in case of pollution incident or non-compliance with new pollution regulations.	●○○ Short

1 Annex II of the E-PRTR (European Pollutant Release and Transfer Register) is a comprehensive list of pollutants that are required to be reported by industrial facilities in the European Union. It includes a wide range of substances categorized by their potential impacts on air, water, and soil, serving as a standardized reference for environmental reporting and monitoring across Europe.
2 SET refers to Solution for Energy Transition as described in chapter 1 of the present report.
3 RAC refers to Solutions for Refractory, Abrasives and Construction as described in chapter 1 of the present report.

1.2.3.2. Policies related to pollution [E2-1]

Environmental stewardship rests upon the implementation of a robust Environmental Management System (EMS), which is a key factor in improving operational excellence while reducing environmental impacts. Imerys requires each operation to have an effective EMS enabling it to identify and establish controls for significant environmental risks. The mandatory EMS requirements for all activities are covered by Group-wide environmental policies, which include eight pillars aligned to the core elements of international standards for environmental management systems. The policies on this matter specify the internal requirements applicable to all operations.

These internal policies cover air and water pollution amongst other topics. They define the responsibilities of site level and senior managers and Environment, Health and Safety (EHS) personnel in managing and controlling potential exposures and risks in order to prevent adverse environmental impacts and to reduce the environmental footprint of Imerys operations.

Additionally, the Group has a structured internal environmental incident reporting policy that supports sites to implement process to prevent and mitigate the impact and to report it in the internal system. Each incident is investigated as per Group policy, and corrective action plans are pursued until closure.

The policy applies to the same scope as the consolidated financial statements. Newly acquired sites are included, from the date of acquisition. Warehouses, offices and laboratories are excluded, when not attached to an industrial site. At Group level, the implementation of these policies is supervised by the Sustainability Committee. For more information about the governance over environmental topics, refer to the disclosure requirement [ESRS 2 GOV-1] of the present chapter.

The internal water policy established comprehensive control measures for both wastewater effluents and stormwater runoff, dedicated to environmental protection and minimizing pollution risk.

Regarding wastewater management, the policy mandates strict identification of water discharges and channeling to ensure discharges quantification and to prevent diffuse releases. Group policy requires regular monitoring of water quality against applicable regulations or internal Group standards where regulation is non-existent or insufficiently prescriptive, specifically on physico-chemical parameters, such as total suspended solids, pH and temperature. Furthermore all water treatment systems and monitoring equipment are subject to regular inspection, calibration and maintenance, with upkeep activities documented in a dedicated maintenance logbook.

For stormwater management, the policy focus on preventing runoff contamination by preserving undisturbed areas and minimizing impermeable surfaces, wherever possible without entailing safety and environmental risks. Imerys operations are required to keep an updated drainage map to identify potential pollution sources, including stored chemicals, waste materials and maintenance areas, and integrate protective barriers and erosion controls.

Within its value chain, the Group implemented since 2018 a comprehensive responsible purchasing policy, based on Supplier Environmental, Social and Governance Standards ("Supplier ESG Standards"). This policy, which covers a broad panel of environmental topics, asks specifically the suppliers to :

- Comply with all applicable environmental regulations;
- Implement an environmental management system in line with recognized international standards;
- Ensure that all environmental risks and impacts are identified, assessed and mitigated to as low as reasonably practicable;
- Optimize the use of natural resources to reduce their environmental footprint by preventing pollution, managing waste and implement the "reduce, reuse and recycle" principle;
- Promote the development and dissemination of environmentally friendly practices, including through effective and appropriate training.

1.2.3.3. Actions and resources related to water pollution [E2-2]

Environmental Maturity Matrix (EMM)

To support the development of an effective environmental management system across the Group, an Environmental Maturity Matrix covering the critical elements of environmental management is used. This maturity matrix, as with the other continuous improvement matrices deployed across the Group, is used to assess site level environmental performance and guide the development of action plans.

The Group Environment, Health and Safety (EHS) Audit Team conducts annually comprehensive and independent onsite Environmental compliance audits using the Environmental Maturity Matrix tool. Every year around 30 sites are audited for all their environmental conformity by internal environmental experts.

In 2025, 31 audits were conducted out of the 36 initially scheduled. This adjustment resulted from a strategic streamlining of the audit program to prioritize sites with the highest EHS stakes, ensuring optimal allocation of available auditor resources within a challenging economic context.

External environmental certifications

In addition to implementation of mandatory EMS requirements, which are fully aligned with international standards, the Group maintains a number of ISO 14001 and Eco-Management and Audit Scheme (EMAS) certifications. As of the end of 2025, 33% of Group operations are ISO 14001 or EMAS certified by external certification organizations. The evolution of certification coverage compared to previous years comes from a structural realignment of site definition and industrial entity aggregation methodology rather than a reduction in the actual number of certified sites, which remains stable.

Regulatory monitoring

Since 2018, the Group has used an integrated solution to manage environmental legal compliance and regulatory monitoring. This solution supports the development of updated environmental legal registers, with regular alerts, register updates and regulatory assistance by environmental legal specialists for each country. To date 94% of Imerys sites spread across 29 countries from all continents are covered by dedicated tools for monitoring regulatory compliance. In addition to the new solution developed at Group level, sites across Imerys use other tools to support regulatory monitoring locally. Imerys tracks and analyzes environmental performance on a quarterly and annual basis at all levels of the Group.

Air and water quality monitoring

Water quality parameters are generally monitored at each discharge point of the operation, ensuring compliance with site-specific threshold values mandated by local regulations. In instances where regulatory requirements do not specify quality parameters, sites are required to adhere to the Group's internal standards. These internal standards establish comprehensive criteria, with a strategic plan extending to 2030, aimed at harmonizing water quality thresholds. The focus areas include total suspended solids, temperature, and pH levels, reflecting the Group's commitment to responsible water management and environmental stewardship across all its operations. (Refer to **disclosure requirement [ESRS E2-3]** for more information about Imerys 2030 objective)

Monitoring of atmospheric emission and dust fallout are periodically carried out in order to prevent air emission pollutants. Emission thresholds are established in accordance with applicable local regulations. Sites assess their air emissions based on materiality, employing specific methods and tools tailored to their operational context. The most frequently measured parameters include dust, sulfur oxides (SO_x), and nitrogen oxides (NO_x), with additional parameters evaluated based on site-specific environmental considerations. The current reporting scope for NOx and SOx pollutants is solely based on industrial sites and excludes extractives sites as this is due to the wide variety of mobile equipment used at mining extractives sites, which requires substantial work to identify the type of equipment and the type of fuel it uses. To address PM10 dust emissions, Imerys has launched a progress plan to systematically strengthen the assessment and monitoring of this pollutant in order to set its materiality . Initiated last year, this program focuses on few sites in Europe and the United States where PM10 measurement is required. Currently, fewer than ten sites have been identified as having potential material emissions. Over the coming years, the Group is committed to map the PM10 potential materiality and assess reporting methodologies over the coming years. This will ensure to demonstrate the materiality of this pollutant and to strengthen the Group's reporting if threshold is exceeded. The frequency of measurements is aligned with local regulatory requirements and site-specific environmental challenges. This approach ranges from continuous online monitoring to regular periodic assessments (as detailed in **paragraph below "***Site identification with regards to air emissions***"**).

Management of environmental incidents

The Group's ultimate aim is to have zero environmental incidents, but when they do occur, each incident is thoroughly investigated as an opportunity to learn and prevent recurrence. The Group has implemented a comprehensive environmental incident reporting policy with the primary objective of fostering continuous improvement. This policy relies on a dedicated database to enhance the understanding of the types and root causes of environmental incidents occurring within operations. The incident management framework is designed to achieve multiple critical objectives:

- Mitigate environmental impacts and prevent recurrence of incidents through thorough analysis and corrective actions;
- Ensure accurate classification and recording of all environmental incidents for consistent tracking and trend analysis;
- Facilitate prompt notification and conduct appropriate investigations to address issues in a timely manner;
- Implement proper responses to non-conformities.

Training, awareness and communication

Training and awareness of the Group environmental management are achieved through various communication and training activities. Local initiatives also arise at regional, hub or site level and include job-related environmental training. These training courses can be followed in several formats depending on the target audience and in different languages (as applicable):

Training activities	Targeted audience	description
Environmental Learning Path	Newcomers	The "Caring for our Planet" module is intended to introduce the key principles and tools of the Group environmental management system.
EHS auditor training	EHS and mining and resource planning auditors	This training conducted annually aims at aligning and calibrating the Group internal auditors team members (update on the Imerys requirements, auditing process and techniques, …). This is required for all auditors existing and new members joining the group auditor team.
Digital courses on the Imerys Learning Hub	All Imerys employees	The Group provides its employees with an e-learning platform offering a broad choice of on-demand addition contents: – Basic environmental modules – Specific environmental Learning modules – Rebroadcast of internal environmental courses, webinars and virtual classes focusing on specific environmental themes.
Imerys Connect day	All Imerys employees	Imerys Connect Day is an annual event organized by the Group and typically brings together Imerys employees from around the world to foster connection, collaboration, and engagement within the Group. The Connect Day usually includes various activities such as: – Presentations on Imerys EHS performance and recognition of employee achievements – Workshops and discussions on key EHS topics – Team-building exercises – Networking opportunities for staff from different regions and departments The event aims to strengthen the Group culture and promote a sense of unity across the global organization, with a focus on health, safety and environmental topics.

Action	Expected outcome	Results at end 2025
EHS audits On-site EHS compliance audits Scope : Imerys selected sites	**36** audits planned in 2025	**31** audits completed (86 % of the plan)
Air emission review Definition of air emissions management plans Scope : Imerys priority sites[1]	**7** air emissions plans to be defined	**7** air emission plans defined (100 % of the plan)

1

01 CASE STUDY

Winner of the SD Challenge 2025 : Precise Environmental Management

Imerys is driving a strategic effort a to achieve ultra-low emissions at its site in China. The project strengthens real-time monitoring by installing continuous emission-tracking equipment and NOx sensors. It reduces fugitive emissions through improved enclosures, upgraded dust-collection systems, and localized air-quality monitoring stations. All environmental data is then integrated into a plant-wide management platform that provides more efficient and proactive oversight. This coordinated approach enables significant reductions in atmospheric emissions, with expected performance at less than 50% of regulatory thresholds.

02 CASE STUDY

Strategic air emission reduction in Belgium

The partnership between Imerys and E.ON at the Willebroek production site reflects a strong commitment to reducing air emissions through advanced industrial solutions. The tail gas treatment plant integrates an advanced exhaust gas treatment system specifically designed to substantially reduce atmospheric pollutants, including SO_x and NO_x. By capturing and treating process off-gases rather than flaring them, the project delivers a marked improvement in local air quality and significantly lowers the site's overall air emission footprint.

03 CASE STUDY

Multiparameter dust monitoring

An advanced multiparameter dust-monitoring system has been implemented at one of Imerys' sites in Switzerland to manage and mitigate dust emissions. The initiative adresses and anticipates both environmental requirements and potontial community impacts related to about dust fallout. While the plant meets legal emission limits, the project uses a multifaceted monitoring approach to track emission patterns, dust dispersion, and chemical composition. By collecting and analyzing this data, the Site can identify key emission sources, optimize operations according to weather conditions, reduce overall dust impact, and maintain transparent communication with stakeholders.

1.2.3.4. Targets related to air and water pollution [E2-3]

Site maturity level assessment

Achieving the Group's 2025 commitments

The environmental management target is to ensure that 100% of Group sites have assessed their environmental maturity at least one time every three years by 2025. The environmental maturity matrix, organized around Imerys' policies, allows the sites to measure their performance and then to deploy the continuous improvement program. The matrix is updated when environmental policies are updated.

Group Objective	Baseline	Performance 2025	Target
Reduce environmental impacts by assessing the maturity level of sites against environmental management requirements[1]	2022 0%	100%	2025 100%

Identifying material sites for air and water pollution

In 2024, based on the updated results of the double materiality assessment, the Group has implemented a methodology for identifying the material sites with respect to air emissions and water pollution across its industrial facilities. This identification process is based on two key criteria:

1. Instances where substance threshold exceedances affect more than two sites within the Group, and
2. Sites that exceed the thresholds specified in the European Pollutant Release and Transfer Register (E-PRTR) list

Site identification with regards to air emissions

Achieving the Group's 2025 commitments

At the Group level, air pollutants, primarily sulfur oxides (SO_x) and nitrogen oxides (NO_x), are predominantly associated with operations in the Solutions for Refractory, Abrasives, and Construction and the Solutions for Energy Transition Business Areas,distinctive to the specific industrial processes inherent to these operations.

It is noteworthy that all sites exceeding the E-PRTR thresholds are in compliance with their respective local regulations, underscoring the Group's commitment to regulatory adherence across its global operations. In 2024, seven sites have been identified out of the Group's industrial facilities worldwide, accounting for less than 5% of the Group's total industrial footprint. These sites are located in Western Europe and in the United States.

In 2024, Imerys established a new short term objective to manage air pollutants emissions, with a focus on these seven priority sites. This addition objective and associated action plan was reviewed and validated by the Board and Strategy and Sustainability Committees.

Group Objective	Baseline	Performance 2025	Target
Reduce the risk of air pollution by ensuring priority sites[2] define site specific air emission management plans.	2024 0%	100%	2025 100%

In 2025, significant progress was achieved toward reducing air-pollution risks by ensuring that all priority sites developed and validated site-specific air emission management plans. A comprehensive review process was implemented including an assessment of local regulatory contexts, emission sources, monitoring practices, and environmental management systems. Each site was engaged to provide detailed documentation on SOx, NOx, dust, and other air emissions, enabling a consistent verification of calculation methods, compliance status, and data reliability. This structured approach not only strengthened the accuracy and transparency of reported emissions but also supported these priority sites in identifying areas of improvement and, where relevant, initiating action plans to enhance their operational maturity. The seven sites identified as exceeding the indicative thresholds for air pollutants (notably SOx, NOx and CO), remain compliant with local regulations (further details can be found in **disclosure requirement [ESRS E2-4]**). A reporting process has been implemented to quantify the main air pollutants and improve the accuracy and consistency of the data collected across sites. Due to differences in measurement methodologies between countries, the consolidation of PM10 dust emission data remains an ongoing process as described in the **section** *"Air and water quality monitoring"* **above**.

1 Environmental Management requirement as defined by Imerys policies and measured by the environmental maturity matrix, which is based on leading international environmental standards.
2 The list of priority sites with respect to air emissions is based on (1) Instances where substance threshold exceedances affect more than two sites within the Group (2) sites that exceed the thresholds specified in the European Pollutant Release and Transfer Register (E-PRTR) list.

Site identification with regards to water pollution

Based on the material sites identification process described above, none of the Group's sites are considered as material sites for water pollution. However, the Group has identified **two sites** that exceed certain E-PRTR thresholds. For these two sites, they are in compliance with their respective local regulations and specific action plans are adressed.

These plans are subject to a rigorous management and monitoring process at multiple levels of the organization: site-specific, Business Area, and Group-wide. This multi-tiered approach ensures comprehensive oversight, facilitates the effective implementation of necessary improvements, and demonstrates the Group's commitment to responsible water management and environmental stewardship across its operations. In 2025, the Group implemented a reporting process enabling the quantification of the identified pollutants, which improves the accuracy of the information disclosed.

Furthermore, in its commitment to advancing material impact management, Imerys has established a new mid-term objective focused on water pollution management. The details of this new objective, outlined in the following section, demonstrate Imerys' ongoing efforts to enhance its sustainability practices and address key environmental challenges.

Toward Imerys 2030 ambition

Imerys has made substantial progress in water quality reporting and monitoring, as evidenced by its performance against established targets. Nevertheless, the Group acknowledges that water quality management remains a multifaceted and intricate challenge. This topic, encompasses not only environmental considerations but also technological, regulatory, and operational aspects. As a leader in the industrial minerals sector, Imerys understands that addressing water quality concerns requires a comprehensive approach, innovative solutions, and collaborative efforts within and beyond its industry.

Objective, metric and target description

> **Objective 2026-2030** : Cover 90% of priority water discharge points with continuous water monitoring

The metric related to the voluntary target (i.e. not mandatory as per a specific regulatory framework) will tracks the percentage of **priority discharge points** equipped with online monitoring systems. This initiative enables continuous, real-time monitoring of crucial water quality parameters, including temperature, pH and total suspended solids, at Imerys **most material sites**. By leveraging advanced technology for constant surveillance, Imerys ambition is to swiftly detect and address any potential water quality issues, ensuring prompt corrective actions and minimizing environmental impact.

Scope of the objective

To identify the sites included in the 2026–2030 roadmap, the Group conducted a comprehensive assessment of all industrial operations within its financial perimeter, encompassing all business areas and geographical locations. This evaluation focused exclusively on Imerys' direct operational footprint, without extending to the broader value chain.

The Group established specific criteria to select the sites for this initiative, primarily focusing on Imerys locations with the largest discharge volumes to surface and sea waters and those with potential significant quality impacts[1]. Based on these criteria, 14 sites, predominantly located in the United States and Europe, were identified as sufficiently material to be included in the scope of this objective.

For each selected site, a thorough evaluation of priority discharge points was conducted through collaborative efforts involving local site expert teams, business area specialists, and Group-level experts. A priority discharge point is defined as a continuous outflow of significant water volumes from operations into the environment.

A priority discharge point is considered as equipped with online monitoring systems when it continuously measures three key parameters: total suspended solids, temperature, and pH levels. These parameters have been identified as the most material indicators for assessing the environmental impact of Imerys' operations on water quality.

1 Priority Sites have been selected hierarchically to reach >80% coverage of total water discharge to surface water and sea, by order of contribution to the Group value, giving priority to sites with past water incidents and/or complaints and located within a radius of 5 km in an area classified as IUCN category I, II or III.

1.2.3.5. Metrics related to air and water pollution [E2-4]

Metrics related to air emissions	Unit	2025	2024
Number of sites exceeding E-PRTR Threshold of CO	#	2	-
Total CO emissions for the sites exceeding the E-PRTR threshold	tonnes	2,885	-
Number of industrial sites exceeding E-PRTR Threshold of SO_x	#	5	5
Total SO_x emissions for the industrial sites exceeding the E-PRTR threshold	tonnes	1,491	1,290
Number of industrial sites exceeding E-PRTR Threshold of NO_x	#	4	4
Total NO_x emissions for the industrial sites exceeding the E-PRTR threshold	tonnes	1,323	1,292
Metrics related to water pollution			
Number of sites exceeding E-PRTR threshold of Ni	#	1	-
Total Ni discharged for the sites exceeding the E-PRTR threshold	kg	61	-
Number of sites exceeding E-PRTR threshold of Cl	#	1	-
Total Cl discharged for the sites exceeding the E-PRTR threshold	tonnes	4,118	-

By default, the Group's SO_x and NO_x emissions from fuels are automatically calculated on a monthly basis with fuel consumption and SO_x and NO_x emission factors specific to fuel from the EPA AP 42 database. SO_x and NO_x emissions can also be reported manually at site level for the operations having a continuous monitoring of these pollutants at all points of rejection. In other cases, SO_x and NO_x are calculated (and documented) by the site by taking into account the sulfur content of the raw materials, the additives and the process conditions (desulfurization rate). In accordance with ESRS E2 requirements, NO_x and SO_x emission reporting has shifted from global consolidation to targeted aggregation. Consequently, the 2024 and 2025 data exclusively reflect emissions from sites that exceed E-PRTR annual thresholds. The Group continues its efforts to manage and reduce both SO_x and NO_x emissions related to its operations through an internal policy, technological upgrades and investments. The reported Ni, Cl and CO emission data for 2025 are derived from a combination of sample measurements at the water discharge points for Ni and Cl and periodic sensor readings at air emission sources for CO. To ensure annual representativity, these analyses were conducted at regular intervals throughout the year, following country-specific methods and regulatory standards, and consolidated to provide a comprehensive view of the yearly quantity released.

1.2.3.6. Financial effects from material pollution-related risks and opportunities [E2-6]

Metrics related to environmental incidents	Unit	2025	2024
Number of Level 4 & 5 environmental incidents	#	0	0
Capex allocated to the prevention and mitigation major environmental incidents	€ thousands	1417	806
Opex allocated to the prevention and mitigation of major and critical environmental incidents	€ thousands	0	221
of which Opex amounts allocated to fines	*€ thousands*	0	*90*

The severity of environmental incidents involving Imerys is determined by evaluating the environmental, financial, regulatory and reputational consequences and can be:

- Level 1 - None or no lasting environmental impact, requiring no remediation;
- Level 2 - Minimal and no permanent harm to the environment or minor breach of Group standards;
- Level 3 - Limited short-term harm to the environment, occasional breach of Group standards, or formal complaint by a third party;
- Level 4 - Medium term harm to the environment, repeated breach of Group standards;
- Level 5 - Long term harm to the environment, severe breach of Group standards.

According to [ESRS E2-6, DP 40b], Imerys discloses in the table above the Capex and Opex of its "Major" environmental incidents, corresponding to Level 4 or Level 5 incidents according to its internal reporting protocol. There were no Level 4 or 5 environmental incident in 2025. The Capex and Opex reported above correspond to the expenses due to a water-related environmental incident that occurred in 2023.

In this context, following the occurrence of a series of level 2 and 3 environmental incidents at an Imerys site in England between 2021 and 2023, Imerys has reached a collaborative settlement with UK environmental authorities. Finalized in September 2025, the agreement includes a £430,000 contribution to the Westcountry Rivers Trust to fund vital environmental work. Imerys continues to make significant investments upgrading and replacing infrastructure and control monitoring.

As of December 31, 2025, Imerys reported **€104.2 million** for environmental and dismantling provisions, as indicated in **Chapter 6, Note 26.2** ***"Other Provisions"*** **of the present document.** This covers Imerys' environmental obligations for pollution remediation, as well as its obligations to dismantle plants.

1.2.4. Water management [ESRS E3]

Water is a shared and finite resource, with high social, cultural, environmental and economical value. It is a basic human right and vital for ecosystems. Demand for water is rising owing to rapid population growth, urbanization and increasing water needs from industry sectors, resulting in an increasing pressure on resource accessibility. A global approach to water management is a necessity to secure its access and its quality for the future generations, but also to preserve aquatic ecosystems that depend on the resource.

Imerys, like any other extractive Group, has an impact on water resources as part of the Group's operations, which require water for ore extraction and processing. Furthermore, water plays a crucial role in controlling the air emissions of operations, such as dust suppression in quarries or aqueous chemical adjuvants for flue gas treatment. Some Imerys activities may impact natural water flows and may influence groundwater levels depending on the hydrogeological context. The Group is committed to ensuring effective water management and to minimizing the impact of its operations, both in terms of quantity and quality.

Note: the following disclosure describes Imerys commitments related to water conservation, as outlined in ESRS E3. The management of water quality is detailed in ESRS E2. Please refer to section 1.2.3.3 of the present chapter for more information on this matter.

1.2.4.1. Impacts, risks and opportunities related to water resources [IRO-1]

Imerys conducted an initial high-level identification of its material impacts, risks and opportunities during its double materiality analysis in 2024. An update of this assessment was conducted in 2025, which confirmed the initial results(refer to disclosure requirement [ESRS 2 SBM-3] of the present chapter). The analysis highlighted the material aspect of water management motivated by the importance of the resource for production and the volumes to be managed to maintain the activities, on the one hand, and taking into account the risk of water shortage in high stressed areas where Imerys' activities are located, on the other hand.

At the initiation of the 2023-2025 water roadmap, the Group screened its sites to prioritize water management efforts and address specific requirements and Group targets (refer to disclosure requirements [ESRS E3-1] and [ESRS E3-2]) over those three years).

This priority sites list, composed of 46 sites, was established using the following criteria:

- The priority sites based on water volumes refer to sites where the yearly water withdrawal and/or water discharge of operations exceeded 1 million cubic meters of water, regardless of the water stress risk.
- The priority sites in water stress level 5 refer to sites located in basins rated as at extremely high risk (5) of water stress. As such these sites were also considered to be potentially exposed to material water-related risks together with the priority sites identified previously.

Imerys used the WWF Water Risk Filter and particularly the "Baseline Water Stress", corresponding to the ratio of the overall surface and groundwater withdrawal compared to the available renewable water at local scale, to identify their priority sites for the 2023-2025 roadmap. With respect to the baseline assessment results, most of Imerys operations identified within this category are concentrated along the Pacific coast of North and South America, around the Mediterranean Sea, India, and South Africa.

The Group's assessment of sites operating in extremely high water stress was renewed at the end of 2025. This updated analysis provides a revised and more rigorous baseline for future planning and will be used to draw the updated list of priority sites for the next water conservation roadmap.

This reassessment resulted in an increase in the number of sites identified, from 29 to 48 sites.

This evolution is not primarily due to operational changes but rather a strategic shift in the analytical methodology. The 2023-2025 baseline was established using the WWF Water Risk Filter, while the 2025 update utilized the WRI Aqueduct 4.0 database, which integrates more frequently updated data and incorporates the most updated climate modeling (CMIP6). This strategic shift was necessary as the WWF Water Risk Filter became less suitable for analyzing future water stress trends.

Among these 48 sites located in extremely high water stress areas, only 22 sites have substantial use of water (higher than 10 000m^3 per year) and are likely to integrate the next water roadmap.

In addition to the physical risks mentioned above, the Group pursues the understanding of its impacts on affected communities and other stakeholders potentially concerned by considering economical, social and cultural vulnerability criteria in the assessment. Refer to disclosure requirement [ESRS S3] of the present chapter for more information.

ESRS E3. Water and marine resources

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : WATER DEPLETION			
⊖ Potential negative impact	● Own operations (all activities)	Group activities **may have an impact on water reserves in the event of inefficient water management** (excessive consumption, withdrawal or lack of recycling), potentially contributing to water scarcity or tension over water availability.	●●● Long

1.2.4.2. Policies related to water and marine resources [E3-1]

The Group has specific internal policies related to water management that respond to the following challenges:

- Management of wastewater and stormwater (including water treatment, and pollution prevention and response), which is dealt in [ESRS E2] of the present chapter; and
- Water conservation (including sourcing and use of water in Imerys' operations), which is treated under the present section and relates to the sustainability matter identified as "water depletion" in the double materiality analysis.

These policies were developed based on the leading international water reporting standard for the mining and metals industry by the International Council on Mining and Metals (ICMM)[1], with two main objectives: improve water reporting and mitigate the Group water footprint, specifically in areas at water risk.

The policies apply to the same scope as the consolidated financial statements, with a progressive implementation starting with the priority sites defined above, and full coverage to be achieved by 2030.

At Group level, the implementation of these policies is supervised by the Sustainability Committee. For more information about the governance over environmental topics, please refer to the disclosure requirement [ESRS 2 GOV-1] of the present chapter.

Within its value chain, the Group implemented since 2018 a comprehensive responsible purchasing policy, based on Supplier Environmental, Social and Governance Standards ("Supplier ESG Standards"). This policy, which covers a broad panel of environmental topics, asks specifically the suppliers to :

- Comply with all applicable environmental regulations;
- Ensure that all environmental risks and impacts (including on water resources) are identified, assessed and mitigated to as low as reasonably practicable;
- Optimize the use of natural resources, including water, to reduce their environmental footprint by implementing the "reduce, reuse and recycle" principle;
- Promote the development and dissemination of environmentally friendly practices, including water use, through effective and appropriate training

1 International Council on Mining and Metals (ICMM), "Water Reporting: Good Practice Guide", 2nd edition (2021).

1.2.4.3. Actions and resources related to water management [E3-2]

In 2023, Imerys has defined a water roadmap to be deployed in two phases corresponding to the two objectives set for the water policies as described in the disclosure requirement [E3-1] of the present chapter:

- The phase 1 **(period 2023-2025)** will be dedicated to strengthening data management, improving the overall water reporting methods, including quantitative and qualitative data on the water balance, while assessing water-related risks of priority sites to establish a strong baseline.
- The phase 2 (**period after 2025**) will be dedicated to preserving water resource and reducing water-related risk within the Group.

In this trajectory, water working groups have been organized, involving representatives from all Imerys' Business Areas to ensure a proper understanding of the new reporting requirements, identify areas for improvement, and set up new indicators and KPIs to follow the progress of the operations in their water management journey.

Actions taken in 2025 to improve water management

Action	Expected outcome	Results at end 2025
Water management template implementation Site implementation of the water management plan Scope : Imerys priority sites	**100%** Sites with implemented water management plan by the end of 2026	**39%** Sites with implemented water management plan
Monitor the number of initiatives submitted in the Water Contest Scope : RAC[1] business area sites	Highlight and share best practices in water management Support knowledge sharing and replication of solutions Strengthen engagement around water management	**21** Initiatives related to the reduction of water consumption and waste water **38%** Replicable initiatives related to the reduction of water consumption and waste water

01 **CASE STUDY**

Water management through process water recycling

A significant water management optimization was successfully completed at an Imerys site, located in Vietnam, through the implementation of a recycling system at the crushing station. This project was designed to drastically reduce freshwater withdrawal from the nearby lake and minimize wastewater discharge in the meantime. The project involves collecting the process water in sedimentation ponds for primary treatment before being pumped back into the crushing process.

Commissioned in early 2025, this recycling loop has demonstrated substantial environmental and operational benefits, including an annual reduction in surface water withdrawal of nearly 243 000m3, which corresponds to an 84% decrease in surface water withdrawal per ton of product. Furthermore, the short recycling loop positively impacts energy consumption, resulting in 23% reduction energy saving per ton of product.

1 RAC refers to Solutions for Refractory, Abrasives and Construction as described in chapter 1 of the present report.

Refinement of risks and opportunities on priority sites

Specific actions of risks assessment and opportunities identification have been conducted on priority sites part of the 2023-2025 roadmap, to evaluate operational risks exposure, likelihood, operational vulnerability while identifying potential opportunities for water savings and business resilience. The methodology, co-developed with an external partner, relies first on the assessment of hydrological basin risks, where information is collected from recognized databases, such as WWF Water Risk Filter[1], WRI Aqueduct 4.0[2] and Copernicus Climate Atlas[3], to evaluate the risk exposure on a large scale, main regional challenges of water management and future trends. In a second step, the analysis is performed at the operational scale, to evaluate the current dependencies, vulnerabilities and risks associated to the site's water management.

Both risks analyses cover three main themes, physical, regulatory and reputational risks, declined into sub-themes, which are for example the lack of water, excess of water and water quality for the physical risks.

Lastly, the assessment covers the opportunities potentials and feasibility, split into six types of opportunities, water savings, marketing, societal, financial, technological and environmental opportunities.The operational risks & opportunities analysis have been deployed on the priority sites.

- All priority sites managing large water volumes have conducted the assessment in 2024.
- Regarding the sites in extremely high water stress, the operational risks & opportunities assessment have been performed on sites with significant yearly water withdrawal superior to the median withdrawal value of Imerys operations (more than 10 000 m3/year), susceptible to be exposed to higher risk than the other water stress sites that have minimal impact on water availability or low dependency on the resource. At the end of 2025, all the sites on high water stress meeting the criteria listed previous fully conducted this analysis. As of today, two sites have been identified as at-risk with respect to the lack of water. Additional steps will include developing anticipation plans, reducing water withdrawal, securing alternative supply options, and implementing water recycling projects.

Lastly, the water risks and opportunities assessment is planned to be rolled-out on the new sites entering the priority list for the coming water roadmap. This list takes into consideration the updated water stress analysis conducted at the end of 2025 using the WRI Aqueduct 4.0.

Water toolkits

A set of tools, including water toolkits referencing standardized practices for water volumes estimation or measurements, was shared at Group scale to harmonize methodologies across the various regions where Imerys operates, along with a water management plan template, structuring local initiatives aspiring to water sobriety and operational risks mitigation.

1.2.4.4. Targets related to water [E3-3]

Achieving the Group's 2025 commitments

In order to meet Imerys objective of enhancing water data management, and thus better understand its impacts, risks, and opportunities related to water depletion, the Group has decided to set a voluntary (i.e. not mandatory as per a specific regulatory framework) "**water reporting progress indicator"** focused on its **priority sites** to measure progress based on the number of reporting indicators made available and the accuracy of their reporting, with a target set at 100% in 2025 compared to the 2022 baseline. Details of the calculation methodology and definitions are included in appendix 1.7 of the present chapter.

Together with close monitoring of operations located in extremely high water stress areas, these initiatives should lead to the identification of all potential levers, plus understanding and applying Best Available Technologies (BATs) where possible, to minimize the impact on water availability at watershed scale while improving the Group's business resilience to face more frequent drought episodes. **Priority sites** (as defined in above in disclosure requirement [ESRS 2 IRO-1 - E3]) are sites with water withdrawal and/or discharge that exceeds 1 million m^3 per year, plus the sites located in extremely high water stress areas.

Group objective	Baseline	Performance 2025	Target
Improve water management by ensuring priority sites comply with new water reporting requirements	2022 0%	99%	2025 100%

1 The World Wide Fund for Nature (WWF) Water Risk Filter is a free online tool that enables companies and investors to explore, assess, and respond to water risks.
2 The World Resources Institute (WRI) Aqueduct 4.0 consist of 13 baseline water risk indicators spanning quantity, quality, and reputational concerns.
3 The Copernicus Interactive Climate Atlas (C3S Atlas) is a platform to exploring 30 variables from 8 state-of-the-art datasets.

The quality and reliability of the Goup's operational water data improved during past cycle. This progress was driven by several simultaneous factors, including training and internal awareness programs to ensure that management teams across all levels understand the direct link between water reporting and operational efficiency. At site level, dedicated water reviews involving experienced local operational and environment teams developed detailed water flow diagrams and performed balance modelling. This critical assessment of the input, usage and discharge points, let to a noticeable improvement in the model balancing. Where gaps were identified, action plans were defined to improve quantification methods, including strategic installation of new sensors in critical water streams, or the refinement of existing hydrological models to yield more accurate estimations. This combination of personnel training, technical validation and investment in meters has strengthened Group-wide water reporting.

1.2.4.5. Metrics related to Water [E3-4]

Metric related to water resource	Unit	2025	2024
WATER WITHDRAWALS			
Total operational water withdrawals	**million m³**	**60.079**	**45.670**
Water withdrawn from water groundwater	million m³	34.545	21.470
Water withdrawn from suppliers	million m³	4.261	4.233
Water withdrawn from surface water	million m³	4.956	8.225
Water withdrawn from rainwater	million m³	14.776	10.023
Water withdrawn from other sources (including seawater)	million m³	1.540	1.719
WATER CONSUMPTION			
Total water consumption	million m³	17.524	15.999
Of which total water consumption in areas of extremely high water stress	million m³	3.268	2.087
OTHER METRICS			
Total water stored	million m³	71.642	21.096
Total water storage variation	million m³	50.546	-
Total water recycled and reused	million m³	98.692	96.166
Water intensity of revenue	m³/€ million	17,754	12,669

Water withdrawals

The total operational water withdrawals have significantly increased in 2025 by 32% compared to the previous reporting period.

This significant evolution is primarily attributable to a structural consolidation and technical revamping at a key material site part of the priority list. As a major contributor to the Group's total operational withdrawal and, more particularly to groundwater withdrawal, the integration of this site's refined modeling has naturally resulted in a noticeable shift in consolidated data. The site moved from fragmented, split models to a unified, robust architecture that eliminates regional silos, ensuring cross-functional consistency across the entire operation.

This variation reflects a decisive shift; assumptions on strategic water flows have been replaced with on-field data acquisition in 2025 with the integration of eight new flowmeters and five drone-based bathymetric surveys on the largest on-site ponds supplying the operations.

Furthermore, the model now features granular simulation of specific operational cycles allowing to track complex flows that were previously excluded or of poor confidence. A rigorous calibration process has confirmed a strong fit between the updated model predictions and actual field measurements, ensuring that while the figures have shifted, they now provide a far more accurate and comprehensive view of the operational reality than the previous year.

Water reused and recycled

Although industrial processes are very heterogeneous, water reuse and recycling is a relatively widespread practice at Imerys sites. The sites using thermal processes are the main water recyclers, followed by wet processing plants where a part of the process water is recovered and reused in the same process step or for a different use, such as dust abatement. Finally ore washing process in quarries tend to recycle more and more water, **such as the case study highlighted in the section [E3-2]**.

Water consumption

Water used for the operations, if not recycled or discharged, is considered as consumed. Water consumption at Imerys represents 11% of the overall water inflows to supply the operations (both withdrawal and recycling volumes). The main consumption items are grouped into 5 distinct categories, namely the moisture contained in the finished products, forced water evaporation, typically occurring in the drying steps of mineral processing, natural water evaporation, in the ponds and old pits used as water reservoirs for the plants, water losses from leaks, and water used to transport extracted minerals by pipeline over long distances.

In 2025, total water consumption reached 17.524 million m³, compared to 15.999 million m³ the previous year. This increase in total volume does not reflect a rise in operational activity, but rather a planned improvement in the water balance assessment of priority sites. This adjustment ensures a more accurate and exhaustive tracking of water footprint, in line with the Group's 2023-2025 water roadmap and reporting requirements.

Regarding sites located in areas of extremely high water stress, consumption rose from 2.087 million m³ in 2024 to 3.268 million m³ in 2025. This significant variation is primarily due to a change in reporting scope following a water stress risk assessment renewal conducted via the WRI Aqueduct 4.0 tool. Using the same scope as 2024, a slight decrease in consumption was actually observed. However, the inclusion of additional sites in this category , as per described in the section [IRO-1] of this present chapter, brought the consolidated figure to 3.268 million m³.

Water Storage

The 2025 reporting cycle reflects a substantial increase in recorded water storage volumes relative to 2024. This variance is attributable to two primary factors:

- The Group has aligned its reporting protocols with total storage capacity. This included the remediation of two specific data divergences from the prior period, ensuring that previously omitted volumes are now accurately captured within the current inventory.
- Incremental increases in stored water are attributed to physical gains resulting from rainwater interception and the natural recharge of storage infrastructures.

These refinements ensure that the 2025 figures represent a more precise technical baseline for the Group’s current storage infrastructures.

1.2.5. Biodiversity and land rehabilitation [ESRS E4]

Imerys has a major responsibility to take into account effectively, and in a timely manner, all the impacts of its operations on natural habitats, fauna and flora, at all sites and in all stages of a quarry life cycle, while striving for no-net-loss of biodiversity. This is why, Imerys has designed and is implementing its biodiversity program and internal policy to contribute to SDG 15 *"to protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, halt and reverse land degradation and halt biodiversity loss".*

1.2.5.1. Processes to identify impacts, risks, dependencies and opportunities [IRO-1]

At Group level, in 2024, Imerys conducted a high-level identification of actual and potential material impacts, risks and opportunities related to biodiversity and ecosystems at its own sites and in the upstream value chain in the context of the double materiality analysis. An update was conducted in 2025, confirming the initial results, with no changes identified (refer to disclosure requirement [ESRS 2 SBM-3] of the present chapter). Imerys has also completed detailed biodiversity impact, risk, dependencies and opportunity assessments, which are detailed below.

Assessment of impacts

Imerys conducted a comprehensive assessment of its biodiversity footprint utilizing the **Corporate Biodiversity Footprint (CBF)** methodology, developed by Iceberg Data Lab. This methodology measures the extent of a Group's impact on biodiversity, taking into account the major direct pressures identified by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES)[1], including habitat loss and degradation, species overexploitation, climate change, pollution, Invasive Alien Species (IAS).

Consultation on potential impacts on the natural environment, potentially impacts on affected communities and potential impacts on ecosystem services are conducted in accordance with the specifications of local regulations.

Assessment of dependencies

In 2024, Imerys conducted a comprehensive screening analysis of all industrial sites (quarries and plants) to evaluate dependencies on ecosystem services using two advanced tools:

- **ENCORE** (Exploring Natural Capital Opportunities, Risks and Exposure). ENCORE is a free, online tool that helps organizations explore their exposure to nature-related risks and understand their dependencies and impacts on nature. It is maintained and continuously improved by Global Canopy, UNEP FI and UNEP-WCMC, who together form the ENCORE Partnership;
- **Biodiversity Risk Filter (BRF)**. The BRF, developed by WWF, is a free online tool aimed to help companies and financial institutions to assess and act on biodiversity-related risks and opportunities across their operations, value chain and investments.

The analysis, focused on the extractive sector, assessed 21 ecosystem services.

Assessment of risks and opportunities

Imerys completed a comprehensive analysis of risks and opportunities through an integrated approach, combining external and internal data sources. The Group conducted a global screening of all industrial sites using the Biodiversity Risk Filter (BRF) tool, complemented by site-specific internal information including ecological atlases, biodiversity action plans, data on disturbed and rehabilitated areas, and environmental incident reports.

1 The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) is an independent intergovernmental body established by States to strengthen the science-policy interface for biodiversity and ecosystem services for the conservation and sustainable use of biodiversity, long-term human well-being and sustainable development.

1.2.5.2. Material impacts, risks and opportunities [SBM-3, E4-1]

Identified impacts, dependencies, risks and opportunities

The assessment of impacts, dependencies, risks and opportunities described in the above section highlighted actual and potential negative impacts, positive impacts as well as risks related to biodiversity in association with Imerys operations.

With regard to negative impacts, of the five main pressures (habitat loss and degradation, overexploitation of organisms, climate change and invasive alien species) on biodiversity, Imerys contributes to three key pressures via the Corporate Biodiversity Footprint (CBF) methodology: habitat degradation, climate change, and pollution, encompassing Imerys' own operations and to some extent its upstream value chain (Scopes 1, 2, and 3 upstream). Additionally, through the Biodiversity Risk Filter (BRF) and site-specific internal data, the Group also identifies and manages the impact of invasive alien species (IAS), particularly in the context of quarry land occupation and rehabilitation. The results of the impact study revealed that the material negative impact of Imerys' activities is concentrated in Scope 1, due to extractive activities (quarries/mines) and the associated **land occupation** and **disturbance.** No material impacts were identified regarding desertification and soil sealing.

The Group also generates positive biodiversity impacts by preserving, recreating, and restoring ecological areas that have not been artificialized in the long term. During rehabilitation works, the Group has the potential to diversify habitats, creating a mosaic of local ecosystems capable of supporting a wide range of species or contributing to the recovery of threatened species. Furthermore, collaboration with other stakeholders can lead to the development of sustainable landscapes that meet both ecological and social needs for nature preservation and sustainable land use.

With regard to risk, the analysis identified physical, reputational, and regulatory risks associated with biodiversity and ecosystems. Reputational factors emerged as the most significant, with media scrutiny posing the highest risk, based on the BRF. Secondary risks included increasing regulatory obligations and elevated rehabilitation and permitting costs.

The assessment using ENCORE identified a degree of dependency on "rainfall pattern regulation" services to mitigate flood risks and potential operational damages and on the "water purification" services. Other dependencies identified include water flow regulation, water supply and flood control. Based on the assessment, dependencies do not present material risks to the Group strategy and business model.

ESRS E4. Biodiversity and ecosystems

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : PRESSURE ON BIODIVERSITY			
⊖ Actual negative impact	● Own operations (Extractive activities)	Group activities contribute to the **drivers of biodiversity loss**, **including land-use change, introduction of invasive alien species, pollution, and climate change.**	●○○ Short
R Risk	● Own operations (Extractive activities)	The Group may be exposed to **financial risks** related to increasingly **stringent nature-related regulations and/or requirements**, including rehabilitation, or to reputational damage in case of damage to biodiversity.	●○○ Short
SUB-TOPIC : IMPACT/LOSS OF BIODIVERSITY			
⊕ Actual positive impact	● Own operations (Extractive activities)	Group activities **have positive impacts** on local biodiversity in the event that **rehabilitation and restoration efforts** result in land uses with **greater biodiversity value** than the initial land uses.	●●● Long
⊖ Potential negative impact	● Own operations (Extractive activities)	Group activities **may have negative impacts on the state of species** and/or on the **extent and condition of ecosystems** as a result of quarrying operations.	●●○ Medium
R Risk	● Own operations (Extractive activities)	The Group may be exposed to **financial risks** related to increasingly **stringent nature-related regulations** and/or requirements, including rehabilitation, or to reputational damage in case of damage to biodiversity.	●○○ Short

Mapping of Imerys site's local ecological context

The main impact caused by extractive activities is **land disturbance**. In order to identify actual and potential land disturbance impacts and to reduce Group impacts on **habitat loss** Imerys has assessed the sensitivity of the habitat location across its operations.

In 2019, Imerys started collecting ecological data from its sites in France to assess the challenges and their ecological quality, as well as their potential to promote local ecosystems, fauna and flora. Since then, Imerys has completed sensitivity mapping for all the Group's quarries across the world using the World Database of Protected Areas[1]. In 2022, this mapping was updated and extended to cover all Group sites, including plants.

In 2023, in partnership with Imerys, PatriNat developed a methodology[2] to characterize and map the ecological context of sites through multi-thematic cartographic assessments. This collaborative work generated a set of ecological atlases covering every Imerys quarry and plant around the world. These atlases present an assessment of the ecological context within a 5km radius buffer around the coordinates point of each site. They represent geospatial layers for the Geographic Information System (GIS)-based land management system and were used to produce a global dashboard with all sites' results.

Mapping results and site prioritization approach based on impacts

Imerys has implemented an approach to prioritizing its operational sites based on their potential ecological impact, leveraging the comprehensive mapping of ecological contexts. The Group has established a clear definition of **priority sites** founded on impact materiality, focusing on extractive operations that meet at least one of the following criteria:

- **High-volume extraction:** sites that extract more than one million tons of material annually, regardless of their geographical location.
- **Proximity to protected areas:** sites situated within a 5 km radius of areas classified as International Union for Conservation of Nature (IUCN) categories I, II, or III, which represent areas of significant ecological importance.
- **Biodiversity hotspot proximity:** sites located in recognized biodiversity hotspots and within a 5 km radius of areas classified as IUCN category IV.

The Group has not identified any sites located in current IUCN categories I, II, or III areas. The Group has identified eight extractive sites that are situated within a 5 km radius of biodiversity-sensitive areas classified by the IUCN as Category I, II, or III.

None of the priority sites are in, or directly connected to the IUCN sensitive areas. However, it is possible that they may have indirect negative impacts on ecosystems or species. Additional analysis will be conducted in the future to determine the nature of the potential impacts.

Imerys has set specific objectives and targets for these priority sites as described in the disclosure requirement [E4-4] below.

An additional 11 plants (non-extractives based activities) are located within a radius of 5km of a biodiversity-sensitive area classified by the IUCN as Category I, II, or III. While the biodiversity impact is considered not material for such operations, specific action plans are nevertheless established for these facilities.

1 World Database on Protected Areas (WDPA) is the most comprehensive global database on terrestrial and marine protected areas. It is a joint project between the United Nations Environment Programme (UNEP) and the International Union for Conservation of Nature (IUCN), managed by UNEP World Conservation Monitoring Centre (UNEP-WCMC).
2 The cartographic evaluation of the ecological background of sites on an international scale is a methodological framework created by PatriNat and described here: https://www.patrinat.fr/fr/cartographic-evaluation-ecological-background-sites-international-scale-7269

1.2.5.3. Policies related to biodiversity and ecosystems [E4-2]

Imerys has a comprehensive biodiversity program, underpinned by its environmental policy governing biodiversity management across all operational sites. This policy establishes a robust framework for addressing the risks, impacts and opportunities of operations on natural habitats, fauna, and flora, with the ultimate goal of achieving no-net-loss of biodiversity. The policy is aligned with Imerys' environmental charter and sets minimum standards that apply to all sites, regardless of local regulatory requirements.

Key features of the biodiversity management policy include:

- **Implementation of the mitigation hierarchy:** this approach prioritizes avoiding and minimizing negative impacts on biodiversity, followed by restoration and offsetting measures where necessary.
- **Life cycle approach**: the policy addresses impacts throughout the entire plant and mine life cycle, from exploration and development to operation and closure.
- **Protected areas management:** sites located near protected areas are required to adapt their management, rehabilitation activities, and Biodiversity Action Plan (BAP) objectives to align with the ecological goals of these sensitive areas.
- **Comprehensive impact assessment:** the policy considers Imerys' main impacts on nature and addresses the five primary global drivers of biodiversity loss.
- **Action framework:** the policy defines expected actions in terms of management systems and governance, enhancement of global and local biodiversity knowledge, implementation of the mitigation hierarchy, employee and contractor training and engagement with local communities and other stakeholders.
- **Internal tools and support:** implementation is supported by a suite of internal tools described in the section below and designed to assist sites in assessing their biodiversity impacts and in developing appropriate management strategies.

Furthermore, Imerys has integrated specific measures for managing Invasive Alien Species (IAS). These initiatives are fully incorporated into the environmental management system policy, as detailed in disclosure requirement [ESRS E2-1]. Additionally, their implementation and effectiveness are systematically monitored and evaluated through the environmental maturity matrix, which is elaborated in disclosure requirement [ESRS E2-2].

At Group level, the implementation of this policy is supervised by the Sustainability Committee. For more information about the governance over environmental topics, please refer to the disclosure requirement [ESRS 2 GOV-1].

1.2.5.4. Actions and resources related to biodiversity and ecosystems [E4-3]

Imerys has expressed its commitment to act to protect biodiversity by joining act4nature International, an initiative spearheaded by "Entreprises pour l'Environnement" (EpE) and various partners. Act4nature International aims to galvanize businesses to protect, promote, and restore biodiversity. Through this engagement, Imerys aligns itself with a global network of companies dedicated to biodiversity conservation.

These commitments cover the period 2025-2028 and are built around four pillars as described in the figure below.

Raise awareness, train, mobilize and engage Imerys' key stakeholders

Promote biodiversity awareness among both internal and external stakeholders through organized training and events.

24%

PERFORMANCE

Initiate and conduct studies and research on biodiversity and conservation

Develop and test methods and indicators for assessing sites' ecological condition, identifying opportunities for ecological rehabilitation and sharing ecological data, to contribute to the overall understanding of biodiversity.

10%

PERFORMANCE

Reinforce the mitigation hierarchy globally in all quarries and reduce main pressures on biodiversity

Imerys is working to fight against the loss of biodiversity, by strengthening the mitigation hierarchy sequence in its extractive sites, as well as reducing its impacts on the main causes of biodiversity loss.

36%

PERFORMANCE

Continuously improve Imerys' environmental strategy and scientific expertise

Enhance the integration of nature in Imerys activities by understanding the Group footprint, collaborating closely with scientific experts, implementing appropriate tools for action and incorporating biodiversity into operations and value chain.

30%

PERFORMANCE

Strategy and scientific partnerships

Since 2018, Imerys has maintained a strategic scientific partnership with PatriNat, a consortium comprising the French National Museum of Natural History (MNHN), the French Agency for Biodiversity (OFB), the National Center for Scientific Research (CNRS), and the French Research Institute for Development (IRD). This collaboration provides crucial external oversight of the Group's biodiversity program and facilitates the mobilization of scientific expertise to enhance biodiversity knowledge and actions across Imerys sites. The partnership's success and ongoing value have been affirmed through renewals in 2021 and 2024, with the current agreement extending through 2028.

In accordance with the Group biodiversity policy described in the section above, Imerys and PatriNat co-developed internal guidelines that outline the actions to be implemented to ensure the protection of biodiversity throughout the life of Group quarries.

Imerys and PatriNat also designed internal tools that facilitate the concrete implementation and monitoring of biodiversity actions on site, in accordance with the internal policy and guidelines :

- **Biodiversity Maturity Matrix:** this tool aims to support sites in the assessment of biodiversity performance. This matrix also offers sites the opportunity to go beyond the standards' requirements and to implement improvement actions.
- **Biodiversity Toolbox:** best practices guide for biodiversity management
- **Biodiversity action plan (BAP) models**: to facilitate the design concrete action plans adapted to the local context.

Mitigation hierarchy approach and reduction of main pressures on biodiversity

As the most important pressure caused by Imerys is the occupation and degradation of habitats, the Group has reinforced the Mitigation hierarchy approach to control this impact and develop potential natural restoration opportunities, with the following main actions:

- **Ensuring compliance with the biodiversity internal policy** which is based on sequential approach to manage ecological impacts that prioritizes avoiding harm, then minimizing impacts, followed by restoring affected areas, and finally offsetting any residual impacts as a last resort. Each extractive site develops a tailored Biodiversity Action Plan, considering local requirements and ecological contexts. Where feasible, a progressive rehabilitation approach is deployed, coordinating mining activities with the restoration of previously extracted areas to minimize habitat impact. The Group prioritizes the use of native species in revegetation efforts and implements prevention and control measures to reduce the presence of IAS. Supporting this effors, in 2025, the Group has spent €6.7 million of its provisions for mining site restoration, as indicated in **the note 22.2 "Other Provisions of its consolidated accounts"**
- **Auditing and supporting priority sites** By the end of 2025, Imerys completed audits for all 20 priority sites, establishing a maturity baseline and specific improvement plans. Supported by internal and external experts, these plans are now being implemented. Key actions include enhancing ecological knowledge through field surveys, testing indicators to refine the understanding of local impacts, and developing comprehensive, site-specific **Biodiversity Action Plans (BAPs)** to integrate preservation, management, and ecological reclamation. Furthermore, BAPs are subject to annual reviews, ensuring continuous improvement and adaptation to evolving environmentaland business needs. In addition, Imerys implements measures to reduce other primary pressures on biodiversity, specifically regarding water and climate change. Recognizing the interconnected nature of these environmental drivers. Strategies for mitigating climate-related impacts are detailed further in **disclosure requirement [ESRS E1].**

Scientific expertise and monitoring on site

Imerys has established a diverse array of pilot sites across different biogeographical and regulatory environments to implement long-term projects. These projects aim to :

- address biodiversity challenges,
- implement R&D programs with innovative procedures or technologies
- evaluate metrics and methodologies for measuring the success of ecological management and restoration efforts.

Furthermore, as a result of the scientific studies undertaken in collaboration with partners at Imerys sites, 3,653 data entries on biodiversity were published in The National Heritage Inventory Information System (SINP) and in the Global Biodiversity Information Facility (GBIF), thereby contributing to the dissemination of biodiversity data made available for scientists and citizens all over the world.

01 CASE STUDY
Ecological quality of habitats

*The **Biodiversity Indicators Reporting System (BIRS)** is a tool for environmental management and reporting, designed to monitor key ecological performance indicators. To ensure its practical application and effectiveness across diverse operational environments, BIRS has been successfully tested at four sites located in different geographies across the globe where Imerys operates.*

02 CASE STUDY
Ecological indicators

*With the support of PatriNat, Imerys has tested different ecological indicators aiming to measure its footprint and the ecological state of biodiversity and ecosystems in extractive sites. **ECOVAL** (Ecological equivalence assessment) was deployed in various Imerys pilot sites in France. This methodology aims to compare biodiversity losses at impacted sites and the biodiversity gains in offset areas. In the long term, this allows Imerys to assess the ecological equivalence and the effectiveness of ecological operations.*

03 CASE STUDY
Shared ecological data

*Imerys has established a dedicated presence on the **Global Biodiversity Information Facility (GBIF) platform**. The Imerys GBIF profile serves as the centralized repository for publishing ecological data , primarily sourced from field ecological surveys and collaborative research and development projects. This data sharing supports global scientific research while enhancing the Group's ability to proactively identify potential impacts on species across its operational footprint. In 2025, 992 data were published.*

Raise awareness, train, mobilize and engage stakeholders

Imerys has implemented activities with internal and external stakeholders to initiate greater awareness of biodiversity. A biodiversity report was published in 2025, presenting the biodiversity strategy and the main results of actions implemented to reinforce and increase maturity in the Group. This report has been presented to financial investors and analysts in a dedicated roadshow. The report is publicly available on the Imerys web page.

Awareness action	Targeted population	Description of the awareness action and outputs
Educational film on biodiversity	All Imerys employees	The Group developed a short and educational film to share details on the program and raise awareness of biodiversity internally.
Internal environmental community	All Imerys employees	An internal environmental community has been created, and the Group has organized educational sessions on biodiversity with employees to support the dissemination of good practices and biodiversity knowledge across the Group.
Environmental network seminar	Environmental managers from each region	In 2025, an Environmental Seminar was conducted to co-build the Group's environmental roadmap and deliver essential training and awareness sessions focused on environmental topics, including soil biodiversity and biomimicry.
Internal digital webinars	All Imerys employees	In 2025, several webinars open to all Imerys employees took place in order to train teams on environmental themes, including the collection and formatting of ecological data, the desktop screening for ecological analysis and the new act4nature commitments.
Digital training course	Mandatory for all senior managers as well as specific positions and operational teams Openly available to all other employees	To support the objective to avoid a net loss, prevent and reduce negative impacts, Imerys continues to train staff on biodiversity, including through a digital training course recently updated. The main objective of the module is the understanding of the impacts of Imerys' activities on biodiversity and to gain insight into the strategy and actions implemented.
SD Challenge	All Imerys employees	With the development of the Group biodiversity roadmap, sites across Imerys have continued to develop local initiatives aimed at supporting biodiversity and promoting innovative rehabilitation projects, both during and after mining activities. In 2025, 17 biodiversity and rehabilitation initiatives were submitted in the SD Challenge. The winning project was awarded to one of Italy's sites in recognition of its conservation and restoration efforts focused on an endangered plant.

√ *For more information on Imerys' 2025-2028 Act4nature International commitments, see www.imerys.com*

1.2.5.5. Targets related to biodiversity and ecosystems [E4-4]

Achieving the Group's 2025 commitments

Imerys' mid-term biodiversity target for 2023-2025 comprises two key components, designed to drive comprehensive progress in biodiversity management:

- **Act4nature commitment fulfilment (60% of 2025 overall performance)** :achieve all objectives 2025 defined within the Act4nature commitment, as detailed in disclosure requirement [ESRS E4-2].
- **Internal biodiversity audits (40% of overall performance)** :conduct 20 internal biodiversity audits on priority sites, as specified in disclosure requirement [ESRS E4-1, SBM-3]. These audits are crucial for assessing and improving biodiversity management practices across Imerys' most ecologically significant operations.

In line with the commitments made and in order to ensure the continued integration of biodiversity stakes within Group operations, the Sustainability Committee ensures formal oversight of Imerys' biodiversity performance, with regular progress reviews. In addition, a dedicated Steering Committee with PatriNat has been established to govern the activities undertaken within the scientific partnership. Involving the Imerys Chief Sustainability Officer and one of the PatriNat Directors, it meets twice a year to follow up on the program's status and to define actions to reach Group targets.

Group Objective	Baseline	Performance 2025	Target
Reduce impact on biodiversity by fulfilling Imerys act4nature commitments and conducting biodiversity audits on 20 priority sites	2022 0%	107%	2025 100%

act4Nature International commitments progress	Unit	2025
Continuously improve Imerys' environmental strategy and scientific expertise	%	102%
Reinforce the mitigation hierarchy globally in all quarries and reduce main pressures on biodiversity	%	123%
Initiate and conduct studies and research on biodiversity and conservation	%	125%
Raise awareness, train, mobilize and engage Imerys' key stakeholders	%	95%
Overall progress	**%**	**111%**

Biodiversity internal audits progress	Unit	2025	2024
Number of biodiversity audits conducted on priority sites	#	20	13
Overall progress	**%**	**100%**	**65%**

Imerys successfully completed 111% of the actions outlined for its 2025 act4nature commitments, demonstrating significant progress in its biodiversity conservation efforts. This high completion rate underscores the Group's dedication to environmental stewardship and its ability to effectively implement biodiversity initiatives across its operations. Key achievements include the deployment of the internal policy across the Group, research and development programs and raising awareness of employees.

Toward Imerys 2030 ambition

The Group is actively transforming its public engagements into tangible actions through its external commitments. Recognizing the need to pursue and further strengthen its efforts, the Group will continue to focus on fulfilling its external commitments, demonstrating its dedication to preserving and enhancing biodiversity across its global operations. This strategic approach enables the Group to make simultaneous progress on multiple fronts, encompassing the four pillars described in previous sections.

Objective, metric and target description

Objective 2026-2030 : Reduce impacts on biodiversity by fulfilling at least 90% of the Group external commitments annually until the end of 2030.

The annual progress ratio is a key performance indicator that measures Imerys' commitment to biodiversity conservation and management. This metric precisely measures the Group's advancement in fulfilling its external biodiversity commitments year by year. Specifically, it calculates the percentage of successfully completed biodiversity initiatives since the 2025 baseline, measured against the total number of commitments pledged for each period from 2025. By tracking this metric, the Group can demonstrate its commitment to environmental stewardship, assess the efficiency of its biodiversity initiatives, and identify areas for improvement. The annual progress ratio serves as an invaluable tool for both internal management and external stakeholders, offering a concrete means to evaluate Imerys' ongoing efforts in promoting biodiversity and adhering to its environmental commitments.

Scope of the objective

The external Imerys commitments for the period 2025-2028 are structured under the act4nature initiative, a SMART action plan structured around 16 key actions. In developing these commitments, Imerys has taken a comprehensive approach, considering all existing and potential future extractive sites across its global operations. For actions specifically targeting extractive sites, the scope includes the entirety of Imerys' mining and quarrying activities worldwide.

√ Imerys act4nature commitments are publicly available on www.imerys.com.

1.2.5.6. Metrics related to biodiversity and ecosystems change [E4-5]

Imerys is committed to reducing its environmental impact and moving toward a **no net loss of biodiversity** across its operations. Recognizing the complexity of ecosystems and the multifaceted nature of biodiversity, the Group acknowledges that, unlike climate change impacts which can be measured in CO_2 equivalents, biodiversity lacks a single, universal metric. This complexity necessitates a more nuanced and comprehensive approach to biodiversity assessment and management.

Biodiversity indicators investigation

To address this challenge, Imerys has embarked on an ambitious initiative to test and implement various biodiversity indicators. These indicators are crucial for two primary purposes: to accurately measure and understand the Group's impact on nature, and to assess the state of biodiversity in areas where Imerys operates. This approach enables the Group to develop targeted and effective Biodiversity Action Plans, ensuring that conservation efforts are data-driven and tailored to specific ecological contexts.

Since 2018, Imerys has been conducting extensive trials across its European and Asian operations, utilizing a suite of sophisticated biodiversity assessment tools:

- **IQE** (Indicateur de qualité écologique): a comprehensive ecological quality indicator
- **Ecoval** (Évaluation de l'équivalence écologique): an assessment tool for ecological equivalence
- **PERSICAIRE** (Pressions Etat Réponses des Sites en Contexte Anthropisé : Inventaire Rapide et Evaluation): a rapid inventory and evaluation system for anthropized contexts
- **BIRS** (Biodiversity Indicator and Reporting System): A standardized system for biodiversity measurement and reporting

The testing of these diverse tools will allow Imerys to capture a holistic view of biodiversity across its varied operational landscapes. By leveraging these indicators, the Group aims to refine its biodiversity management strategies, enhance decision-making processes, and demonstrate tangible progress toward its environmental commitments.

The ecological Atlas

Imerys has developed and implemented an innovative ecological atlas, a comprehensive tool that enables the Group to identify, evaluate, and visualize critical ecological information for its operational sites. This atlas serves as a powerful decision-making aid, allowing it to :

- assess the ecological context of each site
- prioritize locations based on their environmental sensitivity
- identify associated biodiversity risks and opportunities.

Building on this foundation, Imerys has initiated a more in-depth review process for priority sites, involving detailed mapping of incidence parameters related to biodiversity changes. By leveraging this tool, the Group can tailor conservation efforts to specific site conditions, allocate resources more efficiently to areas of highest ecological importance, and monitor the effectiveness of biodiversity initiatives over time.

1.2.5.7. Financial effects related to biodiversity [E4-6]

As of December 31, 2025, the Group reported € 127.7 million for provision for restoration, as indicated in Chapter 6 of the Universal Registration Document (note 26.2 "Other Provisions"). This covers the rehabilitation of Imerys extractive sites.

1.2.6. Resource use and circular economy [ESRS E5]

The growing demand for the world's mineral resources is placing ever-increasing pressure on natural systems. Imerys recognizes its crucial role in reducing this pressure by ensuring the best use of the natural resources under its stewardship, not only through mineral resources efficiency, but also by integrating key circular economy concepts within the Group's business models.

As defined in the ESRS E5 standard, the circular economy model aims to maintain the value of products and materials by creating a system that allows for: usability, reusability, repairability, remanufacturing or refurbishment, recycling and recirculation by the biological cycle.

Imerys aims to contribute to the circular economy through sustainable sourcing, extraction, and transformation of products, as well as innovative solution design.

The Group focuses in particular on using more efficiently its mineral resources by valorizing its mineral wastes, substituting when possible with secondary mineral resources and developing products whose properties enable downstream circularity.

Note: the following disclosure describes Imerys commitments related to **mineral resources optimization and industrial waste management, as outlined in** [ESRS E5]. *For more information about other inflows and outflows,* **please refer to the following sections of the present chapter :**

- *ESRS E1 Climate change, which addresses, in particular, GHG emissions and energy resources* - section 1.2.2.6
- *ESRS E2 Pollution, which addresses, in particular, emissions to water and air* - section 1.2.3.5
- *ESRS E3 Water and marine resources, which addresses, in particular, water resource (water consumption)* - section 1.2.4.5
- *ESRS E4 Biodiversity and ecosystems, which addresses, in particular, ecosystems and species* - section 1.2.5.6

1.2.6.1. Processes to identify and assess material resource use and circular economy-related impacts, risks and opportunities [IRO-1]

Contributing to a more circular economy can take many forms. It is necessary to clearly identify and prioritize subjects with the most positive impact and opportunities for the Group, its value chain, society, and the environment and to minimize the negative impacts and associated risks.

This prioritization process started with a baseline assessment completed by an internal panel of experts constituting the circular economy working group, as described in [ESRS E5-2] in section 1.2.6.3 below.

Within the scope of this exercise, the Group considered the impacts on resource use from mineral resources extraction and mineral waste management, and the associated financial risks related to emerging regulations and increasing waste management costs, while also recognizing new business opportunities linked to the development of circular economy products.

The results of this assessment were used in the double materiality analysis described in disclosure requirement [ESRS 2 IRO-1] of the present chapter and confirmed by the outcomes of the circular economy study of raw materials published during the World Circular Economy Forum 2024 by the UN Environment Programme and the International Resource Panel.

Note: An integral part of the materiality assessment considers impacts on affected communities associated with resource use. Although Imerys has not conducted specific, targeted consultations with local affected communities on this matter, the Group is committed to establishing constructive dialogue with its stakeholders living nearby. The Group takes into account potential complaints through the established grievance mechanism, as described in the disclosure requirements [ESRS S3 & ESRS 2 IRO-2].

The following table summarizes the material negative impact, risk, and opportunity identified as a result of the double materiality assessment.

ESRS E5. Resource use and circular economy

Description of the IRO	Location within the value chain	Materiality	Time horizon
SUB-TOPIC : PRODUCTION OF MINERAL WASTE (ENTITY-SPECIFIC)			
Group activities **have negative impacts on resource use in the event of inefficient mineral resources** extraction, generation of excessive mineral waste and/or improper mineral waste management, despite continuous efforts on improving processing efficiency.	● Own operations (Extractive activities)	⊖ Actual negative impact	●○○ Short
The Group may be exposed to **financial risks** related to **emerging circular economy regulations** and / or increasingly stringent mineral **waste management requirements** or management costs.	● Own operations (Extractive activities)	R Risk	●○○ Short
SUB-TOPIC : CIRCULAR ECONOMY			
The Group's development strategy aims to develop **new business opportunities** linked to the development of products associated with the **circular economy** (resource recovery, circular supply, downstream circularity)	● Own operations → Downstream value chain	O Opportunity	●●● Long

In response to these IROs, and as per the OECD[1] definition, the circular economy topic activity has been subdivided into three business models most immediately relevant for Imerys:

- **Resource Recovery**: finding destinations for the mineral wastes of Imerys' own activities.
- **Circular Supply**: introducing reclaimed raw materials into the Group processes for existing products and substituting primary raw materials.
- **Downstream circularity**: providing products to the market that enable downstream circular economies by enabling recycling, extending product lifecycle or decreasing waste generation.

1.2.6.2. Policies related to resource use and circular economy [E5-1]

Governance

The Circular Economy Steering Committee

The Circular Economy Steering Committee, chaired every quarter by the Chief Sustainability Officer, includes the Climate and Product Sustainability Vice President, the Strategy Vice President, the Mining & Resource Planning Vice President, Business Areas Science and Technology senior managers, and representatives of each Business Areas. The Committee is responsible for validating proposed KPIs, objectives, targets, and actions, monitoring progress, sharing best practices across Business Areas and offering feedback and guidance on encountered challenges.

At Group level, Circular economy is supervised by the Sustainability Committee.

The Circular Economy working group

The Circular Economy working group focuses on circular economy projects, specifically for minerals. Energy, water, and packaging are out of scope as they are managed by other teams (climate, environment, purchasing). The working group's activities aim to identify opportunities for reducing mineral-based waste in the entire value chain, and for developing sales of materials that would otherwise have become waste as per the three business models described above.

1 OECD: Business Models for the Circular Economy, 2019 (https://www.oecd.org/environment/business-models-for-the-circular-economy-g2g9dd62-en.htm).

Circular economy policies across Imerys' operations

By committing itself through its policies to optimize the use of natural resources to reduce the environmental footprint of its activities and products, Imerys promotes circular models across the business for all its mineral resources inflows.

The Group is also committed to reducing industrial waste generation through prevention, reduction, recycling, and reuse, a means to contribute further to the United Nations SDG 12 on sustainable consumption and production patterns.

√ *For more information about the governance over environmental topics, refer to the* **disclosure requirement [ESRS 2 GOV-1] of the present chapter.**

Mineral resources management policies

As the main source of mineral raw materials to the Group's industrial plants, mineral reserves and resources are one of the Group's most important assets. Establishing and maintaining effective management of mineral reserves and resources is a core element of Imerys' business.

Mineral resources management is defined through a series of **mining and resource planning policies** and procedures, which are reviewed at least every five years. At Group level, the implementation of these policies is supervised by the Group's Mining and Resource Planning Vice President. Each mining operation is required to have a detailed knowledge of the mineral resource through exploration, drilling and sampling, a Life of Mine Plan[1] and a detailed five-year mine plan.

This approach across Imerys' 71 extractive sites enables operations to maximize the efficient use of mineral resources by mining the minimum required for production and its long-term viability.

In parallel, Imerys has internal policies and procedures governing the design, construction, operation, monitoring and remediation of mineral waste and Tailings Storage Facilities (TSF). These extend to also include: promoting progressive remediation, implementation of appropriate compensation and offset measures and ensuring adequate restoration and dismantling provisions are maintained through the life and post life management periods of a site.

Industrial waste management policies

Due to the nature of the processing operations, the Group's activities generate **relatively limited quantities (non-material) of industrial waste.**

Nevertheless, Imerys industrial waste management policies and procedures oblige regular site level reviews (included into EHS audits) of industrial waste management, such as: avoidance, minimization, and recovery opportunities reuse or recycling). All countries in which Imerys operates have national environmental laws regulating industrial waste. The national environmental laws of different countries apply different criteria to determine how industrial waste shall be treated. Each operation follows the national environmental laws of the country in which it is operating to determine whether a specific type of waste is regulated as hazardous waste or non-hazardous waste. Waste that is non-recyclable is either incinerated, landfilled or otherwise eliminated, consistent with the laws, regulations and practices of the region. At Group level, the implementation of these policies is supervised by the Group's Environment Vice President.

Circular economy policies extended to the value chain

Within the upstream value chain

The relationships with Imerys' suppliers are based on mutual trust and respect. The Group has defined a Code of Business Conduct and Ethics, to which it holds both itself and its suppliers accountable.

The Imerys Supplier Environmental, Social and Governance Standards ("Supplier ESG Standards") outline the minimum requirements Imerys expects from its suppliers, including key environmental stewardship policies:

- Ensuring all environmental risks and impacts are identified, assessed and mitigated to as low as reasonably practicable;
- Optimizing the use of natural resources;
- Managing waste and implementing the "Reduce, Reuse and Recycle" principle.

√ *For more information about responsible purchasing policy, refer to* **[ESRS S2-1] of the present chapter**.

Within the downstream value chain

Imerys' minerals can be conducive to the circular economy, particularly downstream of its own perimeter through technological know-how, commercial network and strong innovation. As such, Imerys' SustainAgility Solutions Assessment (SSA) framework promotes sustainable solutions by assessing the footprint of its products and innovating to reduce the environmental impact across their lifecycle.

√ *For more information about SustainAgility Solutions Assessment (SSA) framework, refer to* **[ESRS S4-1] of the present chapter.**

1 *A Life of Mine Plan (LOMP) documents the economic mining limits and main parameters for the exploitation of the mineral deposits.*

1.2.6.3. Actions and resources related to resource use and circular economy [E5-2]

Imerys' strategy for its mineral solutions is aligned with the trend of the world economy toward more sustainable solutions for the energy transition, sustainable construction and natural solutions for consumer goods. The circular economy is a core lever of that strategy, positioning Imerys to meet growing expectations on sustainability from its customers.

While the Group has already successfully applied circular economy principles in various ways , accelerating projects in this direction is a key objective in the years to come

Actions related to resource recovery

Once extracted, the beneficiation of the ore during processing offers further opportunities to maximize recovery, thus minimizing mineral waste generation.

Imerys' investments in or modifications to its industrial facilities can mean significant improvements in recoveries can be achieved when modern processing technologies are introduced. These sometimes allow the reuse of historically discarded mineral waste.

01 **CASE STUDY**
Polwhite™ LOOP, the first kaolin to be certified circular material by ISCC PLUS

Polwhite™ LOOP is a mineral solution providing optimum barrier performance, maintaining excellent material handling and flowability during processing. It is suitable for multiple applications in the automotive industry and construction. It has been certified ISCC (International Sustainability and Carbon Certification) PLUS, a global leading certification system, validating the sustainability characteristics of alternative feedstocks throughout the entire supply chain, from origin to end consumer.

Actions related to circular supply

Imerys is constantly seeking to develop ways to create a more sustainable value chain and still produce high-performance end-products for customers. The upstream nature of the Group's business limits opportunities to substitute material inflows with secondary resources. However, by working with other industrial players, opportunities to minimize the use of primary resources upstream can emerge.

These opportunities are identified during the continuous improvement program implementation, innovation program, product management and through other ongoing initiatives, including the Group Sustainable Development Challenge.

Seitim, a joint venture between Imerys and Seitiss, transforms mineral waste into valuable mineral resources. Launched in late 2023, Seitim addresses customer demand for recycled minerals, reduces ecological footprints, and improves waste management. It utilizes digital tools to find untapped waste sources, creating value-added products for the building and construction material producers, amongst various applications in Europe. Future plans include expanding into new industries and scaling operations.

02 **CASE STUDY**
VaLuMix: a customised recycled based solution to tackle stone wool waste production

VALuMix is an engineered solution developed by the Imerys Building Products team that contains at least 50% recycled refractories. VALuMix is then blended with stone wool production waste to form briquettes used in the formulation of stone wool. This innovative solution enables our customer to increase their use of recycled material while integrating waste back into their stone wool production process. This comprehensive, closed-loop approach makes VaLuMix a powerful example of customer-centric industrial circularity.

Actions related to downstream circularity

Imerys' ambition is to proactively steer the overall product and project portfolios toward improved sustainability performance and sustainable solutions. The vehicle it uses to implement this ambition is the SustainAgility Solutions Assessment (SSA) - a robust methodology to measure Imerys' portfolio against sustainability criteria and give customers a clear indication of their suitability credentials.

SSA evaluations of the current portfolio allow the Group to identify enablers of the downstream circular economy as covered by specific questions in the assessment. SSA is also used to screen innovation portfolios to prioritize projects with positive impact on circular economy (and potentially reject / rework projects with negative impact on circularity).

√ *For more information about SustainAgility Solutions Assessment (SSA), refer to [ESRS S4] of the present chapter.*

Imerys aims to support the development of more circular production and consumption models by working in collaboration with its value chain ecosystem and investing in technology- and science-based innovation.

Projects for improving downstream circularity are concentrated on:

- Enabling downstream recycling
- Extending product lifecycle along the full value chain
- Reducing waste at the customer and/or end-user

03 CASE STUDY
Sewper® Liner and SewperCoat® against H_2S biogenic corrosion in wastewater assets

Imerys' calcium aluminate solutions, like Sewper® Liner (for new wastewater infrastructure) and SewperCoat® (for existing wastewater assets), creates a long-lasting barrier against H_2S biogenic corrosion. This protection ensures concrete elements remain functional for longer periods, reducing the need for frequent replacements and repairs. This enhanced durability ultimately leads to a decrease in maintenance requirements and associated resource consumption, contributing to a lower environmental impact throughout the product's lifecycle.

1.2.6.4. Targets related to resource use and circular economy [E5-3]

A key part of understanding how wastes from mines or quarries have value in new industries and improving re-classification of waste materials is quantifying and qualifying what current and historic wastes are available.

Imerys is currently developing a Group-wide baseline of the available waste mineral inventory. Waste mineral inventory refers to all mineral waste areas and long-term stockpiles of already excavated or processed material.

The baseline metric include spatial coordinates of active mineral waste stockpiles and preliminary mineral characterization details.

Group Objective	Baseline	Performance 2025	Target
Improve mineral resources efficiency by ensuring priority sites[1] by mineral waste volume comply with new mineral waste reporting requirements	2022 0%	87%	2025 80%

With this objective, Imerys implemented a strategic initiative to centralize data on mining waste generation, focusing on the 15 major sites that contribute significantly to the Group waste footprint. This comprehensive centralization effort encompasses critical information such as volume, tonnage, composition, and mineralogy of waste dumps.

In 2025, substantial efforts have been dedicated to accurately calculating the volume of legacy waste dumps of the 15 priority sites, which represents 51% of mining volumes, through the use of LIDAR (LIght Detection And Ranging) and drone data. Concurrently, work is in progress to acquire data on material types and basic mineralogy. This information will be integrated into the new Land Management system, ensuring data continuity, expanding the Group's knowledge of material types in a dynamic tool.

In addition to the target mentioned above, Imerys committed in 2023 to achieve by the end of 2027 a specific target related to the management of its tailings storage facilities (TSF). Although the Group operates few TSF with inherently low risk due to their locations, size and type of construction, Imerys has adopted the Global Industry Standard on Tailings Management (GISTM). This global standard provides a framework for safe tailings management. Embedded within the 6 key topics of the Standard are 15 Principles and 77 auditable requirements. All of Groups tailings facilities at entity level are included on the Global Tailings Portal, a publicly accessible and searchable database with detailed information on global tailings facilities.

Group Objective	Baseline	Performance 2025	Target
Comply with applicable GISTM requirements across all its tailing disposal facilities	2022 0%	80%	2027 100%

Toward 2030 ambition

While Imerys acknowledges the critical role of circular economy principles in sustainable business practices, the Group has yet to establish a specific target in this area for the current reporting period. This deliberate approach stems from its commitment to setting meaningful and achievable objectives based on comprehensive data and thorough analysis. The company is currently in the process of developing robust management policies and refining its metrics to accurately measure and monitor circular economy initiatives. This foundational work is crucial for establishing a reliable baseline and identifying key areas for improvement.

By taking this measured approach, Imerys aims to define a well-informed and impactful circular economy objective in the coming year. This strategy aligns with the Group's dedication to transparency and its goal of making substantial, quantifiable progress in resource efficiency and sustainable practices across its operations. As Imerys continues to advance its understanding and capabilities in this domain, it remains committed to integrating circular economy principles more deeply into its business model and reporting frameworks.

1 Priority sites for mineral waste are defined by mining volume.

1.2.6.5. Material inflows and outflows [E5-4 & E5-5]

Imerys' resource use and circular economy policies, actions, targets and metrics relate to the following identified material inflows and outflows (waste, products and materials).

Mineral inflows

One of the characteristics of Imerys is its unique access to a wide range of mineral reserves and resources as sources of the majority of raw materials to the Group's industrial plants. The prevalence of these raw materials are industrial minerals; geological materials, which are mined or quarried for their commercial value.

The industrial minerals used by the Group include: Ball clays, Bentonite, Calcium Carbonates, Diatomite, Feldspars, Kaolin, Perlite, Refractory minerals, Talc and Wollastonite. Imerys also sources and processes certain raw materials from external suppliers to create its specialty products. These materials include bauxite, alumina and zirconia, which are processed to produce synthetic corundums. Tabular alumina is used in refractory applications.

The Group uses some hydrocarbon feedstock for non-energy purposes to produce synthetic graphite, carbon black and other graphite-based products.

Some material inflows used by the Group are classified as Critical Raw Materials (including Bauxite, Feldspar, Silicon Metal and Graphite) or Strategic Raw Materials (including Silicon Metal, Graphite, Bauxite) according to Annex 1 - Regulation EU 2024/1252 (11th April 2024). It should be noted Imerys is currently developing projects related to lithium, which is classified as a both Critical and Strategic Raw Material under the above list. Heavy or Light Rare Earths are not materially used as inflows.

Imerys extractive operations can currently be classified under the quarrying economic activity sub sector with the pertinent Nomenclature of Economic Activities (NACE) Rev. 2 codes:

- B.08.11 Quarrying of ornamental and building stone, limestone, gypsum, chalk and slate
- B.08.12 Operation of gravel and sand pits; mining of clays and kaolin
- B.08.99 Other mining and quarrying n.e.c.
- B.09.90 Support activities for other mining and quarrying

Mineral outflows

Imerys portfolio

Imerys' value-added solutions are designed to meet the specific, technical requirements of its customers and can be split into three categories:

- **Functional additives:** an integral part of the formulation of customers' products, but account for only a minor share of the finished product manufacturing cost (e.g. talc improves the rigidity of polymers used in the automotive industry; calcium carbonate makes plastic films breathable for use in baby diapers, or calcium aluminates used in self-levelling, quick-drying cement floor screeds).
- **Mineral components**: critical constituents in the formulation of customers' products (e.g. mineral solutions for ceramics, or fused alumina in industrial abrasives).
- **Process enablers**: essential in customers' manufacturing processes, but are not found in the end product (e.g. diatomaceous earth used to filter liquids or to extract proteins from blood plasma by fractionation).

Mineral wastes

An overview of material resource use flows at Group level in 2025 is as follows:

The Group's mining operations remove overburden and selectively mine minerals that are valuable from other waste rock (Overburden and Internal Waste). Overburden and Internal Waste are generally not processed and merely extracted from the mine or quarry to gain access to the ore and are subsequently used as backfilling or reprofiling materials in post-mining remediation work.

Mineral processing methods are primarily mechanical and physical, as such, the portion of the mined minerals that is discarded is generally inert and subsequently returned to the mine or quarry either dry or mixed with water (tailings) for eventual incorporation in the final remediated landform.

The Group's mineral waste streams can be classed within the following European Waste Catalog codes.

- 01 01 - wastes from mineral extraction
- 01 01 02 - wastes from mineral non-metalliferous excavation
- 01 04 - wastes from physical and chemical processing of non-metalliferous minerals
- 01 04 08 - waste gravel and crushed rocks other than those mentioned in 01 04 07
- 01 04 09 - waste sand and clays
- 01 04 10 - dusty and powdery wastes other than those mentioned in 01 04 07
- 01 04 12 - tailings and other wastes from washing and cleaning of minerals other than those mentioned in 01 04 07 and 01 04 11.

The majority of the mineral waste flows are non-metallic minerals. Biological materials, metals, plastics, textiles, Critical Raw Materials and Heavy or Light Rare Earths are not materially present in the mineral waste stream.

Inflow and outflow data is collected at entity specific level. An overview of material resource use flows at Group level is as follows:

Entity-specific metrics related to mineral outflows	Unit	2025	2024
Run Of Mine (RoM)	million tonnes (dry)	17.4	18.7
Displaced mining waste	million tonnes (dry)	31.6	35.2
Mineral process waste	million tonnes (dry)	8.0	9.1
of which tailings	million m^3 (wet)	2.2	2.6

The decrease in mineral outflows in 2025 corresponds to reduced production and the sale of some mining sites.

Industrial waste

Industrial waste are the non-mineral wastes generated by Imerys activities, such as solvents, inks, plastic big bags, cardboard and wooden pallets. The amount of hazardous waste generated by most Imerys operations is principally: chemical additives, residual oils, and associated packaging waste.

Metrics related to industrial waste	Unit	2025	2024
Total industrial waste	tonnes	85,199	117,937
Non-recycled hazardous industrial waste	tonnes	2,354	2,931
Recycled hazardous industrial waste	tonnes	1,861	1,488
Non-recycled non-hazardous industrial waste	tonnes	46,477	60,877
Recycled non-hazardous industrial waste	tonnes	34,508	52,641
Industrial waste intensity per net revenue	(tonnes/€ million)	25	33

The Group's activities generated 85 kt of industrial waste in 2025, 95% of which was non-hazardous. The decrease in waste generation compared to 2024 is primarily due to the sale of assets and exceptional volumes of non-hazardous mineral waste in 2024, and internal mineral waste recycling projects. In 2025, the amount of reported recycled waste represents 43% of the total industrial waste.

1.3. EMPOWERING OUR PEOPLE

1.3.1. Imerys' workforce [ESRS S1]

1.3.1.1. Material impacts, risks and opportunities [SBM-3]

Identification of groups within the workforce subject to material impacts

All people in Imerys' workforce who could be materially impacted by the Group's activities are included in the scope of this disclosure. This includes :

- Imerys employees, which includes permanent, fixed-term or seasonal, expatriate, apprentice and non-guaranteed hours employees;
- Imerys non-employees as defined by the CSRD, covering self-employed workers and temporary agency workers that Imerys relies on for mining, an activity that is subject to strong fluctuations because of its dependence on weather conditions and the highly volatile demand for mining products.

For health and safety impacts, risks and opportunities, a third category of workers is included :

- "Other workers", including Imerys interns and other contractors not included within the categories cited previously such as subcontractors and vendors who provide specialized services or products. The Group also acknowledges the presence of other individuals who may be on-site periodically, including visitors and hauliers. These individuals, while not permanent employees, are considered part of the extended workforce for the duration of their presence at Imerys facilities.

Due to the inherent nature of industrial mining and quarrying activities, it is appropriate to differentiate between:

- Laboratory and office workers from headquarters
- Operational workers, which are employees and non-employees working in mines, quarries and plants, who are therefore more exposed to potential risk regarding health and safety impacts.

Note : the Group's reporting scope excludes activities and services that are externalized or purchased from third parties and performed at their own facilities, including those of suppliers, manufacturers, or partners. This exclusion encompasses, for example, the manufacture of equipment at a supplier's site.

Material impact, risks and opportunities

The following table summarizes the material negative and positive impacts identified as a result of the double materiality assessment presented in disclosure requirement [ESRS 2 IRO-1] of the present chapter. The conclusion of the assessment updated in 2025 highlighted a common pattern of the severity and the likelihood of the identified impacts;

- The inherent risks linked to the Group industrial activity, impacts related to **health and safety are the most material topics** for the workforce;
- The impacts related to **diversity, equity, inclusion, and working conditions are either actual** impacts or potential impacts that may happen within the organization, but with a limited severity of injuries or psychological harm;
- The actual, systemic and **positive impact of talent and skills enhancement** on human capital development and local economic benefits.

The processes for engaging with the workforce about these impacts and the mitigation measures Imerys implements are respectively presented in disclosure requirements [ESRS S1-2] and [ESRS S1-3].

ESRS S1. Own Workforce

Materiality	Location within the value chain	Description of the IRO	Time horizon
HEALTH & SAFETY			
Imerys commitment :			
The Group is committed to developing a proactive Health & Safety culture wherever it operates. The Group is likewise committed to a continuous improvement cycle of Health & Safety performance; setting objectives, reporting, auditing and reviewing. The personal involvement of each individual within Imerys is considered essential to achieving an incident-free workplace. The Group has developed requirements for each site to perform health baseline assessment and group standards to provide adequate protection for occupational health exposures.			
The Health & Safety framework is fundamental to the Group's success and contributes to SDG 3 to ensure healthy lives and promote well-being for all at all ages and concretely contributes to SDG 8 to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.			
⊖ Potential negative impact Punctual	● Own operations (all activities)	**Occupational illness** : Group activities **may have negative impacts** on employees in the event that it does not provide adequate protection to employees to prevent occupational diseases *Main group(s) of own workforce :* Operational workers (employees and non-employees)	●●● Long
⊖ Actual negative impact Punctual	● Own operations (all activities)	**Occupational injury** : Group activities **have negative impacts** on employees in the event that it does not provide adequate protection to employees to prevent occupational injuries, life changing accidents or fatalities *Main group(s) of own workforce :* Operational workers (employees and non-employees)	●○○ Short
DIVERSITY, EQUITY AND INCLUSION			
Imerys commitment :			
Imerys seeks to create an environment that promotes employees' development as a key element of growth and transformation. It strives to promote mutual respect in all practices and dealings with its employees and non-employees.			
The Group commits to ensure a culture of inclusion, enable workers to achieve a satisfactory state of equilibrium between work and private life, and prevent violence and harassment in the workplace.			
The Group contributes to SDG 4 to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all; to SDG 5 to achieve gender equality and empower all women and girls; and to SDG 8 to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.			
⊕ Actual positive impact Systemic	● Own operations (all activities)	**Diversity, equity and inclusion awareness** : Group activities **have positive impacts** on local employees and local communities as through proactive diversity, equity and inclusion programs inclusion **awareness for minority and/ or vulnerable populations may increase amongst employees as well as local communities.** *Main group(s) of own workforce :* All employees and non-employees surrounding Group operations	●○○ Short
⊖ Potential negative impact Punctual	● Own operations (all activities)	**Violence and harassment** : Group activities **may have negative impacts** on employees in the event that it **neither prevents, nor sanctions violence and harassment** in the workplace. *Main group(s) of own workforce :* All employees and non-employees belonging to a minority	●●○ Medium
⊖ Actual negative impact Systemic	● Own operations (all activities)	**Inadequate work-life balance** : Group activities **have negative impacts** on employees in the event that working conditions **prevent employees from balancing their work and private lives**. *Main group(s) of own workforce :* Operational workers (employees and non-employees)	●●○ Medium

ESRS S1. Own Workforce

Materiality	Location within the value chain	Description of the IRO	Time horizon
TRAINING & SKILLS DEVELOPMENT			
Imerys commitment :			
Imerys is committed to provide continuous learning to improve the skills and competencies of all employees globally. Such a development opportunity is a continuing process for every employee at every level of the organization, and formal training is one key element amongst several development opportunities.			
Imerys ensures that training is made available on a fair basis and allocated in a transparent manner, based on business requirements and personal needs. All training is implemented and performed in accordance with the respective national laws, in particular with respect to labor law, anti-discrimination laws and data protection requirements, and in accordance with its internal Learning policy. This contributes to the development of human capital at Imerys and thus work toward SDG 4 to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.			
⊕ Actual positive impact Systemic	● Own operations (all activities)	**Human capital development and local economic benefits** : Group activities **have positive impacts** on local employees as through **training and skills development** employees gain new competencies, professional experiences, career opportunities and increased lifetime earning potential as a result of their employment with Imerys. Indirectly this **contributes to local, regional and/or national economies** and can likewise **support the development of infrastructure in remote areas** given that most Imerys sites are located away from main employment areas where employment options are relatively limited. *Main group(s) of own workforce :* All employees and non-employees surrounding Group operations	●●● Short

Imerys' commitment to reducing negative impacts, enhancing positive impacts and managing risks and opportunities related to its own workforce is captured under one of the SustainAgility program's three axes, "Empowering our people". These topics are fully integrated within Imerys' values, which are detailed in section 1.1.3.1 of the present chapter.

Empowering our people

Health and Safety	Diversity, Equity and Inclusion	Training and skills development	Labor practices and working conditions
			

1.3.1.2. Processes for engaging with Imerys' workforce and its representatives [S1-2]

The Group strives to build constructive, open dialogue with its employees and their representatives in accordance with local regulations and implements best practices in matters of workforce management. Establishing and maintaining this open dialogue is a means to contribute to SDG 8 to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all. The interests and views of Imerys employees and representatives also provide rich insights to guide the development of the Group sustainability roadmap. The materiality assessment, for instance, was conducted in collaboration with Imerys employees through several means of consultations, including through a survey to all employees (refer to "Your Voice" hereafter) and face-to-face meetings with employees and employee representatives.

Engagement with Imerys' workforce and its representatives occur through various channels and occasions, among which:

- collective bargaining frameworks and agreements and social dialogue forums;
- the employee engagement survey "Your voice";
- internal communication platforms and social media and community tools.

Engaging with workers' representatives through collective bargaining and social dialogue

Imerys recognizes the right to freedom of association and the right to collective bargaining, which is clearly set out within the Group Code of Business Conduct & Ethics and detailed within the related HR policies and procedures. Dialogue between Imerys and its workers' representatives occurs regularly during the year according to the local legislation in place.

A majority of Group employees (68%) are covered by Collective Bargaining Agreements (CBAs). These CBAs commonly include subjects such as health and safety, work organization and working hours, training, compensation and benefits, and equal opportunities.

In Europe, the European Works Council (EWC) covers Group employees in 18 countries (see section below). The EWC is regularly informed and consulted on Group strategic decisions, including major projects related to changes in the Group's activities when they occur. Discussions with the EWC include updates with regard to business performance, safety, environment, employee engagement, divestiture and acquisition, diversity, equity and inclusion amongst other topics.

The term of office of elected representatives of the EWC is four years and the EWC is composed of:

- The employee delegation, which consists of 15 members, representing different nationalities; and
- Five EWC officers, acting as a liaison between representatives and Imerys management.

The most recent EWC agreement was signed on May 24, 2022, covering 2022-2026. Amongst various provisions, this agreement provides a specific training path to all members beyond the legal requirements, covering Group activities, geographical presence, market and customer applications, and key figures. Furthermore, in order to better apprehend their missions and responsibilities as EWC Representatives, a specific tailor-made training on financial matters was also conducted covering the main financial components and mechanics of a Profit & Loss, balance sheet and free operating cash flow statements.

In addition to financial training, the EWC representatives participated in the Climate Fresk[1] workshop in 2025 to enhance their sustainability knowledge. This engaging, collaborative session provided an understanding of climate change science.

In 2025, the European Works Council (EWC) convened for one plenary session, with its five officers meeting three additional times throughout the year. The plenary session focused on critical topics, including the ongoing CSRD implementation process and the company's sustainability performance, roadmap, and priorities for 2025 and beyond. More specifically, EWC representatives were briefed on the updated results of the double materiality assessment, a key component of sustainability reporting. Additionally, the new 2026-2030 roadmap was presented, outlining the Group's sustainability strategy. Please refer to disclosure requirement [ESRS 2 IRO-1] for more information.

In the event of restructuring, the Group engages in constructive dialogue and puts in place a range of services for employees, ranging from internal mobility, training, outplacement services, amongst other offerings as appropriate to the specific situation.

Engaging directly with employees through the employee engagement survey "Your voice"

Imerys evaluates its employees' engagement periodically through the "Your voice" survey. The questionnaire, available in 26 languages, is shared with all employees across all Imerys countries and businesses and conducted confidentially and anonymously. The Chief Human Resources Officer is then responsible for using these rich insights to guide the development of improvement action plans. The last edition conducted in 2021, for which the response rate reached 88% (over 13,000 employees) showed high levels of engagement and enablement across the Group (68% and 73% respectively), driven by a strong loyalty to Imerys (71%), which is 10 points above the industrial norm. As a result of the findings of the last survey, the Group launched a major pluriannual project (2022-2025) around the Group Purpose, Vision and Values, which are presented in greater detail in Chapter 1, section 1.1.1 of the Universal Registration Document.

1 More information on the Climate Fresk is available on https://climatefresk.org/world/

Engaging directly with employees through internal social media and communities

Internal communication campaigns aim to provide all employees with information that can help them understand the Group's strategy and activities, build their sense of belonging and help to strengthen the Group identity. Information is actively shared across the Group via various means, including through a collaborative digital platform "OneImerys", which supports daily communication and collaboration. This platform hosts essential information, documentation and policies, but also social feeds and workspaces, tools and business applications. The intranet is optimized to enable employees to use tools and resources in an agile way – including smartphone access to Group level applications. The intranet facilitates the sharing of projects, initiatives and successes throughout the Group. It is likewise a platform to share information and support discussion on specific topics within specialized communities.

To "communicate for success" is a central part of Imerys' Leadership Competencies, and as such the Group privileges regular managerial face-to-face dialogue to share key information within teams. To complement this form of dialogue, the Group launches various video messages from the Group CEO and senior leaders. At least bi-annual, these videos are intended for all employees and cover the main achievement and challenges. Quarterly calls run by the CEO and the members of the Executive committee are held with the top leaders of the Group to provide information about strategic matters in progress or in preparation. These sessions include a question and answer section, which support the cascade of information within the organization in a complete and consistent fashion.

1.3.1.3. Processes for impact remediation and channels for workers to raise concerns [S1-3]

Local managers and HR officers are the primary contacts for Imerys workers. However, they are free to report any negative impact through the channels described above or by using the alert system described in disclosure requirement [ESRS G1-1] section 1.4.1.3, paragraph *"Alert system and protection of whistleblowers"* of the present chapter The remediation process is then the same as for any other matter raised through this channel; a dedicated team is set up to investigate the alert, and mitigation measures are drawn up based on its findings.

1.3.1.4. Health and Safety

Policies related to health & safety [S1-1]

Safety Management System

For Imerys, managing Health and Safety (H & S) of the Group's employees and contractors is a core value. The Group has a dedicated Health and Safety Committee, chaired by the CEO and composed of each of the Business Area Senior Vice presidents and functional Senior Managers of the Group. The Health and Safety Committee meets at least three times a year and monitors the Group's progress on all health and safety policies, objectives and programs. The main health and safety indicators are reviewed on a monthly basis at every Executive Committee meeting and during quarterly business reviews. Each Business Area, Hub and Sites monitor their H&S performances, programs and initiatives, to ensure compliance with the group H&S requirements as well as the legal and local requirements.

Based on a set of core safety values established at Imerys and the 4 pillars of the Safer Together umbrella detailed here after, the "Imerys Safety System" (ISS), the H&S management system, is developed in compliance with recognized industry standards (e.g. ISO 45001), to prevent occupational illness & occupational injury and to create a positive and proactive Safety Culture. It encompasses the core elements of international standards for H&S management systems, that are periodically reviewed and revised as part of a management system. The ISS is defined in the Umbrella H&S Policy and through the Safety Culture Maturity Matrix. Imerys requires each operation across the Group to have an effective Safety Management System (SMS) in place with site managers ensuring that Imerys Group policies, guidelines and system are transformed into procedures aligned with local legal requirements. Senior leaders verify the effective implementation of the Imerys Safety System (ISS) within the sites and operations under their perimeter of responsibility.

The **Imerys Safety System** deployed through Health and Safety policies, guidelines, prevention programs and initiatives is structured around a common umbrella called "**Safer Together".** It provides a visual identity and brings together the different elements of the ISS to create a positive and proactive Safety Culture: Being Positive About Safety; Placing Health & Safety Above All; Looking Out For Each Other; and Taking Responsibility.

Each pillar covers specific components of the ISS. **"Being positive about Safety"** includes initiatives such as recognition programs, prevention campaigns, sharing good practices, and Imerys Connect Day. **"Placing Health and Safety above all"** includes the elements of compliance programs, risk assessment, policies focused on managing critical risks, health assessment monitoring and surveillance, EHS audits and mine safety audits, emergency preparedness and response, safety alerts sharing and accident analysis, inspections and regulatory and risk training. **"Taking Responsibility"** encompasses initiatives focused on individual commitment (e.g. Take 5, H&S awareness training, improvement proposals and bottom-up reporting). **"Looking out for Each Other"** is about respecting and caring about each other, through coaching and feedback with initiatives like Visible Felt Leadership (VFL), Behavioral Based Safety programs and Safety Summits. Safety culture development , with standards and assessments, is essential and includes all persons on sites (employees, contractors and visitors) and all levels of the organization from senior leaders to shopfloor workers.

The Operational Control of the ISS is structured around a set of Health and Safety policies and guidelines, detailed hereafter (see section 1.3.1.4), and Group internal audit program to control implementation across all sites.

Health and safety policies

The Group internal policies, developed in accordance with recognized industry standards, are in place to prevent occupational illness and occupational injury (refer to disclosure requirement [ESRS S1-1] above). These policies are made available to each site, which ensures that it is transformed in local procedures aligned with local legal requirements and made available in comprehensive languages for all the workers. The Group Internal H&S policies includes the following documents:

Imerys Health and Safety Charter: Signed by the CEO, it emphasizes the Group H&S vision, the importance of the role played by each individual to create a health and safety culture, and the expectations around continuous improvement, training and zero tolerance if the Group' policies and procedures are breached.

Environmental, Health & Safety General Policy: establishes the overall framework and organization for compliance and continuous improvement in EHS at Imerys, while clarifying employee roles and responsibilities.

EHS Audit Policy and Safety Culture Improvement Team (SCIT) Policy: ensures the consistent application of standard practices for effective and efficient EHS SCIT events and EHS audits, and also prescribes periodic assessment of sites.

EHS audits evaluate the compliance of the site in the correct and effective applications of Group policies and guidelines as well as local regulations regarding environment, health and safety.

SCIT events evaluate the maturity and continuous improvement of the site safety culture, based on the Safety Culture Maturity Matrix.

Thematic policies : the Group also has 40+ additional policies for the management of specific health and safety risks covering a broad spectrum of situations, like electrical safety, working at height, forklift safety, and risk assessment for example.

Group policies apply to all employees and non-employees (e.g. self-employed workers, temporary agency workers), and other workers on site (e.g. contractors, interns...), in all Group activities. Senior Vice-Presidents, Industrial Vice-Presidents, Hub Directors and Site Managers are responsible for monitoring their implementation at all levels of the organization.

These policies are subject to regular updates. For the safety policies, the Housekeeping requirements have been updated to integrate initiatives like "5S" as part of the continuous improvement and internal efficiency programs. And a new policy was issued in 2025, related to "Railroad Safety". Regarding the health protocols, several were thoroughly updated, integrating references to standards and tools developed or implemented in recent years, as well as recommending pertinent good practices. Key areas of focus included: *Exposure to Airborne Contaminants, Hearing Conservation and Noise, Medical Surveillance* and *Occupational Exposure to Chemicals*.

Taking actions on material impacts related to health & safety on own workforce [S1-4]

Safety Culture Maturity matrix (SCMM)

To support the development of an effective safety culture, the Group has developed a Safety Culture Maturity matrix (SCMM) based on four key elements: **leadership and accountability**, **compliance and continuous improvement**, **Behavior-Based Safety (BBS)** in an i**ntegrated approach**. The SCMM matrix, built considering internationally recognized standards for safety management and aligned with the fundamentals of the Imerys safety policies and procedures, helps operations conduct yearly gap analyses and drive their improvement plans in partnership with industrial teams and safety professionals. The Group EHS Audit Team conducts annually comprehensive and independent audits (SCIT events) on selected sites to assess the Safety Culture Maturity. These events allow calibration of the site self-assessment and perform perception surveys to identify perception gaps between management and workforce and formulate recommendations to improve the Site H&S culture.

Risk Assessment

Risk management, defined by a dedicated policy, is a cornerstone of the ISS. All sites and operations are required to develop overall workplace/task-specific risk assessments, compliant with Imerys standards as well as local regulatory requirements. This is a systematic examination of all aspects of the work undertaken to consider what could cause injury or harm, whether the hazards can be eliminated, and if not, what preventive or protective measures are, or should be in place to control the risks. The overall workplace/task-specific risk assessment will normally be conducted by a team including operators, maintenance workers, safety professionals, supervisors, managers and if necessary, external experts. The worker representatives of the site, when applicable, are also involved in the process, as well as occupational health services. Sites document the results of the workplace or task-specific risk assessment and train employees accordingly. The overall workplace and task-specific risk assessments need to be reviewed and revised, as necessary, to take into account changes to the work activity, or if the root cause analysis conducted following an accident or injury identifies a previously unidentified risk. In most cases, risk assessments will be reviewed at regular intervals, depending on the nature of the risks and the degree of change likely in the work activity and/or based on local regulation.

The conclusions of the task-risk assessment identify if the risk is adequately controlled and if not, options for reduction based on the hierarchy of controls (elimination, substitution, engineering controls, administrative controls and personal protective equipment).

Serious 7

The Group safety efforts focus in particular on the "Serious 7" to address highest risk areas (lock out, tag out, try out, electrical safety, machine guarding and conveyor safety, mobile equipment, working at heights, ground control and forklift safety) which have been identified as key contributors in preventing Imerys' severe injuries and fatalities. This approach is supported by :

- Detailed policies and guidelines to control these risks
- Regular audits and inspections to identify non-compliance and gaps
- Associated prevention and corrective actions plan with investment to reach full compliance
- Training and communication campaigns to raise awareness
- Sharing good practices and safety alerts

Emergency Preparedness and Response

To effectively manage the business risks and potential environmental, health and safety impacts from emergency situations, each site is required to identify potential emergency scenarios (which can include : injury, lone workers, confined space rescue, working at height rescue, fire, explosion, chemical spill/release, acts of terrorism, vandalism, natural disasters, loss of containment and power failures, …). These scenarios are developed and prioritized based on the site specific risks. The appropriate response actions, equipment and outside support to manage the risks and to mitigate the impacts to safety, health, environment as well as property, plant and equipment are assessed. A written Emergency Response Plan is developed and maintained. Internal personnel responding to a specific emergency have access to the necessary response equipment to face potential scenarios identified and are competent to carry out their assigned duties based on experience and training. New employees, contractors and visitors are made aware of emergency procedures prior to working on-site.

Emergency response drills are conducted periodically to test emergency response and evacuation procedures and the different scenarios identified on a rotating basis.

Accident, Incident and events reporting, investigation and monitoring

A data management system is in place to enter and record Health and Safety events:

- Accidents, injuries (fatality, lost-time and non-lost-time accidents, first aid) with associated lost and/or restricted duty days
- Occupational illnesses (fatality, lost-time and non-lost time illness) with associated lost and/or restricted duty days
- Incidents (property damages, near-misses)
- Bottom-up events (at risk conditions, at risk behaviour, positive observations)
- Working hours

These records apply to all employees and non-employees (e.g. self-employed workers, temporary agency workers), and other workers on site (e.g. contractors, interns...). This allows tracking lagging indicators, like non-lost time and lost time occupational illnesses and accident frequency rates in accordance with the Group injury and ill health reporting policy. In case an incident occurs, incident investigations are conducted and corrective actions are implemented at site level with follow-up by Business Area teams. Safety alerts are issued whenever a fatality, a life-changing injury or a Significant Potential Incident (SPI) occurs to share root causes and lessons learned within the Group. An SPI is any reported incident that has the potential to result in a fatality or a life-changing injury regardless of the actual severity. Where appropriate, corrective actions identified through an incident investigation are directly integrated into the next update of Group safety policies to reduce the risk of recurrence.

On top of reporting and recording safety and health events, the database is also used to perform and record prevention activities :

- Inspections: to assess applications of the Group' standards on the field
- Worker interactions - Safety dialogue (VFL & BBS): to promote safe behaviour and redirect unsafe acts, key driver for a proactive safety culture

These records are used to track leading indicators associated with those activities (bottom-up reporting, Inspection and VFL rates).

Dedicated modules are also available database to cover occupational health and industrial hygiene topics:

- Health Risk Assessment
- Sampling and Occupational Exposure monitoring. Imerys also tracks Occupational Exposure Limits (OEL) data on a quarterly basis to ensure reliable reference values and traceability
- Corrective actions for health and industrial hygiene

(refer to **disclosure requirement [ESRS S1-4], paragraph *"Occupational health action plan (OHAP)"* below**)

Training, awareness and communication

– Training and awareness of the Group health and safety management system are achieved through various communication and training activities (classroom, distance learning or mixed), often developed in local languages. Local initiatives also arise at regional, hub or site level and include job-related and regultory safety training and regular safety toolbox meetings. These training courses can be followed in several formats depending on the target audience. Sites are responsible to ensure every person (employees, contractual, temporary, agency, or part time workers) at site has the appropriate skills and training. For sub-contractors working on sites, Safety induction and specific Imerys risks training are delivered by Imerys when appropriate, and training records related to the activities directly performed by the contractors (e.g. driving licences, electrical training, ….) will be requested and checked.

Training activities	Targeted audience	Description
Safety Learning Path	Newcomers	The modules of the Safety Learning path are intended to introduce the key principles and tools of the Imerys Safety journey (ISS, Take 5, Serious 7, Safety Dialogue). Different paths are available for Operational and non-operational employees
Safety Summits	Operational managers and senior leaders	The Group Safety Summits aim at strengthening Visible Felt Leadership (VFL) within the most senior leadership
Imerys Safety Universities	Operational managers and senior leaders	The Imerys Safety University relies on a tailored approach to coach site managers and operational managers (production, maintenance, mining, logistic, …) on mastering Imerys tools and how to cascade VFL within their supervisory teams
EHS auditor training	EHS and mine safety auditors	This training conducted annually aims at aligning and calibrating the Group auditors team members (update on the Imerys requirements, auditing process and techniques, …). This training is required for all existing auditors and new members joining the Group auditor team.
Digital courses on the Imerys Learning Hub IMERYS Learning Hub	All Imerys employees	The Group provides its employees with an e-learning platform offering a broad choice of on-demand addition contents: – H&S basics (ISS, Take 5, Serious 7, Safety Dialogue) – Specific Health & Safety Learning modules (Risk Assessment, Root Cause Analysis, Managing Hazardous Substances, Process Safety, Safety Culture, BBS, Management of Change, Truck Tip over, Business Continuity Plan…) – Rebroadcast of 200+ internal health & safety webinars and virtual classes focusing on a specific safety theme.

Other Group wide initiatives and toolboxes have been undertaken to support the continuous improvement of occupational safety and health management including for example :

Awareness initiatives and toolboxes	Targeted audience	Description
Imerys Connect Day Imerys Connect Day	All Imerys employees	Imerys Connect Day is an annual event organized by the Group and typically brings together Imerys employees from around the world to foster connection, collaboration, and engagement within the Group. The Imerys Connect Day includes various activities such as: – Presentations on Imerys EHS performance and recognition of employee achievements – Workshops and discussions on key EHS topics – Team-building exercises – Networking opportunities for staff from different regions and departments The event aims to strengthen the Group culture and promote a sense of unity across the global organization, with a focus on health, safety and environmental topics.
Take 5 Take 5	All Imerys employees	The Take 5 is a brief five-step process that each employee should undertake before starting work and then throughout the day whenever work or working conditions change.
Industrial Hygiene user guide	Operational managers and senior leaders EHS teams	A user guide was developed to describe the frequency and roles and responsibilities for site and EHS teams with regards to Occupational Health Assessments (OHA) relating to physical, chemical, biological agents and welfare.

Occupational safety action plan

Action	Expected outcome	Results at end 2025
Onsite EHS compliance audits and Safety Culture Maturity Assessments (SCIT) On-site EHS compliance and SCIT audits Scope : All Imerys sites	**54** audits and SCIT planned in 2025 Develop and implement simple audit checklists for Serious 7 policies compliance by 2028 on one third of industrial sites	**45** audits and SCIT completed (83% of the plan)
Accident & Incident tracking and investigations Scope : All Imerys sites	– Identify root causes of accident, take prevention and corrective measures, share learnings for high potential incidents – Improve quality of process safety event reporting in internal systems	**69** safety alerts related to Significant Potential Incident (SPIs)
Training and awareness-raising Scope : All Imerys sites	Enhance workers' skills and knowledge through cross-site collaboration, sharing lessons learned from incidents, exchanging improvement ideas, and disseminating best practices	**124,235** total training hours on EHS topics **12 sessions** of Imerys Safety University (ISU) **2** Safety Summits **14** webinars on specific Safety topics e.g. H&S and CSRD reporting, Root Cause Analysis, Mine Geotechnical Risk Management, Process Safety, Insurance **852** Serious 7 (S7) training hours – Imerys Connect Day on the theme "Enabling tomorrow starts with me" – Good practices and sharing in H&S Community engagements: **352 posts, 211 comments and 3,291 Likes**
Leading activities (bottom up reporting, Inspections and VFL/BBS)	Foster a proactive safety culture by encouraging the reporting of potential hazards, unsafe behaviors, near-miss incidents, and property damage, thereby enhancing preventive measures and risk mitigation strategies.	**4.48** Bottom-up rate for 1000 working hours (+ 10% versus 2024) – Promoting the compliance with Imerys standards through the reporting of regular inspections (Serious 7 and others) **12.22** Inspection rate for 10,000 working hours (+ 23% versus 2024), among which are Serious 7 related 7.02 (- 8% versus 2024) – Promoting leadership behaviors and Safety Culture through the reporting of interactions / safety dialogue **41,421** VFL and BBS interactions recorded (-6% versus 2024)

Occupational health assessment (OHA)

The Group conducted a baseline assessment in 2020 focused on industrial workplace health risks (chemical, biological, physical and psychological). The purpose was to assess worker health based on the risk identification, assessment, control, monitoring and review processes for all its sites to ensure a common approach identifying and managing areas of risk. The baseline assessment was transformed into the OHA which all sites must complete periodically to reassess the status of workplace health risks.

Occupational health action plan (OHAP)

Imerys developed a comprehensive **OHAP**, as a continuation from the work contained with the OHA. The OHAP enables sites to implement improvement action plans covering the range of workplace health risks previously mentioned as identified through the OHA. Imerys' operations identified the range of occupational health risk scenarios, assessed them and developed the OHAP proportional to the risk, and as a continuous improvement cycle.The OHAP progress on the action plans is monitored until closure bt the Health and Safety committee.

Across Group locations, health plans and programs are based on site occupational health risks, which integrate wellness initiatives. Wellness and occupational health campaigns are supported by Human Resources, external occupational health nurses and physicians and internal health and safety personnel as well as communication teams.

Appropriate information, instruction and training are provided. Occupational health practices are systematically reviewed to seek improvement, simplification and standardization. Compliance with regulations and the Group's occupational health policies are reviewed regularly through the Group environmental, health and safety (EHS) audit program.

Policies Roll-out of specific policies Scope : All Imerys sites	Expected deployment of the Occupational Illness Policy by 2026	Group policy has been completed.
Risk and general management Occupational Health Assessments (OHA) Scope : All Imerys sites	Each site is required to assess its occupational health risks and maturity, maintain and update and deploy an action plan accordingly. Each site is required to assess its occupational health risks and deploy an action plan ensuring a minimum completion rate of 75% of those actions annually	**99%** of sites assessed the physical, chemical and biological hazards exposure (New sites recently acquired to be covered) **91%** Of sites completed their Occupational Health Action Plan Completed, two day session was held for European colleagues
Training and awareness-raising Scope : Operational managers and senior leader, EHS teams	Improve knowledge around occupational health risks, through Audit seminar.	**3 webinars on specific topics :** – Hearing Conservation – Hazardous substances back to basics – H&S Protocols Updates – Occupational Illness Policy (December)
System Evolution of Enablon	Improve quality of occupational exposure data monitoring and reporting in Imerys internal systems by increasing the agent library	– Implementation of new digital dashboard to monitor results and performance (2025 released) – Update of the internal system user guide on industrial hygiene reporting (V4 completed)

Targets related to Health & Safety [S1-5]

Achieving the Group's 2025 commitments

In line with the Group's Purpose, Vision and Values, health and safety targets are a central to the SustainAgility program.

Group Objective	Baseline	Performance 2025	Target
Improve Group Safety Culture Maturity [1] across all Business Areas	2022 3.0	3.3	2025 3.3
Increase the global occupational health action plan improvement rate	2022 0%	93%	2025 75%

Safety culture

Every year the safety maturity of all Group operations are categorized using the Safety Culture Maturity Matrix. As a result of the comprehensive assessment, sites develop specific site-level safety action plans. At the end of 2022, the assessment showed a Group maturity of 3.0, which corresponds to the "Proactive" level, where the Imerys Safety System is fully implemented, employees are engaged and contribute actively to safety. The Safety target is to improve the Group Safety Culture Maturity to 3.3 by 2025**.** As of the end of 2025 the consolidated result of the assessment was 3.3, which indicates that the Group met the 2025 target.

Occupational health

Starting in 2023, the business areas planned and developed an Occupational Hygiene Improvement Action Plan known as the OHAP, focussed on improving worker health protection measures. Activities were identified through Imerys continuous improvement programs (exposure monitoring, occupational health annual assessment to list two examples). The OHAP was directed by the Group Industrial Hygienist in coordination with Business Area industrial hygiene focal points. The plan includes the most relevant actions that are specific to the respective Business Areas to continue the improvement of their baseline. The objective for 2025 is the completion of at least 75% of the actions for the year. At the end of 2025, 91% of the actions planned were implemented, which represents a cumulative performance of 93% since 2022.

Toward Imerys 2030 ambition

Health and safety stand as the cornerstone of Imerys' operations, deeply embedded in the Group's Purpose and guiding the daily behaviors and decisions of its workforce. While Imerys has made significant strides in its pursuit of world-class health and safety standards, the Group remains steadfast in its commitment to continuous improvement.

Imerys is fostering a robust health and safety culture throughout the organization. The Group empowers employees to be proactive about safety, encouraging personal responsibility and mutual care. This focus stems from a genuine concern for employee well-being and the recognition that a safer workplace enhances operational efficiency.

Objective, metric and target description

> **Objective 2026-2030** : Reduce the Group Total Injury Frequency Rate **by -5% annually** until the end of 2030.

Imerys has monitored its safety performance using the combined Total Injury Frequency Rate (TIFR), which encompasses both employees and non-employees. The Group considers this metric to be a valuable key performance indicator for assessing its success in accident prevention. The long-term safety goal is to reduce the TIFR by 5% annually through 2030, with the ultimate objective of achieving an absolute TIFR value of 2.4. Should this target be reached prior to 2030, the Group's focus will shift to maintaining this level of performance. This ambitious target underscores Imerys' commitment to continuous improvement in workplace safety. The TIFR is calculated as follow :

TIFR = ((Fatalities + LTA + NLTA) x 1,000,000)) / (Number of employees and non-employees hours worked)

Scope of the objective

Imerys maintains a comprehensive approach to safety reporting, aligning its safety perimeter with its financial reporting scope. Divested or discontinued operations are excluded from the safety perimeter from the date of discontinuation, maintaining the accuracy and relevance of the safety data. Notably, newly built projects operating under a "turnkey" contract are immediately included in the Imerys safety program, demonstrating the Group's commitment to safety from the outset of new ventures.

The safety reporting coverage is extensive, encompassing :

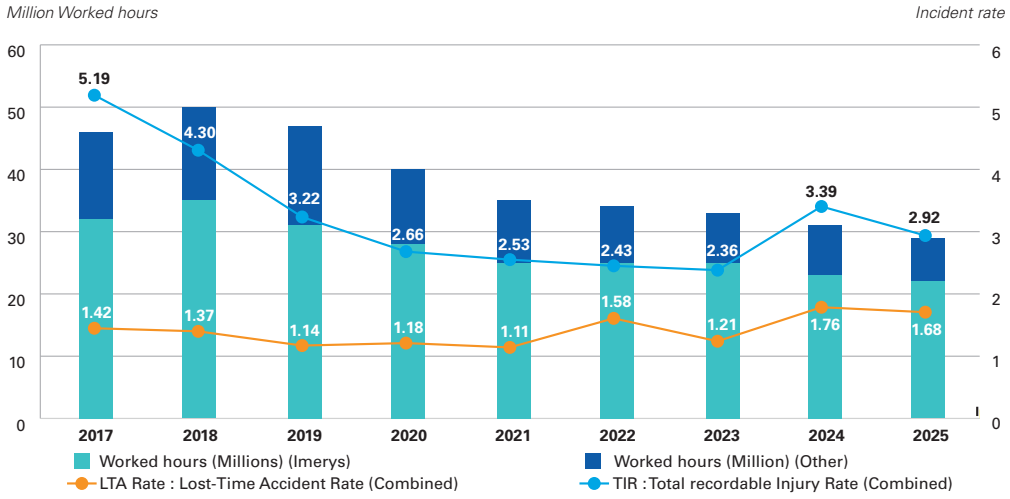

- all categories of employees, including permanent, fixed-term, expatriate, apprentice, and non-guaranteed hours workers.
- all non-employees such as self-employed workers, temporary agency workers, contractors, and interns.

This inclusive approach underscores Imerys' dedication to fostering a culture of safety that permeates all levels of its operations and extends to all individuals contributing to its activities.

The TIFR incorporates fatalities, Lost Time Accidents (both with and without life-changing consequences), and Non-Lost Time Accidents (with and without restricted duties). First Aid incidents and minor injuries are not included in the TIFR calculation.

Metrics related to health and safety [S1-14]

GROUP LOST TIME ACCIDENT RATE

As of December 2025, the combined Lost Time Accident (LTA) rate of the Group (own workforce and other workers on site) was 1.68 and the combined Total Recordable Injury Rate (TRIR) was 2.92 above the 2025 target TRIR, which was set at 2.62.

A comprehensive awareness campaign on life changing injuries was conducted in may 2023 to target Imerys' immediate priority of eliminating fatalities and severe injuries. No fatality has been recorded for more than three years and Two life changing injuries occurred in the period since the launch of the campaign, in January 2024 and in November 2025. This is a significant improvement over the historical records. In addition, despite being slightly above this year's target of 2.62, the TRIR, which includes all recordable accidents, for employees and contractors has improved by 14% compared to 2024. The main causes of these events being related to behaviour, skills and risk management / risk evaluation associated with the following direct causes : slip-trip and fall, being in the line of fire and hit-struck by moving or stationary objects. Business Area Behaviour-Based Safety Program (BBS), supported by a campaigns, in order to empower employees to take ownership of their own safety and that of their colleagues, and to remind key rules and requirements and why they are important on the day to day work, has shown significant improvement in the level of accidents in 2025. The Group will keep up its unyielding focus on continuously improving safety performance and work toward its goal to achieve an injury-free workplace.

Topic	Indicator	Unit	2025	2024
Fatalities	**Total number of fatalities**	**#**	**0**	**0**
	Number of fatalities of employees	#	0	0
	Number of fatalities of non-employees	#	0	0
	Number of fatalities of other workers on site	#	0	0
	Number of fatalities as a result of work-related injuries	#	0	0
Lost-Time Accident rates	**Lost-time accident rate of employees and non-employees**	**-**	**1.68**	**1.76**
	Lost-time accident rates of employees	-	1.33	1.69
	Lost-time accident rates of non-employees	-	2.95	1.27
	Lost-time accident rates of other workers on site	-	2.64	2.25
Number of days lost due to injuries and fatalities from work-related accidents[1]	**Total number of lost days due to injuries and fatalities from work-related accidents (own workforce and other workers on site)**	**#**	**1357**	**2,897**
	Number of lost days of employees due to injuries and fatalities from work-related accidents	#	785	2,153
	Number of lost days of non-employees due to injuries and fatalities from work-related accidents	#	160	114
	Number of lost days of other workers on site due to injuries and fatalities from work-related accidents	#	412	630
Number of recordable work-related accidents	**Total number of recordable work-related accidents[2]**	**#**	**85**	**106**
	Number of recordable work-related accidents of employees	#	60	76
	Number of recordable work-related accidents of non-employees	#	10	5
	Number of recordable work-related accidents of other workers on site	#	15	25
Recordable work-related accidents rates	**Rate of recordable work-related accidents of employees and non-employees**	**-**	**2.92**	**3.39**
	Rate of recordable work-related accidents of employees	-	2.74	3.28
	Rate of recordable work-related accidents of non-employees	-	4.21	2.12
	Rate of recordable work-related accidents of other workers on site	-	3.05	4.33
Safety Management	**Percentage of employees and non-employees covered by Imerys health and safety management system (SMS) based on legal requirements and (or) recognized standards or guidelines**	**%**	**100%**	**100%**
	Percentage of workforce covered by a SMS which have been internally audited	%	23.2%	19.8%
	Percentage of workforce covered by a SMS which have been audited/ certified by an external party	%	20.6%	20.7%

1 Indicators related to ill health, previously disclosed in 2024, are omitted from this year's report as the Group upgrades its reporting methodology.
2 Work-related injury data is reported according to a uniform Imerys global standard to ensure consistency across jurisdictions. This includes a central monitoring process to reconcile data, while final alignment between the global standard and local regulations is performed at the site level. This standardized approach facilitates benchmarking and the adoption of cross-border safety best practices despite differing local requirements.

1.3.1.5. Diversity, equity and inclusion

Policies related to Diversity, equity and inclusion to own workforce [S1-1]

Ensuring a diverse, equitable and inclusive environment is part of the same core value as safety and health and is crucial to the Group's long-term strategy. Imerys is committed to nurturing an inclusive culture where every person matters, where differences are appreciated and people listen to each other, unlocking collective potential.

The Group has set up a **Diversity, Equity and Inclusion Steering Committee** to ensure the Group DE&I program presented hereafter is successfully implemented and the objectives achieved. It is composed of 10 members, among which three Executive Committee members as well as other senior members of various Functions and Business Areas Senior Managers.

The following policies were implemented by the Group particularly to reduce the risk of the negative impacts described previously (refer to disclosure requirement [ESRS 2 SBM-3] above):

- The **Code of Conduct and Ethics** strictly prohibits harassment in any form and discrimination of any kind, including on the basis of gender, age, nationality, religion, sexual orientation, marital, parental and family status, ethnicity, disability, affiliation or union membership;
- The **Diversity, Equity and Inclusion Charter** clearly articulates the shared commitment to achieving greater diversity, equity and inclusion across the Group. This charter, signed by the Group CEO, is available in 21 languages and is supported by a dedicated communication campaign on the sites.
- The **Recruitment Policy** underscores DE&I as a core Imerys value at every stage of the process, from preparation to onboarding, to foster a safe, inclusive environment where employees can thrive. Any decision relating to recruitment (as well as remuneration, implementation of benefits programs, internal mobility etc.) must be administered based on the principles of non-discrimination and harassment, as reflected within the Code of Conduct and Ethics. In some instances, positive action is encouraged: roles are required to have a diverse shortlist that is gender-balanced where possible and legally permissible, for instance.

While the Group has not developed a standalone policy dedicated to 'Work-life balance,' this sub-topic is actively managed through the integration of flexible work arrangements and the principles and policies that support diversity, equity, and inclusion. Employee wellbeing and work-life balance are managed with a decentralized approach via local policies tailored to regional regulatory requirements. This ensures both operational effectiveness and compliance across the Group's diverse jurisdictions.

Imerys openly shares its commitment to Diversity, Equity and Inclusion and keeps all its stakeholders, internally and externally, informed about the DE&I objectives and the results of the collective commitment by regularly reviewing its diversity, equity and inclusion performance in a continuous improvement cycle.

√ *The Diversity, Equity and Inclusion Charter is publicly available on Imerys.com.*

Taking actions on material impacts related to Diversity, equity and inclusion on own workforce [S1-4]

Focusing on non-discrimination and equal opportunity

The Group is dedicated to promoting **Diversity, Equity and Inclusion** at all levels of its operations, with a focus on **non-discrimination and equal opportunity** with regard to human resources management. To foster an inclusive culture, the Group works to:

- **Eliminate barriers**, raise awareness about unconscious bias through DE&I communication and awareness campaigns, and help employees develop strategies to counteract these biases.
- **Implement various training programs,** from onboarding new employees to providing ongoing resources and tools through the Imerys Learning Hub, to support these diversity and inclusion efforts.
- Integrate DE&I as key components of the **Group Leadership Competencies** presented in the paragraph *"Diversity, Equity and Inclusion action plan"* **below**, the behavioral model against which the Group's formal performance appraisals are conducted.
- Implement **flexible work options in place**, covering working locations (telecommuting options) as well as working hours (flexible time options). Imerys has adopted a blended model and policy that allows all eligible employees to work from home a specific number of days. By minimizing the pressures of commuting and allowing for more personal flexibility, these arrangements directly enhance work-life balance and support overall employee wellbeing.

Fostering gender equality

On March 14, 2022, the Group CEO, on behalf of Imerys, signed the United Nations **Women's Empowerment Principles (WEPs)**. By signing the WEPs, Imerys commits to taking bold steps to advance gender equality in the workplace, marketplace and community and to accelerate its efforts to create a more gender-inclusive and equal organization aligned with the Group's long-term ambition. Imerys also started using the WEPs gender gap analysis tool, a voluntary self-assessment tool, on an annual basis to measure progress over time, benchmark against industry standards, and leverage equality resources in a continuous improvement cycle.

Promoting disability inclusion

With regard to disability, Imerys runs annual campaigns on disability inclusion, seizing the opportunity to discuss the needs of employees with disabilities and how Imerys can better support them. Both Imerys' intranet page and the Imerys.com website have been built to ensure their content is accessible to all users, including users with disabilities who use Assistive Technologies (AT). Continuous testing and monitoring will continue to ensure that the Group maintains an accessible online experience for as large an audience as possible.

Fighting against violence and harassment

Imerys maintains an uncompromising stance against violence and harassment through its "Speak Up" global whistleblowing system (as detailed in **disclosure requirement [ESRS G1-1] section 1.4.1.3, paragraph** *"Alert system and protection of whistleblowers"*), providing a confidential channel for reporting misconduct. The Group Ethics Committee provides high-level oversight by monitoring misconduct incident indicators, including discrimination and harassment and designing action plans to address systemic issues. The Committee ensures that investigations involving qualified individuals take place and oversees the overall integrity of the process. This framework is reinforced by mandatory Code of Conduct training to ensure all employees can identify and report prohibited behaviors.

Diversity, Equity and Inclusion action plan

The 2023-2025 action plan, is structured around 5 priorities:

DE&I Governance

Develop and embed a DE&I governance structure to increase the impact of DE&I efforts.

DE&I Enablement

Enable and educate leaders, managers and employees to adapt inclusive mindsets.

DE&I Communication

Communicate the DE&I aspiration, creating more awareness at all levels of Imerys' organization.

HR Integration

Embed DE&I in policies and practices to make talent decisions more inclusive and help all employees thrive in Imerys.

Business Integration

Educate and enable the business to integrate DE&I into day-to-day operations.

Action	Expected outcome	Results at end 2025
Implementing training on DEI topics Scope : All Imerys employees across hierarchical levels "Implementing Inclusion into your daily woking life" virtual training	Train employees on how they can implement inclusion into their daily working life, by providing them with key insights and practical examples to help develop a personal action plan that favors inclusion on a daily basis.	**20%** completion rate A 20% completion rate is generally considered an average to satisfactory outcome for a non-mandatory, voluntary virtually training program.
Improve selected sites' accessibility Scope : Selected Imerys sites	Identify one site per region to allocate resources for facilities for women and accessibility for people with disabilities, where these are not in place. Provide gender and disability accessibility guidelines to selected sites	**4** sites selected across regions Guidelines for gender and disability accessibility of sites provided by Group level
DE&I survey third edition Scope : Representative sample of connected employees	Achieve **76 %** in diversity statement and **76 %** in fairness of treatment statement	Achieved **84%** in diversity statement and **85 %** in fairness of treatment statement
Internal communities on DE&I Scope : Group wide and at country level	Creating DE&I enablement at all levels of Imerys' organization.	Group's internal network of **179** DE&I ambassadors to promote DE&I **9** Employee Resource Groups (ERGs) in total, **four** of which created within 2025 on parents, caregivers, LGBTQIA+ and employees' wellbeing
Communication and awareness promotion Scope : Group wide	Creating more DE&I awareness at all levels of Imerys' organization.	**3** communication and awareness campaigns focusing on gender, DE&I growth mindset and disability inclusion Internal articles on the intranet, showcasing initiatives on different DE&I dimensions
Conduct an annual gender pay equity analysis Scope : Group wide	Increase the percentage of employees with grades falling within an explained or non significant pay gap to **100%**.	**100%** of employees with grades falling within an explained or non significant pay gap
Supporting women leadership Scope : Group wide	Increase the representation of women at all levels of Imerys; organisation	Women's participation : **30%** in the Managing and Developing Your People (MDYP) training

Targets related to Diversity, Equity and Inclusion [S1-5]

Achieving the Group's 2025 commitments

Imerys has identified key material challenges, particularly the prevention of harassment and violence in the workplace. While no quantitative targets have been established for these topics to date, the Group monitors the effectiveness of its policies and practices through relevant qualitative indicators. Violence and harassment are addressed by tracking the number and nature of complaints submitted via the global "Speak Up" whistleblowing system, enabling the identification of risks and corrective actions where necessary. Work–life balance is managed locally through flexible working arrangements and policies that align with regional regulations and the Group's diversity and inclusion principles.

Other objectives have also been defined to improve the living environment and promote diversity, aiming to create a respectful and inclusive working environment, where every employee can flourish in complete safety.

Group Objective	Baseline	Performance 2025	Target
Increase the score of the Diversity, Equity & Inclusion Index	2022 0%	93%	2025 100%

Imerys' DE&I Index is composed of five equally weighted metrics related to gender, pay gap, nationality, disability and inclusion, and can result in a score ranging from 0 to 100. The mid-term target for the Group was to increase the score of the Diversity, Equity & Inclusion Index to 100% by the end of 2025. Imerys has adopted a comprehensive approach to define and set the DE&I Index, incorporating both internal perspectives by stakeholders and external insights by experts. The collaborative and data-driven approach ensures that the DE&I targets are aligned with industry standards and Imerys organization's strategic objectives.

At the end of 2025, the achievement of the Group DE&I Index is at 93% out of the target of 100% set for the end of 2025. This Group DE&I Index achievement is the result of the Diversity, Equity and Inclusion (DE&I) roadmap focusing on clearly defined DE&I governance, DE&I training, awareness and enablement for all employees, adaption of HR policies and practices, as well as integration of DE&I into day-to-day operations. The DE&I Index score of 93%, represents a significant progression from the 0% baseline established at the end of 2022. While the final result was slightly below the ambitious 100% target, the Group demonstrated consistent year-on-year improvement across all five metrics of the index. Imerys remains committed to the momentum built over the last three years, using these 2025 results as a foundation for more granular and impactful targets in the next strategic cycle (2026-2030).

Toward Imerys 2030 ambition

The Group's long-term ambition is to embrace and facilitate Diversity and Inclusion (D&I) in all its dimensions in order to be an inclusive employer, to foster an environment of innovation and creativity, to help enhance business decisions and drive a culture where every person matters. Recognizing both the significant progress achieved and the ongoing need for improvement to realize its ambition, Imerys is fully committed to accelerating and continuing its efforts in diversity and inclusion. To this end, the Group will extend the monitoring of its performance over the next five years by creating an updated D&I Index.

Objective, metric and target description

> Objective 2026-2030 : Increase the **Diversity & Inclusion Index score at 100%** by the end of 2030.

As previously described, Imerys' D&I Index is a composite metric which serves as a comprehensive tool, enabling Imerys to simultaneously advance multiple facets of its D&I strategy. This multidimensional approach allows the Group to track progress and implement initiatives across various aspects of diversity, and inclusion within the organization. For these reasons, and building upon the positive experience gained during the implementation of the previous roadmap, the Group is redeploying a slightly updated version of its Index in its new 5-year roadmap.

Scope of the objective

The updated version of the Imerys' Diversity and Inclusion Index is composed of four[1] equally weighted metrics related to gender, pay gap, nationality, and employees' perception of inclusion through employee surveys , and can result in a score ranging from 0 to 100.

1 Although the disability facet has been removed from the updated D&I index based on the 2025 Double Materiality Assessment, Imerys remains committed to monitoring progress and implementing disability-inclusive initiatives, empowering local level to better drive action.

DEI Index 2026-2030

25% Gender

- Increase the number of women in senior manager roles
- Increase the number of women in manager roles
- Increase the number of women in expert and professional roles

25% Pay equity

- Increase pay equity percentage of M/E/P+[1] employees with similar level of responsibilities

25% Nationality

- Increase the percentage of underrepresented nationalities in senior manager roles

25% Inclusion

- Increase perception of diversity and fairness of treatment through employee engagement survey

1 M/E/P+ refers to Managers, Experts and Professional, as well as senior managers.

Metrics related to Diversity, Equity and Inclusion [S1-9 & S1-12]

Metrics related to registered headcount by gender	Unit	2025	2024
Number of women Board members	#	4	4
Number of women at top management level[1]	#	26	26
Number of men at top management level	#	64	69
Number of women Executive Committee members	#	3	3
Number of women in Senior Management roles[(2)]	#	23	23
Number of women in manager/expert/professional roles	#	1,441	1,415
Number of women in Paraprofessional roles	#	1,152	1,142
Number of women in the Group	**#**	**2,619**	**2,583**
Percentage of women Board members	%	40%	40%
Percentage of women at top management level	%	29%	28%
Percentage of men at top management level	%	71%	72%
Percentage of women Executive Committee members	%	33%	33%
Percentage of women in senior management roles[2]	%	28%	27%
Percentage of women in manager/expert/professional roles	%	34%	33%
Percentage of women in Paraprofessional roles	%	14%	14%
Percentage of women in the Group	**%**	**21%**	**21%**

In 2025, Imerys maintained 40% female representation on the Board and 33% on the Executive Committee. The Group increased women's representation in senior management and in manager, expert and professional roles. Imerys maintained the balanced gender distribution and actively pursued recruitment efforts to promote equal opportunities. Efforts to increase the proportion of women in all levels of the organization shall continue in the coming years, with an emphasis on senior management, manager, expert and professional roles. The efforts of increasing the proportion of women in all levels should be achieved while competencies and qualifications are the number one criteria for recruitment and promotion for every job position at Imerys.

1 Top management level includes not only Executive Committee members but also Senior Management roles.
2 Senior management roles include the roles that directly report to Executive Committee members (excluding assistants/secretaries, etc.) or directly report to the Chief Information Officer or Business Area Purchasing Directors.

Metrics related to registered headcount by age bracket	Unit	2025	2024
Percentage of employees with less than 30 years	%	12%	13%
Percentage of employees from 30 to 50 years	%	52%	52%
Percentage of employees over 50 years	%	36%	35%

The Group age pyramid structure remained relatively stable in 2025, providing a solid basis for continuing to grow internal skills and expertise. The headcount distribution saw minor shifts: the percentage of employees under 30 years decreased slightly to 12% (vs 13% in 2024) and the proportion over 50 years increased slightly to 36% (vs 35% in 2024). Imerys continues to recruit across all age brackets to support an age-diverse workforce.

Metrics related to disability	Unit	2025	2024
Number of women employees with a disability in the Group	#	41	40
Number of men employees with a disability in the Group	#	131	114
Number of employees with a disability (headcount)	**#**	**172**	**154**
Percentage of Registered headcount with a disability	%	1.4%	1.2%
Percentage of women employees with a disability in the Group	%	0.3%	1.6%[1]
Percentage of men employees with a disability in the Group	%	1.1%	1.2%[2]
Percentage of persons with disabilities in the Group subject to legal restrictions on the collection of data	**%**	**1.5%**	**1.3%**

In 2025, a change was observed in the proportion of employees declaring a disability. This evolution is reflected the improved accuracy within the Human Resources Information System (HRIS), which enabled the Group to capture a larger number of employees. The Group maintains its dedication to creating an environment where employees of all physical and mental abilities are accepted and valued. Imerys' actions focus on policy reviews, education, awareness and accessibility actions at site.

With regard to this data on the representation and inclusion of people with disabilities within Imerys, as definitions of "disability" vary from country to country in legal terms, the Group has carefully adapted the approach to take account of these differences while ensuring consistent reporting across its businesses. In countries with broader legal definitions, the data includes individuals who may not be recognized as disabled under narrower interpretations in other jurisdictions. This approach, while inclusive, can affect comparability between regions. To address this, the Group has adopted an internally standardized reporting framework, supplemented by localized data notes that highlight these jurisdictional variations. Data collection focuses on gathering information from countries where Imerys is legally allowed to do so, and records any variations in disability definitions across various regions. The Group may revise its methodology to adapt to changing legal frameworks and improve data accuracy, with the latest review conducted in November 2023. By providing this contextual information, Imerys aims to present a transparent overview of efforts to support employees with disabilities while recognizing the complexities introduced by various legal landscapes. Imerys does not collect disability data in jurisdictions where this practice is prohibited by law.

1 The percentage of women employees with a disability in the Group in 2025 is the number of women with a disability divided by the number of employees (Headcount). This calculation changed compared to 2024, where it was based on the number of women with a disability divided by number of women. Applied to 2024, this indicator would have been at 0.3%.
2 The percentage of men employees with a disability in the Group in 2025 is the number of men with a disability divided by the number of employees (Headcount). This calculation changed compared to 2024, where it was based on the number of men with a disability divided by number of men in 2024. Applied to 2024, this indicator would have been at 1.2%.

1.3.1.6. Training and skills development

Providing continuous learning is essential and a continuing process for every employee at every level of the organization. At Imerys, formal training serves as one key element amongst several development opportunities available to employees.

Policies related to training and skills development to own workforce [S1-1]

Talent development is critical to fostering an innovative, engaged and motivated workforce, ensuring strong long-term growth across the Group. With the labor market constantly evolving, Imerys recognizes the potential short term challenges this presents and addresses them through a comprehensive talent roadmap aiming at improving human resources processes, focusing on **talent acquisition**, **employer branding**, **internal mobility, professional learning and development** and **retention**.

To that end, the Group has adopted two policies which cover all employees:

- **Learning policy**, Clarifies and structures the Imerys learning organization ensuring employees have access to development opportunities tailored to their needs.
- **Performance policy**, outline the Performance Appraisal and Development (PAD) process;

In addition, a global **internal mobility policy** offers permanent employees a streamlined process to develop them by:

- Explore new challenges and new businesses within Imerys;
- Meet personal aspirations for career growth and evolution;
- Enhance collaboration across business areas, and;
- Strengthen Group culture and mindset.

The Chief Human Resources Officer is responsible for monitoring the implementation of these policies, and that apply universally to all employees, entities and geographies within the Group.

Internal mobility: A key to employee retention

Supporting internal career growth and career moves across the Group is a priority for Imerys. This is implemented through :

- **Specialized committees** that meet regularly to discuss internal mobility and promotion opportunities.
- **Succession planning** is an annual process of reviewing the **succession pipeline** for a number of managerial and key professional positions.
- **Performance Journey** a robust and **comprehensive performance management** system that evaluates both competencies development and achievement of numerical objectives.

In 2024, the new **Imerys Leadership Competencies** were introduced to reflect the Purpose, Vision and Values of the Group. In 2025, these Leadership competencies were embedded via various tools and resources across the organization. These competencies are assessed between employees and their managers during annual reviews. The framework includes:

- **Cares for self and others**: how employees demonstrate self-awareness and nurture an inclusive and safe environment, empowering people to do their best.
- **Collaborates for success**: how employees work together across boundaries to achieve shared goals.
- **Commits to customers**: how employees understand (internal and external) customer needs and take action to meet them.
- **Drives results:** how employees deliver sustainable results and strive for excellence.
- **Shapes the future:** how employees think in long-term scenarios, anticipate future challenges and opportunities while prioritizing sustainability.

The Imerys Learning Hub: Imerys' platform for Employee Development

At Imerys, empowering employees to take charge of their development is a key priority. This is achieved by continuously diversifying and increasing the Group's training programs through a blended learning approach that combines in-class and digital training and enabling employees to actively lead their own development and learning experience.

The Group's entire learning offering is centralized and hosted on a platform called the "Learning Hub", a platform accessible to 9,280 employees with Imerys e-mail accounts. The Imerys Learning Hub brings together all in-class training and digital learning courses, for diverse learning opportunities, covering topics such as:

- Safety, environment,
- Finance, management and leadership,
- Project management,
- Commercial excellence and industrial marketing, and
- Geology and mining fundamentals, amongst other topics.

All learning resources are available in English and many are also available in other languages, including French, Brazilian Portuguese, German and Chinese. In addition to transversal topics, the Imerys Learning Hub hosts global training courses tied to the Group Code of Conduct. While these courses are open to all employees, they are mandatory for specific targeted populations

The platform also features sustainability focused courses from the **UN Global Compact Academy** as well as Group organized training and awareness raising sessions on Human Rights based on UN Guiding Principles. These sessions aim to support employees identify and address potential risks to human rights in their areas of responsibility.

Thematic programs for skill development

To ensure that employees are equipped with the skills they need for current and future challenges, Imerys has developed dozens of targeted programs to support employees to regularly upgrade and improve their skills according to their organizational level and their role. These comprehensive programs cover a wide range of essential knowledge areas, including finance, project management, and communication, while also offering specialized people management training for various target groups within the organization. Key initiatives include the "Imerys Leadership Program" and the "Lead My Team Program," both of which are detailed in the below section. The mission of both initiatives is to support key talents in a leadership development journey to cultivate their mindset and skills for current and future success within the business and organizational context within which they work.

Beginning in 2025, Imerys launched its **Artificial Intelligence (AI) tool training** with a series of five foundational AI webinars to support the digital transition, following the installation of Gemini AI and Imerys Improve AI (the Group's proprietary secure generative AI platform), thereby focusing on enhancing employee productivity and digital skills. This comprehensive effort in 2025 also included five webinars to over 500 employees and the establishment of a Google Champion Network of 130 advanced users to share best practices, with a full, detailed training program scheduled for 2026.

Onboarding is the final and vital stage in the recruitment process. It helps employees integrate seamlessly into the organization while reinforcing the Groups' commitment to diversity and inclusion. Imerys has implemented a digital global onboarding program to ensure global consistency across the Group .and streamline the process for the new hires. This ensures that every newly recruited employee has a clear understanding of Imerys in their first 90 days. The onboarding program guides new recruits through valuable information, including Imerys' organization and tools, markets, customers, mandatory training (including the Code of Business Conduct and Ethics, safety, diversity, equity and inclusion, cybersecurity, mining, geology and sustainability) as well as Business Area, function, and country-specific content.

The Group also runs an onboarding program for operational workers across the Group. It defines the minimum requirements to control health and safety risks related to the onboarding period for new operational workers for which Imerys has managerial authority, and/or has a strong and direct influence, at all Imerys industrial sites. The Group likewise focuses on induction training for Imerys' new plant managers to help them understand the Group's approach to operational excellence and continuous improvement, covering topics such as safety, processes, finance, HR, and environment.

Taking actions on material impacts related to training and skills development [S1-4]

Imerys Leadership Competencies (ILCs)	Permanent action

Scope : all Imerys employees

Expected outcome :

- Five core competencies that are the foundation for fostering excellence and growth within Imerys, in line with the Group Purpose and Values of Unlocking Better Futures.
- ILCs depicts the behaviors expected, on the ways employees achieve their goals, drive their personal development, and contribute to the Group's success.
- ILCs clearly and simply set out what behaviors Imerys encourages and values.
- - Embedding ILCs in all HR processes such as learning and development programs, performance and reward.

Imerys Leadership Program **2025**

Scope : managers, Experts and Professionals identified in the Organization & People Review process

Expected outcome :

- Equips leaders with the mindset and skills to drive Imerys forward
- Strong leadership pipeline to provide Imerys with the leaders of tomorrow
- Creating a consistent and common culture of inclusive and authentic leadership
- Accelerating the success of key managers

Lead My Team Program **Permanent action**

Scope : Operations Sites Managers, Supervisors, Team Leaders

Expected outcome :

Group-wide initiative launched that aims at training supervisors in managerial techniques to:

- provide them with skills and behaviors to improve their team and business performance
- develop and improve a strong safety culture
- create a continuous improvement culture.

Group Mentoring Program **2025**

Scope : Senior Managers and Alumni of the Imerys Leadership Program.

Expected outcome :

The Imerys Group's six-month, company-wide mentoring program is designed to :

- Foster talent and organizational growth.
- Promote knowledge sharing.
- Drive experience development.
- Expand networking and organizational understanding.
- Supports Imerys's succession planning.
- Reinforces the company's culture.

Trainings, skill & development metrics [S1-13]

Talent development and the enhancement of employee skills is a material topic for the Group related to a positive impact. Although no target for training and skill development have been established, Imerys measures the effectiveness of its policies and actions through structured governance and performance monitoring processes supported by a set of indicators that track progress and effectiveness. These mechanisms enable the continuous assessment and improvement of development opportunities across the organisation.

Metrics related to training and skills development	Unit	2025	2024
Number of trained employees	#	11,907	11,250
Number of training hours by year	**#**	**246,402**	**248,218**
Of which environment, health and safety related training	*#*	*124,235*	*126,610*
Of which technical skills training	*#*	*98,103*	*100,275*
Of which management training	*#*	*24,065*	*21,333*
Percentage of employees that participated in regular performance and career development reviews	**%**	**50%**	**57%**
Percentage of women employees that participated in regular performance and career development reviews	%	72%	80%
Percentage of men employees that participated in regular performance and career development reviews	%	45%	51%
Average number of training hours per employee	**#**	**20**	**20**
Average number of training hours per woman employee	#	14	15
Average number of training hours per man employee	#	21	21

The year 2025 represented a period of strategic consolidation for training initiatives at Imerys, characterized by the comprehensive implementation of the Imerys Performance Journey. This undertaking led to a 13% increase in management training, complemented by the annual dedicated Learning Week, which furnished a diverse array of self-development opportunities focused on self-leadership, thereby fostering individual progression.

In quantitative terms, the Group substantially broadened its educational outreach throughout the organization. The total number of trained employees rose by nearly 6%, reaching a cumulative total of 11,907 individuals. This expanded coverage was achieved while successfully sustaining a robust and consistent benchmark of 20 training hours per employee on average across the entire workforce.

The organization maintained its primary focus on critical operational excellence. Significantly, Environment, Health, and Safety (EHS) training continued to constitute over 50% of the aggregate training volume, with 124,235 hours allocated to these subject areas. This highlights Imerys' unwavering commitment to maintaining a safe, compliant, and proficient workplace environment in the context of evolving operational requirements. Despite fluctuating market dynamics, the Group remains dedicated to sustained investment in the professional resilience and long-term development of its workforce.

1.3.1.7. Labor practices and working conditions

While teh topics under labor practices and working conditions are not conisderd material under the souble materiality assement, however the group is still commited to the various topics and they remain key subjects to the Group differnet stackholders

Fundamental Principles

Imerys strives to promote mutual respect in all practices and dealings with its employees and non-employees working on its sites. The Group is committed to complying with local legislation in force in the countries where it operates and to respect internationally recognized human rights, as set out in the International Bill of Human Rights and provisions of the fundamental conventions of the International Labour Organization (ILO), particularly in terms of non-discrimination, privacy, child labor, forced labor, compensation and working hours. The Group is committed to respecting human rights, avoiding complicity in human rights abuses and providing access to remedy, in line with the UN Guiding Principles on Business and Human Rights. Imerys is fully committed to taking effective measures to end discrimination and to eradicate child labor and forced labor. Imerys endeavors to have a positive impact on employees' welfare through its employment practices, which likewise have both indirect and induced positive impacts on surrounding communities and thereby contribute to SDG 8 to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Code of Business Conduct and Ethics

The Group Code of Business Conduct and Ethics spells out the fundamental principles and shared commitments to ethical behavior, including respect of human rights and labor practices. The Code applies to all Imerys employees, including those of its subsidiaries, as well as Imerys' business partners. Managers at Imerys have a particular responsibility to ensure its daily application because of their roles and responsibilities with regard to Group operations.

Compliance with the Code and policies on human rights and labor practices, including preventing child labor and forced labor, is included within due diligence assessment for new projects and new business relations (mergers, acquisitions, joint ventures) and within the scope of internal auditing missions for the Group existing activities. Policies on prohibition of child labor and forced labor have been in place since 2009.

Human rights policy

In 2025, Imerys published a comprehensive human rights policy that aligns with the above fundamental principles and Code of Business Conduct and Ethics. The Group's policy outlines its commitment to respecting human rights throughout its operations and supply chain. It consolidates key elements of other policies in areas such as forced labor, child labor, working conditions, freedom of association, non-discrimination, community rights, and data protection.

Imerys has clear governance structures, with the Ethics Committee overseeing the Duty of Care program and reporting annually to the Board's Audit Committee. The Group conducts regular risk assessments, implements preventive and mitigation measures, and maintains robust monitoring and reporting mechanisms, including its 'Speak up!' whistleblowing system.

Imerys' approach includes ongoing employee training, supplier assessments, and community engagement to ensure effective implementation and continuous improvement of its human rights practices. The Group regularly evaluates the effectiveness of its control measures and undergoes an annual independent sustainability assessment to identify areas for improvement.

Compensation and benefits management

The Group has developed a global and comprehensive program for benefits management. All the healthcare, death and disability benefits provided to its employees are mapped, to ensure that levels of coverage are harmonized across the Group, in line with local regulations and market practice and managed in a structured and efficient way. The Group Pension Committee governance principles, objectives and operating modes are applicable across Imerys sites.

The Group compensation and benefits systems and policies aim at ensuring market competitiveness, internal consistency, and equal pay for work of equal value, while being driven by a clear pay-for-performance objective. Imerys' global grade grid and position evaluation system provide a rational and consistent basis for the maintenance of the pay structure and foster transparency. The Group endeavors to align its remuneration practices across the world with international standards.

Fixed compensations are reviewed on a yearly basis under the close coordination of the Human Resources function, supported by regular local and/or sectoral surveys. Short-term variable pay schemes consist of both individual and shared objectives. These are also adjusted annually using the management by personal objectives approach, or sometimes multidimensional performance appraisals (360degree feedback). Agile conversations on performance are also advised all year long.

In 2025, the Imerys CEO, all the Executive Committee and most senior managers had individual objectives linked to the achievement of the Group's mid-term sustainability objectives. Long-term compensation programs are fully aligned to the Group's long-term financial and sustainability objectives.

While the topics under labor practices and working conditions are not considered material based on the results of the 2025 Double Materiality Analysis, they remain key subjects of interest for the Group's various stakeholders.

√ *For more information on Executive Compensation, see chapter 4, section 4.3 of the Universal Registration Document.*

1.3.1.8. Additional metrics related to Imerys' own workforce [S1-6, S1-7 & S1-11, S1-17]

Characteristics of Imerys employees [S1-6 and S1-7]

Metrics related to registered headcount	Unit	2025	2024
Number of employees (Headcount)	**#**	**12,342**	**12,392**
of which permanent employees	*#*	*10,783*	*10,829*
of which non-permanent employees	*#*	*362*	*363*
of which non-guaranteed hours	*#*	*1,197*	*1,200*
Average number of employees (Headcount)	#	12,445	12,896
Number of non-employees[1]	**FTE**	**1,107**	**1,086**
of which temporary agency worker	*FTE*	*1,077*	*1,047*
of which self-employed workers	*FTE*	*30*	*39*

As of December 31, 2025, the Group's workforce stands at 12,342 employees, reflecting a slight decrease from the previous year. Refer to **chapter 6.1,** *Note 11 "Staff expenses"* for more information about financial indicators related to Imerys employees.

Metrics related to number of employees by gender (Headcount)	Unit	2025	2024
Men	#	9,723	9,809
Women	#	2,619	2,583
Other	#	0	0
Not reported	#	0	0
Total Employees	**#**	**12,342**	**12,392**

Imerys maintains the balanced gender distribution and actively pursues recruitment efforts to promote equal opportunities.

Number of employees by country (Headcount)	Unit	2025	2024
France	#	2,191	2,084
United States of America	#	1,875	1,910
China	#	1,281	1,274
Other countries	#	6,995	7,124
Total Employees	**#**	**12,342**	**12,392**

In 2025, only three countries employed more than 50 employees while representing over 10% of the total workforce. These three countries represent more than 40% of Imerys registered employees. Out of the 40 countries, over half (27) have a workforce exceeding 50 employees, representing from 0.4% to 8%.

1 The total hours worked by non-employees are converted to Full-Time Equivalent by divided the annual non-employees worked hours by 12 and then by the monthly statutory hours of a permanent employee in the respective countries.

	2025					2024				
Reporting period	Women	Men	Other	Not disclosed	Total	Women	Men	Other	Not disclosed	Total
Number of employees	2,619	9,723	0	0	12,342	2,583	9,809	0	0	12,392
Number of permanent employees	2,365	8,418	0	0	10,783	2,333	8,496	0	0	10,829
Number of temporary employees	137	225	0	0	362	144	219	0	0	363
Number of non-guaranteed hours employees	117	1,080	0	0	1,197	106	1,094	0	0	1,200
Number of full-time employees	2,438	9,629	0	0	12,067	2,406	9,718	0	0	12,124
Number of part-time employees	181	94	0	0	275	177	91	0	0	268

In 2025, the gender distribution of the workforce remained stable compared to 2024.

	2025					2024				
Reporting period	Europe	Americas	Asia-Pacific	Africa & Middle East	Total	Europe	Americas	Asia-Pacific	Africa & Middle East	Total
Number of employees	6,303	3,431	2,140	468	12,342	6,257	3,452	2,143	540	12,392
Number of permanent employees	6,021	2,205	2,129	428	10,783	5,972	2,234	2,124	499	10,829
Number of temporary employees	266	45	11	40	362	265	38	19	41	363
Number of non-guaranteed hours employees	16	1,181	0	0	1197	20	1,180	0	0	1200
Number of full-time employees	6,041	3,423	2,135	468	12,098	6,003	3,444	2,137	540	12,124
Number of part-time employees	262	8	5	0	244	254	8	6	0	268

In 2025, the breakdown of employees by region remains similar to 2024. 51% of the employees are located in Europe, mainly in France and the United Kingdom, 28% are located in the Americas and 17% in Asia.

Metrics related to turnover	Unit	2025	2024
Number of employees who have left Imerys during the year [1]	#	1,336	1,453
Rate of employee turnover	%	10.7%	11.7%

In 2025, the turnover rate has remained relatevly stable compared to 2024.

Collective bargaining coverage and social dialogue metrics [S1-8]

Metrics related to collective bargaining agreement	Unit	2025	2024
Employees under collective bargaining agreement	%	68%	67%

	Collective Bargaining Coverage		**Social dialogue**
Coverage rate by country or region	Employees – EEA (for countries with >50 empl. representing >10% total empl.)	Employees – Non- EEA (estimate for regions with >50 empl. representing >10% total empl.)	Workplace representation (EEA only) (for countries with >50 empl. representing >10% total empl.)
0-19%			
20-39%		North America	
40-59%		Asia	
60-79%			
80-100%	France		France

1 *The departures include permanent employees leaving, during the year, for the following reasons: voluntarily, dismissal, retirement or death.*

Social protection [S1-11]

Imerys' global and comprehensive program (Global Management System) for benefits management maps all the healthcare, death and disability benefits provided to its employees. This program ensures harmonized coverage levels across the Group, aligning with local regulations and market practices while maintaining efficient management. The Group Pension Committee's governance principles, objectives and operating modes are applicable across Imerys sites. All Imerys employees in countries covered by the Global Management System benefit from social protection. This represents 99% of Imerys' workforce. This system streamlines benefit administration and ensures consistent coverage across the organization.

Metrics related to social protection	Unit	2025	2024
Percentage of employees covered by social protection	%	99	98

Incidents, complaints and severe human rights impacts [S1-17]

Metrics related to incidents, complaints and severe human right impacts	Unit	2025	2024
Number of confirmed reported incidents of discrimination (including harassment)	#	2	4
Number of confirmed reported incidents on other work-related complaints	#	1	10
Number of reported severe human rights incidents (child labor, forced labor, human trafficking)	#	0	0
Number of severe human rights issues and incidents connected to own workforce that are cases of non respect of UN Guiding Principles and OECD Guidelines for Multinational Enterprises	#	0	-

Remuneration ratio [S1-16]

1. Scope

The annual remuneration ratio covers all Imerys employees worldwide, reflecting the diversity of Group activities and compensation practices. To ensure data reliability and consistency, certain categories of employees are excluded (e.g., non-active staff, part-time employees, obviously incorrect remuneration, missing annual salaries, etc.). In 2025, these exclusions account for 4.9% of the total workforce. The worldwide average and median remuneration at Imerys includes the base salary and fixed bonuses only. For reliability reasons, all variable bonuses have been excluded.

2. Methodology

The highest remuneration considered is that of the CEO. There are two approaches to distinguish:

Adjusted Remuneration Ratio (salary + fixed bonuses): Presented in a table showing the evolution over the last five financial years, providing a long-term perspective. Both the numerator and denominator are based on the adjusted remuneration.

Total Compensation Ratio: For the 2025 financial year, the ratio for the highest remuneration (numerator) includes all elements of compensation, namely the fixed portion, the annual variable portion, and any other benefits. The denominator remains unchanged and includes only the base salary and fixed bonuses.

This dual presentation helps in understanding how remuneration evolves over time (fixed components) while also offering a more comprehensive snapshot for the current year (global remuneration).

3. Results and Interpretation

The results of the annual remuneration ratio reflect Imerys' position as an international Group operating in multiple countries, each with potentially different pay levels and tax systems. Any comparison between the CEO's remuneration and that of all employees should therefore be viewed in the context of these local specifics, currency fluctuations, and regional pay practices. **The publication of the ratio includes:**

- **Five-year evolution table**: see below, showing the evolution of the adjusted remuneration ratio (salary + fixed bonuses)
- **2025 Global Remuneration Ratio:** 111.6 Based on total remuneration (including annual variable components) as described in Chapter 4, section 4.3.2.1 of the Universal Registration Document.

While this topic is not considered as material, these elements provide a comprehensive and transparent view of the Group's remuneration policy, while taking into account the methodological constraints resulting from the diversity of Imerys' locations.

Metrics related to remuneration ratio	2025	2024	2023	2022	2021
Median remuneration ratio	26.4	26.6	29.6	28.7	29.7
Average remuneration ratio	22.2	22.2	23.4	22.8	24.8

1.3.2. Workers in the value chain [ESRS S2]

Imerys believes that high standards in all environmental, social and governance areas are essential for all of its business operations across the globe. The Group expects its suppliers to adhere to the same principles as elaborated within the Group Code of Business Conduct and Ethics.

1.3.2.1. Impact, risk and opportunity related to workers in the value chain [SBM-3]

As part of its Vigilance Plan presented in Part II of the present chapter, the Group has established a specific risk mapping process to identify, assess and prioritize, human rights, health, safety and environmental risks within its suppliers in different geographical areas, referred to as the "Duty of Care risk mapping process". The results of the Duty of Care risk mapping process are integrated as appropriate with the double materiality analysis presented in disclosure requirement [ESRS 2 SBM-3] of the present chapter. Based on this risk assessment, the Group has identified **potential health and safety risks within its value chain** further described in the table hereafter.[1]

ESRS S2. Workers in the value chain

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : OCCUPATIONAL ILLNESS AND INJURY			
Potential negative impact Punctual	Upstream value chain (Raw materials, Mining, Energy, Transport, Packaging, Chemicals, Industrial services and General services categories)	The activities of Imerys subcontractors/suppliers **may have negative impacts** on their employees in the event that they do not provide adequate protection to employees to **prevent occupational diseases or occupational injuries, life changing accidents or fatalities**	Short

Identification of groups within the value chain subject to material impacts

For health and safety impacts described above, it is necessary to distinguish two main categories of workers within the value chain :

- **Contractors working on the Group operations** who are not part of Imerys workforce, such as subcontractors and vendors who provide specialized services or products. These workers are including in "other workers" category described in [ESRS S1] of the present chapter.
- Workers working for operations in Imerys upstream and downstream value chain who **perform their work at supplier's facilities or under supplier supervision**. Due to the inherent nature of their activities, operational workers, working specifically in raw materials, and mining activities, are more exposed to potential risk regarding health and safety impacts.

1 In 2025, Occupational Health and Occupational Injury in the upstream value chain were merged into a single impact scenario due to the interconnected nature of these two aspects of workplace safety and health, while also recognizing the challenges in conducting a more granular analysis due to data constraints.

1.3.2.2. Policies related to value chain workers [S2-1]

With regards to health and safety policies covering **contractors working on the Group operations,** refer to [ESRS S1], section 1.3.1.4 of the present chapter.

For the **workers working in the upstream and downstream value chain** as described in the section above, the Group implemented since 2018 a comprehensive responsible purchasing policy, based on Supplier Environmental, Social and Governance Standards ("**Supplier ESG Standards**") and supervised by the Group Purchasing Vice-President.

These standards outline the minimum requirements Imerys expects of its suppliers for all operations under the supplier's own control. The Standards are based on the fundamental principles of Human Rights, as defined by the Universal Declaration of Human Rights (United Nations 1948), the Fundamental Conventions of the International Labor Organization (ILO), the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (2011) and the Ten Principles of the UN Global Compact (2000).

In 2025, Imerys collected feedback from suppliers and as a results made minor adjustments to the Supplier ESG Standards. Additionally, new requirements related to biodiversity were added, aligning with Imerys' own environmental standards. The updated version of the Supplier ESG Standards are publicly available on the Group website.

Health and safety supplier standards

With regards to health and safety, the suppliers are required to :

- Comply with all applicable occupational health and safety regulations;
- Implement a health and safety management system in line with recognized international standards;
- Comply with applicable Imerys occupational health and safety policies and procedures for any works being undertaken by suppliers on Imerys sites;
- Identified, assessed and mitigated all health and safety hazards to as low as reasonably practicable;
- Take the necessary actions to prevent accidents, work related injuries and occupational illnesses;
- Ensure that all workers exposed to specific health and safety hazards received effective and appropriate training;
- Provide the workers under supplier's responsibility with the appropriate personal protective equipment.

Human right-related supplier standards

With regards to human rights related matters, the suppliers are required to :

- Respect internationally proclaimed human rights of all employees, contractors, and third-party employees as well as the communities in which they live.
- Prevent child labor in full accordance with the ILO conventions including on the age limits and type of work permitted.
- Eliminate all forms of forced, compulsory labor and human trafficking in full accordance with the ILO conventions.
- Comply with any local legislation which applies to human rights

These requirements form an integral part of the Supplier ESG Standards and are part of the Group's Human Rights policy, published in 2025. This policy not only covers Imerys employees but also extends to its entire supply chain, demonstrating the company's commitment to ethical practices beyond its immediate operation (refer to ESRS S1, section 1.3.1.7 for more information about the Human Rights policy).

In addition to social aspects, the Supplier ESG Standards cover a broader panel of topics such as environmental stewardship, climate change, and business conduct. Aligned with the Group Code, the Sustainability Charter and Imerys' SustainAgility ambition, they have been translated into 23 languages.

1.3.2.3. Processes for engaging with value chain workers about impacts [S2-2]

Imerys demonstrates its commitment to responsible business practices by engaging in **regular business reviews** with its key suppliers. During these structured meetings, the Group creates an open forum for dialogue, where supplier representatives are encouraged to voice any concerns related to health and safety issues or human rights matters. This proactive approach allows Imerys to address potential problems promptly and collaboratively.

By giving suppliers the opportunity to raise critical aspects, this helps identify and mitigate risks and contributes to continuous improvement in workplace conditions and ethical practices across Imerys' network of suppliers. This ongoing engagement underscores Imerys' holistic approach to sustainability and its recognition of the vital role suppliers play in achieving responsible business objectives.

1.3.2.4. Processes to remediate negative impacts and channels for value chain workers to raise concerns [S2-3]

Local procurement managers and purchasers are the primary contacts for supplier worker representatives to raise concern. However, they are free to report any negative impact through the channel described above or by using the **alert system** described in disclosure requirement [ESRS G1-1] section 1.4.1.3, paragraph *"Alert system and protection of whistleblowers"* of the present chapter.

The remediation process is then the same as for any other matter raised through this channel; a dedicated team is set up to investigate the alert, and mitigation measures are drawn up based on its findings. Quick access to the online alert system is provided within the Supplier ESG Standards, which are signed and acknowledged by suppliers.

1.3.2.5. Taking action on material impacts on value chain workers [S2-4]

In 2019, the Group began the roll-out of a comprehensive responsible purchasing program integrating environmental, social and governance matters. This program encompasses key risk prevention and mitigation measures including (but not limited to):

- Supplier **ESG Standards:** as described in section [ESRS S2-1] above, this code is communicated to all suppliers and forms an integral part of the contractual agreements.
- **Supplier selection and onboarding:** sustainability criteria, including health & safety, human rights, labor, ethics, environmental and supply-chain management practices, are integrated into the supplier selection process. Potential suppliers are evaluated based on their commitment to these principles and their EcoVadis score (as described hereafter). Recognizing that a comprehensive EcoVadis assessment can require up to three months to complete, new or prospective suppliers may not have a rating available at the time of sourcing. In such cases, it may initiate business relationships, while simultaneously initiating the EcoVadis assessment process. This approach allows Imerys to onboard necessary suppliers while ensuring promptly commitment to sustainability.
- **Imerys utilizes and leverages EcoVadis** as a key tool for evaluating the sustainability performance of its suppliers and to drive continuous improvement of the supply chain. If a supplier's score falls below the threshold (which is category-specific based on materiality), a corrective action plan process may be requested. This collaborative approach involves working with the supplier to develop and implement targeted improvements.
- **On-site audits:** for high risk raw materials, as defined in the Vigilance Plan presented in Part II, where EcoVadis assessments are not yet available, independent on-site audits are conducted to gain a comprehensive understanding of their operations and ensure alignment with Imerys sustainability standards.
- **Training and awareness**: Imerys buyers are trained on key aspects of the responsible purchasing program to support its implementation, recognize risks and develop mitigation actions.

In the case Imerys has a reasonable suspicion that a supplier is directly committing - or sourcing from any party committing - a serious violation of the Standards despite the risk prevention and mitigation measures, **the Group may suspend or terminate the relationship with supplier**, without any liability toward the Supplier.

1.3.2.6. Target related to workers in the value chain [S2-5]

Achieving the Group's 2025 commitments

In 2022, the Group defined mid-term sustainability objectives based on the double materiality assessment process and results presented in disclosure requirements [ESRS 2 SBM-1], [ESRS 2 IRO-1] and [ESRS 2 SBM-3 - S2] of the present chapter. In accordance with the responsible purchasing program described above, **the mid-term target for the Group was to deploy a sustainability rating scheme covering at least 75% of Group Suppliers (by spend) by the end of 2025.**

The supplier engagement strategy prioritizes suppliers with an annual spend exceeding €100,000. This amount gathers the spend coming from several supplier legal entities to ensure a large and comprehensive coverage. It reflects a risk-based approach to due diligence.

With regards to health and safety,

- Imerys utilizes the 360° watch EcoVadis feature to identify any adverse reports concerning employee at partner's facilities.
- When subcontractors are performing works in Imerys premises, the same level of rigorous health and safety policies are applicable (refer to [ESRS S2-1] above), ensuring consistency with the internal employee practices. In this context, health and safety performance indicators related to contractors working on the Group operations are presented in section 1.3.1.4 within [ESRS S1].

Group Objective	Baseline	Performance 2025	Target
Deploy a sustainability rating scheme of Group suppliers (by spend)	2022 53%	75%	2025 75%

As of the end of 2025, the Group successfully achieved its supplier engagement objective. The EcoVadis-based scheme covered 75% (by spend) of suppliers with yearly spend above €100,000 (at Group level). Over 2,000 suppliers are now assessed, including smaller suppliers invited in 2025 (compared to the €100k objective threshold). This significant achievement was driven by several key factors:

- Recent onboarding of procurement teams (100+ employees) through comprehensive internal training on sustainability topics.
- High level of engagement from Imerys purchasing and procurement teams, totaling more than 250 employees, supported by regional initiatives and awareness campaigns.
- Systematic integration of sustainability considerations in supplier partnerships, especially for those with annual spend exceeding €100,000.
- Improved global awareness of sustainability issues among suppliers, resulting in more policies being implemented, despite varying levels of maturity observed across different regions.

Toward Imerys 2030 ambition

Imerys has enhanced its approach to responsible purchasing by implementing practices that extend sustainability standards, particularly health and safety, throughout its global supply chain. The Group has achieved significant coverage of its suppliers' sustainability profiles by spend, positioning it well to advance its responsible purchasing journey. Moving forward, Imerys aims to accelerate the implementation of its risk mitigation strategies for its core suppliers, focusing on both category and spend, including health and safety issues. This strategic approach demonstrates the Group's commitment to continuously improving its supply chain sustainability and aligning with evolving regulatory requirements.

Objective, metric and target description

> Objective 2026-2030 : Ensure **80% (by spend) of the Top 1000 core suppliers achieve at least a moderate score** by the end of 2030.

By prioritizing its TOP 1000 core suppliers across the organization and addressing specific risk areas, Imerys seeks to maximize the impact of its responsible purchasing initiatives while ensuring efficient resource allocation. This proactive stance not only strengthens the company's risk management but also contributes to its overall sustainability goals and reinforces its position as a responsible company.

Scope of the objective

Core supplier definition

Core Suppliers are entities within Imerys' upstream value chain that meets one or both of the following criteria:

- **High Impact Materiality Driver** (The "Inside-Out" View): The supplier's activities, products, or services are identified as causing, contributing to, or being directly linked to Imerys' most significant actual or potential negative impacts on people or the environment.
- **High Financial Materiality Exposure** (The "Outside-In" View): The supplier represents a material financial risk or opportunity for Imerys, where the underlying driver is a sustainability issue that could affect the company's cash flow, access to finance, cost of capital, or resilience.

The core supplier base encompassed by this objective comprises the TOP 1000 suppliers, spanning all purchasing categories and geographical regions in which Imerys operates. This carefully curated list of suppliers is subject to annual review and adjustment to ensure it remains aligned with the core supplier definition and accurately represents Imerys' most significant supply chain relationships. The dynamic nature of this list allows Imerys to adapt to changing business conditions, emerging sustainability challenges, and evolving supplier landscapes.

Sustainability score assessment

Imerys has adopted a comprehensive approach to Sustainability assessments of its suppliers, relying primarily on external ratings to ensure objectivity and thoroughness.

- The Group has identified EcoVadis as its main provider, with over 75% of its spend assessed through this platform as of December 2025.
- To enhance coverage and gain insights into a diverse range of suppliers, including large state-owned entities that may be challenging to evaluate through Western providers, Imerys considers additional Sustainability rating agencies.
- For suppliers lacking formal ratings, the company utilizes international indexes with Country and Industry data to establish a generic risk baseline, which is then refined through a questionnaire.

Imerys acknowledges the varying score scales across different agencies and has established a "moderate risk" threshold appropriate to each scale. While ISO certifications and industry standards provide valuable insights, Imerys recognizes their specificity may limit broad application across its diverse supplier base.

1.3.3. Affected communities [ESRS S3]

Imerys commits to building a legitimate "social licence to operate" in the communities and countries in which it operates. The Group sees this as an essential foundation for its business activity. Imerys therefore aims to enter into dialogue and engage with key stakeholders in a spirit of transparency and good faith. Working around the world, Imerys' operations and employees are part of the local communities that surround Group sites and are seen as representatives of the Group.

1.3.3.1. Interest and views of Stakeholders [SBM-2]

The Group actively encourages sites and employees to contribute to the socio-economic development of their respective communities by not only identifying and understanding stakeholders' needs and expectations, but also actively contributing talents and skills and supporting initiatives that create shared value. Working in a collaborative and constructive manner with local partners, communities, associations and other stakeholders helps the Group contribute to numerous Sustainable Development Goals through its operations.

Imerys recognizes that proactive, inclusive, accountable, and transparent stakeholder engagement is more likely to result in optimal outcomes for both communities and the Group. Given the variety of countries and contexts across which Imerys operations occur, engagement with local stakeholders can take many forms. Each form of engagement is an opportunity for Imerys to understand and take into consideration the interest and views of its local stakeholders and affected communities. Across the Group a number of local committees or local stakeholder forums exist. These formal committees may dedicate members who either volunteer or are elected to represent their local community in regularly scheduled meetings held together with representatives of the Group to discuss forthcoming operations, development projects, outreach initiatives, and a range of other subjects appropriate to the context. The Group likewise hosts a number of open door days during which local residents, including local schools, are invited to learn more about industrial minerals operations. Often these open door days coincide with European Minerals Days, an initiative of the European Industrial Minerals Association. Similarly, tours and visits are often organized for groups of interested stakeholders, including local administrative representatives or local associations. Several sites also contribute to or are located near museums dedicated to geology and industrial minerals, which provide information on the extraction and transformation processes linked to Imerys operations.

Notwithstanding efforts to establish constructive local stakeholder engagement, grievances may occur. Grievances can involve a wide spectrum of subjects, questions or issues and represent both minor preoccupations and far more serious conflicts. With the community grievance mechanism policy, Imerys aims to address all grievances received, regardless of whether they stem from real or perceived issues and whether the complainant is named or anonymous. The community grievance mechanism is used to report such concerns and grievances. In addition, the Group has a whistleblowing process detailed in **disclosure requirement [ESRS G1-1] section 1.4.1.3, paragraph *"Alert system and protection of whistleblowers"* of the present chapter**, which provides multiple ways for the external stakeholders who are aware of circumstances they believe to represent violations of Imerys' Code of Business Conduct and Ethics or legal requirements to report them directly via a dedicated platform.

1.3.3.2. Impact, risk and opportunity management [SBM-3]

Identification of affected communities groups

As defined by the CSRD, the term "affected communities" refers to *groups of people living or working in the same area that have been or may be affected by a reporting undertaking's operations or through its upstream and downstream value chain*. Therefore, the local context of each operation should be considered. However, as e Group operates in more than 150 sites located in 33 countries, whether in rural, urban and industrial areas, the identification of material impacts, risks and opportunities for each single group of affected communities remains one of the biggest challenges.

Nonetheless, Imerys defined three important communities at Group level to identify more precisely how and to what extent it affects its local communities. Thus, the "affected communities" considered in the following disclosure requirements encompass:

- people living and/or working in the immediate vicinity of Imerys sites;
- remote communities affected directly or indirectly by the activity of those sites;
- communities directly or indirectly impacted by the access and use of land, including but not limited to owners of neighboring land.

An individual can belong to one or several communities described above and may be impacted positively or negatively, in a punctual or systemic manner, at short, medium and long term horizon.

Description of positive and negative impacts

The following table summarizes the material negative and positive impacts identified from the updated double materiality assessment which was carried out in 2025 and is presented in disclosure requirement [ESRS 2 IRO-1] of the present chapter. This update determined that *Unfair access to land and resource rights* and *Denial of civil and political rights* are not material topics for the Group. The conclusion of the updated assessment remains unchanged as it highlighted a common pattern of the severity and the likelihood of the identified impacts; while the effect of the impact is severe as it may result in life changing injuries and/or in significant psychological harm, the likelihood of occurrence is low, as it has never happened, happened rarely within the Group or in exceptional circumstances.

The processes for engaging with affected communities about these impacts and the mitigation measures Imerys implements are respectively presented in disclosure requirements [ESRS S3-2] and [ESRS S3-3]

ESRS S3. Affected communities

Description of the IRO	Location within the value chain	Materiality	Time horizon
SUB-TOPIC > COMMUNITIES' ECONOMIC, SOCIAL AND CULTURAL RIGHTS			
Community support and development	Own operations (all activities)	Actual positive impact Systemic	Short

IRO description

Group activities have positive impacts on local communities through local stakeholder engagement programs, community development initiatives and donations focused on education and skill development, environmental stewardship, social development, health, and culture.

Main affected communities

People living and/or working in the immediate vicinity of Imerys sites and remote communities who may benefit directly or indirectly from the programs, initiatives and donations

Imerys commitments

To contribute via donations and facilitate constructive local relationships, generate positive impacts by supporting the activities of local associations and help ensure that engagement actions are developed and rolled-out via partners who have local knowledge and expertise as well as a long term mandate (refer to disclosure requirement [ESRS S3-4] for more details).

Negative impacts on local communities	Own operations (all activities)	Potential negative impact Punctual	Short

IRO description

Group activities may have negative impacts on local communities in the event that it fails to adequately manage environmental or social topics, communicate effectively or remediate negative impacts.

Main affected communities

People living and/or working in the immediate vicinity of Imerys sites who may suffer from noise, traffic, visual pollution or other environmental or social aspects due to site activities.

Imerys commitments

To ensure that the Group minimizes its potential negative impacts on local communities, and in particular vulnerable populations, around its sites through the effective implementation of environmental, health and safety management systems, and through open and transparent dialogue (refer to disclosure requirement [ESRS S3-1] for more details).

Inappropriate security arrangements	Own operations (all activities)	Potential negative impact Systemic	Medium

IRO description

Group activities may have negative impacts on local communities in the event that security arrangement for employees and physical assets do not respect the human rights of local populations.

Main affected communities

People living and/or working in the immediate vicinity of Imerys sites.

Imerys commitments

In line with the Voluntary Principles on Security and Human Rights, Imerys commits to encourage respect for the human rights of individuals and communities by those who secure Group facilities (refer to disclosure requirement [ESRS S3-1] for more details).

ESRS S3. Affected communities

Description of the IRO	Location within the value chain	Materiality	Time horizon
SUB-TOPIC > RIGHTS OF INDIGENOUS PEOPLES			
No respect of the rights of indigenous people	Own operations (Extractive activities)	Potential negative impact Punctual	Long

IRO description

Group activities may have negative impacts on local communities in the event that it does not respect the rights of indigenous people and/or communities near its sites.

Main affected communities

Indigenous communities as stated by the ILO Convention No. 169, Article 1.

Imerys commitments

To ensure that the Group protects the rights of indigenous people communities near its sites (refer to disclosure requirement [ESRS S3-1] for more details).

1.3.3.3. Policies related to affected communities [S3-1]

As stated in its Code of Business Conduct and Ethics, Imerys is committed to act as a responsible corporate citizen worldwide. This includes respecting human rights, assuring the health and safety of all employees and of all those with whom the company works with and committing to the highest international standards of environmental protection and taking actions for sustainable development. These commitments are also enshrined in the Group Supplier ESG Standards.

This section describes the fundamental elements of Imerys' approach to all internationally recognized human rights relevant to affected communities and how the Group demonstrates its commitment in line with the Universal Declaration of Human Rights, the United Nations Guiding Principles on Business and Human Rights (UNGPs), ILO Declaration on Fundamental Principles and Rights at Work or OECD Guidelines for Multinational Enterprises and other international frameworks.

Imerys Group Chief Sustainability Officer is accountable for the implementation of these policies related to affected communities.

√ *For more information about the governance of sustainability matters, please refer to* disclosure requirements [ESRS 2 GOV-1] of the present chapter.

Policies related to local affected communities management

With the support of the Stakeholder Engagement policy, the Community Grievance Mechanism policy and the Donations policy, the Group actively encourages sites and employees to contribute to the socio-economic development of their respective local communities by not only identifying and understanding stakeholders' needs and expectations, but also by actively contributing talents and skills and supporting initiatives that create shared value. Working in a collaborative and constructive manner with local partners, affected communities, associations and other stakeholders helps the Group contribute to numerous Sustainable Development Goals through its operations.

Free, Prior and Informed Consent (FPIC)

While very few Imerys operations are located in proximity to Indigenous people lands, Imerys respects indigenous people's rights, as set out in the United Nations Declaration on the Rights of Indigenous peoples and would respect the principles of Free, Prior and Informed Consent (FPIC) of indigenous peoples, providing culturally appropriate alternatives, and adequate compensation and benefits for projects that affect indigenous peoples' rights. The following rights of indigenous peoples are especially relevant:

- The right to self-determination, by virtue of which indigenous peoples freely determine their political status and pursue their economic, social and cultural development;
- Rights to property, culture, religion, and non-discrimination in relation to lands, territories and natural resources, including sacred places and objects;
- Rights to health and physical well-being in relation to a clean and healthy environment;
- Rights to set and pursue their own priorities for development;
- The right to make authoritative decisions about external projects or investments.

Key elements for consent of indigenous peoples have been recognized by international law since 1989, when the Conference of the International Labor Organization adopted Convention 169 on Indigenous and Tribal Peoples.

Imerys is committed to engage with potentially impacted communities, to address potential impacts related to Group operations, and to instill an open dialogue that supports the development of a positive and constructive relationships with affected indigenous peoples. Furthermore, the Group commits to providing a timely and culturally appropriate response to any solicitation or inquiry initiated by indigenous communities.

01 **CASE STUDY**
Agreement between Imerys and the First Nations Atikamekw community of Wemotaci

In Canada, one of Imerys sites is located 55 km from the First Nations Atikamekw community of Wemotaci. In 2022, Imerys and the "Conseil des Atikamekw de Wemotaci" signed a Development Agreement that will be valid for the entire life of the mine. This framework outlines Imerys' long-term commitment to instill open, constructive dialogue and generate economic opportunities for the local community, not only through financial contribution to support development of a cultural heritage center but also through employment and local sourcing opportunities for community members.

Security Arrangements

Imerys commits to respect human rights in its efforts to maintain the safety and security of its assets. The Group will not provide support[1] to public or private security forces that have been credibly implicated in the infringement of human rights, breaches of international humanitarian law or the excessive use of force.

In alignment with the *Voluntary Principles on Security and Human Rights* and the best practices expressed in the UN Basic Principles on the Use of Force and Firearms, Imerys requires that:

- security personnel take all reasonable steps to exercise restraint and utilize non-violent means before resorting to the use of force;
- if force is used it shall not exceed what is strictly necessary, and shall be proportionate to the threat and appropriate to the situation; and
- firearms shall only be used for the purpose of self-defense or the defense of others if there is an imminent threat of death or serious injury.

1.3.3.4. Processes for engaging with affected communities about impacts [S3-2]

The Stakeholder Engagement policy, includes identifying and understanding the various stakeholders connected to a site or a project including all affected communities. This policy applies to all operations.

The objectives are to:

- Gain insights into stakeholders interests, concerns and influence levels, helping in informed decision-making;
- Develop a Stakeholder Engagement Plan by creating tailored communication and engagement strategies for different stakeholder groups;
- Assist risk management by anticipating potential conflicts and enabling proactive mitigation measures;
- Support long-term engagement strategies by building transparent, positive and collaborative relationships.

In **Step 1**, the process involves identifying all stakeholders who are affected by or can impact Group activities. This identification is achieved through brainstorming sessions with relevant managers and expanding the list through networking. Important considerations include who benefits from the site's presence, who could be negatively impacted, and who has influence over the site's operations.

Step 2 involves analyzing the stakeholders to understand their influence and interest, classifying them as high, medium, or low in both categories. This analysis helps tailor engagement strategies by considering the stakeholders' support, concerns, and expectations.

In **Step 3**, a system is developed to ensure effective communication and response to stakeholders. Responsibilities are assigned for managing stakeholder interactions, and engagement forms (including the type and the frequency of engagement) are identified. Depending on the local context, engagement occurs with affected communities or their legitimate representatives directly, or with credible proxies that have insight into their situation.

Finally, **Step 4** focuses on planning and monitoring the implementation of engagement activities. Objectives are defined and monitored using qualitative and quantitative indicators. To ensure that engagement happens, the Site Manager, who is the most senior employee with responsibility for day-to-day oversight of the site, is responsible for reviewing the Stakeholder Engagement Plan annually and validating it.

A new e-learning training, available to all employees, was launched in 2025 on the Stakeholder Engagement policy. Refreshers trainings sessions were also organized to train operations managers and site managers in various locations.

1 *Support includes, but is not limited to, procuring minerals from, making payments to or otherwise providing logistical assistance or equipment to non-state armed groups or public or private security forces; it does not include legally required forms of support, including legal taxes, fees, and/or royalties that companies pay to the government of a country in which they operate.*

1.3.3.5. Processes to remediate negative impacts and channels for affected communities to raise concerns [S3-3]

Grievances can involve a wide spectrum of subjects, questions or issues and represent both minor preoccupations and much more serious conflicts. With the Community Grievance Mechanism policy Imerys aims to address all grievances received, regardless of whether they stem from real or perceived issues, and whether the Complainant is named or anonymous.

Each Community Grievance Mechanism (CGM) established locally is used to report concerns and grievances. All grievances received by sites (whatever the access points used for example email or designated phone number) are tracked and monitored in a Group IT reporting system. Sites are defining indicators to ensure the effectiveness of their Community Grievance Mechanism and are seeking feedback from complainants on their level of satisfaction with the grievance mechanisms.

The Group is committed to protecting the identity of the Complainant and to handling personal information in accordance with legal requirements. This duty extends to all employees or representatives of the Group or its contractors who participate in the grievance mechanism. The processing and retention of personal data in connection with a grievance is made in compliance with the EU General Data Protection Regulation (GDPR). This means in particular ensuring that in application of the Group's Data Privacy Policy. Retaliation against a Complainant to undermine the Community Grievance Mechanisms is not tolerated by Imerys.

These Community Grievances Mechanisms are open to all external stakeholders who consider themselves affected by Imerys' activities. There are no restrictions on the type of grievances a stakeholder can raise under these Mechanisms. However, the Group has also established a whistleblowing system called "Speak up!" described in **disclosure requirement [ESRS G1-1] section 1.4.1.3 of the present chapter**, which provides multiple ways for the external stakeholders who are aware of circumstances they believe to represent violations of Imerys' Code of Business Conduct and Ethics or legal requirements to directly report them via a dedicated platform.

Imerys takes action to avoid, prevent or mitigate negative impacts on local communities, including where such impacts are related to environmental management. When grievances are reported, the Group implements dedicated action plans to address them in a timely and structured manner. This commitment is reinforced by the objectives set for the 2026–2030 period, including the goal to complete 100% of action plans related to local community grievances on time by the end of 2030.

A dedicated e-learning training on local grievance mechanisms was launched in 2025 and is available for all employees on the Imerys Learning Hub.

1.3.3.6. Taking action on material impacts on affected communities [S3-4]

Contributions to local communities via donations are common practice in the business world as they can facilitate constructive local relationships, generate positive impacts by supporting the activities of local associations and help ensure that engagement actions are developed and rolled-out *via* partners who have local knowledge and expertise as well as a long term mandate. The Group's Donations protocol ensures that the Group's approach to donations is aligned with the Group's Code of Business Ethics and Conduct and also that appropriate analysis, reporting, accounting and approvals to avoid the risks of improper conduct are in place.

Through its community engagement efforts, Imerys' priority is to support education within neighboring communities, promote equal opportunities and focus its actions toward young adults, women and girls, and people in socially fragile situations in the areas surrounding the Group operations.

In 2025, Imerys donations represented more than €764 thousand, in 20 countries.

02 CASE STUDY
Finalist of the 2025 SD Challenge

Although engagement strategies differ globally and are tailored to each local context, Imerys promotes best practices across the Group by recognizing specific projects annually through the Sustainable Development Challenge.

Road2Resilence initiative, submitted in one of Imerys sites in India, is the winner in the Community Engagement category of the SD Challenge 2025. This project trengthens safety and well-being in the surrounding semi-rural communities by addressing long-standing road infrastructure and awareness gaps. Through the installation of streetlights, CCTV cameras, and essential traffic-safety equipment, the project enhances night-time visibility, improves public security, and supports smoother, safer mobility for local residents. At the same time, close collaboration with local authorities and schools fosters a culture of shared responsibility, empowering children, families, and community members with practical road-safety knowledge.

Fonds Dan Germiquet

Imerys has likewise supported *Fonds Dan Germiquet* since its creation. The Dan Germiquet Fund provides merit-based scholarships to international students who have chosen to integrate *École Nationale Supérieure de Géologie de Nancy* (ENSG). The Dan Germiquet Fund was established ten years ago to honor the memory of Dan Germiquet, who was for many years Imerys' Vice President for Geology and Mine Planning. Education was dear to Dan Germiquet's heart and he was closely involved with the life of the National School of Geology and its students. Since 2014, 76 students have graduated thanks to the scholarship provided by the Dan Germiquet Fund. By financing international students to obtain their diplomas from the National School of Geology, the Fund also provides a valuable springboard for long and fruitful careers. Engineers who graduate from the school are highly employable scientific experts who often move to leading positions in the mining sector. The knowledge acquired at the school, including handling complex data and uncertainty, also equip students for a range of other careers in industry, such as management and research. In December 2022, the Group signed a five-year agreement as a founding member of the newly created *Geol Nancy Foundation*. This new Foundation will host Imerys' long-term commitment to the Dan Germiquet Fund.

Employee volunteering program

Imerys employees have an important role to play in supporting the communities where they live. In 2024, the Group launched Spark, an employee volunteering program specially designed for those who want to help have a positive impact in their communities through the donation of their time. Thanks to partnerships with associations, 2 working days are given to employees to carry out a wide range of volunteering activities with local communities. Since September 2024, a pilot employee volunteering program has been launched in 5 countries (France, the United Kingdom, Singapore, Switzerland and the United States), representing 2,500 employees in the first phase. This program contributes to the IRO "Community support and development".

1.3.3.7. Target related to community engagement [S3-5]

Achieving the Group's 2025 commitments

Imerys has defined pilot sites from amongst its global operations to focus particular efforts on local stakeholder engagement. The pilot sites were defined based on the five criteria, including financial, grievance, media, permitting and operational indicators. These indicators were selected as proxies for the potential impacts as well as sensitivity that may exist amongst local communities in the immediate areas surrounding Imerys operations. The pilot list will be refined and updated as appropriate as additional information is received through local community forums and or the grievance mechanisms.

Group Objective	Baseline	Performance 2025	Target
Improve stakeholder engagement by ensuring pilot sites identify and assess potential impacts on local stakeholders as per Group requirements.	2024 74%	100%	2025 100%

In 2025, Imerys successfully fulfilled its objective to enhance stakeholder engagement by ensuring that all pilot sites identified and assessed local stakeholders in full alignment with Group requirements.

Toward Imerys 2030 ambition

Imerys recognizes effective community engagement as a cornerstone of sustainable practices and a key driver of long-term success. The Group's global presence offers a unique opportunity to create lasting, positive impacts in diverse communities worldwide. Imerys commitment is rooted in open dialogue, mutual respect, and shared value creation. By actively collaborating with local stakeholders, Imerys aims to address community needs, mitigate potential negative impacts, and contribute to sustainable local development. This structured dialogue process allows the Group to define and deploy the most necessary and appropriate actions in direct response to identified real or potential impacts. Through strategic partnerships, targeted investments, and employee volunteerism, Imerys strives to be a catalyst for positive change, aligning its business objectives with broader societal goals.

Objective, metric and target description

> Objective 2026-2030: **Complete 100% of action plans** related to local community grievances on time by the end of 2030.

Imerys recognizes that community engagement is inherently context-specific, varying significantly based on local social and environmental needs. This diversity presents challenges in establishing standardized metrics across the company's global operations. To address this complexity, Imerys has adopted a flexible approach to target-setting that combines both qualitative and quantitative methodologies.

Central to this strategy is the newly developed indicator focusing on action plans for community grievance events. This metric serves as a robust measure of the company's commitment to addressing local grievances through structured, timely responses. By tracking the implementation and effectiveness of these action plans, Imerys aims to ensure prompt resolution or mitigation of issues, foster stronger community trust, and maintain a clear framework for accountability. This approach not only allows the company to adapt to diverse local contexts but also provides a mechanism for continuous improvement in its community engagement practices. Through this balanced methodology, Imerys strives to create meaningful, positive impacts in the communities where it operates.

Scope of the objective

Grievances can involve a wide spectrum of subjects, questions or issues and represent both minor preoccupations and potentially more serious concerns. Imerys aims to address all grievances received, regardless of whether they stem from real or perceived issues, and whether the complainant is named or anonymous.

The objective encompasses addressing complaints that may arise within Imerys' value chain, with particular emphasis on issues occurring on or around Imerys sites. This focus extends to key contractors areas such as transportation and maintenance. additionally, this objective addresses potential negative impacts on local communities, including grievances related to the rights of indigenous people, by establishing clear mechanisms for such grievances to be raised and metrics for resolution.

Metrics related to community engagement

Imerys continues to enhance its understanding of its stakeholders' needs and expectations.

While ensuring that 100% of the Group's priority sites updated their stakeholder mappings in 2025, the objective acted as a catalyst for broader adoption. This organizational momentum encouraged many additional sites to implement the framework, leading to a marked increase (74% compared to 58% in 2024) in the global coverage of the stakeholder engagement tools.

2024 donation data has been restated in 2025 following an internal review. The year-on-year decrease in community investment is primarily due to the 2024 completion of a primary school infrastructure project in South Africa. This legacy project included the delivery of eight classrooms, water facilities, and full educational equipment. The successful handover of the site in late 2024 marks the conclusion of this specific investment cycle.

Metrics related to community engagement	Unit	2025	2024
Sites with a stakeholder mapping	%	74%	58%
Of which priority sites	*%*	100%	*74%*
Sites with a community grievance mechanism	%	48%	48%
Donations	€ thousands	764	1,470
Number of countries benefiting of these donations	*#*	20	*21*
Employees included in the volunteering pilot program Number of volunteering hours	#	2500	2,500
Severe human rights issues and incidents connected to affected communities	#	0	0

1.3.4. Sustainable solutions for consumers and end-users [ESRS S4]

As a leading Business-to-Business provider of specialty minerals, the Group maintains an indirect connection to final end-users. While Imerys does not interact directly with consumers, its products serve as essential components in numerous everyday consumer goods and industrial applications. The Group's influence on end-user experiences is manifested through product integration, performance enhancement, and sustainability initiatives. Imerys actively collaborates with manufacturers to develop innovative solutions that benefit end-users, conducts comprehensive market research to anticipate consumer trends, and ensures stringent regulatory compliance to safeguard consumer interests. The extent of the Group's connection with end-users varies across its diverse product portfolio and applications, but it is predominantly indirect and facilitated through Imerys' direct customers in the manufacturing sector.

1.3.4.1. Impact, risk and opportunities [SBM-3]

The impacts, risks, and opportunities outlined in the following sections were identified through a comprehensive double materiality assessment, as detailed in disclosure requirement [ESRS 2 IRO-1] of this chapter. Neither the initial assessment in 2024 nor the update in 2025 revealed any material impacts on people or the environment, however, it highlighted a specific risk and an opportunity pertaining to consumers and end-users.

ESRS S4. Consumers and end-users

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUSTAINABLE PORTFOLIO			
Imerys commitment			
Imerys is committed to providing high-quality products to its customers and, indirectly, to end-users, through sound, responsible and sustainable product management. By identifying and understanding the implications and opportunities linked to the global market trends presented in Chapter 1, section 1.1 of the Universal Registration Document, the Group is able to maximize the positive impacts linked to its business and satisfy current and future market and customer needs. The Group's commitment to sustainable portfolio management is a mean to contribute to SDG 12 to ensure sustainable consumption and production patterns and to SDG 13 to take urgent action to combat climate change and its impacts.			
O Opportunity	→ Downstream value chain	**Natural Solutions for Consumer Goods** : the Group's development strategy aims to **grow it annual revenue** in activities related to natural solutions for consumer goods	●●● Long
INADEQUATE SAFETY OF CONSUMERS AND/OR END-USERS			
Imerys commitment			
Imerys is committed to ensuring the safety of its products for human health and environment through the compliance with all relevant regulations in the countries where they are sold. This commitment involves comprehensive regulatory monitoring, rigorous product testing and certification, strict supply chain management, detailed documentation and traceability processes.			
R Risk	→ Downstream value chain	The Group may be exposed to **financial risks** related to fines, lawsuits, reputational damage, product recalls, potential market value decline and/or **increasingly stringent regulations limiting product sales in particular markets.**	●○○ Short

1.3.4.2. Policies related to consumers and end-users [S4-1]

The Executive Committee of the Imerys Group has established the **Product Stewardship Governance Committee** to assist the Executive Committee in ensuring the Group's Product Stewardship program is effectively deployed to maintain product-related compliance, and minimize exposure to risk and reputational damage, in the markets in which Imerys operates. The Product Stewardship Governance Committee is chaired by the CEO and composed of the Group Product Stewardship Vice-President, the Group General Counsel, the Chief Sustainability Officer, the Group Industrial Health & Safety Vice-President. They meet at least three times per year and monitor the Group's progress on all Product Stewardship objectives and programs.

The Group's **Priority Chemical policy** aims to minimize the health and safety impacts on its workers and its products to downstream users by first and foremost, where possible avoiding and or restricting their use. This policy applies to all purchased raw materials, intermediates, products (produced or purchased) and development samples. Priority chemicals encompass substances suspected to have irreversible effects on human health or the environment, and classified as Carcinogen, Mutagen, Reprotoxic (CMR) categories 1A, 1B and 2, Persistent, Bioaccumulative & Toxic (PBT), very Persistent & very Toxic (vPvB) and Persistent Organic Pollutants (POP) by the Globally Harmonized System (GHS).

The priority chemicals list undergoes regular revisions to align with evolving regulatory requirements and the classification of newly identified substances. In 2025, the list was updated by more than 240 substances confirming Imerys's product stewardship commitments. Additionaly, Imerys supplies its products exclusively to industrial customers that incorporate them into downstream applications for consumer markets. The Group's rigorous product qualification processes and strict formulation governance ensure that, should a hazardous substance be identified after market launch, its potential impact can be promptly assessed and appropriate corrective actions implemented.

The **Material Safety Data Sheet (SDS) Authoring policy** aims to ensure the conformity of Imerys SDS to applicable regulatory requirements and accepted industry standards. Safety Data Sheets (SDS) are mandatory documents that must be conveyed with the supply of chemical substances or mixtures throughout the supply chain, as required by relevant European or local regulations. Imerys must convey an SDS down to the supply chain without distinguishing the sales channel, as the SDS authoring policy does not apply to a specific target group.

A product's SDS lists information relating to hazardous substances it contains and provides guidance and advice on the safe handling, storage and transportation of Imerys products.

In 2023, Imerys established **dedicated policies for consumer goods markets.** The purpose of these policies is to clearly set out the compliance obligations and best practices that are required in these markets, in the targeted countries. These policies apply globally to all regulated human food additives, cosmetics and personal care markets in which the Group operates or plans to operate. In 2025, Imerys continued his effort to establish dedicated policies for consumer goods markets and sensitive markets such as feed additives and pharmaceutical products.

1.3.4.3. Action to managing material risks [S4-4]

The overarching goal of Imerys' portfolio management is to identify and minimize the health, safety, environmental, and social impacts of all Group products throughout their lifecycle, while maximizing their economic benefits and positive impacts to customers and their end consumers. This commitment is assured by a robust product stewardship program and the assessment of the product portfolio against sustainability criteria.

A science-based approach

The Group employs state-of-the-art analytical methods, equipment and testing to ensure that product regulatory assessments and associated decisions are driven by sound science. The Group continually evaluates testing policies and invests in innovation in health, safety, and sustainability across product ranges, locations, and production processes to ensure continuous improvement. These measures enable the Group to produce high-quality products, meet customers' expectations and operate in a stringent, dynamic regulatory environment.

Tailor-maid transition plans dedicated to Priority Chemicals

Imerys does not intentionally manufacture products using chemical substances that are classified as Priority Chemicals. However, when chemicals in current use fall under the definition of this policy, the Group develops a transition plan to eliminate, substitute, reduce such chemicals in impacted products, or to discontinue the impacted product or raw material. This transition plan requires approval by the Product Stewardship Governance Committee and is routinely reviewed through to completion.

Stringent criteria applied to food additives, cosmetics and personal care applications

In food additives, cosmetics and personal care applications, only products internally approved as compliant may be intentionally sold into the pertaining markets in the approved listed geographies. Products may be approved internally only if they meet the food additives, cosmetics and personal care regulatory requirements for that geography, supported by an auditable documentation confirming compliance.

The M4 program

For certain minerals, the Group applies the Mine to Market Mineral Management (M4) program, both for owned and external deposits. Owned deposits are those the Group operates itself. These deposits are thoroughly vetted for geological properties and apply careful mine planning. The Group may also source from a select number of high-quality external deposits. During the vetting stage, thorough preliminary testing is conducted to ensure the site meets M4 program standards. Thorough ongoing testing is then conducted before any material from these sites is accepted and materials that do not meet quality standards at any point are rejected.

The SDS Management tool

Continuing its efforts initiated in 2023 to revise and harmonize all of the Group's Safety Data Sheets (SDS), Imerys has made significant progress in 2025 by implementing a global SDS authoring software. This unique software used by all Imerys Business Areas helps to issue SDSs at global scale compliant with the requirements of regional/national regulations. It allows Imerys to provide accurate and updated safe use, handling and disposal information to its customers. This software also provides a global substance regulatory monitoring, enhancing the compliance program and hazardous substances management across the business. The deployment of the safety data sheet software is expected to be completed in 2026.

1.3.4.4. Action to pursuing material opportunities [S4-4]

Imerys is committed to developing materials and expertise to deliver relevant and innovative market-driven solutions to support the growth of the Group while at the same time delivering sustainable solutions to society. Capacity to quantify the environmental and social impacts and steer the Group's product portfolio to ensure long-term product sustainability is a key theme within the Group SustainAgility program.

SustainAgility Solution Assessment (SSA) Framework

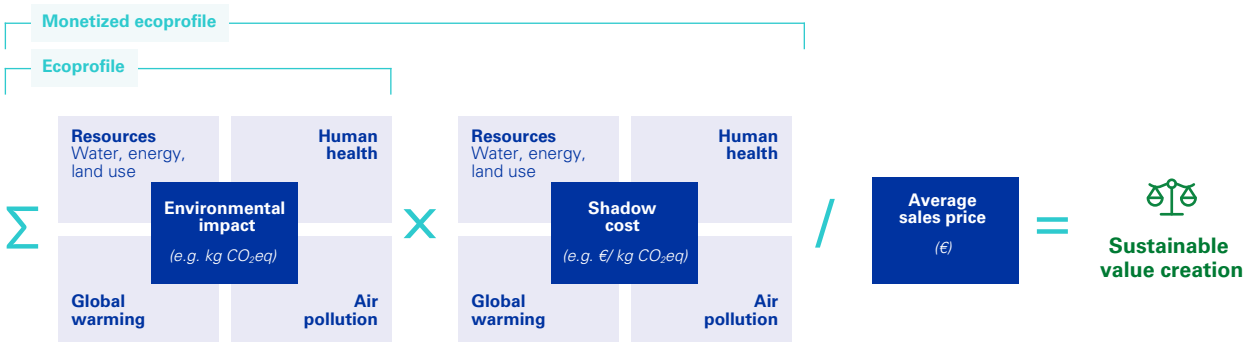

Assessment methodology

In 2018, Imerys launched its SustainAgility Solutions Assessment framework, which has been designed in line with the World Business Council for Sustainable Development (WBCSD [1]) guidelines for Portfolio Sustainability Assessments (PSA [2]), so as to objectively measure the sustainability of Imerys products and identify their environmental and social impacts. The SustainAgility Solutions Assessment (SSA) framework provides a systematic, high quality, scientifically robust and transparent approach to review products and services based on several criteria, ultimately scored on two factors:

- **Sustainable Value Creation :** the balance between the economic value created and the environmental impact
- **Market Alignment :** the level of sustainability-related benefits or challenges (based on an evaluation of public data and thorough review by key stakeholders).

Methodology – LCA & Sustainable value creation

Sustainable value creation formula is based on monetized ecoprofile = "cost for the planet"

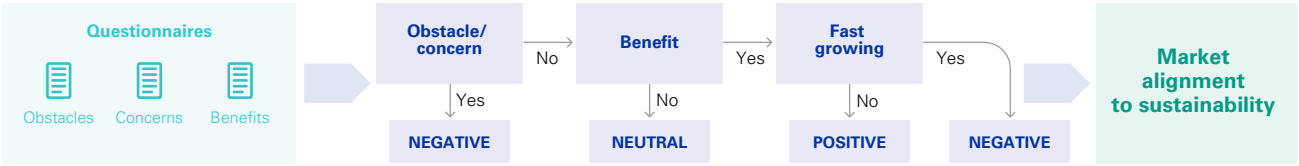

1 The WBCSD is a global, CEO-led organization of over 200 leading businesses working together to accelerate the transition to a sustainable world by making more sustainable businesses more successful.
2 Portfolio Sustainability Assessments (PSA) is a methodological framework to proactively steer product portfolios toward improved sustainability outcomes https://www.wbcsd.org/Programs/Circular-Economy/Resources/Portfolio-Sustainability-Assessment-v2.0.

Within the SustainAgility Solutions Assessment framework, Sustainable Value Creation is based on the quantification of the products' environmental footprints or eco-profiles from "cradle-to-gate", using a Life Cycle Assessment (LCA) methodology following the requirements of ISO 14040:2006 & ISO 14044:2006[1] , as well as a dedicated LCA software and LCA public databases such as Ecoinvent.

Imerys manages its own product database, which is continuously updated to include the most recent industrial or innovative information. Since 2022, Imerys has joined ScoreLCA[2] to participate in the future development of Life Cycle Assessment practice thanks to a collaboration between industrial, institutional and scientific actors.

Methodology – Market alignment

Market alignment assessment involves detecting the market signals, thanks to either an evaluation of publicly available information or discussions with key stakeholders (legislation, customers' needs, ecolabel requirement)

As part of the Market Alignment Assessment, the impacts of Imerys actions to help the downstream value chain manage risks and create opportunities to improve sustainability performance are assessed. These impacts are reflected in the final SSA score of the product in the targeted application.

Each Product in Application Combinations (PAC) undergoes a comprehensive update every five years, encompassing both LCA and market alignment evaluations.

An extended framework to Capex and M&A

All new product development, material M&A projects and strategic Capex are systematically assessed according to the SustainAgility Solutions Assessment framework, using a shortlist of indicators. Future developments are compared to existing or reference products, and screening assessment results are fully integrated in Imerys' innovation process as a criterion for decision-making and stage gate pass. This means that progressively, projects which do not fulfill minimum sustainability criteria will have to be improved before moving to the next steps of development. This screening tool also includes the effectiveness of Imerys' actions on the downstream value chain by measuring to what extent risks are reduced and opportunities pursued thanks to the new development project.

Governance

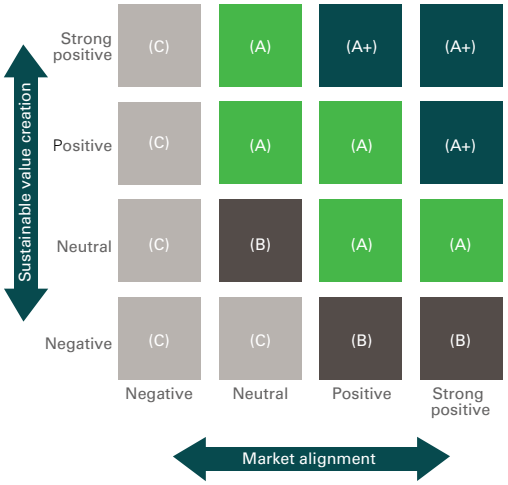

SustainAgility Solution Assessments and Product Life Cycle Assessment are overseen by the Group's Climate and Portfolio Sustainability VP and managed by a dedicated team, both at Corporate level and in the different Business Areas, with direct links to all other functions (marketing, operations, product stewardship, science & technology, etc.). Imerys dedicated SSA team is composed of LCA specialists with specific expertise on mineral processing in order to perform impact assessment calculation, conduct in-depth analysis of results, assess new products profiles at the earliest stages of development and prepare data to be shared with customers.

Sustainable portfolio classification

Portfolio mapping

For both the Sustainable Value Creation and the Market Alignment assessments, each PAC is given a rating, ranging from A+, indicating a PAC that demonstrates an extremely positive result or strong sustainability-related benefits, to C, indicating a PAC that requires improvement or presents sustainability-related risks. The ratings of both the Sustainable Value Creation and the Market Alignment assessments are combined and used to determine the final scoring of a specific Product in Application Combination within the four categories below :

1 ISO 14040: 2006 describes the principles and framework for life cycle assessment and ISO 14044: 2006 specifies requirements and provides guidelines for life cycle assessment.
2 SCORELCA is a French association that aims to promote a positive, shared and recognized evolution of global environmental quantification methods at the European and international level, in particular of life cycle assessment (LCA). https://scorelca.org.

03

SustainAgility Solutions: Pioneer Certificate

The Group aims to help drive sustainable innovation in the specialty minerals industry, pushing the boundaries of Group products to meet customers' needs while offering sustainable solutions that meet global environmental and social challenges. The **Pioneer certificate**, introduced in 2021, facilitates the identification of sustainable solutions and highlights material opportunities for Imerys' customers and stakeholders. It aims to provide quantitative and qualitative information about the environmental and social footprint of solutions with outstanding sustainability performance, giving customers a clear basis to consider such criteria in their purchasing decisions.

Whether it's supporting carbon-free mobile energy or sustainable construction, developing alternative packaging or more sustainable food production, or designing longer-lasting solutions to reduce materials consumption across a range of industries, the Group is continually advancing its product portfolio and assessing it against sustainability criteria to adapt to changing customer needs.

01 CASE STUDY
Finalist of the 2025 SD Challenge

FilmLink® 410, the latest addition to the FilmLink® range, is a fine, engineered marble developed by Imerys, offering a unique high-performance solution for the breathable film industry. Designed in close collaboration with customers, this product cuts production waste by delivering 40% fewer defects compared to its predecessor.

This significant improvement enables customers to increase film production throughput while drastically reducing scrap generation. FilmLink® 410 also supports key operational goals by delivering high breathability, improved mechanical properties with lower liquid breakthrough, and excellent film color from its high-purity marble base

Action	Expected outcome	Results at end 2025
Conduct eco-profile evaluation of Imerys portfolio Scope : all Imerys operational sites	Regular estimation of the environmental footprints from "cradle-to-gate" of the full range of Imerys mineral and product families. Results are used to identify impact reduction levers, monitor progress, ecodesign new products and share reliable data for customers.	**62%** operational sites with product eco-profiles completed or updated in the last 5 years, covering the full range of Imerys mineral and product families, including Kaolin, Refractory minerals, Talc, Perlite, Diatomaceous Earth, Mica, Carbonate, Wollastonite, Bentonite, Calcium aluminates, Graphite and Carbon Black.

1.3.4.5. Targets related to product sustainability [S4-5]

Achieving the Group's 2025 commitments

The mid-term target is to assess Imerys' Product in Application Combinations (PACs) against sustainability criteria, covering at least 75% of Imerys' product portfolio (by revenue), and to ensure at least 75% of Group New Product Developments are scored as "SustainAgility Solutions" by the end of 2025. These two objectives enable the Group to pursue new opportunities for sustainable innovation and growth while effectively managing material risks related to consumer and end-user safety, as these considerations are integral to the SSA framework (refer to "Methodology – LCA & Sustainable Value Creation" figure in the previous section).

Group Objective	Baseline	Performance 2025	Target
Assess the Product in Application Combinations (PAC) of Imerys product portfolio (by revenue) according to sustainability criteria	2022 55%	78%	2025 75%
Ensure the Group New Product Developments are scored as SustainAgility Solutions	2022 75%	94%	2025 75%

As of the end of 2025, 78% of the Group portfolio by revenue was assessed, which represents 602 Product in Application Combinations (PACs). The projects launched in 2025 have been rated as SustainAgility Solutions, in the two highest categories ranked A+ and A.

Based on the results of the deployment of the SSA methodology, Imerys is able to categorize a significant portion of its portfolio based on sustainability criteria. The main findings of the 2025 mapping, based on 78% of the Group portfolio by revenue, show that 45% of the PACs that have been assessed are rated as SustainAgility Solutions. As this is a partial assessment of the Group's portfolio, the revenue breakdown will evolve over time as additional PACs are assessed. The revenue within each category will also evolve following methodology updates put in place to foster continuous improvement.

Revenue by SSA Matrix Categories	Unit	2025	2024
SustainAgility Solutions – Pioneer	€ million	174	172
SustainAgility Solutions – Enabler	€ million	1,359	1,351
Transitioner	€ million	409	490
Learner	€ million	682	555
Not yet evaluated	€ million	760	1,038
Percentage of Revenue by SSA Matrix Categories			
SustainAgility Solutions – Pioneer	%	5%	5%
SustainAgility Solutions – Enabler	%	40%	37%
Transitioner	%	12%	14%
Learner	%	20%	15%
Not yet evaluated	%	22%	29%

Toward Imerys 2030 ambition

Imerys' development strategy prioritizes revenue growth in natural solutions for consumer goods, alongside other strategic axes including energy transition,waste reduction, and sustainable construction. Having achieved its 2023-2025 objectives, the Group has established a comprehensive understanding and mapping of its portfolio's sustainability. Looking ahead, Imerys aims to maintain up-to-date and enhanced sustainability information for its products, leveraging the latest reliable data available. Simultaneously, the Group is committed to expanding its offering with sustainable innovations, ensuring a continued focus on both market demands and environmental responsibility. This approach positions Imerys to meet evolving customer needs while contributing to broader sustainability goals in its key markets.

Objective 1 : Imerys existing portfolio

Objective, metric and target description

Objective 2026-2030 : Assess 80% of Imerys' existing product portfolio against the ISO Life Cycle Assessment (LCA) standard, using primary data from Imerys operating sites.

Imerys is committed to expanding its cradle-to-gate Life Cycle Assessments (LCA) coverage across a significant portion of its existing product portfolio. While the company aims to maintain the mapping of its portfolio's sustainability, the focus is also on increasing the availability of environmental data with enhanced quality and accuracy. The company follows a standardized methodology that incorporates primary data collected from operating sites, with updates conducted at least every five years, and secondary data from recognised Life Cycle Inventory databases such as Ecoinvent or from suppliers when available. By providing customers with comprehensive LCA data, Imerys enables them to calculate the environmental footprint of their final products, track improvements effectively and take informed decision.

Scope of the objective

Imerys is committed to conducting comprehensive Life Cycle Assessments (LCA) for products manufactured by its own assets within its existing portfolio. The LCA coverage is based on revenue of sold products.

The environmental impacts of Imerys' products is calculated from cradle to gate and covers a large range of indicators based on common LCA characterisation methods

Objective 2 : New product development

Objective, metric and target description

Objective 2026-2030 : Ensure that **80% of New Product Developments (NPD) launched deliver a sustainability improvement** for downstream value chain by the end of 2030.

Imerys tracks the percentage of its New Product Developments (NPD) projects launched each year that are designed to deliver sustainability improvement for downstream value chain. This assessment is derived from the "Market Alignment" horizontal axis of the SustainAgility Solutions Assessment (SSA), as described in previous sections. This approach ensures that new products not only meet market demands but also deliver clear environmental and social benefits. This KPI serves as a tangible measure of Imerys' commitment to integrating sustainability into its core business strategy and product offering.

Scope of the objective

New Product Development at Imerys encompasses products launched after 2025 and registered in the Group's comprehensive product management system. An improved sustainability profile for these new products is defined by downstream benefits in the final application (categorized as positive or strong positive) such as reduction of energy and GHG emissions, waste reduction, recycling enabler, expanding life span of final product, replacing hazardous substances. This approach ensures that sustainability is a key consideration in the product development process. Importantly, the Group's product launch process is designed to ensure that a product can only be properly launched after its sustainability profile has been thoroughly assessed, embedding sustainability considerations into every new offering.

1.4. GROWING WITH OUR CUSTOMERS

"Growing with our customers" is one of the three axes of the SustainAgility program. It means behaving ethically, operating fairly, ensuring responsible purchasing, and advancing sustainable products and processes. By aligning its growth strategy with customer needs and maintaining unwavering ethical standards, Imerys positions itself as a trusted partner in sustainable innovation and responsible business practices.

While the [ESRS S2] and the following section describes how Imerys embodies business conduct into everything its does in accordance with the [ESRS G1], the [ESRS S4] above presents the screening of Imerys products against environmental and social criteria to adapt its portfolio and meet changing customer needs.

1.4.1. Business conduct [ESRS G1]

Ethical business conduct is the foundation upon which Imerys' business is built. At its core, Imerys is Unlocking Better Futures together with stakeholders through ethical behavior and fair operating practices and by ensuring the Group collaborates with responsible value chain partners. This solid foundation is also a guarantee and a source of confidence for Group employees, customers and society at large, as exemplary conduct is proof of reliability and long-term sustainability. In addition to all the other SDGs referred to in this chapter, Imerys' commitment to responsible business conduct contributes to SDG 16 to promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

1.4.1.1. Governance related to business conduct [GOV-1]

Imerys is committed to sound corporate governance as a means to ensure the Group continually improves its functioning and management, in an atmosphere of transparency, duly respecting the expectations of investors and other stakeholders. Regular dialogue between the Chief Executive Officer, the Executive Committee and the Board of Directors plays a decisive role in defining and implementing the Group's strategy, including with regards to the Group's sustainability ambition. Imerys follows the recommendations of the AFEP-MEDEF Corporate Governance Code applicable to French-listed companies.

√ *For more information regarding Corporate Governance,* **see chapter 4 of the Universal Registration Document.**

The Group has a dedicated Ethics Committee to assist the Executive Committee in ensuring the Group's operations are conducted ethically, in particular in accordance with regulations on antibribery, antitrust, Duty of Care, international sanctions, personal data protection, responsible use of artificial intelligence and the protection of whistleblowers. The Ethics Committee is chaired by the Group General Counsel and Group Secretary and is composed of Executive Committee members and Senior Managers of the Group. It meets regularly (at least twice a year). In 2025, the Ethics Committee met four times.

The Ethics Committee is accountable for setting out ethics-related priorities and for promoting an ethical corporate culture. It establishes and monitors the achievement of the ethics & compliance roadmap. It is accountable for ensuring the adequacy of ethics-related codes, policies and procedures, starting with the Imerys Code of Business Conduct & Ethics. It ensures the effective dissemination, training and implementation of all ethics-related codes, policies and procedures. It monitors training plans and other awareness-raising measures, and ensures sufficient human and financial resources are available to efficiently implement the program.

The Ethics Committee is also responsible for monitoring the Group whistleblowing and case investigation system "Speak Up!". In this respect, it ensures adequacy of the system and monitors ethics-related misconduct reported either via the whistleblowing system or other channels.

The Ethics committee reports on an annual basis to the Board of Directors' Audit Committee, which reviews the effectiveness of the Group ethics and compliance programs, including the whistleblowing system, and reports to the Board of Directors. The Chair of the Ethics Committee also regularly informs the Executive Committee of the performance and effectiveness of Group ethics and compliance programs.

The Antitrust & Compliance General Counsel, who reports to the Group General Counsel & Company Secretary, is responsible for defining and implementing the ethics and compliance roadmap and for the design and monitoring of Group compliance programs.

The Chair of the Ethics Committee is the Group General Counsel and its Secretary is the Antitrust & Compliance General Counsel ensuring that the Committee has an appropriate level of expertise over legal, compliance and business conduct matters. Its members have been selected to ensure expertise over the different pillars of Imerys compliance programs and experience of Imerys' activities. In 2025, Imerys strengthened its Ethics Committee by welcoming a new member representing Communications, Public Affairs & Security, replacing the former Communications VP, further diversifying the committee's expertise.

√ *For more information on board members' expertise in relation to business conduct matters,* **please refer to the disclosure requirement [ESRS 2 GOV-1], paragraph** *"Board members sustainability competencies and training".*

1.4.1.2. Process to identify impact, risk and opportunity related to business conduct [IRO-1]

Materiality assessment of business conduct matters

As explained in disclosure requirement [ESRS 2 IRO-1] of the present chapter, the double materiality assessment carried out by Imerys in 2024 covered the following business conduct sustainability matters: corporate culture, protection of whistleblowers, political engagement, management of relationships with suppliers including payment practices, and corruption and bribery.

In 2025, as a result of the double materiality assessment update, *Opaque political and lobbying activities and Unfair management of suppliers (including payments practices)* have been assessed as non material (refer to disclosure requirement [ESRS 2 SBM-3] for more information).

ESRS G1. Business Conduct

Materiality	Location within the value chain	Description of the IRO	Time horizon
SUB-TOPIC : INADEQUATE WHISTLEBLOWERS PROTECTION			
⊖ Potential negative impact	• Own operations (all activities)	Group activities **may have negative impacts** on employees or other stakeholders in the event that its internal reporting channels and or **protection of whistleblowers are not adequate or effective.**	●●● Long
SUB-TOPIC : CORRUPTION AND BRIBERY			
⊖ Potential negative impact	• Own operations (all activities)	**Ineffective antibribery compliance program** : Group activities **may have negative impacts** on multiple stakeholders in the event that its **management system** to prevent, detect, investigate and address incidents of corruption and bribery **is ineffective.**	●●● Long

Bribery risk mapping process

As part of its antibribery program, the Group carries out a regular risk mapping exercise to identify, analyze and prioritize the risks of the Group's exposure to bribery based in particular on the business sectors and geographical areas in which the Group operates in compliance with the French Sapin II Law[1]. The aim is to inform top management and provide the Ethics Committee with a clear vision of bribery risks and to ensure that the antibribery compliance program is adapted to the risks identified.

The Group has identified a list of bribery risk scenarios for each main function and a list of relevant means of bribery. These lists are reviewed at each risk map update to confirm their relevance and description. During the 2025 risk map update, the relevance of the 25 bribery risk scenarios and the 11 means of bribery was confirmed. An additional bribery scenario has been identified. They were also reviewed and validated centrally by the Compliance and Internal Audit and Control functions.

The Group uses a "workshop technique" to assess the inherent impact and probability of each bribery risk scenario and to assess the mitigation effectiveness of each means of bribery. The workshops are organized by regions (Asia-Pacific, Europe 1 (European countries with CPI > 60), Europe 2 (European countries with CPI < 60), Middle East & Africa, North America, and South America) and bring together representatives of all the regions' countries where Imerys has operations, business areas, functions and different levels of the hierarchy. A cycle of update by region enables the Group to update the risk map for all the geographical areas where the Group operates.

As a result, a risk map is drawn up identifying and hierarchizing bribery risk scenarios globally and for each country, by taking into account country-related factors (notably the country's economic weight based on Imerys' sales and sensitivity based on the country's Corruption Perception Index issued by Transparency International). The level of effectiveness of Imerys' mitigation measures in relation to each means of bribery is updated based on the votes and qualitative information gathered during the workshops, as well as the central assessment performed by the Compliance and Internal Audit and Control functions (considering the results of internal audit assignments and potential recent bribery cases). The risk map is compared with the previous update to assess the progress made and decide on an action plan, including a training plan. As the cornerstone of the Group's antibribery compliance program, the risk map is validated by the Ethics Committee. It is updated every two years, unless a triggering event occurs. The last update was finalized in December 2025.

1.4.1.3. Corporate culture and business conduct policies [G1-1]

Imerys is committed to exemplary business conduct, ensuring ethical behavior and fair operating practices across all Group activities.

Fostering corporate culture via the Group Code of Business Conduct and Ethics

Imerys establishes and fosters its corporate culture through its Code of Business Conduct and Ethics and the Imerys Purpose, Vision and Values (see Chapter 1 of the Universal Registration Document). The Imerys Code of Business Conduct and Ethics (the Code) summarizes the principles of ethical behavior the Group expects from all of its employees, suppliers, and other partners. It also embeds Imerys' Purpose, Vision and Values. The umbrella principles set forth in the Code are supported by a series of policies and procedures applying to both the general conduct of Imerys and the individual conduct of each employee. The subjects covered by the Code include, but are not limited to, compliance with laws and regulations, protection of the environment and human rights, relations with local communities and trade unions, health and safety, diversity, equity and inclusion, confidentiality, prevention of fraud, corruption, insider trading, and conflicts of interest, lobbying activities, non retaliation for good faith reporting, protection of the Group's assets, fair competition, transparency, and integrity.

The Code is based on best practices recognized internationally. These include the guidance and principles from the following leading global agreements, among others:

- The United Nations Global Compact (UN GC)
- The United Nations Sustainable Development Goals (UN SDG)
- The United Nations Guiding Principles on Business and Human Rights
- The Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- The OECD Due Diligence Guidelines for Meaningful Stakeholder Engagement in the Extractive Sector
- The International Labor Organization (ILO) Fundamental Conventions
- The French Business Climate Pledge
- The act4nature Business Commitments for Biodiversity

1 Law no. 2016-1691 of December 9, 2016 relating to transparency, the fight against corruption and the modernization of economic life.

The Code is a "living document", reviewed and updated annually, under the supervision of the Ethics Committee, in order to take into account internal and external changes and developments in applicable regulations.

Promotion of the Code and Imerys' corporate culture is done both internally and externally. The Code, introduced by the Group CEO, and translated into 21 languages, applies to all Imerys employees, Imerys controlled joint ventures, and partners with whom Imerys does business. It is made available to external stakeholders on the Imerys website and Imerys requires its contracting parties to abide by it. All Imerys employees can access it either on sites or on the Group intranet and they receive regular communication and training (see below). Imerys evaluates adherence with the Code, Imerys corporate culture and values by monitoring training completion and conducting ad hoc employee surveys, such as "Your Voice".

Business conduct and ethics related policies & compliance programs

The Group works continuously to strengthen its programs related to ethics and compliance. The purpose of these programs is to identify risks, implement preventive measures and detect non-compliance with local and international rules and regulations related to the fight against bribery and anti-competitive behaviors, the respect of international sanctions and embargoes, the protection of personal data, and the respect of human rights, health, safety and the environment in Group operations around the world as well as within the Group's upstream value chain (Duty of Care).

The Group's compliance programs are supported by numerous policies and procedures linked with the Code, including but not limited to, the Group's antibribery, antitrust, Duty of Care, international sanctions, personal data protection, responsible use of artificial intelligence and whistleblowing policies and related procedures. All these policies and procedures clearly outline the process, reporting and necessary levels of control to ensure compliance.

The policies with respect to 'business conduct matters', within the meaning of the CSRD, notably policies on whistleblowing, antibribery and relationships with suppliers, are further detailed in this section.

√ *For more information on Imerys' Vigilance Plan, see* Part II of the present chapter.

Alert system and protection of whistleblowers

Enabling stakeholders, both internal and external, to safely voice concerns and having the infrastructure and support in place to hear and deal with those concerns is a cornerstone of good governance and is the core of Imerys' Code. The Group's "Speak up!" system enables reporting via internal channels, via the employee's manager, human resources, or other functions, or directly via a dedicated digital platform at www.speak-up.imerys.com. The Group's digital alert system, operated by an independent qualified third party and open to all employees and external parties, can be used to report any suspected violations of the Group Code. Reports can be made either by telephone or via the Speak up! web platform. Both telephone and web platform reporting are available in main Imerys languages 24 hours per day, seven days per week.

Based on the facts presented in preliminary reports, the Group assigns an investigative team of trained and experienced in-house professionals in the relevant fields to conduct the investigation, supported by external experts where appropriate. The investigative team collects and reviews documents, conducts interviews, and performs any other tasks necessary to reach a conclusion about the allegations in the report in a timely manner and in accordance with applicable laws. Imerys encourages its employees and stakeholders to share any information believed to represent a violation of the Code.

The fundamental elements of Imerys' alert system and the measures to protect whistleblowers are defined in the Group Whistleblowing Policy. This policy explains the alert system's governance (who establishes, manages and supervises the system), its main operational steps (how to report alleged violations or questionable conduct and how Imerys responds to a report) and its core principles to ensure confidentiality and protection of whistleblowers. Accordingly, Imerys and its employees shall take no action in retaliation against any person for making a good-faith report or participating in an investigation under the alert system policy. The policy covers all geographies where the Group operates, all its activities and all violations or possible violations the Group Code, policies and procedures or applicable laws and regulations. Communication and awareness-raising campaigns on the Speak up! system are conducted within the Group and information is accessible externally on the Group website. The Ethics Committee is responsible for the alert system and establishes a periodic assessment of all reported cases in its Annual Report, which is presented to the Audit Committee.

Achieving the Group's 2025 commitments

In the spirit of continuous improvement, Imerys assesses its sustainability policies, actions and results annually through a comprehensive EcoVadis[1] sustainability assessment, sharing these results openly with internal and external stakeholders. Imerys has been assessed annually by EcoVadis since 2014. **The mid-term target is to improve the external sustainability rating of the Group compared to the 2022 assessment by 7% by the end of 2025.**

Group Objective	Baseline	Performance 2025	Target
Improve the external sustainability rating of the Group compared to 2022 assessment	2022 69%	79%	2025 74%

In 2025, Imerys achieved a remarkable improvement in its EcoVadis sustainability assessment, demonstrating the company's commitment to corporate social responsibility and sustainable practices. The Group's overall score increased to 79/100, up from 73/100 in 2024, representing a significant 8.2% improvement. This performance not only surpassed Imerys' mid-term target of a 7% improvement by 2025 (as outlined in the 2022-2025 Sustainagility roadmap) but exceeded it by achieving a 14.5% increase compared to 2022. The score places Imerys in the 96th percentile, ranking among the top 4% of all companies rated by EcoVadis across all sectors. This outstanding performance earned Imerys the Gold medal, awarded to companies positioned above the 95th percentile. Notably, compared to 2024, Imerys demonstrated substantial improvements in pillars related to Labor & Human Rights (+22%), Sustainable Purchasing (+11%), and Ethics (+11%), reflecting the company's holistic approach to sustainability and its ongoing commitment to enhancing its practices across all key pillars of corporate responsibility.

Communication and training on the Group Code and business conduct matters

Awareness and training are essential to effectively embed business ethics in employees' day-to-day activities. To ensure awareness of employees at all Group sites, a printed copy of the Code is available and posters promoting the Speak Up! alert system are displayed at all sites. In addition, awareness of the Code is raised during the annual Imerys Connect Day, bringing all employees across industrial sites, laboratories and offices together. Regular newsletters and articles are also published on the Imerys intranet addressing specific business conduct matters.

The onboarding program for new hires includes mandatory ethics and compliance training modules, covering the Code of Business Conduct and Ethics, antibribery, personal data protection for all employees and antitrust for at-risk populations.

All new and updated ethics and compliance policies and procedures are accompanied by communication and training campaigns, designed to target the most-at-risk populations.

Every year, the Group deploys a mandatory refresher training campaign on the Code for all connected employees, who are asked to commit to the principles set out in the Code and trained on the alert system. The 2025 refresher campaign was launched in October. In addition, mandatory training campaigns on business conduct matters are regularly launched via the Group digital learning platform, the Learning Hub, for the most at-risk populations. In 2025, the Group launched a training on maintaining fair and ethical competition. Finally, each year virtual classes and webinars on business conduct, ethics and compliance matters are delivered to specific populations on an ad hoc basis.

√ *For more information on Training see* section 1.3.1.6 of the present chapter.

1 EcoVadis is a recognized leader used across industries to assess sustainability performance based on four pillars: environment, labor and human rights, ethics and sustainable procurement.

1.4.1.4. Prevention and detection of corruption and bribery [G1-3]

Antibribery compliance program

Imerys has zero tolerance against corruption and bribery and expects its managers to set the tone at the top. Imerys employees and all third parties who do business with the Group (including but not limited to joint venture partners, suppliers, clients, consultants and agents) are expected to totally ban bribery from their business practices. In addition, all Imerys suppliers are required to comply with Imerys' Supplier Environmental, Social & Governance Standards, which specifically include compliance with antibribery regulations.

Imerys has adopted a robust compliance program to deter, detect, investigate and remediate bribery incidents or allegations, in compliance with the requirements of the French Law "Sapin II", described in its antibribery policy. This policy applies to all directors, officers and employees of any Imerys legal entity, covering all activities and in all jurisdictions where the Group operates. The pillars of the Imerys antibribery compliance program are:

- An antibribery policy defining and illustrating the different types of prohibited behaviors available in 23 languages and reviewed annually;
- An internal alert system designed to enable employees and external parties to report possible violations of the antibribery policy, including incidents of corruption or bribery (**see section 1.4.1.3, paragraph** *"Alert system and protection of whistleblowers"* **above**);
- A regularly updated risk map designed to identify, analyze and assess the Group's exposure risks related to bribery (**see section 1.4.1.2, paragraph** *"Bribery risk mapping process"* **above**);
- Processes to evaluate third parties considered most at-risk;
- Extensive antibribery accounting controls specifically designed to ensure proper implementation of the Group's antibribery policy and procedures and detect potential corruption or bribery practices in the books;
- Training initiatives, in particular for most at-risk functions or positions;
- Possible disciplinary sanctions against employees in breach of the Group's antibribery policy, and
- Regular monitoring and assessment of the efficiency and robustness of the Group's antibribery program by the Ethics Committee.

The Group's antibribery policy is supported by specific procedures designed to enable employees to recognize, analyze and act upon situations entailing a risk of bribery: a gifts & hospitality procedure, a conflict of interest procedure, a donations procedure and an intermediary due diligence procedure. For gifts, hospitalities and donations, procedures include rules on reporting and prior approval by management and, for certain cases, the legal department. For conflicts of interests, the procedure sets out rules on reporting and proper management of such situations. The intermediary due diligence procedure is designed to mitigate risks of bribery when appointing intermediaries (including but not limited to agents and distributors). The investigation process of alleged bribery practices and the reporting of outcomes to senior management are detailed in the Group whistleblowing policy (**see section on the** *"Alert system and protection of whistleblowers"* **above**).

The Group tax policy is fully in line with the best international standards with respect to anti-tax avoidance and tax evasion practices. The Group operates in countries chosen solely for industrial or commercial purposes and does not enter into artificial arrangements for tax planning purposes, neither transfer value created to low tax jurisdictions, nor use secrecy jurisdictions or so-called "tax havens" for tax avoidance. It is committed to full compliance with its tax obligations, paying the right amount of tax in the right country at the right time.

Imerys fully supports the principle of open and accountable management of mineral resources. To this effect, and in accordance with the provisions of article L. 225-102-3 of the French Code of Commerce, Imerys reports on payments greater than or equal to €100,000 made in favor of governmental authorities by Group entities conducting activities in exploration, prospecting, discovery, development or extraction of minerals. This report is filed with the French Register of Commerce and available on the website of the Group as per the conditions prescribed by the Law.

Communication and training on bribery and corruption

The antibribery policy can be found on the Group intranet, and is thereby accessible to all employees of every Group entity. It has been translated into the Group's main working languages. The antibribery policy also forms part of the Internal Rules *(Règlements Intérieurs*) of the Imerys Group's French entities. All other policies, procedures forming part of the antibribery compliance program are also available at all times on the Group intranet, together with training material to respond to employees' questions and help them implement Group procedures. Antibribery is also regularly addressed in group internal communications and newsletters.

Training is deployed to ensure employees understand the implications of the antibribery policy and related procedures using e-learning courses and virtual classes. The Group provides online training on antibribery to all connected newcomers and deploys mandatory training campaigns for a selected population amongst its connected employees. These training courses cover the fundamentals of the fight against bribery: definition and key notions, applicable laws and their objectives, group policies, procedures and alert mechanism, and examples of at-risk situations involving, as the case may be, public officials.

Mandatory training campaigns are regularly launched for at-risk functions (namely, sales, purchasing, business development and strategy, site directors and selected functions within operations, management, legal and internal control and audit departments); at-risk-functions covered by the training represent around 11% of all Group employees. The most recent dedicated campaign was organized in 2024.

In 2025, the Group offered:

- A mandatory online training for all newcomers as part of the onboarding program;
- A mandatory online module on Fighting bribery for all connected employees, as part of its 2025 refresher training on the Code of conduct;
- Voluntary virtual classes for operations functions. (**see section** *"Communication and training on business conduct matters"* **above**).

1.4.1.5. Confirmed incidents of corruption or bribery [G1-4]

Imerys does not have any convictions and fines for violation of anti corruption and antibribery laws to report for 2025.

Appropriate remedial actions are implemented in case of breaches of Imerys' antibribery policy and related procedures. Communication, training and disciplinary actions may be taken (including termination of employment, in accordance with local laws)

S3-2 – Processes for engaging with affected communities about impacts		Material	1.3.3.4
S3-3 – Processes to remediate negative impacts and channels for affected communities to raise concerns		Material	1.3.3.5
S3-4 – Taking action on material impacts, and approaches to mitigating material risks and pursuing material opportunities related to affected communities, and effectiveness of those actions and approaches	MDR-A	Material	1.3.3.6
S3-5 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities	MDR-T	Material	1.3.3.7
ESRS S4- Consumers and end-users			
ESRS 2 SBM-3 Material impacts, risks and opportunities and their interaction with strategy and business model	SBM-3	Mandatory disclosure not subject to materiality assessment	1.3.4.1
S4-1 – Policies related to consumers and end-users	MDR-P	Material	1.3.4.2
S4-2 – Processes for engaging with consumers and end-users about impacts		Not applicable	-
S4-3 – Processes to remediate negative impacts and channels for consumers and end-users to raise concerns		Not applicable	-
S4-4 – Taking action on material impacts on consumers and end-users, and approaches to managing material risks and pursuing material opportunities related to consumers and end-users, and effectiveness of those actions	MDR-A	Material	1.3.4.2
S4-5 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities	MDR-T	Material	1.3.4.3
GOVERNANCE			
ESRS G1- Business Conduct			
GOV 1 - The role of the administrative, management and supervisory bodies	GOV-1	Mandatory disclosure not subject to materiality assessment	1.4.1.1 & Chapter 4
IRO-1 – Description of the processes to identify and assess material impacts, risks and opportunities	IRO-1		1.4.1.2
G1-1– Business conduct policies and corporate culture		Material	1.4.1.3
G1-2 – Management of relationships with suppliers		Not material	-
G1-3 – Prevention and detection of corruption and bribery		Material	1.4.1.5
G1-4 – Incidents of corruption or bribery		Material	1.4.1.6
G1-5 – Political influence and lobbying activities		Not material	-
G1-6 – Payment practices		Not material	-

1.6. SYNTHESIS OF QUANTITATIVE INFORMATION

Indicators related to ESRS 2 - General disclosures

Topic	Indicator	Unit	2025	2024	2023
Proportion of variable remuneration dependent on ESG-related criteria	Proportion of sustainability criterion in the annual variable compensation for Chief Executive Officer (STI)	%	15%	15%	15%
	Proportion of the sustainability criterion in the long term incentive plan (LTI)	%	15%	15%	15%
Rating Agencies	CDP (Climate change)	/	A	A	B
	CDP Climate	/	A	A	B
	CDP Water	/	B	B-	C
	CDP (Supplier Engagement Assessment)	/	A	A	B
	Ecovadis	#	79	73	66
	MSCI	/	AA	AA	AA
	Sustainalytics	#	27.7	30.4	31
	ISS-ESG	/	C+ (prime status)	C+ (prime status)	C
	S&P Global	#	70	62	57
Group objectives and performance	Improve Group Safety Culture Maturity across all Business areas	#	3.3	3.2	3.1
	Increase the global Occupational Health action plan improvement rate	%	93%	63%	32%
	Increase the score of the Diversity, Equity & Inclusion Index	%	93%	66%	40%
	Improve stakeholder engagement by ensuring 100% of priority sites [priority site definition to be added] identify and assess potential impacts on local stakeholders as per Group requirements.	%	100%	74%	-
	Improve the external sustainability rating of the Group compared to 2022 assessment	#	79	73	66
	Deploy a sustainability rating scheme of Group suppliers (by spend)	%	75%	70%	61%
	Assess the Products in Application Combinations (PAC) of Imerys product portfolio (by revenue) according to sustainability criteria	%	78%	71%	65%
	Ensure the Group New Product Developments are scored as SustainAgility Solutions	%	94%	86%	78%
	Reduce environmental impacts by assessing the maturity level of sites against environmental management requirements	%	100%	100%	100%
	Reduce the risk of air pollution by ensuring 100% of priority sites define site specific air emission management plans by the end of 2025	%	100%	0%	-
	Improve water management by ensuring priority sites comply with new water reporting requirements	%	99%	55%	22%
	Improve mineral resources efficiency by ensuring priority sites (by mineral waste volume) comply with new mineral waste reporting requirements	%	87%	60%	20%
	Reduce impact on biodiversity by filling Imerys Act4nature commitments and conducting biodiversity audits at the priority sites	%	107%	82%	57%
	Reduce Group Scope 1 & 2 greenhouse gas emissions (tCO2eq) by 42% from 2021 base year in alignment with a 1.5°C trajectory by the end of 2030	%	-28%	-28%	-24%
	Reduce Group Scope 1 & 2 greenhouse gas emissions by 36% relative to revenue (tCO2eq/€M) by 2030	%	-27%	-32%	-31%
	Reduce Group Scope 3 greenhouse gas emissions (tCO2eq) by 25% from 2021 base year in alignment with a 1,5°C trajectory by the end of 2030 (from purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting, and investments)	%	-22%	-15%	-6%
	Improve resilience to physical climate risks by assessing 100% of Group operations according to climate scenarios and developing adaptation strategies for the three most significant risks by the end of 2025.	%	100%	0%	-

Indicators related to ESRS E2 - Pollution

Topic	Imerys indicator	Unit	2025	2024	2023
Financial resources allocated to the prevention and mitigation of pollution	Number of major and critical environmental incidents (Level 4 and 5)	#	0	0	1
	Capex amounts allocated to the prevention and mitigation major environmental incidents	€ thousands	1,417	806	388
	Opex amounts allocated to the prevention and mitigation of major and critical environmental incidents	€ thousands	0	221	1
	of which Opex amounts allocated to fines	€ thousands	0	90	0
Water priority sites	Number of sites exceeding emission thresholds	#	2	2	3
Water emissions	Total Ni emissions for the sites exceeding the E-PRTR threshold	kgyear	61	-	-
	Total Cl emissions for the sites exceeding the E-PRTR threshold	metric ton/ year	4,118	-	-
	Total CO emissions for the sites exceeding the E-PRTR threshold	metric ton/ year	2,885	-	-
Air emissions	Total SOx emissions for the industrial sites exceeding the E-PRTR threshold	metric ton/ year	1,491	1,290	-
	Total NOx emissions for the industrial sites exceeding the E-PRTR threshold	metric ton/ year	1,323	1,292	-
Financial effects	Environmental and Dismantling provisions	€ million	104.2	115.5	-

Indicators related to ESRS E3 - Water resources

Topic	Imerys indicator	Unit	2025	2024	2023
Water withdrawals	Total operational water withdrawals	million m3	60.079	45.670	50.477
	Water withdrawn from water groundwater	million m3	34.545	21.470	24.142
	Water withdrawn from suppliers	million m3	4.261	4.233	3.725
	Water withdrawn from surface water	million m3	4.956	8.225	15.628
	Water withdrawn from rainwater	million m3	14.776	10.023	-
	Water withdrawn from other sources (including seawater)	million m3	1,540	1.719	6.982
Water consumption	Total water consumption	million m3	17.524	15.999	-
	Of which total water consumption in areas of extremely high water stress	million m3	3.268	2.087	-
Other metrics	Total water stored	million m3	71.642	21.096	-
	Total water storage variation	million m3	50.546	-	-
	Total water recycled and reused	million m3	98.692	96.166	89.912
	Water intensity per net revenue	m3/€ million	17,754	12,669	13,304

Indicators related to ESRS E4 - Biodiversity and land rehabilitation

Topic	Imerys indicator	Unit	2025	2024	2023
Biodiversity & land rehabilitation targets	Reduce impact on biodiversity by fulfilling Imerys act4nature commitments and conducting biodiversity audits on 20 priority sites	%	107%	82%	57%
Imerys' extractive an non extractive sites	Number of Imerys' extractive sites located in proximity to sensitive areas (IUCN categories I, II, or III)	#	8	6	-
	Number of Imerys' non extractive sites located in proximity to sensitive areas (IUCN categories I, II, or III)	#	11	-	-

Indicators related to ESRS E5 - Resource Use and Circular Economy

Topic	Imerys indicator	Unit	2025	2024	2023
Material resource use flows	*Run Of Mine (RoM)*	Mdmt	17.4	18.7	18.8
Waste generation	Displaced Mining Waste	Mdmt	31.6	35.2	39.4
	Mineral Process Waste	Mdmt	8.0	9.1	9
Industrial waste	**Total industrial waste**	tonnes	85,199	117,937	96,232
	Of which non-recycled hazardous industrial waste	tonnes	2,354	2,931	1,729
	Of which recycled hazardous industrial waste	tonnes	1,861	1,488	1,444
	Of which non-recycled non-hazardous industrial waste	tonnes	46,477	60,877	50,228
	Of which recycled non-hazardous industrial waste	tonnes	34,508	52,641	42,831
	Industrial waste intensity per net revenue	(tonnes/€ million)	25	33	25

Indicators related to ESRS S1 - Imerys's own workforce

Topic	Imerys indicator	Unit	2025	2024	2023

1.7. CALCULATION METHODOLOGY [MDR-M]

Calculation methodology of indicators related to ESRS E1 - Climate change

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
SCOPE 1 & 2 GHG EMISSIONS		
Scope 1	$KtCO_2eq$	Scope 1 includes process emissions and emissions from the combustion of fossil fuels. It also includes CH_4 and N_2O emissions from the combustion of biomass (CO_2 emissions from biomass is accounted as zero due to its biogenic origin). Emission factors from the updated Environmental Protection Agency (EPA) are used for fuel- and biomass-related calculations. Process emissions are reported at site level and are either directly measured or calculated using mass balances. Fugitive emissions result from intentional or unintentional releases (e.g., equipment leaks, hydrofluorocarbon losses from refrigeration and air conditioning, and methane leakages from gas transport). Scope 1 also covers Forest, Land and Agriculture (FLAG) emissions arising from land use change and land management within company boundaries, quantified through a stock-difference approach supported by remote-sensing data and internal geographic information systems.
Scope 2 (location based)	$KtCO_2eq$	Scope 2 (location-based) includes GHG emissions from purchased electricity and steam. Scope 2 location-based emissions are calculated using average grid emission factors reflecting the electricity mix of the country or region where energy is consumed. Country-specific emission factors published by the International Energy Agency (IEA) and, for the United States, the Emissions and Generation Resource Integrated Database (eGRID) are used for these calculations.
Scope 2 (market based)	$KtCO_2eq$	Scope 2 includes GHG emissions from purchased electricity and steam. Scope 2 market-based emissions are calculated using supplier or contract-specific emission factors, reflecting the emissions associated with electricity purchased through eligible contractual instruments such as Power Purchase Agreements (PPAs), Energy Attribute Certificates (EACs), or equivalent instruments that meet GHG Protocol quality criteria. Where supplier-specific data are not available, residual mix emission factors are applied, if the residual mix is unavailable, the relevant location-based country or state average factor is used as a fallback.
SCOPE 3 GHG EMISSIONS		
Purchased goods and services	$KtCO_2eq$	This category includes the purchased raw materials (cradle-to-gate: extraction, processing and transportation of the raw materials), mining services and contracts (overburden, hauling, rehabilitation, drilling, explosive, blasting, crushing – also including heavy mobile equipment and tires), chemicals (purchase, processing and transportation), packaging (purchase of polypropylene, polyethylene and paper bags, pallets, covers/films), personal, IT and industrial services (consulting, hardware and software purchases, temporary manpower, audit and legal services) and professional services (interim, legal services, consulting…). For raw materials and chemicals, the calculation of GHG emissions is based on a quantity-based method, using cradle-to-gate emission factors (extraction, production and processes, energy used, transportation). Emission factors are primarily sourced from Ecoinvent (versions 3.9.1, 3.10, and 3.11), complemented by specialized databases including Carbon Cloud, the City of Winnipeg database, and CRU. For mining services and contracts, packaging, personnel, IT, and industrial services, a spend-based calculation is performed using the Carnegie Mellon EIOLCA methodology. Finally, specific supplier emission factors (PCFs) have been integrated to replace generic data for specific product families, including Additives (Evonik), Dispersants (Coatex), Coating Agents (Oleon), PH Modifiers (Kem One, CINER, Sisecam), Alumina (Alcoa, Mytilineos), and Zircon (Tronox, Iluka).
Capital goods	$KtCO_2eq$	This category includes the manufacturing, transportation, installation of industrial equipment and services (waste is excluded and is reported in the Scope 3 waste generation category). The calculation is done on a spend-based method for the different activities using the Carnegie Mellon EIOLCA methodology.
Fuel-and-energy-related activities (not included in Scope 1 or 2)	$KtCO_2eq$	This category includes well-to tank emissions of fuel consumption reported under Scopes 1 and 2. Losses and upstream emissions from purchased electricity are also included. For electricity, the mapping was done on a country basis, with country-specific electricity mixes (oil, coal, natural gas, nuclear, renewables…) taken into account. IEA data were considered. Moreover, emission factors from DEFRA were applied for each energy source: thermal energy (extraction, production and transportation)
Upstream transportation and distribution	$KtCO_2eq$	All transportation modes within Imerys upstream value chain are included: bulk shipping, container shipping, road, intermodal (road + train) and train. All Greenhouse gases (GHG) emissions related to transportation are calculated on a well-to-wheel basis. Emissions from distribution, including warehouses, are also included under this category. Inter-site transportation within Imerys mines and plants is excluded from this category, as it is already accounted for under scope 1 & 2. Transportation and distribution emissions are calculated using a distance (km) and quantity-based method (tonnage), and specific emission factors according to the selected transportation mode, products transported and geographical location. Emission factors are obtained from the following sources: Ecoinvent 3.11, Google maps is used to calculate the distances.

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Waste generated in operations	$KtCO_2eq$	All types of solid waste (including mining waste) and wastewater generated by Imerys manufacturing plants, laboratories and offices are included in this category. Office waste and production units cleaning (dust) is managed by a third-party. The calculation is performed using a spend-based method and Carnegie Mellon EIOLCA's methodology, which is an environmental input-output life cycle assessment that evaluates the impact of the economic activities on the GHG emissions. For mining operations, none of the mineral waste is treated by third-parties, meaning that it does not go into a landfill nor is it incinerated. All the mineral waste from mining is managed within Imerys' own operations and considered under Scope 1. Quarries are rehabilitated at the end of their lifetime to prevent any further environmental damage and, as such, no waste remains.
Business travel	$KtCO_2eq$	GHG emissions from business travel are calculated using a supplier-based method, where the data are shared directly by Imerys suppliers. Emissions are calculated on a well-to-wheel basis.
Employee Commuting	$KtCO_2eq$	Following the discontinuation of the GHG Protocol's "Scope 3 Evaluator", a new methodology was developed in 2024 by Imerys to estimate 2023 Scope 3 employee commuting emissions, based on actual commuting habits of Imerys' employees (distance, transportation mode and number of commuting days per year). An employee commuting survey was sent to a sample of employees based in 10 countries which represent 77% of Imerys' total headcount. Based on the survey response rate per country, results were then extrapolated to account for 100% of the Group's headcount. Country-specific emission factors were used for each transportation mode (in gCO_2eq/passenger-km).
Downstream transportation and distribution	$KtCO_2eq$	All transportation modes within Imerys downstream value chain are included: bulk shipping, container shipping, road, intermodal (road + train) and train. All GHG emissions related to transportation are calculated on a well-to-wheel basis. Transportation is considered from Imerys' gate to the customer's gate. Emissions from distribution, including warehouses, are also included under this category. For transportation and distribution, emissions are calculated using a distance-based (km) and quantity-based method (tonnage), applying specific emission factors tailored to the selected transportation mode, product type, and geographical location. Distances are calculated using Google Maps APIs, while emission factors are primarily sourced from Ecoinvent 3.11, EcoTransIT, and CERDI. To enhance accuracy, generic data for container shipping and rail transport has been replaced with specific CO_2 emission reports integrated from key logistics partners, including Maersk, Hapag-Lloyd, CMA-CGM, MSC, ONE, Evergreen, and rail operators such as Hexafret and DB Cargo UK.
Processing of sold products	tCO_2eq	Screening only considered processing steps that are required to obtain the right properties (mainly thermal expansion, spray drying & firing); further processes of finished products (composed of many other ingredients) that are not directly linked to Imerys minerals are excluded. In very specific applications where further processing is known, assumptions have been made to confirm that it is not significant, compared to other Scope 3 categories, based on Life Cycle Assessment studies performed by Imerys. Further processing stage is generally not significant compared to cradle to gate inventory, except in a few cases that are listed below: – Perlite used in filtration & Building materials, expanded by customers – Minerals (Kaolin, Feldspar, Ball clay, Ground Calcium Carbonate) used in ceramics – Refractory aggregates used in refractory bricks, with thermal processing by brick manufacturers – Ground calcium carbonates and other minerals with carbonate content (such as clays that could contain up to 2.5% of carbonates) are used in ceramic applications
Use of sold products	tCO_2eq	Imerys products are inert materials, used as components and/or additives in final products and applications. As they are not combusted or chemically/ physically transformed (they are not feedstocks) and they are not consumed during the processing stages, they do not generate direct GHG emissions during use phases. Direct use phase emissions are equal to 0.
End of life treatment of sold products	tCO_2eq	Process aids (filtration) are the only intermediate sold products in Imerys' portfolio, i.e. they are the only products that are disposed of right after being used. An estimate of their end-of-life emissions has been calculated using internal Life Cycle Assessment data. For minerals used as raw materials, blended and integrated into a final product, which are inseparable from other materials, the following market / applications were considered to assess the % of recycling according to a recent study published by IMA (*Recycling of industrial mineral applications Contribution to circular economy - IMA Europe - September 2023*): paper & board, plastics & rubber, paint & coating, ceramics, building products, refractory, abrasives. Minerals that are entirely consumed during the use phase have no end-of-life treatment. End of life of packaging of sold products is also included, by considering the average weight of packaging units and the composition and the emission factor given by Ecoinvent database for packaging materials.
Investments	tCO_2eq	This category includes emissions of Joint Ventures (JVs). Emissions data were provided directly by the Joint Venture companies and allocated according to Imerys' share for each given JV.

Calculation methodology of indicators related to ESRS E2 - Pollution

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Environmental management maturity indicator	Percentage	This metric measures Imerys' commitment to act as a responsible environmental steward by assessing environmental risks and continually improving control measures to reduce adverse environmental impacts, maximizing the efficient use of natural resources and conserving and creating biodiversity value. Environmental Management requirement are defined by Imerys policies and measured by the environmental maturity matrix, which is based on leading international environmental standards.
Air emission management plan indicator	Percentage	To address air emissions, Imerys has set a target for 2025, prioritizing sites that exceed the threshold for SO_X and NO_X emissions. The objective is to align emissions with E-PRTR thresholds for SOx, NOx, CO, NM VOC, and PM10. By the end of 2025, all priority sites must establish specific air emission management plans to mitigate pollution risks.
Air emissions and water discharges		
Number of industrial sites exceeding E-PRTR Threshold of SO_x,NO_x,CO, Ni and Cl	Number	This metric indicates the number of sites that exceeds the European Pollutant Release and Transfer Register (E-PRTR) threshold, a European Union regulation that requires industrial facilities to report their emissions of specific pollutants when they exceed certain threshold levels.
Total SO_x emissions	Tonnes	The Group's SO_x emissions from fuels are automatically calculated monthly using fuel consumption data and emission factors from the EPA AP 42 database. SO_x emissions can also be reported manually at site level, where it is calculated based on sulfur content of raw materials, additives, and process conditions, such as the desulfurization rate. As a best practice, continuous monitoring of SO_x emissions at all points of rejection is recommended to ensure accurate tracking and effective management.
Total NO_x emissions	Tonnes	The Group's NO_x emissions from fuels are automatically calculated monthly using fuel consumption data and emission factors from the EPA AP 42 database. NO_x emissions can also be reported manually at site level, where it is calculated based on the nitrogen content of raw materials, additives, and process conditions. As a best practice, continuous monitoring of NO_x emissions at all points of rejection is recommended to ensure accurate tracking and effective management.
Total CO emissions	Tonnes	CO emissions are calculated using the standard regulatory methodologies of the respective countries of origin.
Total Ni discharged	Kg	Ni discharges are calculated using the standard regulatory methodologies of the respective countries of origin.
Total Cl discharged	Tonnes	Cl discharges are calculated using the standard regulatory methodologies of the respective countries of origin.
Environmental incidents		
Number of Level 4 & 5 environmental incidents	Number	This metric reflects the number of Level 5 environmental incidents, which correspond to long-term environmental harm and severe breaches of Group standards, as well as Level 4 incidents, which involve medium-term environmental harm and repeated breaches of Group standards.

Calculation methodology of indicators related to ESRS E3 - Water resource

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
WATER REPORTING		
Water reporting progress indicator (for priority sites)	million m^3	For each priority site, a mark out of 100% is awarded based on two criteria: – Water reporting and water balance validity (75% of the overall score) The new site-level reporting requirements cover a list of 5 macro-indicators. • 40% is awarded if all the indicators on the list are reported by the site (8%/indicator) • 10% is granted when the site provides an explanation on the significant gaps between the actual and the past reporting campaigns (maximum score: 50%) • 50% is awarded if the difference between water inflows and outflows is inferior to 10%, or if inferior to 20% with a valid explanation of the water unbalance. – Water quality reporting (25% of the overall score) The new site-level reporting requirements cover a list of 3 quality parameters (Total suspended solids, pH and Temperature) • All points are granted if at least 50% of the priority sites and sites in water stress 5, that discharge water to the environment, comply with the water quality reporting.
WATER WITHDRAWALS		
Total operational water withdrawals	million m^3	Quantity of water supplied by a third party or withdrawn from the environment that enters the operational water system and supplies operations. At Imerys, operational water withdrawals are split in the following categories, according to the origin of the water: from groundwater, from suppliers, from surface water, from rainwater, from seawater or from other sources (such as wastewater obtained from another organization). Imerys applies the definition and the recommendation of the ICMM standard. Operational water withdrawal volumes are quantified based on suppliers invoices, water meters, nominal pump capacities and running hours when not equipped with flowmeters. Rainwater is estimated based on local hydrological models, taking into account direct interception of rainwater by operational water stores, and indirect streams such as runoffs converging to these facilities, considering sub-catchment area and soil occupation.
Water withdrawn from groundwater	million m^3	This water refers to the water from wells, boreholes or other systems for extracting water from beneath the surface of the ground. In the case of aquifer interception, the upwelling of water at the bottom of the pit are considered as groundwater. This flow falls in this category only when this water is used for the operations and/or quarry tasks (such as dust management, maintenance, vehicle washing). Entrained water in the ore (natural moisture) belongs to this category as well. Water volumes from groundwater are either measured by water meters, flow meters or nominal pump capacities and running hours. In some specific cases, hydrogeologic surveys are conducted to evaluate the water flow of an intercepted groundwater table when used in the operations. For the case of entrained water in the ore, the volume of water is estimated based on moisture content measurements of representative samples of ore and the quantity of ore extracted and entering the production plant.
Water withdrawn from suppliers	million m^3	This water refers to the water obtained from water suppliers, local governments, water utilities or private water companies used in offices, facilities (e.g. drinking water from municipal water supply network) or operations. Water volumes from suppliers are quantified based on water meters, suppliers invoices, when supplied via pipelines or in bottles, or differential weighting when transported via water trucks.
Water withdrawn from surface water	million m^3	This water refers to the water taken from rivers, lakes, ponds, springs, streams, or other water that naturally occurs on the Earth's surface (as opposed to water that is in the ground) with the purpose to sustain operations or be used in tasks. Water volumes from surface water are either measured by water meters, flow meters or nominal pump capacities and running hours.
Water withdrawn from rainwater	million m^3	This water refers to natural precipitation and runoff that accumulate in active/inactive pits and operational water stores intended to supply the operations and tasks Operational water withdrawals from rainwater (precipitation and runoffs) are estimated from sub-catchment basins delimitations from the water drainage map and are estimated according to weather data from stations near the site (within a maximum radius of 20km from the site).
Water withdrawn from other sources	million m^3	Some Imerys operations may obtain water from sources other than those listed above. For example, an operation may obtain wastewater from another organization. Water volumes from other sources are either measured by water meters, flow meters or nominal pump capacities and running hours.

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
WATER CONSUMPTION		
Total water consumption	million m^3	The amount of water drawn into the boundaries of the undertaking (or facility) and not discharged back to the environment or a third party, such as water evaporation, either forced or natural, end-product moisture, losses.ter consumption is estimated from the water balance, consumption being the difference of water withdrawal and water discharge, that applies for simple operations with limited natural water flow contribution. Consumption is quantified at process scale, based on mass balance of consumptive process units and moisture content measures.
Total water consumption in areas at water risk, including areas of extremely high water stress	million m^3	Imerys defines areas of extremely high water stress as regions where the ratio of total surface and groundwater withdrawals to available renewable water is greater than 80% in the WRI Aqueduct 4.0.
OTHER METRICS		
Total water stored	million m^3	Water storage is purpose built, artificial structures, within the site boundaries, intended to collect or hold operational water for its further use in the operations. Water stores are closed reservoirs, sediment ponds for water recycling, disused pits, tailing storage facilities. The volume of large water storage facilities, such as tailings or disused pits is estimated from bathymetric surveys or computer-based height-volume model from historical topographical data and reference surface level. The volume of smaller water storage facilities are based on geometrical model approach and water level readings (sensor, level gauge, visual reference point).
Water storage variation	million m^3	Water storage variation is the difference in storage volume between the current and preceding reporting periods
Total water recycled and reused	million m^3	Water and wastewater (treated or untreated) that has been used more than once before being discharged from the Group or shared facilities' boundary, so that water demand is reduced. This may be in the same process (recycled) or in a different process within the same facility (own or shared with other undertakings) or in another of the undertaking's facilities (reused). Water volumes recycled are either measured by water meters, flow meters or nominal pump capacities and running hours.
Water intensity of revenue	m^3/€ million	This metric provides the relationship between a volumetric aspect of water and a unit of activity (products, sales, etc.) created.

Calculation methodology of indicators related to ESRS E4 - Biodiversity

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Impact on biodiversity reduction indicator by fulfilling Imerys act4nature commitments and conducting biodiversity audits.	Percentage	This metric is a composite measure designed to assess and reduce the company's impact on biodiversity through two key components: – Act4nature Commitments annual planning 2025-2028(60% weighting):This component evaluates the progress in implementing 16 specific actions grouped into four main areas: improving environmental strategy and scientific expertise, combating biodiversity loss, conducting biodiversity research, and raising awareness among stakeholders. The annual progress is calculated as a percentage of deployment for each action, which is then consolidated by topic to track overall advancement. – Biodiversity Audits on Priority Sites (40% weighting):This component focuses on conducting biodiversity audits on 20 priority sites, defined as: a) Quarries extracting over 1 million tons annually, or b) Sites within a 5km radius of sensitive areas (Protected IUCN areas of category I, II, or III, or biodiversity hotspots near protected IUCN areas of category IV). The audits aim to evaluate the sites' maturity in biodiversity management and adapt local biodiversity action plans. Progress is measured annually based on the number of sites audited during the 2022-2025 period.
Number of Imerys' extractive sites located in proximity to sensitive areas (IUCN categories I, II, or III)	Number	IUCN areas refer to protected areas categorized by the International Union for Conservation of Nature (IUCN). It is defined as geographical space, recognized, dedicated and managed, through legal or other effective means, to achieve the long term conservation of nature with associated ecosystem services and cultural values. – IUCN Category I splits into two sub-categories with : Ia : Strict Nature Reserve Ib : Wilderness Area – IUCN Category II : National Park – IUCN Category III : Natural Monument or Feature This metric is estimated on the number of Imerys' extractive sites that are located within a radius of 5 km in an area classified as IUCN category I, II or III.

Calculation methodology of indicators related to ESRS E5 - Circular economy

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
MINERAL WASTE REPORTING		
Mineral waste reporting progress indicator	Percentage	Total percentage of requirements completed across fifteen priority sites. Including : mineral characterizations and spatial data,
GISTM compliance indicator across Imerys' tailing disposal facilities	Percentage	Total percentage of applicable auditable requirements completed across relevant sites. Including: Affected communities; Integrated knowledge base; Design Construction Operating Monitoring data; Management and governance; Emergency response and long term recovery; Public disclosure and access to information.
Run of Mine (RoM)	tonnes (dry)	This is the total quantity of ore extracted from the mine and ready to be used by the processing plant.
Displaced inert mining waste	tonnes (dry)	Displaced inert mining waste refers to solid materials that are removed or displaced during the mining process and are not used in the production of the desired mineral resource. This includes overburden, topsoil, and other rock and soil materials that are excavated and stored separately from the valuable ore or mineral deposits.
Mineral process waste	tonnes (dry)	This metric refers to the residues, Tailings or other non-valuable material produced after the beneficiation and processing of material to form mineral products
Mineral process waste of which tailings	cubic metres (m3)	Tailings are a combination of the fine grained solid material remaining after the recoverable metals and minerals have been extracted from mixed ore and any process water remaining.
INDUSTRIAL WASTE		
Total industrial waste	tonnes	Industrial wastes are the non-mineral wastes generated by Imerys activities, such as solvents, inks, plastic big bags, cardboards and wooden pallets. It excludes the wastes from production: overburden, mineral wastes, by-products, off-specifications. The reporting of this indicator is to measure and categorize waste generated by Imerys operations into hazardous, non-hazardous, recycled, and ultimate industrial waste. If some water containing liquid is counted as waste (rather than wastewater) according to regulations, the reported quantity excludes the water content. The reported quantity refers to the waste evacuated from operational sites within the calendar year. It does not include the waste stocked on sites for future disposal.
Non-recycled hazardous industrial waste	tonnes	Many Imerys operations generate waste that is classified as hazardous and regulated by national legislation. This type of waste requires specialized handling, including specific methods for transportation, treatment, storage, and disposal. The classification of hazardous waste can vary by country, so it's essential to consult the relevant definition in the jurisdiction where each Imerys operation is located. The estimation of non-recycled hazardous industrial waste quantities is based on delivery notes
Recycled hazardous industrial waste	tonnes	This waste refers to the hazardous waste disposed of by the entity and recycled externally. The waste can then be reused as a raw material in another process or reused for another purpose. Incineration of waste that is used as fuel and composted waste should be considered as recycled waste. The estimation of recycled hazardous industrial waste quantities is based on delivery notes.
Non-recycled non-hazardous industrial waste	tonnes	This waste refers to any industrial waste from an Imerys operation that is not hazardous waste. This includes all other forms of solid or liquid waste excluding wastewater. The estimation of non-recycled non-hazardous industrial waste quantities is based on delivery notes.
Recycled non-hazardous industrial waste	tonnes	This waste refers to non-hazardous materials disposed of by the entity and recycled externally. Such waste can be repurposed as raw materials in other processes or reused for different applications. Notably, waste incinerated for fuel and composted materials are also classified as recycled waste. The estimation of recycled non-hazardous industrial waste quantities is based on delivery notes.
Industrial waste intensity per net revenue	tonnes/€ million	This metric measures the quantity of industrial waste produced or each unit of net revenue earned. It helps to assess a company's efficiency in managing its waste output relative to its financial performance.

Calculation methodology of indicators related to ESRS S1 -Own Workforce

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
HEALTH AND SAFETY INDICATORS		
Group Safety Culture Maturity	Number	The Group Safety Culture Maturity indicator is the average of the maturity levels obtained by each site based on the result of the self-assessment performed through the Group Safety Maturity Matrix by each site.The Group Safety Maturity Matrix is an Imerys tool developed internally considering internationally recognized standards for safety management and aligned with the fundamentals of the Imerys safety policies and procedures. It is used to conduct gap analyses of the sites maturity and drive their improvement plans in partnership with industrial teams and safety professionals. Since 2019, the occupational safety maturity are categorized using the matrix, from Level 1.0 to 4.0 as follow:Maturity Level 1 corresponds to [Reactive] level where Imerys Safety System is weak;Maturity Level 2 corresponds to [Planned] level where Imerys Safety System is basic, some essential requirements not yet implemented;Maturity Level 3 corresponds to [Proactive] level where Imerys Safety System is "fully implemented, employees are engaged and contribute actively"; Maturity Level 4 corresponds to [Best-in-class] level where Imerys system is implemented beyond Imerys minimum requirements and is a reference for best practices sharing
Occupational health action plan (OHAP) improvement rate	%	Occupational Health Action Improvement rate tracks sites annual actions focussed on worker health protection measures, with a minimum completion of 75% required year to year. This is the ratio of the actions completed / actions planed for the end of the reporting year. Actions may come from various sources; annual occupational health assessment (separate to the OHAP), exposure monitoring etc. Focussed on worker health protection measures in the workplace (physical, chemical and or biological hazards)
Number of safety alerts related to Significant Potential Incident (SPIs)	Number	Significant Potential Incidents (SPIs) refer to events or near-misses that, while they may not have resulted in serious harm or damage, had the potential to cause significant injury, environmental impact, or property damage. These are incidents that could have had severe consequences under slightly different circumstances. The concept of SPIs is an important part of Imerys' safety management system. By identifying and analyzing these incidents, the Group aims to prevent more serious accidents from occurring in the future. SPIs are typically reported, investigated, and analyzed with the same rigor as actual incidents. And the results of these analysis are shared within the group through Safety Alerts. This proactive approach helps Imerys to continuously improve its safety performance and reduce the risk of serious accidents. This metric is calculated as the number of SPIs Safety Alerts shared within the reporting year.
Visible Felt Leadership (VFL)	Number	Visible Felt Leadership refers to the practice of leaders demonstrating their commitment to safety through visible actions and behaviors that can be observed and felt by employees at all levels of the organization. VFL typically involves: Leaders regularly visiting work sites and engaging directly with employees about safety issues.Demonstrating a personal commitment to safety through actions and decisions.Actively participating in safety initiatives and discussions. Recognizing and reinforcing good safety practices. Addressing safety concerns promptly and visibly.This metric refers to the number of leaders interactions recorded within the reporting year.
Behavior-Based Safety (BBS)	Number	Behavior-Based Safety is a key component of Imerys safety management system and overall safety culture. Behavior-Based Safety is an approach that focuses on identifying and promoting safe behaviors among employees to prevent accidents and injuries in the workplace. The BBS program at Imerys typically involves: Observing and analyzing workplace behaviors Providing immediate feedback on safe and at-risk behaviorsEncouraging employees to actively participate in identifying and addressing safety concerns Promoting positive reinforcement for safe behaviors Developing action plans to address identified safety issues The goal of BBS is to create a proactive safety culture where employees are actively engaged in maintaining a safe work environment. By focusing on behaviors, the Group aims to prevent accidents before they occur and continuously improve safety performance.This metric refers to the number of BBS interactions between co-workers recorded within the reporting year.
Life-changing injuries	Number	A life-changing injury refers to a serious injury with permanent impact to the victim. The injury involves amputation, brain damage, loss of vision, severe burns resulting in major scarring, and permanent inability to use arm or leg (including hand and foot) normally. With respect to an amputation of part of a finger, the accident will be considered life-changing if it impacts the bone. An event which results in a Life Changing Injury, as detailed above, will be classified under this level, even if there was no lost day and the worker was back to his or her next scheduled shift. This metric is the number of work-related injuries resulting in a life changing consequence.
Lost-Time Accident rates (LTA)	Ratio	A Lost-Time Accident is a work-related accident or injury where the injured worker (employee, non-employee or other worker on site) cannot work on the next day after the injury occurred, during normal working hours, due to the injury suffered. A physician or other licensed health care professional provides certification that the accident victim is not fit for work.Lost-Time Accident (LTA) rate: (number of lost time accidents x 1,000,000)/number of hours worked.

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Number of days lost due to work-related injuries, and fatalities	Number	A day on which an Imerys Employee Worker, a non-Imerys Employee Worker or an Other Worker on site cannot work due to a work-related accident. Lost Days are counted from and including the day after the injury occurred until and including the last day of absence, and measured in calendar days, meaning days on which the affected individual is not scheduled for work (for example, weekends, public holidays) will count as Lost Days. The day on which the injury occurred is never counted as a Lost Day. In case of fatality, by convention, 365 Lost Work Days, or 366 for leap year, will be reported.This metric is the number of lost days recorded within the reporting year and measured separately for lost days associated to Injuries
Recordable work-related accidents rate	Ratio	The recordable work-related accidents rate is a measure of Fatalities, Lost Time Accidents (with and without Life Changing) and Non Lost Time Accidents (with and without restricted duties) related to the working hours.This metric, also called, Total Recordable Incident Rate (TRIR) is calculated by : (number of fatalities, lost time accidents and non-lost time accidents x 1,000,000)/number of hours worked.
Worked hours	Number	This indicator includes all working hours including overtime, for which workers are paid, excluding Vacations/Holidays, National Holidays or any other non-working days available under local benefits programs. It is obtained by the sum working hours reported by all the sites, for each type of worker categories, within the reporting year. The working hours are based on real working hours when available or on the best estimation made by the site according to the headcount and work planning / presence on site and local standards of working time, or by default on an average of 40 hours per week per full time worker present on site.
HUMAN RESOURCES INDICATORS		
Score of the Diversity, Equity & Inclusion Index	Percentage	Imerys' Diversity, Equity and Inclusion Index is a composite metric developed to track diversity, equity and inclusion in the areas of gender balance, pay equity, nationality, disability, as well as engagement scores deriving from employee engagement surveys. It is composed of five equally weighted metrics (20% each) and can result in a score ranging from 0 to +100. The mid-term target for the Group is to increase the score of the Diversity, Equity & Inclusion Index to 100% by the end of 2025.
Number of women Board members	Number of women	Number of women Board members as at December 31
Percentage of women Board members	Percentage	[Total of women Board member / Total Board members] x 100
Number of women at top management level	Number of women	It includes not only Executive Committee members but also Senior Management roles.
Number of men at top management level	Number of men	It includes not only Executive Committee members but also Senior Management roles.
Percentage of women at top management level	Percentage	[Total women at top management level / Total employees at top management level] x 100
Number of women Executive Committee members	Number of women	Number of women Executive Committee members as at December 31
Percentage of women Executive Committee members	Percentage	[Number of women Executive Committee Members / Total Executive Committee Members (including the CEO)] x 100
Number of women in Senior Management roles	Number of women	Number of women that directly reports to Executive Committee members (excluding assistants/secretaries, etc.) or directly reports to the Chief Information Officer or Business Area Purchasing Directors.
Percentage of women in senior management roles	Percentage	[Number of women in senior management roles / Total number of senior managers] x 100
Number of women in manager/ expert/professional roles	Number of women	Employees on positions requiring professional or technical qualification (university degree or equivalent experience), assorted with supervisory and/or expertise responsibilities.
Percentage of women in manager/ expert/professional roles	Percentage	[Number of women in manager/expert/professional roles / Total number of manager/expert/ professional] x 100
Number of women in Paraprofessional roles	Number of women	Number of women not included in the categories: Executive Committee members, Senior Managers or Managers / Experts / Professional.
Percentage of women in Paraprofessional roles	Percentage	[Number of women in Paraprofessional roles / Total number of Paraprofessional roles] x 100
Number of women in the Group	Number of women	This indicator shows the number of women in the Group as at December 31.
Percentage of women in the Group	Percentage	[Total women employees / Total employees] x 100
Percentage of employees with less than 30 years	Percentage	[Total employees with less than 30 years / Total employees] x 100

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Percentage of employees from 30 to 50 years	Percentage	[Total employees from 30 to 50 years / Total employees] x 100
Percentage of employees over 50 years	Percentage	[Total employees over 50 years / Total employees] x 100
Number of employees with a disability	Number of employees	It indicates the number of employees with a least one type of disability of which the recognition, by the relevant country authorities, is still effective as at December 31.
Number of women employees with a disability in the Group	Number of women	Number of women included in the number of employees with a disability.
Number of men employees with a disability in the Group	Number of men	Number of men included in the number of employees with a disability.
Percentage of Registered headcount with a disability	Percentage	[Total employees with a disability / Total employees] x 100
Percentage of persons with disabilities in the Group subject to legal restrictions on the collection of data	Percentage	The number of employees with a disability versus the total number of headcount in the countries the Group has presence and it is legally allowed to collect information on employees' disabilities
Number of trained employees	Number	Number of training hours (whether it is a requirement of the country labor Law or a company decision to update/upgrade the technical or managerial skills of their employees through a formalized curriculum or program (with attendance register); in other words, in-house/external training sessions during working hours, excluding information session or informal meetings (e.g.welcome session)N.B. : EHS training hours included Calculation : Number of training hours taken during the month X number of attendees.
Number of training hours by year	Number	Number of training hours (whether it is a requirement of the country labor Law or a company decision to update/upgrade the technical or managing skills of their employees through a formalized curriculum or program (with attendance register); in other words, in-house/external training sessions during working hours, excluding information session or informal meetings (e.g.welcome session)N.B. : EHS training hours included
Collective bargaining coverage	Percentage	[Number of employees covered at least by one collective bargaining agreements as at December 31 / Total employees] x 100
Number of employee (headcount)	Number	Total number of Imerys employees in headcount as at December 31 who perform work for any of the Imerys' entities. It includes permanent, temporary and non-guaranteed hours employees.
Number of permanent employees	Number	Total number of employees registered in the Imerys headcount on December 31, employed under a contract of indefinite duration and directly paid by one of the Imerys companies. Full-time and part-time workers are included in permanent employees, except non-guaranteed hours employees.
Number of temporary employees	Number	Total number of employees registered in the Imerys headcount on December 31, employed under a fixed-term contract / agreement and directly paid by one of the Imerys companies. Seasonal, full-time and part-time workers are included in non-permanent employees, except non-guaranteed hours employees. As per the regulation of users country, the apprentices are included in the non-permanent employees.
Number of non-guaranteed hours employees	Number	Non-guaranteed hours employees are employed directly by an Imerys company without a guarantee of a minimum or fixed number of working hours. The employee may need to make themselves available for work as required, but Imerys is not contractually obliged to offer the employee a minimum or fixed number of working hours per day, week, or month.
Average number of employees (Headcount)	Number	Average of the total number of Imerys headcount at the end of each month of the year.
Non-employee workers in Imerys' workforce (Full-Time Equivalent)	Number	Number of total annual hours worked by non-employees, including self-employed workers and temporary agency workers / monthly statutory hours of a permanent employee in the respective countries / 12 months
Number of employees who have left Imerys during the year	Number	Number of permanent employees who leaves voluntarily or due to dismissal, retirement or death during the year.
Rate of employee turnover	Percentage	Number of permanent employees who have left Imerys during the year / average permanent headcount of the year.
Number of reported incidents of discrimination (including harassment)	Number	Number of whistleblowing reports raised during the year regarding discrimination or harassment which have been confirmed after investigation
Number of confirmed reported incidents on other work-related complaints	Number	Number of whistleblowing reports raised during the year regarding allegations related to human resources matter, other than discrimination and harassment, which have been confirmed after investigation

Calculation methodology of indicators related to ESRS S2 - Workers in the value chain

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Supplier sustainability rating indicator	Percentage	This metric measures Imerys' commitment in ensuring exemplary Business Conduct by maintaining the highest standard of business ethics and compliance, respecting and implementing fair operating practices, ensuring responsible purchasing. This program is based on the assessment of supplier sustainability performance based on a comprehensive review of human rights, labor, ethics, environmental and supply chain management practices.

Calculation methodology of indicators related to ESRS S3 - Affected communities

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Stakeholder engagement progress indicator (for priority sites)	Percentage	Percentage of priority sites having a stakeholder engagement plan (step 1 and Step 2) completed
Sites with stakeholder mapping	Percentage	Percentage of sites having a stakeholder engagement plan (step 1 and Step 2) completed
Sites with a community grievance mechanism	Percentage	Percentage of sites having a community grievance mechanism
Donations	Monetary	This metrics reports the amount of donations approved during the year
Employees included in the volunteering pilot program	Number	Number of employees having access to the volunteering pilot program
Number of volunteering hours	Number	Number of hours in which employees dedicated to the volunteering pilot program
Severe human rights issues and incidents connected to affected communities	Number	Number of whistleblowing reports raised during the year regarding allegations related to severe human rights issues and incident connected to affected communities, which have been confirmed after investigation

Calculation methodology of indicators related to ESRS S4 - Consumers and end-users

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Products in Application Combinations (PAC) assessment indicator	Percentage	This indicator measures the progress of the evaluation of the Group existing product portfolio using the SustainAgility Solutions Assessment (SSA).The SustainAgility Solutions Assessment (SSA) has been designed in line with the World Business Council for Sustainable Development (WBCSD[1]) guidelines for Portfolio Sustainability Assessments (PSA[2]). The Group existing portfolio is read as Product in Application Combination (PAC) and each PAC is then given a rating according that is meets or not specific sustainability criteria.The metrics is a ratio of yearly revenue generated by the PAC rated according to SSA over the annual turnover of the Group.
Group New Product Developments SustainAgility scoring indicator	Percentage	This indicator evaluates Imerys' dedication to innovate and grow the Group portfolio by assessing the sustainability of new products, processes and services in order to deliver sustainable solutions for society. This metric tracks the percentage of the Group's new products that achieved one of the top two categories in the four-tier SustainAgility Solutions Assessment framework, qualifying as a "SustainAgility Solution".
Revenue by SSA Matrix Categories	€ million	Revenue by SSA refers to the proportion of the Group's revenue attributed to Products in Application Combinations that have been assessed using the SSA methodology. This categorization is based on specific sustainability criteria, allowing Imerys to evaluate and classify its portfolio accordingly. The revenue classification is derived from the SSA methodology, which assesses the sustainability performance of Product Application Combinations (PACs)

Calculation methodology of indicators related to ESRS G1 - Business conduct

Metric	Unit	Calculation methodology, significant assumptions, and contextual information
Group's external sustainability rating progress indicator	Percentage	Imerys is committed to exemplary business conduct, ensuring ethical behavior and fair operating practices across all Group activities. In the spirit of continuous improvement, Imerys assesses its sustainability policies, actions and results annually through a comprehensive EcoVadis sustainability assessment, sharing these results openly with internal and external stakeholders.
Incidents of corruption and bribery		
Number of convictions for violation of anti-corruption and anti-bribery laws	Number	This metric shows the number of convictions raised during the year for violation of anti-corruption and anti-bribery laws in the Group.

1 The WBCSD is a global, CEO-led organization of over 200 leading businesses working together to accelerate the transition to a sustainable world by making more sustainable businesses more successful.
2 Portfolio Sustainability Assessments (PSA) is a methodological framework to proactively steer product portfolios toward improved sustainability outcomes https://www.wbcsd.org/Programs/Circular-Economy/Resources/Portfolio-Sustainability-Assessment-v2.0.

1.9. REPORT ON THE CERTIFICATION OF SUSTAINABILITY INFORMATION

This is a translation into English of the statutory auditors' report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852 of the Company issued in French and it is provided solely for the convenience of English-speaking users.

This report should be read in conjunction with, and construed in accordance with, French law and the H2A guidelines on "Limited assurance engagement - Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852

Report on the certification of sustainability information and verification of the disclosure requirements under Article 8 of Regulation (EU) 2020/852 of the company IMERYS, relating to the year ending December 31, 2025

To the Annual General Meeting

IMERYS
43 quai de Grenelle
75015 Paris

This report is issued in our capacity as statutory auditor of the company IMERYS ("the Group"). It covers the sustainability information and the information required by Article 8 of Regulation (EU) 2020/852, relating to the year ended December 31, 2025, included in the Group management report and presented in part I of the chapter 3 "Sustainability report" in the universal registration document (hereinafter referred to the "Sustainability report of the Group").

Our procedures, which relate to this information, were carried out in an evolving context characterized by uncertainties about the interpretation of texts and the development of market practices.

Pursuant to Article L.233-28-4 of the French Commercial Code, IMERYS is required to include the above-mentioned information in a separate section the Group management report. This information enables an understanding of the impacts of the activity of the Group on sustainability matters, as well as how these matters influence the evolution of the Group's business, its performance and position. Sustainability matters include environmental, social and corporate governance matters.

Pursuant to Article L.821-54 paragraph II of the aforementioned Code, our responsibility is to carry out the procedures necessary to issue a conclusion, expressing a limited assurance, on:

- compliance with the requirements set out in the sustainability reporting standards adopted by the European Commission pursuant to Article 29b of Directive (EU) 2013/34 of the European Parliament and of the Council of 26 June 2013, as amended by Directive (EU) 2022/2464 of the European Parliament and of the Council of 14 December 2022 (hereinafter ESRS, for European Sustainability Reporting Standards) of the process implemented by the Group to determine the information reported, which includes, where the Group is subject to it, the obligation to consult the social and economic committee provided for in the sixth paragraph of Article L.2312-17 of the French Labor Code;
- compliance of the sustainability information included in the Group Sustainability Report with the provisions of Article L.233-28-4 of the French Commercial Code, including with the ESRS; and
- compliance with the reporting requirements set out in Article 8 of Regulation (EU) 2020/852.

This engagement is carried out in compliance with the ethical rules, including independence, and the quality rules prescribed by the French Commercial Code.

It is also governed by the guidelines of the French National Audit Authority (H2A) *"Limited assurance engagement - Certification of sustainability reporting and verification of disclosure requirements set out in Article 8 of Regulation (EU) 2020/852".*

In the three separate sections of the report that follow, we present, for each of the sections of our engagement, the nature of the procedures that we carried out, the conclusions that we drew from these procedures and, in support of these conclusions, the elements to which we paid particular attention and the procedures that we carried out with regard to these elements. We draw your attention to the fact that we do not express a conclusion on any of these elements taken individually and that the procedures described should be considered in the overall context of the formation of the conclusions issued in respect of each of the three sections of our engagement.

Finally, where deemed necessary to draw your attention to one or more disclosures of sustainability information provided by IMERYS in the Group management report, we have included an emphasis of matter paragraph.

Limits of our engagement

As the purpose of our engagement is to express limited assurance, the nature (choice of techniques), extent (scope) and timing of the procedures are less than those required to obtain reasonable assurance

This engagement does not provide a guarantee regarding the viability or the quality of the Group's management, in particular, it does not provide an assessment of the relevance of the choices made by the Group in terms of action plans, targets, policies, scenario analyses and transition plan, which would go beyond compliance with the ESRS reporting requirements.

Our engagement also does not cover comparative information relating to the 2023 financial year. In addition, as forward-looking information is inherently uncertain, future outcomes may differ, sometimes significantly, from the forward-looking information presented in the Group management report.

Our engagement does, however, allows us to express conclusions concerning the process for determining the sustainability information to be reported, the sustainability information itself, and the information reported pursuant to Article 8 of Regulation (EU) 2020/852, as to the absence of identification or, on the contrary, the identification of errors, omissions or inconsistencies of such importance that they would be likely to influence the decisions that readers of the information subject to this engagement might make.

Sustainability information and the information provided for in Article 8 of Regulation (EU) 2020/852 may be subject to inherent uncertainty arising from the state of the science knowledge and the quality of the external data used. Certain information is sensitive to the methodological choices, assumptions and/or estimates made for their preparation and presented in the Group management report.

Compliance with the requirements set out in the ESRS of the process implemented by the Group to determine the information reported, including the obligation to consult the social and economic committee provided for in the Article L. 2312-17 of the French Labor Code

Nature of the procedures carried out

Our procedures consisted in verifying that:

- the process defined and implemented by the Group, including the obligation to consult the social and economic committee provided for in the sixth paragraph of Article L.2312-17 of the French Labor Code, has enabled it, in accordance with the ESRS, to identify and assess its impacts, risks and opportunities related to sustainability matters, and to identify those material impacts, risks and opportunities that have led to the publication of sustainability information in the Sustainability report of the Group, and
- the information provided on this process also complies with the ESRS.

Conclusion of the procedures carried out

Based on the procedures we have carried out, we have not identified any material errors, omissions or inconsistencies regarding the compliance of the process implemented by the Group with the ESRS.

Elements that received particular attention

We set out below the elements that have been the subject of particular attention in relation to our assessment of compliance with the ESRS of the process implemented by the Group to determine the information reported.

The information relating to how the Group updates its double materiality analysis is set out in section 1.1.4.1. "Process to identify and assess material impacts, risks and opportunities [IRO-1]" of the Sustainability report of the Group.

We have, through interviews with management and/or others as appropriate and through inspection of available documentation, become aware of:

- the identification and assessment of the internal and external factors that led to the update of the double materiality analysis. These include in particular the identification of new influencing factors, the evolution of stakeholders' interests and points of view and the consideration of market practices;
- the changes made, in comparison with the prior reporting period, to the list of impacts (negative or positive), risks and opportunities ("IRO"), actual or potential, identified by the Group, and to the process implemented by the Group to assess impact materiality and financial materiality in order to determine the material information disclosed (including the setting of thresholds).

Based on our professional judgment, our procedures consisted primarily of:

- exercising our professional skepticism regarding the documentation of the analyses carried out by the Group, as well as on the approach implemented by the latter to identify the internal and external factors to be considered;
- assessing the appropriateness of internal and external factors considered by the Group with regard to our knowledge of the Group and its own facts and circumstances specific to the Group;
- assessing the relevance of the changes made by the Group to the assessment of the actual and potential impacts, risks and opportunities identified, with regard to:
  - our knowledge of the Group and its own facts and circumstances specific to the Group;
  - the risk analysis carried out by the Group;
  - the available sector analyses and competitive benchmarks we considered relevant;
- assessing, for the changes affecting the actual and potential impacts, risks and opportunities, the compliance of the impact and financial materiality assessment process implemented by the Group (including the setting of thresholds) with the criteria defined by ESRS 1;
- assessing the appropriateness of the description provided in this respect in section 1.1.4.1. "Process to identify and assess material impacts, risks and opportunities [IRO-1]" of the Group Sustainability Report.

Compliance of the sustainability information included in the Sustainability report of the Group with the provisions of Article L.233-28-4 of the French Commercial Code, including the ESRS

Nature of procedures carried out

Our procedures consisted in verifying that, in accordance with legal and regulatory requirements, including the ESRS:

- the disclosures provided enable an understanding of the general basis for the preparation and governance of the sustainability information included in the Sustainability report of the Group, including the basis for determining the information relating to the value chain and the exemptions from disclosures used;
- the presentation of this information ensures its readability and understandability;
- the scope chosen by the Group for providing this information is appropriate; and
- on the basis of a selection, based on our analysis of the risks of non-compliance of the information provided and the expectations of users, that this information does not contain any material errors, omissions or inconsistencies, i.e. that are likely to influence the judgement or decisions of users of this information.

Conclusion of the procedures carried out

Based on the procedures we have carried out, we have not identified material errors, omissions or inconsistencies regarding the compliance of the sustainability information included in the Sustainability report of the Group, with the provisions of Article L.233-28-4 of the French Commercial Code, including the ESRS.

Elements that received particular attention

We set out below the elements that have been the subject of particular attention in relation to our assessment of the compliance of the sustainability information set out in section 1.2. "Caring for our planet" of the Sustainability report of the Group with the provisions of Article L.233-28-4 of the French Commercial Code, including the ESRS.

Information provided in application of environmental standards (ESRS E1)

Information reported in relation to the assessment of greenhouse gas (GHG) emissions (scopes 1, 2 and 3) and transition plan for climate change mitigation are mentioned in sections 1.2.2.6 respectively "Metrics related to climate change [E1-5 to E1-8]" and 1.2.2.4. "Transition plan, actions, and resources regarding climate change mitigation [E1-1, E1-3 & E1-4]" of the Sustainability report of the Group.

We set out below the elements that have been the subject of particular attention in relation to our assessment of the compliance of this information with the ESRS.

Our procedures consisted primarily of:

- assessing, through interviews conducted with the management or the relevant individuals, in particular, the "Climate & Portfolio Sustainability" Department, whether the description of the policies, actions and targets implemented by the Group covers the following areas: climate change mitigation, energy and climate change adaptation;
- assessing the appropriateness of the information presented in Section 1.2.2. "Climate Change [ESRS E1]" of the Sustainability Report of the Group and its overall consistency with our knowledge of the Group.

- With regard to the information published on the greenhouse gas (GHG) emissions:
  - we obtained an understanding of the greenhouse gas emissions inventory protocol used by the Group to draw up greenhouse gas emissions report and verified its correct application, in particular with regard to changes in the method for calculating activity data, inclusions and exclusions from scope 3 categories and the transparency of the disclosures provided in this respect, the process of gathering information, the emission factors used and the calculation of the related conversions as well as the calculation and extrapolation assumptions;
  - through inquiries with management, we obtained an understanding of the main changes during the year in the scope of data collection for certain categories of activities, that could have an impact on the determination of scope 3 greenhouse gas emissions;
  - we reconciled physical data (such as energy consumption), on a sampling basis, to the underlying data used to calculate scope 1, 2 and 3 greenhouse gas emissions and traced them to supporting documents;
  - With regard to the estimates that we considered to be critical, used by the Group to prepare scope 1, 2 and 3 greenhouse gas emissions, we assessed whether the methods had been applied consistently.
- With regard to our procedures regarding the Transition plan for climate change mitigation, our procedures primarily consisted of assessing whether the published information appropriately describes the key underlying assumptions of this plan, it being specified that we are not required to express a conclusion on the relevance or the level of ambition of the objectives set out in this transition plan.

Compliance with the reporting requirements set out in Article 8 of Regulation (EU) 2020/852

Nature of procedures carried out

Our procedures consisted in verifying the process implemented by the Group to determine the eligible and aligned nature of the activities of the entities included in the consolidation.

They also involved verifying the information reported pursuant to Article 8 of Regulation (EU) 2020/852, which involves checking:

- the compliance with the rules applicable to the presentation of this information to ensure that it is readable and understandable;
- on the basis of a selection, the absence of material errors, omissions or inconsistencies in the information provided, i.e. information likely to influence the judgement or decisions of users of this information.

Conclusion of the procedures carried out

Based on the procedures we have carried out, we have not identified any material errors, omissions or inconsistencies relating to compliance with the provisions of Article 8 of Regulation (EU) 2020/852.

Elements that received particular attention

We determined that there were no such elements to disclose in our report.

Neuilly-sur-Seine and Paris-La Défense, February 27, 2026

PART 2 VIGILANCE PLAN

In accordance with article L. 225-102-1 of the French Commercial Code, the Vigilance Plan (the "Vigilance Plan") aims to set out the reasonable measures of vigilance put in place within the Group to identify risks of and prevent severe impacts on human rights, fundamental freedoms, health and safety and the environment resulting from the activities of the Group, including all Group subsidiaries as defined in point II of article L. 233-16 of the French Commercial Code, as well as the activities of subcontractors and suppliers, in France and abroad, with which Imerys has an established commercial relationship, where such activities are linked to this relationship (hereafter collectively referred to as Suppliers).

This Vigilance Plan summarizes the key elements of the Group's "Duty of Care" program. The Group has established a Duty of Care policy setting out Imerys' approach to protecting human rights, fundamental freedoms, health and safety and the environment and the structure and functioning of its Duty of Care program. It provides guidance to Imerys employees regarding their Duty of Care responsibilities and identifies how Duty of Care is to be managed within the Group.

2.1. GOVERNANCE

Every Imerys employees, officers and directors have a key role to play in preventing and detecting human rights, health and safety and environmental risks related to Imerys' operations and its Suppliers in their daily work. In addition, a clear allocation of responsibilities has been established to design, implement and monitor an adequate and effective Duty of Care program.

- **Audit Committee:** every year, the Audit Committee reviews the performance and effectiveness of the Duty of Care program through the Ethics Committee's Report.
- **Executive Committee:** the Executive Committee has established the Ethics Committee to assist the Executive Committee in ensuring the Group's operations are conducted ethically, in particular in accordance with Duty of Care regulations. It is regularly informed of the performance and effectiveness of the Duty of Care program by the Chair of the Ethics Committee.
- **Ethics Committee:** it is accountable for the design and monitoring of the Duty of Care program. This includes ensuring that the Duty of Care policy and related documents are adequate, monitoring the Duty of Care risk mapping, validating the Vigilance Plan, monitoring training plans and other awareness-raising measures, ensuring that sufficient human and financial resources are available to efficiently implement the program, assessing the performance and effectiveness of the program, and identifying new ideas to improve this program. The Ethics Committee reports on an annual basis to the Audit Committee of the Board of Directors.
- **Antitrust & Compliance General Counsel:** the Antitrust & Compliance General Counsel reports to the Group General Counsel & Group Secretary and is responsible for the Duty of Care program. This includes defining and rolling out the Duty of Care policy and related procedures, defining and implementing the Duty of Care objectives which are part of the ethics & compliance roadmap, monitoring training and communication plans, providing the Ethics Committee with indicators to assess the performance and effectiveness of the program. S/he is supported by the Group Chief Sustainability Officer, the Group Chief Human Resources Officer, the Group Health and Safety Vice President and the Group Sustainable Purchasing Director in the designing and monitoring of the Duty of Care program.
- **Sustainable Purchasing Committee**: it is responsible for ensuring the completion of the Duty of Care risk mapping of Suppliers and ensuring the development and implementation of the responsible purchasing program. The Committee is chaired by the Group Purchasing Vice President and is coordinated by the Group Sustainable Purchasing Director. The Group Chief Sustainability Officer, Antitrust & Compliance General Counsel, and Climate and Portfolio Vice president are part of this committee, who meet monthly, to steer the Responsible Purchasing program.

2.2. DUTY OF CARE RISK MAPPING PROCESS

As part of its Vigilance Plan, the Group has established a specific risk mapping process to identify, assess and prioritize, human rights, health, safety and environmental risks within its operations and those of its subsidiaries as well as those of its Suppliers in different geographical areas, herein referred to as the "Duty of Care risk mapping process". The results of the Duty of Care risk mapping process are integrated as appropriate with the Group overall risk mapping as presented in Chapter 2, section 2.1 of the Universal Registration Document.

In 2018, Imerys drew up its first Duty of Care risk map. Between 2019 and 2021, using a regional "workshop technique", a full cycle of updates was completed covering all the regions in which the Group operates (Asia-Pacific, Europe 1 (European countries with CPI > 50), Europe 2 (European countries with CPI < 50), Middle East & Africa, North America, and South America). Thanks to these yearly regional workshops, all functions, business areas, levels in the hierarchy and countries in the region were duly represented.

In 2023 and 2024, the Group revised certain aspects of its Duty of Care risk mapping process to align with the requirements of the Corporate Sustainability Reporting Directive standards on impact materiality assessment, to increase the level of granularity of its risk map and involve more experts in the process. As a result the Duty of Care risk map was also updated in 2023 and 2024.

The Duty of Care risk map is based on a list of risk scenarios identifying actual or potential impacts on human rights, health, safety and the environment. This was reviewed centrally by the sustainability, compliance and responsible purchasing functions, and it reflects the list of sustainability matters covered by the CSRD. This Duty of Care risk register (covering impacts on human rights, health, safety and the environment) includes 41 potential risk scenarios related to Imerys' operations and 13 potential risk scenarios related to its suppliers.

The scenarios for operations are classified into six categories:

- working conditions: insecure employment, inadequate working time, inadequate wages, inadequate social dialogue, including collective bargaining, inadequate freedom of association, inadequate work-life balance;
- equal treatment: gender discrimination, non-development of employees skills, non-inclusion of persons with disabilities, violence and harassment, lack of diversity in the workplace,
- other human rights: child labor, forced labor, inadequate housing, inadequate facilities, non-protection of employee personal data;
- affected communities: negative impacts on safety, living conditions (water accessibility, food, housing) and property of local communities, negative impacts on land rights and land access restrictions (including resettlement), negative impacts on local communities related to security arrangements, violation of the civil and political rights among local communities, violation of the particular rights of indigenous people;
- health and safety: occupational illness, occupational injury;
- climate change and environment: climate change mitigation, climate change adaptation, pollution of air, pollution of water, water depletion, pollution of soil, pressure on biodiversity, impact/loss of biodiversity, production of mineral waste, industrial waste, inadequate management of substances of concern and inadequate management of substances of very high concern.

The scenarios for suppliers are classified into three categories:

- human rights: inadequate working conditions, discrimination and harassment, child labour, forced labour, inadequate access to water and sanitation (including inadequate housing);
- health and safety: occupational illness, occupational injury;
- climate change and environment: climate change, pollution of air, pollution of water, water depletion, loss of biodiversity, production of waste.

Following a "workshop technique", as in past risk mappings, two sets of expert workshops covering all geographic areas where the Group operates were organized: the first to assess risks stemming from Imerys' operations, the second to assess risks related to Imerys' suppliers. The "operations workshop" brought together senior representatives from the Human Resources, Diversity Equity & Inclusion, Health and Safety and Sustainability functions (the later covering the topics of environment, climate change and affected communities), while the "Supplier workshops" included members of the Purchasing function selected in order to achieve representativeness of all purchasing categories and geographies.

In 2023, as a result, an updated risk map was drawn identifying and hierarchizing the risk scenarios based on their relative severity and likelihood. The severity of a risk scenario results from the scale of its impact on people or the environment (as assessed by workshop participants) and the scope of its impact (based either on objective quantitative data reflecting Imerys' risk exposure or internationally recognized country risk indexes [1]). The impact's likelihood is assessed by workshop participants taking into account existing controls and mitigation measures. Qualitative information gathered during workshops is also used to interpret the results and prioritize negative impacts and design action plans. Finally, as in previous years, the Duty of Care risk map was reviewed and approved by the Ethics Committee.

In 2024, the Duty of Care risk map was revised to take into account the finalization of the double materiality analysis, in particular the addition of four new scenarios for operations (pollution of soil, inadequate management of substances of concern, inadequate management of substances of very high concern, and pressure on biodiversity). It was reviewed and approved by the Ethics Committee. In 2025, the risk map was not updated, in the absence of trigerring event.

√ *For more information on the Group risk management process, see* chapter 2 of the Universal Registration Document.

√ *For more information on the evaluation of climate-related risks related to Group operations, refer to* [ESRS 2 IRO-1 E1] of the present chapter.

1 Indexes include, but are not limited to, the Yale University Environmental Performance Index, the International Labour Organization Child Labour Index, the Global Slavery Index, the Ecovadis Country Risk Score, the World Resources Institute Aqueduct Index.

2.3. ASSESSMENT AND MAIN CONTROLS

The Group assesses its operations and the situation of its suppliers taking into account, inter alia, the Duty of Care risk maps developed through the risk management process.

Imerys operations and Group subsidiaries assessments and main controls

The Group assesses human rights, health and safety and environmental risks identified as a result of the Duty of Care risk mapping. This assessment includes identification, analysis and ranking processes. The Duty of Care risk map, which was last updated in 2024, indicates that potential risks include health and safety, environment, climate change and some specific human rights topics. To mitigate and prevent these risks, Imerys implements high standards and strict rules relating to human rights, health and safety and the environment (amongst other themes) in all Group operations across the globe. These standards and rules are expressed in the Imerys Code of Business Conduct and Ethics and in the Sustainability Charter, completed by policies and procedures. This framework defines clear requirements for all Group operations. Implementation of Group policies and procedures are the responsibility of all business and support functions. The effectiveness of these control measures is regularly assessed as part of the Duty of Care risk mapping process. In addition, the Group assesses its sustainability policies, actions and results annually through a comprehensive independent sustainability assessment, sharing the results with internal and external stakeholders.

Details on the management of occupational safety & health risks are presented in [ESRS S1] of the present chapter, management of human rights risks is presented in [ESRS S1] of the present chapter and management of environmental risks is presented in [ESRS E2] and [ESRS E4] of this present chapter.

Imerys Suppliers assessments

Based on the Duty of Care risk mapping process described previously, the Group has identified potential salient human rights, health, safety and environmental risks within its value chain. At Group level, the risk map, which was last updated in 2023 with respect to suppliers, indicated three potential salient risks including:

- potential impacts on Supplier workers exposed to occupational injury or illness risks;
- potential impacts on Supplier workers related to inadequate working conditions, including wages, working time, social dialogue, collective bargaining and freedom of association; and
- potential increases in air or water pollution, and potential impacts on climate change and biodiversity due to Supplier operations.

In addition, the 2023 risk mapping enabled the Group to assess specific risks for each of the seven purchasing categories, thus enabling the Group to have a more informed vision of the risks faced in its upstream value chain.

Following the assessment of each purchasing category, for all the human rights, health, safety and environmental scenarios assessed, the "most-at-risk" Supplier category is considered the raw material Supplier category related to the supply of talc, bauxite and mica.

At the individual Supplier level, the Group regularly assesses its Suppliers at the onboarding stage and throughout the business relationship, focusing on most-at-risk and strategic Suppliers.

The individual Supplier assessment process comprises:

- the assessment of Suppliers at the onboarding stage. This process is defined in the Group purchasing policy. It includes a Suppliers' compliance due diligence procedure to decide whether or not to enter or renew a business relationship with a Supplier. The procedure takes into account the result of the Duty of Care risk mapping and Supplier's sustainability rating (e.g. EcoVadis score). This procedure has been applied to the existing most-at-risk Suppliers above a certain spend;
- the assessment of Imerys' Supplier panel above a certain spend through a sustainability rating scheme (e.g. Ecovadis). The Group Sustainable Purchasing Director is in charge of designing and monitoring the deployment of this process.

At the end of 2025, 75% of Group Suppliers by spend have been assessed. These assessments cover over 1,600 Suppliers and represent all categories of Suppliers.

Imerys Suppliers risk prevention and mitigation measures

The Group implements prevention and mitigation measures, in particular:

- Suppliers are required to acknowledge and comply with the Group Imerys Supplier ESG Standards and the Supplier EHS Policy; Suppliers are excluded from contracting if they cannot achieve minimum ESG (environment, social , including occupational health and safety) requirements, as outlined in the ESG Supplier Standards;
- In case of doubt on compliance with Imerys Supplier ESG Standards, Imerys may verify the alignment of Suppliers with the Supplier ESG Standards through the use of self-declaration, self-assessments, or assessments by Imerys teams;
- Imerys purchasing process are based on objective supplier selection criteria (including ESG performance) for contract awarding, with the goal of ensuring fair treatment and opportunity;
- Imerys is fully committed to support Suppliers' development and continuous improvement and has a Supplier development process in place, which includes information and trainings for Suppliers on how to build capacity and improve sustainability performance as well as access to sustainability benchmarks against peers;
- Suppliers must be able to demonstrate that they can meet the minimum criteria and where any gaps are identified, through formal or informal assessments or audits, Suppliers must be willing to develop and implement a corrective action plan within an agreed timeframe;
- In the case Imerys has a reasonable suspicion that Supplier is directly committing a serious violation of the Standards, or sourcing from any party committing a serious violation of the Standards, Imerys may suspend or terminate the relationship with Supplier, without any liability toward the Supplier;
- The Group conducts audits focusing on Suppliers ranked as "most-at-risk" based on the Group risk mapping and assessment process described above. In specific cases the Group may conduct additional due diligence or specialized external third-party audits prior to or after contract award;
- Imerys buyers are trained on key aspects of the responsible purchasing program to support its implementation, recognize risks and develop mitigation actions. 78% of buyers were trained on sustainability topics in 2025.

Within the most-at-risk category of raw material Suppliers, the purchasing organization has launched an audit program with both internal and external auditors. Internal auditors have been trained and completed SA8000 Social Accountability [1] Auditing training. External third party audits are conducted by certified auditors against SA8000 Standard.

In 2025, seven new audits were carried out on targeted most-at-risk suppliers, in addition to the two others already carried out in 2024.

Alert mechanism

The Group's whistleblowing system, Speak up!, operated by an independent qualified third party and open to all employees and external parties is designed to collect and manage reporting of any suspected violations of the Group Code. For more information on Imerys' whistleblowing system Speak up! (see **section 1.4.1.2, paragraph** *"Alert system and protection of whistleblowers"* **of the present chapter**).

The Group Community Grievance Mechanism is another mechanism for external stakeholders to voice their concerns and grievances, including potential violations of the Group Code, directly at site level.

√ *For more information on Imerys' Community Grievance Mechanism, refer to* **[ESRS G1] of this chapter**.

Monitoring and evaluation of the effectiveness of control measures

In 2025, 44 cases of suspected violations of the Group Code were reported through Speak up!, and 5 of these cases were reported by external stakeholders. The reported cases were thoroughly reviewed and investigated as per the Group policy. Following investigation, 5 of the reported cases were confirmed to be cases of violations of the Group Code. The confirmed violations related to worked related misconducts including harassment (3) and conflict of interests (2). Once the reported cases are confirmed, appropriate remedial actions are defined, implemented and are monitored by the Internal Audit and Control department.

Verification of compliance with the Group Code and other Group policies and procedures is conducted through various internal assessment processes at both local and Group level. Such processes are led by different functions within the Group organization, including but not limited to Legal, Sustainability, Health and Safety, Mining and Resources Planning and Internal Control as described in **Chapter 2, section 2.2 of the Universal Registration Document**.

√ *For more information with regards to the requirements of the "Duty of Care" law, see* **the correlation table included in section 9.5.5.2 of the Universal Registration Document**.

1 The SA8000 Standard is an auditable certification standard that measures the performance of companies in eight areas of social accountability in the workplace: child labour, forced labour, health and safety, free association and collective bargaining, discrimination, disciplinary practices, working hours and compensation. https://sa-intl.org/programs/sa8000/.

PART 3 MINERAL RESERVES AND RESOURCES

The Mineral Reserves and Resources data published in this present chapter have been prepared in alignment with the Pan-European Standard for reporting of Exploration Results, Mineral Resources and Reserves 2021 (PERC Reporting Standard 2021), which is an internationally recognized reporting standard for mineral assets and a member of the CRIRSCO group of codes [1]. In accordance with Group procedures, the Group's Mineral Reserves and Mineral Resources are regularly audited by internal and external auditors.

3.1. MINERAL ASSET REPORTING

The Group Mineral Assets are composed of both Mineral Reserves and Mineral Resources. Mineral Reserves correspond to the portions of a deposit that are demonstrably economic to extract given the prevailing or reasonably forecast regulatory and economic climate at the time of estimation. Mineral Reserves are subdivided into Proven or Probable to reflect the level of certainty in the geological understanding of the deposit, Proven being the higher level. Mineral Resources include deposits or portions of deposits for which extraction has yet to be demonstrated as economically profitable, but it is reasonable to expect that extraction will be viable in the future. These assets typically lack the detailed (mining, processing, marketing and/or legal) technical studies required to demonstrate their economic viability. Mineral Resources are classified in ascending order of geological confidence as Inferred, Indicated or Measured.

The Group's processing operations consume its Mineral Reserves. Imerys continuously undertakes initiatives to compensate for the consumption of these Mineral Reserves in order to maintain a mineral inventory equivalent to around 20 years' worth of production. On existing sites, this involves the collection and analysis of additional data and detailed modeling of already identified Mineral Resources to confirm the potential for exploitation based on quality, quantity, mining parameters, available markets and costs as well as consideration of any potential environmental and social impacts. Where these studies lead to a positive conclusion, Imerys seeks to obtain the necessary exploitation rights (outright ownership, long-term lease or concession), permits and official authorizations. If these elements can be obtained, the Mineral Resources may be converted into Mineral Reserves. Group Mineral Reserves can also be replaced or increased through acquisitions from third parties or acquisitions of companies as part of the Group's external growth operations.

3.2. MINERAL ASSET AUDITS

To ensure consistent reporting across all Group entities and alignment with all relevant standards, internal and external audits are conducted over a three to six-year cycle. Internal audits are conducted by experienced geologists and mining engineers who are independent of the sites they audit. Each internal audit is conducted by two people using standard assessment matrices. The internal reporting and internal audit system undergoes a third party audit at least every five years. Audit results are published in a report setting out any comments and improvement requirements, the implementation of which is then tracked. These audits are an opportunity to share best practices and drive continuous improvement in Mineral Asset management and exploitation.

The results of the Mineral Reserves and Mineral Resources reporting and auditing are assessed by the Audit Committee. Between December 2025 and February 2026, SRK Consulting (UK) Ltd has undertaken an external independent review of the Mineral Reserve and Resources Reporting and Auditing Processes of Imerys. The review has concluded that the governance, processes and auditing regime currently in place are both in line with, and in many instances exceed, the Mining Industry's normal and best practices around Mineral Asset reporting and control, and are adequate and appropriate to ensure compliance with the Pan-European standard for Reporting Exploration Results, Mineral Resources and Reserves ("The PERC Reporting Standard" or "PERC").

1 *CRIRSCO: Committee for Mineral Reserves International Reporting Standards.*

3.3. KEY MINERALS

1) **Ball clays** are very fine-grained sedimentary clays with high plasticity. Once extracted, clays are selected, processed and blended to achieve the desired properties, such as rheological stability, high resistance and mechanical strength.
2) **Bentonite** is an alumino-silicate clay formed from altered volcanic rocks, it has high rheological and absorbent properties.
3) **Calcium carbonates** include marble, limestone and chalk. Processed carbonates are used in different forms. Ground natural calcium carbonate (GCC) is used for its whiteness and alkaline properties. Precipitated calcium carbonate (PCC) is a synthetic product obtained from natural limestone that contributes excellent optical properties to finished products.
4) **Diatomite** is a sedimentary mineral composed of the silicon-rich skeletons of diatoms – unicellular algae present in marine and lake environments. It is known for its low density, high surface area, high porosity and mattifying properties.
5) **Feldspars** are naturally occurring alumino-silicate minerals containing varying concentrations of potassium, sodium, calcium and/or lithium, and are used for their fusing properties at high and low temperatures.
6) **Kaolin** is composed predominantly of kaolinite, a white hydrated alumino-silicate clay produced by the geologic alteration of granite and similar types of rock. The high temperature (7001,200°C) to which it is subjected during the calcination process transforms kaolin into a whiter and more inert mineral. The kaolin family of minerals also includes halloysite, prized *-in fine* porcelain manufacture for its whiteness and translucence.
7) **Perlite** is a very specific type of volcanic rock with a natural water content of between 2% and 5%. Perlite is a low-density, high-porosity mineral. Processed and subsequently heated, perlite expands up to 20 times its original volume, creating a multi-cellular material with a large specific surface area at low density.
8) **Refractory minerals** are valued for their resistance to extreme temperatures, mechanical stresses and corrosion. They include refractory clays (transformed by calcination to chamotte), bauxite and andalusite.
9) **Talc** is a very soft hydrated magnesium silicate with properties unique to the deposit from which it is extracted.
10) **Wollastonite** is a metamorphic calcium mineral associated with skarns. Its elongated crystal structure and thermal properties are utilized in ceramics, cements, paints and plastics
11) **Lithium** is the third element of the periodic table. This light metal has a high charge density making it a key component of modern batteries.

Imerys extracts many other minerals, including bauxite, moler (a natural blend of diatoms and clays with highly absorbent properties), mica and zeolite. Imerys also produces high-quality quartz minerals required to produce silicon metal and ferro-silicon, both of which are used in special steel alloys. Imerys produces a range of high-quality synthetic graphites and talcs as well as the highest quality of fused magnesia, carbon black and zirconia.

3.4. MINERAL RESERVES AND RESOURCES

For the clarity and materiality of reporting its Mineral Reserves and Resources, Imerys has grouped mineral category estimates together. This also protects commercially sensitive information related to individual extraction sites. This practice is in accordance with the "Reporting of Industrial Minerals, Dimension Stone and Aggregates" section of the PERC Reporting Standard.

Mineral Resources are reported separately from Mineral Reserves and both types are reported as final products. Product mass is expressed in thousands of metric tons of minerals marketable in dry form. The corresponding estimates at December 31, 2024 are presented for the purpose of comparison. Changes in estimates of Mineral Reserves and Mineral Resources between December 31, 2024 and December 31, 2025 correspond to minerals used in production, the ongoing exploration and assessment of new and existing assets, technical studies, changes in ownership and mining rights, as well as acquisitions and disposals made as part of normal business. Mining assets totaled €395.5 million at December 31, 2025 (€422.3 million at December 31, 2024).

In accordance with accounting rules, the Mineral Reserve and Mineral Resource assets are recognized at historical cost. They are initially measured at acquisition cost, and subsequently at historical cost minus any accumulated depreciation and impairment. Depreciation is estimated on the basis of actual extraction.

Mineral Reserves and Mineral Resources described in the table below are estimates of the size and quality of deposits based on the technical, regulatory and economic parameters available at a given point in time. Due to unpredictable changes in these parameters and the natural uncertainty associated with such assessments, estimates of Group Mineral Reserves and Resources presented in below table may vary over time. Over the course of geological exploration and assessment, Mineral Reserves and Mineral Resources may change significantly, either positively or negatively. At this point in time, Imerys has no knowledge of any environmental, legal, political or other factors that may adversely affect the estimates presented in these tables in any material way.

3.4.1. Industrial Minerals

Industrial Mineral Reserves Estimates (at Dec. 31, 2025 *vs* Dec. 31, 2024)

1 In 2025 the allocation of sites to different product catagories was updated to reflect the primary product of a site, this primarily impacted the Ball Clays and Mineral for Refractories categories. The table above shows the 2024 Mineral Reserves reported using the 2025 catagorisation. The 2025 reported Mineral Reserves reflect normal activies of mine production and updates to mine plans reflecting changes to site conditions. Signficiant updates to Mineral Reserves included reassessments in Perlite and Kaolin Americas and updates to geological models at sites in Talc Europe and Carbonates Asia-Pacific.

Industrial Mineral Resources Estimates (at Dec. 31, 2025 *vs* Dec. 31, 2024)

1 In 2025 the allocation of sites to different product catagories was updated to reflect the primary product of a site, this primarily impacted the Ball Clays and Mineral for Refractories categories. The table above shows the 2024 Mineral Resources reported using the 2025 catagorisation. The 2025 reported Mineral Resources reflect normal activies of exploration, drilling and general mineral asset development. Signficiant changes in 2025 include reassessments at Perlite, Kaolin and Carbonates in Americas, Talc in Asia-Pacific and first time reporting of Diatomite sites in Europe.

3.4.2. Lithium

Imerys currently has two active lithium exploration projects which have the potential to make the Group the largest integrated lithium supplier in Europe, representing more than 20% of the European lithium output by 2030.

France – Project EMILI

Imerys has continued to develop their understanding of the Beauvoir lithium deposit through continued drilling, culminating in an updated Mineral Resource in September 2025. Compared to the 2022 maiden Inferred Mineral Resource (44.1Mt at 0.9% Li_2O) the subesquent work has extended the Resource to a depth of 450m below current surface and increased the confidence in the grade estimate, allowing for the first reporting of an Indicated Mineral Resource. This updated Mineral Resource was a key input into the EMILI Project Prefeasiblity Study which was completed in 2025.

Imerys continued to work with the consultancy firm AMC [1] to prepare this updated Mineral Resource Estimate (MRE).

Consistent with normal industry practice for the reporting of metalliferous Mineral Resources, Imerys reports the resource in terms of tonnes and grade of in-situ material rather than tonnes of final product as is the normal practice with industrial minerals.

AMC has classified the resource at an Inferred level of confidence and reported it in accordance with the PERC (2021) Reporting Standard requirements. The results of this MRE are presented below. Drilling is continuing into 2026 to support the on-going Feasilibity Study.

√ *For further details on the EMILI project, see* **Chapter 1, section 1.2.2 of the Universal Registration Document**.

EMILI Project Phase 1 Mineral Resources summary

Classification	Tonnage *(000,000' t)*	Density *(t/m³)*	Li_2O *(%)*	Sn *(%)*	Ta *(%)*
Indicated	210.4	2.63	1.01	0.099	0.02
Inferred	163.3	2.63	0.99	0.096	0.01

- Mineral Resources are not Mineral Reserves until they have demonstrated economic viability based on a feasibility study or pre-feasibility study. THe reporting Mineral Resources limited to those parts of the mineralisation that, in the CP's opinion, demonstrate Reasonable Prospects for Eventual Economic Extraction (RPEEE) using long hole open stoping (LHOS) with paste backfill.
- The effective date of the Mineral Resources is 12 September, 2025.
- Mineral Resources are reported exclsive of any Mineral Reserves.
- The contained Li_2O, Sn and Ta represents estimated contained metal in the ground and has not been adjusted for metallurgical recovery.
- Mineral Resources are reported assuming mining via underground or open pit methods at a cut-off grade of 0.6% Li_2O based on a LiOH price of €20,000/t. Concentrate recovery used is 77% and refining recovery from concentrate is 87%.
- Mineral Resources are reported inclusive of possible mining losses, such as ground support pillars.
- The Mineral Resource has been compiled in accordance with the PERC Reporting standard (2021).
- The Competent Person (CP) responsible for reporting the EMILI Mineral Resource is Mark Burnett, an AMC Principal Geologist, who is a Chartered Geologist with the Geological Society of London and has over five years of experience in estimates of lithium and granite hosted deposits.

1 *AMC is an internationally recognized mining consultancy https://www.amcconsultants.com/.*

United Kingdom – British Lithium : Gunheath Lithium Project

Imerys British Lithium (IBL) has continued to develop their understanding of the Gunheath Lithium Project to a Scoping level of study through continued drilling, culminating in an updated Inferred Mineral Resource in July 2025 of 89 million tonnes at 2551ppm Li (0.55% Li_2O). The updated Resource has resulted in a significant decrease in tonnage when compared with the 2023 "Maiden" Inferred Mineral Resource (160 million tonnes at 2495ppm lithium (0.53% Li_2O). The decrease in tonnage has resulted from a revision of the geological controls on the distribution of the lithium mineralisation and the removal of a significant portion of tonnage from the 2023 resource that was based on a single drill hole. Despite additional drilling being conducted in 2024-2025, the reliance on infill reverse circulation (RC) drilling (designed to upgrade the Resource to Indicated) as the main sampling method proved unreliable in terms of quality, therefore the Resource has remained at the classification of Inferred despite this additional drilling. The Resource has now been drilled to a vertical depth of 250m below current surface. The revised 2025 Inferred Resource forms the basis for the 2025 Scoping study.

The Inferred Resource has been classified in accordance with PERC 2021 Reporting Standard. It is quoted using a marginal economic cut off grade of 1000ppm Li and has had appropriate Realistic Prospects for Economic Extraction (RPEE) applied, which include both technical and economic considerations. The results of this updated MRE are presented below

Imerys British Lithium Mineral Resources Summary

Summary MRE Report for the Gunheath Resource. 1st July 2025. Cut off grade = 1000 ppm Lithium

	Mass	Average Value		Material Content	
		Lithium	Li_2O equivalent	Lithium	Lithium oxide
Classification	Million tonnes	ppm	%	kilo tonnes	kilo tonnes
INFERRED	89	2551	0.55	228	490
TOTAL	89	2551	0.55	228	490

- Inferred Mineral Resources are not Mineral Reserves until they have demonstrated economic viability based on a feasibility study or pre-feasibility study. The reported Mineral Resources are limited to those parts of the mineralisation that, in the CP's opinion, demonstrate RPEE based on an open pit mining method of extraction.
- The effective date of the Mineral Resources is July 1, 2025.
- Mineral Resources are reported exclusive of any Mineral Reserves.
- The contained Lithium represents estimated contained metal in the ground and has not been adjusted for metallurgical recovery.
- Mineral Resources are reported assuming mining via open pit methods at an economic cut-off grade of 1000ppm Li and using a Lithium price of US$ 22,800/t.
- Mineral Resources are reported inclusive of possible mining losses, such as dilution.
- The Mineral Resource has been compiled and reported in accordance with the PERC Reporting Standard (2021).
- The Competent Person (CP) responsible for reporting the Gunheath Mineral Resource is Peter Gleeson , who is the Principal Resource Geologist of IBL Mr Gleeson is a Chartered Engineer and is considered to be Qualified for Mineral Reporting (QMR) with the IOM3 and has over 30 years experience in lithium and other similar metal related projects.

Imerys is a French Public Limited Company (Société Anonyme) with a Board of Directors (Conseil d'Administration).

Governance structure

At the date this Universal Registration Document was filed, the offices of Chairman of the Board of Directors and of Chief Executive Officer were held separately by:

- **Patrick Kron,** Chairman of the Board of Directors;
- **Alessandro Dazza,** Chief Executive Officer.

The separation of the office of Chairman of the Board of Directors from that of Chief Executive Officer, which was introduced in 2018[1], was confirmed upon Alessandro Dazza's appointment as Chief Executive Officer and Patrick Kron's most recent reappointment as Chairman of the Board in 2024. The governance structure makes it possible to:

- guarantee the effective working of the Group's governance bodies;
- achieve a complementary mix of skills and experience between the Chairman of the Board of Directors and the Chief Executive Officer;
- further develop the efficiency and agility of the operating procedures of the Board; and
- continue to adhere to best practices in Corporate Governance, taking into account the presence of controlling shareholders.

Corporate Governance Report

The information covered in the present Chapter 4 forms an integral part of the Corporate Governance Report, which constitutes a specific section in the Management Report in accordance with article L. 225-37 paragraph 6 of the French Commercial Code (Code de commerce). The Corporate Governance Report, the cross-reference table for which can be found in paragraph 9.5.4 of Chapter 9 was approved by the Board of Directors on February 19, 2026.

Reference code adopted – the AFEP-MEDEF Code

The Company complies with French Corporate Governance regulations as well as the recommendations provided in the AFEP-MEDEF Corporate Governance Code, which is available on the Company's website (the "**AFEP-MEDEF Code**").

1 Subject to a three-month transition period following the departure of the former Chief Executive Officer.

4.1 Board of Directors

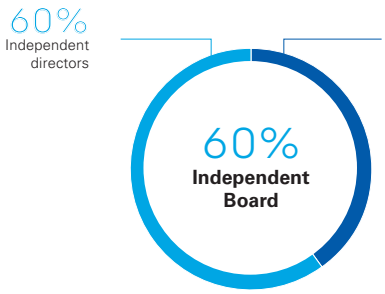

The structure, operating procedures and duties of the Board of Directors (the "**Board**") are defined in French legislation, the company by-laws and the Internal Charter of the Board of Directors (the "**Charter of the Board**").

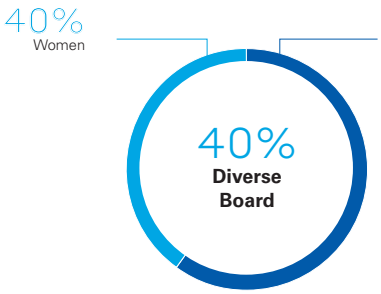

4.1.1 Structure

A diverse and balanced international body

At the date this Universal Registration Document was filed, the Board of Directors had twelve members, including four women directors, six independent directors, two employee-representative directors and five nationalities.

The structure of the Board of Directors enables the Group to benefit from the diverse and international range of specialisms and experience (in terms of areas of expertise and industries) gained by each of its members.

Brief overview of the Board at December 31, 2025

	Personal details				Experience			Position on the Board

At December 31, 2025, the average age of Board members was 51. On average, they have served on the Board for 4.8 years.

1 Including term of office within Imerys.

2 Figure stated on a unit basis of 12 months, rounded up to the next month (dates after the 15th of the month) or down (dates before the 15th of the month).

3 Refer to the review of independence criteria described below.

4 At the publication date of the Universal Registration Document.

Changes in 2025

	Reappointment	Departure	Appointment
Board of Directors	Ian Gallienne Lucile Ribot	Dominique Morin[1] Bernard Delpit Laurent Raets	Bruno Reysset[1] Martin Doyen Johannes Huth[2]
Strategy and Sustainability Committee	Ian Gallienne	Bernard Delpit	Johannes Huth
Appointments Committee	-	Ian Gallienne	Johannes Huth
Compensation Committee	-	Ian Gallienne	Johannes Huth
Audit Committee	Lucile Ribot	Laurent Raets	Martin Doyen
ESG Referent Director	-	-	-

1 Following the retirement of Dominique Morin, an employee-representative director, Bruno Reysset was elected by the Group's French Works Council on December 17, 2024, to serve as his successor with effect from February 1, 2025, for the remainder of his term.

2 Following the resignation of Nicolas Gheysens, who had been serving as director and member of the Strategy and Sustainability Committee since May 13, 2025, the Board of Directors coopted Johannes Huth as director on September 30, 2025. This cooptation will be subject to ratification at the next Shareholders' General Meeting, for the remainder of the term of his predecessor, i.e. until the Shareholders' General Meeting held in 2028 to approve the financial statements for the year ended December 31, 2027. Following Ian Gallienne's resignation as Chairman of the Strategy and Sustainability Committee and member of the Appointments and Compensation Committees, Johannes Huth was appointed Chairman and member of those Committees, respectively.

Changes planned for 2026

In the context of the changes in the governance of GBL, the Company's key shareholder, the ratification of the September 30, 2025 cooptation of Johannes Huth, Managing Director of GBL, will be submitted to the next Shareholders' General Meeting. After serving on the Board for 16 years, Ian Gallienne, now Chairman of GBL, will step down as director at that time.

A decision was also made to adjust GBL's representation on the Board by reducing the number of directors appointed on its proposal from three to two. The appointment of Michael Ogrinz will thus be submitted to a shareholder vote, following the resignation of Martin Doyen as director as of that same date.

Furthermore, as Annette Messemer has informed the Board of Directors that she does not wish to seek reappointment, the next Shareholders' General Meeting will be asked to approve:

- the renewal of the directorships of Stéphanie Besnier and Véronique Saubot,
- the ratification of the cooptation of Johannes Huth as director,
- the appointment of Michael Ogrinz as new director.

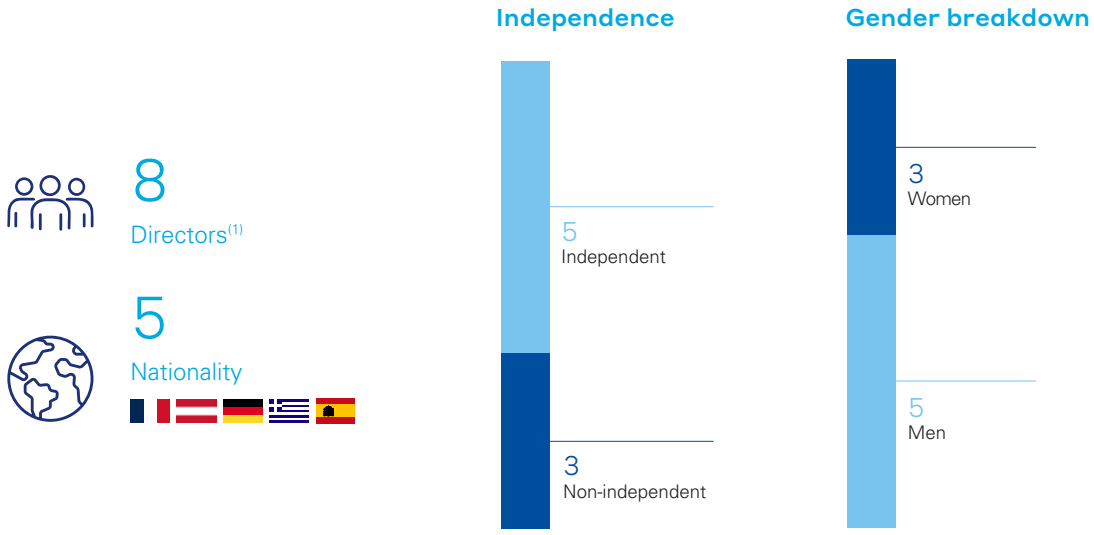

Thus, subject to the decisions to be made at the next Shareholders' General Meeting, on February 19, 2026 the Board of Directors, based on the recommendation of the Appointments Committee, decided that:

- Stéphanie Besnier is to be appointed Chair of the Appointments and Compensation Committees and reappointed member of the Audit Committee,
- Véronique Saubot is to be reappointed member of the Strategy and Sustainability Committee and the Audit Committee,
- Johannes Huth is to be reappointed Chairman of the Strategy and Sustainability Committee and member of the Appointments and Compensation Committees,
- Michael Ogrinz is to be appointed member of the Audit Committee, and
- Laurent Favre is to be appointed member of the Appointments and Compensation Committees.

Given the maturity of the Board of Directors and its Committees on sustainability issues and the now cross-cutting integration of these topics into their work, the Board has decided not to maintain the position of ESG Referent Director.

Finally, in light of the above and in order to align with industry standards and improve the efficiency of its work, the Board of Directors has decided to reduce its size from ten directors to eight (excluding employee-representative directors).

Subject to these decisions, the structure of the Board of Directors at the end of the next Shareholders' General Meeting would be as follows:

1 Excluding employee-representative directors.

Given the changes planned for the Board of Directors at the end of the next Shareholders' General Meeting, in particular the reduction from ten directors to eight, the term of office of the employee-representative director appointed by the European Works Council, which expires in October 2026, will not be renewed at that time, as stipulated in the company by-laws. From that date, the Board of Directors will have one employee-representative director, appointed by the Group's French Works Council.

For further details, see Chapter 8, paragraph 8.2.5 of this Universal Registration Document.

Selection of future independent directors

The Board of Directors places considerable importance on the structure of the Board and of its Committees. It draws on the results of its annual assessments and on the work and proposals put forward by the Appointments Committee, which regularly reviews and makes suggestions whenever the circumstances so require concerning desirable changes to the structure of the Board of Directors and its Committees.

Prior to each decision to extend a director's directorship or upon a departure requiring a new independent director to be appointed or coopted, the Appointments Committee reviews the structure of the Board and assesses its requirements in terms of skills and experience, in accordance with the diversity policy (professional qualifications and experience, balanced representation of men and women, nationality, age) and the Charter of the Board.

When circumstances so require, the Chairman of the Board of Directors, in tandem with the Chair of the Appointments Committee, may retain one or more widely renowned executive search firms and may solicit suggestions from Board members. If an external search firm is retained, it assesses the candidates' skills and knowledge based on the predefined requirements and holds interviews with shortlisted candidates.

The Chairman of the Board of Directors and the Chair of the Appointments Committee hold individual interviews with the candidates shortlisted by the external search firm and jointly select the candidates to be presented to the Appointments Committee. After assessing the various candidacies and discussing their suitability vis-à-vis the diversity policy and the Charter of the Board, especially as regards the principles of independence, integrity, good faith, and professionalism, as well as the requisite knowledge, professional skills, and experience, the Appointments Committee submits its recommendations to the Board (one or two candidates selected). Having heard the report by the Chair of the Appointments Committee concerning the selection procedure adopted and the recommendations made, and after due deliberation, the Board decides on the candidate to be appointed or coopted for approval or ratification by the Shareholders' General Meeting.

This procedure was not used in 2025/2026, as the Board of Directors did not put forward a new independent director for appointment.

Independence

At the date this Universal Registration Document was filed: six of the ten directors (not including the two employee-representative directors, in accordance with the applicable regulations), i.e. 60%, qualified as independent. This ratio is well above that of one third recommended by the AFEP-MEDEF Code for companies with controlling shareholders.

At its meeting of May 3, 2005, the Board of Directors adopted the following definition, which has been maintained every year since: "*the absence of a relationship of any kind with Imerys, the Group or its management that may interfere with a director's freedom of judgment.*" The Board of Directors also takes into account the independence criteria set out in the AFEP-MEDEF Code (as set out in the following table) while restating that the criteria neither preclude independent status if any are not met, nor necessarily permit such status. A member's independent status must be assessed according to their own individual situation or the Company's situation, with respect to their shareholding, or any other consideration.

The Board has also decided, with effect from May 10, 2023, that any director whose term of office has run for more than 12 years will automatically lose their independent status.

At its meeting of February 19, 2026, and in line with the recommendations of the Appointments Committee, the Board of Directors:

- confirmed the definition of independence adopted and the application of the independence criteria set out in AFEP-MEDEF Code under the above-mentioned conditions;
- confirmed the criteria defined in February 2023 for establishing the materiality of any business relationship between a Board member (or director-candidate) and Group companies, such as:
  - qualitative criteria:
    - importance of the business relationship for the Group and the contractual partner company in which the director or director-candidate holds office (economic dependence, exclusive business relationship, strategic nature of the business),
    - the director's or director-candidate's position in the contracting partner company (length of service, operational nature of duties, direct decision-making power over the agreements governing the business relationship, receipt by the director or director-candidate of compensation linked to the agreement(s), and or any other direct interest);
  - quantifiable criteria:
    - proportion of revenue generated by the Group with entities to which the director or director-candidate is affiliated (1% or more);
    - assessed each individual situation, including the business relationships that may exist with any companies of the Group, and the independent status of each director, especially those whose terms of office will be submitted for renewal at the next Shareholders' General Meeting.

Conclusions of the review carried out by the Board, on the recommendation of the Appointments Committee, concerning the criterion of significant business links

The Board noted, on the basis of the personal information provided by each of the members of the Board of Directors and to the best of the Company's knowledge, that:

- no business relationships existed between the Board members representing the Company's controlling shareholder, Groupe Bruxelles Lambert (namely Ian Gallienne, Johannes Huth and Martin Doyen), other than the capital ties between this shareholder and the Company;
- no business relationships existed with Paris Kyriacopoulos other than the capital ties with Blue Crest Holding SA, to which Paris Kyriacopoulos is affiliated, and the Company following the acquisition of the S&B group by Imerys, as well as certain business relationships relating to the fulfillment of actions or commitments made after the acquisition was completed. Blue Crest Holding SA owns a significant interest in the share capital of Imerys and has entered into a shareholders' agreement with the GBL group, with no intention of acting in concert with them, as detailed in Chapter 7, paragraph 7.3.6.3;
- no other director had any business relationship with the Group likely to affect their independence or create a conflict of interest given there were no operational links between the professional duties they perform and the Group's activities (where such ties are assessed using the criteria stated above).

Thus, in light of the above, Ian Gallienne, Johannes Huth, Martin Doyen and Paris Kyriacopoulos cannot be considered as independent.

Conclusions of the review carried out by the Board, on the recommendation of the Appointments Committee, concerning other independence criteria

The Board noted, on the basis of the personal information provided by each of the members of the Board of Directors and to the best of the Company's knowledge, that:

- in view of the senior management positions held in entities belonging to the Group of the Company's controlling shareholder, GBL, Ian Gallienne, Johannes Huth and Martin Doyen do not qualify as independent directors;
- Paris Kyriacopoulos has held senior management positions at the Group for the past five years and cannot therefore be considered as independent.

All the other directors (with the exception of the employee-representative directors) have been designated as independent.

The Board stated that, at its meeting of February 19, 2026, in accordance with the recommendations of the Appointments Committee, it had considered the independent status of Michael Ogrinz, who has been put forward for appointment at the next Shareholders' General Meeting (see Chapter 8, paragraph 8.2.5). Given the capital ties between the Company and GBL, where the director-candidate holds positions, the Board did not consider him to be independent, based on the criteria and principles outlined in this subsection.

Based on these observations and in line with the recommendations of the Appointments Committee, the Board noted the following, it being understood that in the table below: √ indicates an independence criterion has been met and **x** indicates an independence criterion has not been met.

	Criterion 1	Criterion 2	Criterion 3	Criterion 4	Criterion 5	Criterion 6	Criterion 7	Criterion 8	Independent Yes/No
Patrick Kron	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Stéphanie Besnier	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Martin Doyen	✗	✓	✓	✓	✓	✓	✓	✗	No
Laurent Favre	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Ian Gallienne	✗	✓	✓	✓	✓	✓	✓	✗	No
Johannes Huth[1]	✗	✓	✓	✓	✓	✓	✓	✗	No
Paris Kyriacopoulos	✗	✓	✓	✓	✓	✓	✓	✗	No
Annette Messemer	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Lucile Ribot	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Véronique Saubot	✓	✓	✓	✓	✓	✓	✓	✓	Yes
Carlos Manuel Pérez Fernández	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Bruno Reysset	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Criterion 1: Not to be or have been during the past five years: an employee or executive corporate officer of the Company; an employee, executive corporate officer or director of a company consolidated by the Company; an employee, executive corporate officer or director of the parent company or a company consolidated by that parent company.

Criterion 2: Not to be an executive corporate officer of a company in which the Company holds, directly or indirectly, a directorship or in which an employee is designated as a director or an executive corporate officer of the Company (whether at present or in the past five years).

Criterion 3: Not to be a customer, supplier, investment banker, or commercial banker that is material to the Company or the Group, or for which the Company or its Group represents a significant share of business.

Criterion 4: Not to have any close family ties with a corporate officer.

Criterion 5: Not to have been a Statutory Auditor of the Company in the past five years.

Criterion 6: Not to have been a director of the Company for more than 12 years.

Criterion 7: Not to receive any variable compensation in cash or shares or any performance-based compensation from the Company or the Group.

Criterion 8: Directors representing the Company's major shareholders may qualify as independent provided that these shareholders do not have or share control of the Company. However, if shareholders pass the threshold of 10% of capital or voting rights, the Board, on the basis of a report produced by the Appointments Committee, systemically examines whether independent status can be retained taking into account the Company's shareholding and any potential conflicts of interest.

1 Director coopted by the Board subject to ratification of his appointment by the next Shareholders' General Meeting.

Employee-representative directors and the Social and Economic Council

Since October 6, 2014, the Board of Directors has included two employee-representative directors. They are offered specific training to enable them to perform their duties, paid for by the Company and provided by either external organizations or the Imerys learning center. At its meeting of February 12, 2020, the Board of Directors decided employee-representative directors must spend a minimum of 40 hours and a maximum of 45 hours in training per year over the course of their term of office (excluding language classes). The Board also decided to set aside 15 hours of their legally prescribed working hours to prepare for each Board meeting.

Carlos Manuel Pérez Fernández and Bruno Reysset were appointed respectively by the Group's European Works Council on October 6, 2020 and by the France Group Committee on December 17, 2024.

In light of the reduction in the size of the Board of Directors at the end of the next Shareholders' General Meeting from ten directors to eight (excluding employee-representative directors) and in accordance with the company by-laws, the term of office of the employee-representative director appointed by the European Works Council will not be renewed when it expires. Thus, only the term of office of the employee-representative director appointed by the Group's French Works Council will be renewed in October 2026. New elections will be held in 2026.

The Social and Economic Council is represented on the Board of Directors by one person who attends all Board meetings in an advisory.

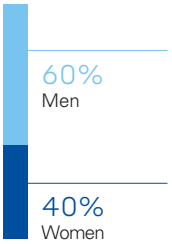

Diversity

The Board of Directors and its Appointments Committee regularly assess the structure of the Board and its Committees, in particular during the process to renew directors' offices and their assessments. They also identify appropriate priorities to ensure the most balanced structure by striving to involve directors with complementary profiles in terms of nationality, gender, age and experience.

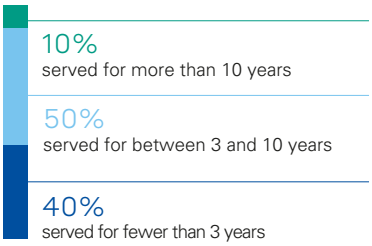

Pursuant to article L. 22-10-10, paragraph 2 of the French Commercial Code, the table below presents the diversity policy applied within the Board of Directors, setting out the criteria and objectives set by the Board of Directors as well as their implementation and results. The diversity policy includes information on the gender balance within the Board of Directors.

In addition, this diversity policy is supplemented, in accordance with the provisions of the aforementioned French Commercial Code, by disclosures concerning how the Company aims to achieve a gender-balanced structure for the Executive Committee and the diversity results among the top 10% of positions by seniority. These disclosures also include, pursuant to the provisions of the AFEP-MEDEF Code, the gender-balance objectives for the "executive bodies".

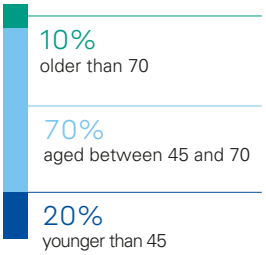

Gender breakdown

Length of service as director

Age breakdown

Criteria	Objectives and implementation arrangements	Results achieved during 2025	Possible review of the objective for 2026
Board of Directors			
Gender diversity	– Maintain the **proportion of directors of each gender equal to or greater than 40%**. When the Board of Directors has no more than eight members, **the difference in the number of directors of each gender may not exceed two**. – Maintain a gender-balanced structure within the Board of Directors by identifying in advance potential candidates for directorships with profiles also fitting the other requirements of the diversity policy.	– The **proportion of women on the Board** has gradually increased, rising from 21.4% in 2013 to **40% in 2024** *(excluding employee-representative directors)*, in line with applicable regulations. **The renewal of the directorship of Lucile Ribot helped maintain the 40% rate in 2025**. – **Three out of the four Committees are chaired by women** (Audit, Compensation and Appointments) and the position of ESG Referent Director is also held by a woman.	– Objective unchanged.
Professional skills and experience	– Maintain a **structure of the Board of Directors with a diverse mix of skills and experience** in the following areas: • finance, accounting • sales, marketing, industry, management • international human resources • stable presence on Boards of listed companies and international groups. – Include a profile from the industrial sector who have held senior management positions and, if possible, have international experience	– The renewal of **Lucile Ribot's** directorship in 2025 contributed to the achievement of these objectives given her recognized expertise in financial and business matters. With her experience, Lucile Ribot also contributes to the development of a sustainable business model. – **Johannes Huth's** cooptation is fully in line with the Board's diversity policy, given his experience as a senior manager and his recognized expertise in international private equity, in particular in the United States. – **Martin Doyen's** appointment complements the Board of Directors' expertise in strategy and finance.	– Maintain a structure of the Board of Directors with a diverse mix of skills and experience in the following areas: • finance, accounting • sales, marketing, industry, management • international human resources • ESG • stable presence on Boards of listed companies and international groups; – Include a profile from the industrial/chemical sector who has held senior management positions in the United States or Asia
Nationality	– Maintain **the Board of Directors' broad international structure** by proposing appointments of directors, wherever possible, from the same geographical regions where the Group does business and matching the Group's ownership structure.	– At December 31, 2025, **five nationalities were represented on the Board**, implying a stable representation of different nationalities over recent years.	– Objective unchanged.
Independence	– Maintain the **proportion of independent directors** at a level in keeping with AFEP-MEDEF Code recommendations.	– Since 2019, the **Board's independence ratio** has stood at **60% or over** (excluding employee-representative directors), a level well above current recommendations for companies with controlling shareholders. – In addition, the chairs of the Board and of the Committees (other than the Strategy and Sustainability Committee) and the position of ESG Referent Director are all held by independent directors. – In 2025, **three of the four Committees were composed mainly of independent directors**, with the Strategy and Sustainability Committee consisting of 50% independent directors.	– Objective unchanged.
Balance	– Maintain a **balance between directors who have served for several years**, by aiming for complementary profiles, and the appointment of new members with new skills and fresh impetus.	– At December 31, 2025, 40% of directors* had served for fewer than 3 years, 50% of directors* had served for between 3 and 10 years, and 10% of directors* had served for more than 10 years. – At December 31, 2025, directors* were between 34 and 72 years old, with an average age of 55.2, with 70% of directors aged between 45 and 70, 10% older than 70 and 20% younger than 45.	– Objective unchanged.

Criteria	Objectives and implementation arrangements	Results achieved during 2025	Possible review of the objective for 2026
Executive Committee			
 **Gender diversity**	– Since 2023, the Board has had a **target of 30% of Executive Committee positions to be held by women**.	– At December 31, 2025, the Executive Committee had three women out of nine members, namely **33% women**.	– Objective unchanged.
10% of jobs with highest level of responsibility			
 **Diversity and Inclusion**	– Champion diversity, equity, and inclusion through implementation since 2023 of an **ambitious plan named "Diversity, Equity & Inclusion"** as redefined in 2022 (2023-2025) to promote diversity, primarily in respect of gender, employee equity, nationality, disability and inclusion. – For the *Senior Managers* category (i.e. the 10% of jobs with the highest level of responsibility within the Group, excluding members of the Executive Committee), the year-end 2025 target was for **30% of positions to be held by women**. The Group is actively pursuing a recruitment policy dedicated to this objective. The Group is also committed to increasing the proportion of women at all levels of the organization, setting specific indicators by 2025 for women *Senior Managers* and for women Managers, Experts and Professionals, in order to strengthen the pool of female talent. – The Group's policy on diversity, equity and inclusion is described in more detail in Chapter 3, section 1.3.1.1.	– At year-end 2025, 28% of *Senior Manager* positions are held by women. Note also that the percentage is 34% in the Executives, Experts and Professionals category. The proportion of women in the Group is 21%. – The Group encourages the achievement of these gender diversity objectives through its recruitment processes, by setting criteria during the pre-selection and assessment phases. The Group also goes beyond the recruitment process and promotes gender equity through education and training, as well as through communication and awareness-raising among its employees on issues of gender and diversity integration.	– The Group reaffirms its objective of promoting diversity through an ambitious 2030 action plan. This plan focuses primarily on gender, employee equity, nationality, disability, multiculturalism, intergenerational inclusion and inclusion of LGBTQ+ individuals. – Regarding gender diversity: • Senior managers: target of 30% of positions to be held by women by year-end 2030. • Talent pool: the Group is also committed to increasing the representation of women at all levels of the organization. In order to strengthen the pool of female talent, specific targets have been set for 2030 for managers, experts and professionals. – The Group is actively implementing a recruitment policy dedicated to achieving these objectives. For more details on the Group's diversity, equity and inclusion policy, refer to Chapter 3, section 1.3.1.1.

* Excluding employee-representative directors.

Expertise and experience of Board members

Members of the Board are selected on the strength of expertise and experience, among other criteria. The members of the Audit Committee are chosen in particular for their financial expertise. The Appointments Committee and the Board of Directors closely focus on assessing these criteria.

The careers and offices held by members of the Board (see **their respective biographies on the following pages and the skills matrix below**) reflect their individual expertise and experience in different areas such as industry, strategy, finance, management, international, ESG/sustainable development and digital, which contribute to the quality of the Board's work and a correctly balanced structure.

●○○ basic knowledge ●●○ in-depth knowledge ●●● expert knowledge

Industry/Group businesses: experience in the industry in which the Group operates, knowledge of the Group's business and competitive environment.

Strategy: experience in corporate strategy, including setting and implementing medium- and long-term objectives, an understanding of the markets and competitive challenges, and the ability to anticipate how they will change.

Finance: experience in the financial sector (banking, accounting, financial markets), capital management or risk management, understanding of financial reporting processes and corporate finance.

Management: experience as a chief executive officer or senior executive at a large company.

Environmental, Social and Governance (ESG), including climate: experience in managing ESG issues.

International: extensive experience gained from commercial activities in various regions overseeing multinational operations.

Digital/artificial intelligence (AI): experience in rolling out and implementing digital technologies and tools, as well as AI.

1 For a detailed description of the ESG skills of members of the Board of Directors, refer to Chapter 3, section 1.1.2.

Other information

Family ties between members of the Board

To the best of the Company's knowledge, there are no family ties between the members of the Board.

Potential conflicts of interest between members of the Board

Pursuant to the AFEP-MEDEF Code recommendations, the Charter of the Board specifies that:

- *"Directors shall inform the Chairman and the Vice-Chair of the Board, should there be one, of any situation likely to create or potentially create a conflict of interest. They shall inform the Chairman and the Vice-Chair, should there be one, of any Group transactions in which they have a direct or indirect interest and of which they have knowledge, before they are completed. They shall abstain from any voting by the Board and even from the discussion prior to the vote where that situation arises; the minutes of the meeting mention this abstention. The Shareholders' General Meeting shall be informed of any such transaction in accordance with the law;*
- *Directors may not use their position or office to obtain for themselves or for a third party any kind of advantage, monetary or otherwise;*
- *Directors may not personally take on any responsibilities in any company or business in direct or indirect competition with those of the Imerys group without informing the Chairman and, should there be one, the Vice-Chair beforehand."*

To the best of the Company's knowledge, no potential conflicts of interest exist between the duties of the members of the Board with respect to the Company and their private affairs and/or other duties, except those mentioned in the paragraph above on Independence.

No member of the Board has been selected as a result of any arrangement or agreement entered into with the principal shareholders, customers, suppliers or other parties, with the exception of the shareholders' agreement in force (notably) between Blue Crest and GBL (see Chapter 7, paragraph 7.3.6.3).

Service contracts between the Company and members of the Board

To the best of the Company's knowledge, no service contracts have been agreed between the members of the Board and the Company or any of its subsidiaries that grant any kind of benefit upon expiration.

Convictions for fraud

To the best of the Company's knowledge, no member of the Board has been convicted of fraud in the past five years.

Bankruptcy, receivership or liquidation of companies in which a member of the Board has held an executive position in the past five years

To the best of the Company's knowledge, no member of the Board has held an executive position in a company that has filed for bankruptcy or been placed in receivership or liquidation in the past five years.

Conviction and/or official public sanction by statutory or regulatory authorities

To the best of the Company's knowledge, no member of the Board has been convicted and/or received an official public sanction in the past five years.

Requirement for Directors to hold shares in the Company

The Charter of the Board requires each Director to purchase 600 shares in the year following their appointment (of which 100 shares must be acquired within six months of appointment). They must hold these shares until the expiration of their term of office. For further details on corporate officers' transactions in Company shares, see section 4.4 of the present chapter.

4.1.2 Profile, experience and expertise

The following information was provided to the Company by each member of the Board in office at December 31, 2025.

Further details, including age, nationality, the number of shares held and any membership of Board Committees, can be found in paragraph 4.1.1 of the present chapter ("Brief overview of the Board"). Other than their term of office at Imerys, the Board members do not hold any appointment in other Group companies at the publication date of the Universal Registration Document and have not held any such appointments during the previous five years (except for Paris Kyriacopoulos, *see below*).

This section also contains information about Johannes Huth and Michael Ogrinz, whose cooptation and appointment as directors will be submitted to a vote at the next Shareholders' General Meeting (see Chapter 8, paragraph 8.2.5).

Patrick Kron

Independent Director and Chairman of the Board of Directors

Born on September 26, 1953

Work address:

c/o Imerys

43, quai de Grenelle

75015 Paris

France

Date first appointed:

June 25, 2019

Term of office expires:

Shareholders' General Meeting in 2027

Main professional activity:

Director and corporate executive

Biography

Patrick Kron graduated from the École Polytechnique and has an engineering degree from the École nationale supérieure des mines de Paris.

Patrick Kron started his career at the French Ministry of Industry in 1979. He took on a number of operational responsibilities at the Péchiney group in Greece between 1984 and 1988 before joining the Executive Committee and occupying managerial positions from 1993 to 1997. From 1998 to 2002, Patrick Kron held the office of Chairman of the Managing Board at Imerys.

Appointed as an independent director to the Board of Alstom in July 2001, he then went on to become its Chief Executive Officer in January 2003 and Chairman & Chief Executive Officer in March 2003. He left Alstom in January 2016 after finalizing the sale of the Group's energy business to General Electric and completing a share buyback program. In February 2016, Patrick Kron set up a management consulting firm, PKC&I. In November 2016, he joined Truffle Capital, a venture capital firm specializing in biomedtech and digital technology, as its Chairman. He left that company on June 30, 2024. He joined SGS in 2025 as director and member of the Remuneration Committee.

Appointed as a Director and Chairman of the Board of Directors of Imerys on June 25, 2019, Patrick Kron was also named Chief Executive Officer for a short interim period between October 21, 2019, and February 16, 2020.

Patrick Kron was admitted as a Knight of the Légion d'Honneur in September 2004 and Officer of the Ordre National du Mérite in November 2007.

Stéphanie Besnier

Independent Director

Born on March 10, 1977

Work address:

42, avenue de la porte de Clichy

75017 Paris

France

Date first appointed:

May 10, 2023

Term of office expires:

Shareholders' General Meeting in 2026

Main professional activity:

Chief Financial Officer

Biography

Stéphanie Besnier's career began in 2001 as an analyst at BNP Paribas in London. She then held various positions at the Ministry of the Economy and Finance from 2003 to 2007. In 2007, she joined the Wendel group's investment team and was appointed as its Associate Director in 2018. She was involved in Wendel's investments in Deutsch Connectors, Constantia Flexibles, IHS Towers and Bureau Veritas and launched the holding company's strategy of investing in growth capital (Wendel Growth). In April 2021, she was appointed as Deputy Director General of the Agence des participations de l'État, the French government agency responsible for managing its strategic interests, which she ran on an interim basis between June and September 2022. During this period, she was a director representing the French government on the Boards of Safran, Engie, Orange and Air France-KLM. She was also a member of these companies' Audit Committees. On March 6, 2023, Stéphanie Besnier joined OVHcloud as Chief Financial Officer. On May 10, 2023, Stéphanie Besnier was appointed Director of Imerys and joined its Audit Committee. Since May 10, 2024, she has also been a member of the Company's Appointments and Compensation Committees.

Paris Kyriacopoulos

Director

Born on May 12, 1981

Work address:

ORYMIL SA

Amerikis 21a

10672 Athens

Greece

Date first appointed:

May 10, 2021

Term of office expires:

Shareholders' General Meeting in 2027

Main professional activity:

Corporate Executive and Director

Biography

Paris Kyriacopoulos gained a Bachelor of Arts degree (cum laude) from the University of Pennsylvania in Philadelphia (United States) in philosophy, politics and economics and an MBA with a high distinction from Harvard Business School in Cambridge (United States).

From 2005 until 2007, he was a junior associate with the Boston Consulting Group (Austria).

He took charge from 2010 to 2015 of FiberLean within Imerys' Filtration & Performance Additives division. From 2016 until 2020, he served as Chief Executive Officer of FiberLean Technologies Ltd, a joint venture between Imerys and OMYA, which was sold to the Werhahn group in 2021 (United Kingdom).

In 2013, he was appointed as a Director, then in 2015 Chairman of the Board of Directors of Motodynamics SA, a company listed on the Athens stock exchange. Since January 2023, he has served as Chairman and CEO of Motodynamics SA.

Since 2021, he has been a director and member of Imerys' Strategic Committee (now the Strategy and Sustainability Committee). Since 2022, he has chaired the Board of Omirou Capital Partners SA and served as the Vice-Chairman of Orymil SA (Greece). Since 2022, he has also been a member of the Supervisory Board of KKFMS (Netherlands). He sat on the Board of the ALBA association in Greece from 2013 until 2018, and then rejoined it in 2022. Since 2021, Paris Kyriacopoulos has also directed Junior Achievement Greece. Since 2022, he has served as a director of Blue Crest SA (Luxembourg) and was named Chairman in 2024.

He has also been a member of the YPO Aegean/Macedonian Chapter since 2018 and director since 2022.

Annette Messemer

Independent Director

Born on August 14, 1964

Work address:

Opernplatz 10

60313 Frankfurt

Germany

Date first appointed:

May 04, 2020

Term of office expires:

Shareholders' General Meeting in 2026

Main professional activity:

Director

Biography

Annette Messemer is a banking and finance executive who sits on Boards of financial institutions, and of industrial and tech groups. She is a director of Vinci, Société Générale and Savencia. Until May 2021, Annette Messemer also sat on the Audit and Risk, Nomination and Compensation Committees of EssilorLuxottica. Until September 2024, she was a member of the Supervisory Board of Babbel Group AG, in Germany.

Until June 2018, Annette Messemer was a member of the Executive Committee of Commerzbank AG in Frankfurt, Germany. She started working in investment banking at JP Morgan in New York in 1994 before continuing her career in Frankfurt and London. Over the 12 years Annette Messemer spent at JP Morgan, she acquired experience in finance, strategic M&A, financial transactions and risk management. Having reached the level of Senior Banker, she moved from JP Morgan to Merrill Lynch in 2006 as Managing Director and member of the Executive Committee in Germany. In 2010, she was appointed to the Supervisory Board of WestLB by the German Minister of Finance in order to assist with one of the largest restructuring operations of the German banking system during the financial crisis. She went on to join Commerzbank in February 2013. Annette Messemer has been a director of Imerys since 2020 and Chair of its Appointments and Compensation Committees since 2024.

Annette Messemer studied political science and economics and holds an MA and a PhD from the University of Bonn (Germany), a Master's from Tufts University and Harvard University (both in the United States), as well as a diploma in politics from Sciences Po in Paris.

4.1.3 Powers

In accordance with French legislation, the company by-laws and its Charter, the Board is tasked with the following duties:

- protecting the Company's corporate interests and assets;
- determining the strategic directions for the Company's operations and overseeing their implementation, by taking into account the social and environmental challenges of its businesses; in this context, it strives to promote the creation of long-term value for the Company by taking these aspects into account within its activities;
- choosing the Company's Corporate Governance structure and appointing its corporate officers;
- adopting the policies of awarding compensation to corporate officers and setting their compensation in accordance with these policies, subject to the prerogatives of the Shareholders' General Meeting;
- exercising permanent control over the way in which Executive Management manages the Company; and
- ensuring the quality of information provided to shareholders and markets.

In order to perform its role, the Board of Directors:

- carries out the checks and controls it deems appropriate throughout the year. It may obtain any documents it considers useful to fulfill its duties;
- is informed by Executive Management of its annual operating objectives for the year ahead and, periodically, its long-term strategic projects;
- receives regular reports from Executive Management on the state of Company affairs, which are prepared in the manner requested by the Board. The report includes the Group's quarterly and half-yearly financial statements. The Board examines and approves the Group's half-yearly consolidated financial statements;
- is provided by Executive Management with the Company's annual financial statements, the Group's consolidated financial statements and its annual report within the first three months following the end of the financial year. It approves the financial statements and the terms of its Management Report, which is presented to the annual Shareholders' General Meeting.

Prior to their implementation by Executive Management, the Board examines and approves the strategic directions of the Company and the Group, including those relating to corporate social responsibility, environmental responsibility and Corporate Governance, as well as any transactions likely to have a significant impact on these strategic directions. Executive Management presents this strategy to the Board, together with an action plan and the time frames within which these actions will be carried out. Executive Management reports annually to the Board on the results of these actions.

In the case of climate change, this strategy must be accompanied by specific objectives and time frames. Every year, the Board examines the results obtained and the need, if any, to adapt the action plan or modify objectives, particularly in light of changes in corporate strategy, technologies, shareholder expectations and the economic capacity to implement them.

Furthermore, prior to their implementation by Executive Management and within the limits of the general powers granted to it by law, the Board examines and approves the following:

- the operations likely to significantly modify the purpose or scope of business of the Company or the Group, including:
- the acquisition, investment, takeover or disposal of securities or any other fixed asset (and any financially comparable transaction, including contributions or exchanges) for more than €75 million per transaction, or the equivalent amount in any other currency,
- material commercial or industrial agreements committing the Company or the Group over the long term,
- any financing operation for amounts likely to substantially modify the Group's financial structure,
- where necessary, the allocation of managerial tasks between the various Deputy Chief Executive Officers, as proposed by the Chief Executive Officer,
- more generally, any commitment made by the Company or the Group that constitutes a related party agreement, in accordance with law.

Finally, the Board of Directors grants any specific delegations of its powers to Executive Management, where necessary and within the limits and conditions set by law, to:

- grant on behalf of the Company any third-party guarantee (such as sureties and endorsements) or collateral on its assets, up to a maximum principal amount set each year;
- make, pursuant to the authorizations granted to the Board of Directors by the Shareholders' General Meeting, purchases by the Company of its own shares or certain capital increases;
- issue ordinary bonds in one or more transactions.

The Board adopts and reviews, as needed, the Charter on Related Party and Standard Agreements, which sets out the procedure to assess standard agreements and identify any related party agreements that require prior approval from the Board. It also conducts the annual review of related party agreements in accordance with the regulations.

Reporting to the Board, the specialized Committees play an advisory role, submitting opinions and recommendations that help the Board make its decisions. The duties and activities conducted by each Board Committee and the ESG Referent Director in 2025 are detailed in paragraph 4.1.5.5 of the present chapter.

4.1.4 Operating procedures of the Board

4.1.4.1 Charter of the Board

As previously mentioned, the Board has adopted a Charter that contains all the principles of conduct applicable to its members and the operating procedures of the Board and its Committees. The Charter of the Board is updated regularly in order to include any applicable legal or regulatory developments, Corporate Governance guidelines and the results of the assessment conducted by the Board each year of its own operating procedures. The Charter of the Board (as per its most recent update on February 21, 2024) is available on the Company's website *(www.imerys.com)*.

4.1.4.2 Board of Directors, Chairman, Vice-Chair (if applicable), Secretary of the Board and non-voting observer

Chairman of the Board of Directors

The Chairman organizes and oversees the work of the Board, on which he reports to the Shareholders' General Meeting. He ensures the Company's bodies operate effectively and, along with the Vice-Chair (should there be one), ensures directors are able to carry out their duties. He is also charged with calling and chairing Board meetings after setting an agenda with the Chief Executive Officer and the Secretary.

In addition to his legal responsibilities and in collaboration with the Chief Executive Officer, the Chairman may perform the following duties:

- represent the Company in its high-level relations nationally and internationally, in particular with the French State, partners and certain stakeholders of strategic importance to the Company;
- regularly give his opinion on all dealings of material importance to the Company (such as strategic focus, major investment or divestment projects, significant financial transactions, social responsibility initiatives as well as recruiting business executives and key positions), without prejudice to the prerogatives of the Board of Directors, its Committees or the executive responsibilities of the Chief Executive Officer;
- take part, at the invitation of the relevant Committee Chair, in meetings of the Committees of which he is not a member.

Vice-Chair

If appointed, the Vice-Chair supports the Chairman in organizing the work of the Board and its Committees. The Vice-Chair ensures the Company's governance bodies operate effectively. The Vice-Chair also coordinates the Company's relations with its controlling shareholders and their representatives, seeks to prevent any situations likely to cause potential conflicts of interest for a director and, more generally, ensures that best Corporate Governance practice is applied.

At the date this Universal Registration Document was filed, the Board of Directors had not appointed a Vice-Chair.

Secretary of the Board

The Board alone has the power to appoint and, where appropriate, dismiss the Secretary of the Board. The Secretary assists the Chairman, Vice-Chair (if appointed), Committee Chairs and the Board, making any helpful recommendations on the procedures and rules that apply to the Board and its Committees, as well as their implementation and compliance. The Secretary is authorized to certify copies or extracts of minutes taken at Board meetings.

The Secretary also acts as Ethics Officer, tasked with giving an opinion prior to any transactions in the Company's shares considered by the Group's Directors and key corporate officers, at their request.

The Board's current Secretary is Emmanuelle Vaudoyer, Group General Counsel since May 2023.

Non-voting observer(s)

The Board may appoint one or more non-voting observers, who may or may not already be shareholders of the Company, to:

- ensure the proper application of the Company's by-laws and policies applicable to the Board;
- advise the Board, in particular by giving their opinion on any matter put to them by the Board or one of its Committees;
- carry out any specific task entrusted to them by the Board or one of its Committees; and
- more generally, assist the Board in performing its duties without interfering in the management of the Company or acting as a director.

Non-voting observers are subject to the same rules as directors as set out in the Charter of the Board, unless stated otherwise.

The Board of Directors no longer has a non-voting observer as of May 13, 2025.

4.1.4.3 Information and training for members of the Board of Directors

Information for Board members

Notices of Board meetings, which are sent to each director via a secure digital platform, include all the information and documents concerning the items on the agenda that members require to effectively take part in debates. Such information and documents may include the Group's (provisional or definitive) quarterly, half-yearly or annual financial statements and presentations on the current situation in the Group's various businesses or any other specific items that will be raised. Directors may also be given certain additional documents in meetings, such as draft press releases on the Group's financial statements for the period or information on changes in the Company's share price.

In order to allow directors to carry out their duties in an appropriate manner, the Chairman and the members of the Executive Committee, if so called upon, will inform them of any important information published about the Group between Board meetings, including critical reports (in particular press articles and financial analysis reports) and any other sufficiently important or urgent information that is relevant to the Group's situation, projects, and economic or market environment.

Annual strategic seminar

Members of the Board of Directors are invited to take part in the annual strategic seminar. These seminars enable them to improve their understanding of the Group's businesses and environment, through thematic presentations and site visits.

As an exception, no seminar was held in 2025.

Integration of new Board members

Particular attention is paid to the integration of new directors. Thus, in 2025, following the appointment of Martin Doyen and the cooptation of Johannes Huth, several training sessions were organized comprising a presentation of the Group's organization, strategy, business lines and global functions, in order to give them a better understanding of the Group's challenges, businesses, markets and organization. In this context, Johannes Huth and Martin Doyen met with members of the Executive Committee and some of the employees on their teams. Martin Doyen attended an in-depth session on the challenges facing the Finance & IT Departments, given his role as member of the Audit Committee. Site visits were also organized, notably in France and Belgium.

Training for Board members

The training of Board members continues beyond their term of office and is an ongoing process. They benefited from access to targeted online training via the Imerys Learning Hub on the following main themes: the Group's markets and activities; social and environmental issues, including climate; and diversity, equity and inclusion (including gender issues).

In 2024, the directors and some members of the Executive Committee participated in a "Climate Fresk" workshop, which covered the mechanisms and challenges of global warming.

In the context of the work of the Board and its Committees, directors are also regularly informed of legislative and regulatory developments and of the assessment of best governance practices. These factors contribute to the continuing professional development of directors. In addition, several members of the Board of Directors have stated that they took training courses during the year, mainly on the topics of climate change and business ethics.

During its latest assessment in February 2026, the Board of Directors identified the training of its members as an area where it could improve its operating procedures. During the financial year, it will initiate discussions on how to revise the training plan to make sure it aligns with the Company's strategic issues.

4.1.4.4 Consideration given by the Board to Environmental, Social and Governance issues

Environmental, Social and Governance (ESG) issues lie at the very heart of Imerys' strategy and its achievements (see Chapter 1, section 1.2.3). The Board of Directors' consideration of these issues is described in Chapter 3, section 1.1.2.1.

4.1.4.5 Succession planning for corporate officers

Succession planning for corporate officers (Chairman of the Board of Directors and the Chief Executive Officer) is reviewed annually. Succession planning should cover short, unexpected succession needs (resignation, disability, death), and defines actions enabling smooth succession over the medium and long term.

Every year, the Appointments Committee reassesses the situation and makes appropriate adjustments. The Appointments Committee may retain the services of external firms to confirm the effectiveness of succession planning. It keeps the Board informed of progress with this task, including during executive sessions, works closely with Executive Management, and meets from time to time with the Chairman of the Board of Directors and the Chief Executive Officer. The review of the succession plans for corporate officers centers on a presentation made to the Committee, and then to the Board, by the Chief Human Resources Officer, of an analysis of the organization and its talent, including the monitoring of internal talent pools.

In 2025, the Committee reviewed the succession plans for corporate officers and for the Executive Committee as part of the general talent organization review. These plans were then presented, on October 30, 2025, to the Board of Directors, meeting in plenary session, for the Chairman of the Board of Directors, and in executive session (i.e. excluding Executive Management and Group employees), for the Chief Executive Officer and the Executive Committee. The Chairman and Chief Executive Officer were involved in the work of the Appointments Committee.

At the time of its most recent assessment in February 2026, while noting the progress made in this area, the Board of Directors stressed the importance of continuing the work undertaken and the time dedicated in the Committee and the Board to monitoring succession plans.

(see also 2025 activities of the Appointments Committee for more details in paragraph 4.1.5.2 below).

4.1.4.6 Board meetings

	2025	2024
Number of meetings	6[1]	6
Average attendance rate[2]	96.62%	96.15%

[1] *Including one written consultation.*

[2] *Including the non-voting observer until May 13, 2025.*

The Board meets as often as the interests of the Group require and at least four times a year. Meetings are called by the Chairman, Secretary or Vice-Chair of the Board, should there be one, by any means of communication, including verbal.

As per the AFEP-MEDEF Code recommendations, the Board of Directors regularly organizes executive session debates at the end of its meetings, i.e. without the Group's Executive Management team and employees.

4.1.4.7 Activities in 2025

During 2025, the main responsibilities and work handled by the Board were as follows:

Topic	Main responsibilities and work performed in 2025
Businesses	– information about safety within the Group and the performance of business activities – hearing of reports from and review of the recommendations of the Strategy and Sustainability Committee – monitoring of the status and progress of the approval process for the agreement being negotiated by the Group's North American talc former subsidiaries to settle the dispute linked to their historical activities in the United States – monitoring of the Group's five-year business plan (2025-2029) – approval of the risk mapping, as reviewed as part of the comprehensive three-year exercise conducted by the Group – information on the Ethic's Committee report on the implementation and monitoring of the Group's ethics and compliance roadmap – review and post-closing monitoring of M&A transactions and strategic projects and investments, in particular, the "EMILI" project involving lithium mining at the Beauvoir site in France – monitoring, on the basis of reports from the Audit Committee, the roll-out of the Group's cybersecurity policy and progress on the project for the gradual introduction of a new common ERP across the Group (up to 2026) – renewal of the authorizations given to the Chief Executive Officer (including acquisitions of treasury shares, bond issues, sureties, endorsements and collateral) on an annual basis – regular information on the consensus and share price, and presentation of a strategic study on the Group's exposure to certain business sectors
Finance	– review and approval of the 2024 annual financial statements and for the first half of 2025, information about or reviews of the financial statements for the first and third quarters of 2025 and review of the corresponding draft financial press releases for all these financial statements – proposed appropriation of profit and payment of the 2024 dividend – review of management projections – hearing of reports from and review of the recommendations of the Audit Committee – monitoring of cash management and working capital actions implemented by the Group – review and approval of the Group's 2026 budget – monitoring of the bond refinancing carried out in the fall of 2025 (€600 million EMTN bond issue maturing in seven years and tender offer on certain outstanding bonds maturing in 2027)
Environment, Social and Governance (ESG)[1]	– review of the structure of the Board and its Committees, including the possible changes planned in 2025 and 2026 – review of the independent status of members of the Board – review of the AFEP-MEDEF Code recommendations, recommendations for improving Corporate Governance practices, and update of the Charter of the Board – review of the development and succession plans for corporate officers (Chairman of the Board of Directors and Chief Executive Officer) – review of the Group's diversity policy for the Board, management bodies and positions of responsibility, including lessons learned from the talent and organization review – review of the agreements with related parties – approval of the annual reports of the Board of Directors – review of key sustainability performance indicators at end-2024 – review of the results of the update of the double materiality analysis concerning the potential and actual impacts as well as the financial risks and opportunities – review of progress made under the sustainability roadmap and the related medium-term objectives for 2025 – review and approval of the Climate Transition Plan updated in 2024 – review and approval of the new SustainAgility roadmap for 2026-2030 – monitoring, in the context of the report of the Appointments and Compensation Committees, of the organization of the governance roadshow
Compensation	– review and approval of the 2025 compensation policies applicable to the Company's corporate officers, evaluation of their compensation in respect of 2024 and, more broadly, of the details required in respect of the 2024 compensation report submitted for approval at the Shareholders' General Meeting – review and approval of the long-term incentive plans established for the Group's main executives, including assessment of the 2024 performance conditions, approval of the 2025 plan and its rules and award of performance shares to the Chief Executive Officer and other allottees
Shareholders' General Meeting on May 13, 2025	– notice of meeting, approval of draft resolutions and approval of the special reports of the Board of Directors – review of the recommendations by proxy advisors and the main investors
Miscellaneous	– change in the Company's registered office

1 A summary of the work on sustainability undertaken in 2025 by the Board and its Committees is available in Chapter 3, section 1.1.2.2.

In 2025, three of the five Board meetings ended with executive sessions, i.e. without the Group's Executive Management teams and employees being there (including the employee-representative directors).

4.1.5 Board Committees & ESG Referent Director

The Board has formed four permanent specialized committees: the Strategy and Sustainability Committee, the Audit Committee, the Appointments Committee and the Compensation Committee. These Committees carry out their work under the responsibility of the Board, which defines their duties, structure and the compensation of their members based on proposals made by the Appointments Committee and the Compensation Committee. The Board is also assisted by an ESG Referent Director.

The Board Committees and the ESG Referent Director play an advisory role and do not have the power to make decisions. The chair of each Board Committee is required to regularly provide the Board with reports on their work.

The members of the Board Committees and the ESG Referent Director are chosen by the Board, based on proposals made by the Appointments Committee, from among the directors. Committee members and the ESG Referent Director are appointed for the same term of office as their directorship. Each Committee elects its own chair based on the recommendation of the Appointments Committee.

4.1.5.1 Strategy and Sustainability Committee

Members	Date first appointed to the Committee	Number of years spent on the Committee*	Independent
Johannes Huth, Chairman[1]	September 30, 2025	0.25	No
Ian Gallienne	April 29, 2010	15.11	No
Laurent Favre	May 14, 2024	1.11	Yes
Paris Kyriacopoulos	May 10, 2021	4.11	No
Annette Messemer	May 10, 2023	2.11	Yes
Véronique Saubot	May 04, 2020	5.11	Yes

* At December 31, 2025

1 Following Ian Gallienne's resignation as Chairman of the Strategy and Sustainability Committee, Johannes Huth was appointed Chairman of said Committee by the Board of Directors on December 10

Number of members: 6 (2025) 6 (2024)

Number of meetings: 3 (2025) 4 (2024)

Independent directors: 50% (2025) 50% (2024)

Attendance rate: 83% (2025) 100% (2024)

Duties

The Charter of the Board defines the duties of the Strategy and Sustainability Committee as follows:

"The duties of the Strategy and Sustainability Committee include examining and submitting opinions and recommendations to the Board of Directors in the following areas:

Strategy

On the recommendation of the Executive Management, determining the Company's strategic directions, including industrial, commercial, financial and innovation strategies, as well as those relating to social and environmental responsibility, including climate change.

Control of the methods used by the Executive Management to implement this strategy, with the action plan and the time frames within which these actions will be carried out. It is informed annually by the Executive Management of the results achieved and also periodically reviews the long-term strategic plan (multi-annual plan) drawn up or revised by the Executive Management.

It therefore closely analyzes and, where necessary, makes recommendations to the Board on:

- the operations likely to significantly modify the purpose or scope of business of the Company or the Group, including:
  - the purchase of shareholdings, investment, takeover or disposal of securities or any other fixed asset (and any financially comparable transaction, including contributions or exchanges) for more than twenty million euros (€20,000,000) per transaction, or the equivalent amount in any other currency,
  - material commercial or industrial agreements committing the Company or the Group over the long term,
  - any financing operation for amounts likely to substantially modify the Group's financial structure.

At the end of every year, the Strategy and Sustainability Committee presents to the Board its annual schedule for the coming year of the work it plans to undertake to review the strategic issues affecting the future of the Group.

In principle, each year, the Strategy and Sustainability Committee holds a special session devoted to the Group's general strategy, open to all Directors.

Risk

Matters relating to the way the Executive Management identifies, measures and monitors the main challenges and potential impacts, risks and opportunities facing the Group in the following areas:

- outside the Group: investor relations and the Group's market positions, relations with financial and non-financial rating agencies and any other interested parties;
- Group policies: financial resource management, human resources and skills management, dependence and continuity of key industrial or commercial activities;
- management information: management control, financial and sustainability information, retrospective checks, where appropriate, on the most material investment projects."

Activities in 2025

The Committee deepened its reflection on the Group's long-term strategic directions and value creation. It notably reviewed and expressed its position to the Board of Directors on the Group's 2025-2029 business plan.

In addition, with a view to pursuing a selective investment policy and disciplined external growth, the Committee monitored the implementation of the strategic directions decided on by the Board of Directors, with a clear focus on accelerating organic growth and improving margins by building a stronger presence in specialty minerals and in the markets for the energy transition, sustainable construction and natural solutions for consumer goods. Within this framework, the Committee periodically reviewed and approved the key stages and main aspects of the most significant investments, acquisitions and divestments. In 2025, the Committee's review focused on:

- The progress made on developing the Group's lithium-related projects (pre-feasibility study for the EMILI project in France, and monitoring of the Imerys British Lithium project in the United Kingdom), and the search for partners in that context;
- The development, organization and contribution of the Group's strategic partnerships (joint ventures): in particular, that linked to the high-purity quartz activities grouped within the 50-50 joint venture The Quartz Corporation, in a deteriorating market environment;
- The potential impact on the Group's business of the major changes in tariffs, particularly in the United States;
- Objectives and conditions of asset acquisition or disposal.

The Committee also examined movement on the roadmap and the Group's progress on sustainable development, mainly by comparing the Group's approach with that of its peers, decarbonizing its electricity, managing water resources and extending its sustainable development roadmap out to 2030 and beyond.

The Committee also periodically reviewed the Group's sales and financial performance in relation to underlying markets and peers. As such, it approved Management's cost reduction and performance improvement ambitions. It was also regularly informed about developments in the *Chapter 11* process for the activities of North American talc entities.

Operating procedures

The Committee is quorate when a majority of its members are present and meets as often as its Chair sees fit or at the request of the Chairman of the Board of Directors or the Chief Executive Officer.

To perform its duties, the Committee hears contributions from officers and other individuals including the Chief Executive Officer, the Chief Financial Officer, the Chief Strategy and M&A Officer, the Chief Sustainability Officer as well as any other member of the Executive Committee or operating or support department head, depending on the items on the agenda for the meeting. These individuals are invited by the Chief Executive Officer on behalf of either the Committee or himself. Where appropriate, the Committee may visit industrial sites and interview the Group's operating managers on-site where this is helpful for the purposes of its remit.

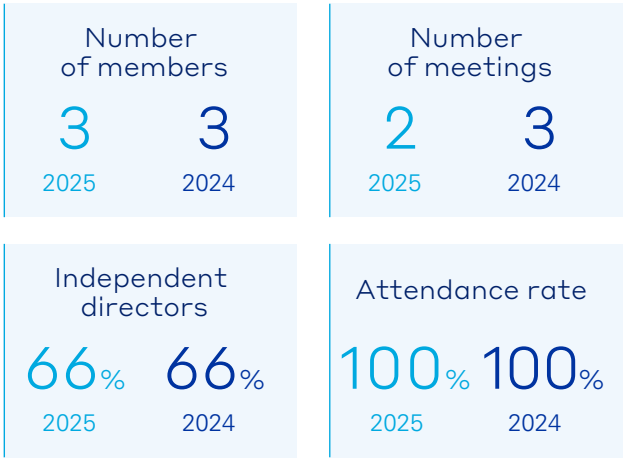

The position of Committee Secretary is held by the Group's Strategy Officer, who drafts the minutes at its meetings.

Over the course of 2025, the Strategy and Sustainability Committee monitored the main management and development decisions made by Executive Management, making sure they were in line with Imerys' strategy and sustainable development roadmap, which had been recommended by the Committee and approved by the Board of Directors.

4.1.5.2 Appointments Committee

Members	Date first appointed to the Committee	Number of years spent on the Committee*	Independent
Annette Messemer, Chair	May 04, 2020	5.11	Yes
Stéphanie Besnier	May 10, 2023	2.11	Yes
Johannes Huth	October 30, 2025	0.5	No

* At December 31, 2025

Duties

The Charter of the Board defines the duties of the Appointments Committee as follows:

"The duties of the Appointments Committee include examining and submitting opinions and recommendations to the Board of Directors on:

- prospective candidates for the positions of Chief Executive Officer, Deputy Chief Executive Officers, Directors, Chairman of the Board of Directors and its Committees as well as their members; as such, the Appointments Committee must take into account the structure and changes to the Company's shareholding to ensure the structure of the Board is balanced in terms of:
  - independence,
  - representation of women and men,
  - nationality,
  - international experience and expertise (in particular, the financial and accounting skills required for members of the Audit Committee or sustainable development skills that might be required for Board members);
- presentation of a succession plan for corporate officers and, as requested by the Chief Executive Officer, members of the Executive Committee;
- the independent status of each director, with respect to the definition of independence adopted by the Board, and any changes (or clarification of criteria) to be made to that definition;
- the section of the Board of Directors' Corporate Governance Report falling within its remit;
- review of draft responses to any requests from regulatory authorities (French Financial Market Authority (AMF) or France's High Committee for Corporate Governance (HCGE)); and
- more generally, the Appointments Committee makes recommendations to the Board to ensure compliance with best governance practices and AFEP-MEDEF Code recommendations. As such, each year the Appointments Committee reviews the conclusions of the self-assessment made by the Board and its Committees as well as the key recommendations."

Activities in 2025

In 2025, the Appointments Committee conducted a comprehensive review of the composition and structure of the Board of Directors and its Committees. This review included a regular assessment of the directors' individual directorships, particularly those whose terms of office were expiring. Accordingly, the Committee recommended the renewal of the directorships of Ian Gallienne and Lucile Ribot. These renewals were approved for a three-year period at the 2025 Shareholders' General Meeting. Ian Gallienne was reappointed Chairman of the Strategy and Sustainability Committee and member of the Compensation and Appointments Committees. Lucile Ribot was reappointed Chair of the Audit Committee.

In light of the decision by Bernard Delpit and Laurent Raets not to seek additional terms of office, Nicolas Gheysens and Martin Doyen were appointed non-independent directors. Following the resignation of Nicolas Gheysens, Johannes Huth, Chief Executive Officer of Groupe Bruxelles Lambert (GBL), was appointed by cooptation. Johannes Huth was also appointed Chairman of the Strategy and Sustainability Committee. This cooptation will be subject to ratification at the next annual Shareholders' General Meeting.

On the basis of the annual self-assessment of the Board of Directors, the Board made recommendations aimed at continuously improving the operating procedures and effectiveness of the Board of Directors and its Committees. The Committee also reviewed the results and comments received during the governance roadshow. In addition, it recommended amendments to the Internal Charter of the Board of Directors (by-laws) in order to ensure compliance with the provisions of the law aimed at increasing business financing and France's attractiveness (the "Attractiveness" law) and approved the Corporate Governance Report for the 2024 Universal Registration Document.

The Committee examined the succession plans in place for the Chairman of the Board of Directors, the Chief Executive Officer and the members of the Group's Executive Committee. Finally, it examined the diversity policy, focusing on the diversity, disability and nationality balance objectives set by the Group and on the progress made in achieving them.

Operating procedures

The Committee is quorate when at least two of its members are present and it meets as often as its Chair sees fit or at the request of the Chairman of the Board of Directors or the Chief Executive Officer.

To perform its duties, the Appointments Committee hears contributions from the Chairman of the Board of Directors, the Chief Executive Officer, the Chief Human Resources Officer and, if required, the Secretary of the Board. It also takes advice from independent experts as it sees fit.

The position of Committee Secretary is held by the Group's Chief Human Resources Officer, who drafts the minutes at its meetings.

4.1.5.3 Compensation Committee

Members	Date first appointed to the Committee	Number of years spent on the Committee*	Independent
Annette Messemer, Chair	May 04, 2020	5.11	Yes
Stéphanie Besnier	May 10, 2023	2.11	Yes
Johannes Huth	October 30, 2025	0.5	No
Bruno Reysset[1]	February 20, 2025	1.1	N/A

* At December 31, 2025

1 Employee-representative director. Bruno Reysset participated as a guest in the meeting of the Compensation Committee held before the February Board meeting that formally appointed him as a member of that Committee.

Number of members		Number of meetings	
4	4	2	3
2025	2024	2025	2024

Independent directors*		Attendance rate	
66%	66%	100%	100%
2025	2024	2025	2024

* Not including the employee-representative director.

Duties

The Charter of the Board defines the duties of the Compensation Committee as follows:

"The duties of the Compensation Committee include examining and submitting opinions and recommendations to the Board of Directors concerning:

- the compensation policy for the Chairman of the Board of Directors, the Chief Executive Officer and other members of the Board;
- the general compensation policy for the Group's executive directors;
- all components of compensation (fixed, variable and exceptional), sign-on bonuses, severance packages and benefits in kind granted or likely to be granted to each corporate officer in accordance with the applicable compensation policy;
- the general policy for granting stock options or performance shares of the Company and determining the beneficiaries of such plans proposed by the Chief Executive Officer;
- the determination of individual stock option or performance share grants to executive corporate officers as well as the specific terms and restrictions that apply to those grants (achievement of financial performance targets, restriction of the number of shares granted, lock-up periods, etc.), in line with the AFEP-MEDEF Code recommendations;
- the section of the Board of Directors' Corporate Governance Report falling within its remit;
- the Group policy on employee share ownership and its terms and conditions as proposed by the Chief Executive Officer;
- the annual review of equality of opportunity and pay;
- review of draft responses to any requests from regulatory authorities (AMF or France's High Committee for Corporate Governance, HCGE); and
- more generally, the Compensation Committee makes recommendations to the Board to ensure compliance with best governance practices and compensation and the AFEP-MEDEF Code recommendations."

The Compensation Committee predominantly comprises independent members, in accordance with the AFEP-MEDEF Code recommendation.

Activities in 2025

In 2025, the Committee reviewed and confirmed the proper application of the compensation policy for senior managers for 2024 as approved by the Shareholders' General Meeting. It then submitted proposals to the Board regarding the policies applicable in 2025 to the Chairman, Chief Executive Officer and members of the Board.

The Committee recommended that the compensation policy applicable to the Chairman of the Board remain unchanged. Following a comparative study conducted the previous year, the Committee recommended adjustments to the compensation policy for the other members of the Board. For the Chief Executive Officer, the Committee suggested that the main components of his compensation be maintained, while adjusting the financial criteria for his annual variable compensation. It also suggested capping the total amount of the severance pay and non-compete indemnity, as well as any exceptional compensation, granted only under specific conditions.

In addition, the Committee analyzed the achievement of the 2024 financial performance targets, in particular those having an impact on long-term incentive plans. On the basis of this analysis, it recommended achievement rates for the respective plans to the Board of Directors. It also recommended the total volume of performance shares to be awarded under the 2025 long-term incentive plans.

Finally, the Committee examined the Board of Directors' discretionary power to depart from the compensation policy, specifying that any use of this power must be reported at the next Shareholders' General Meeting and submitted to an ex-post vote. The Committee also concluded its annual review of executive director-employee pay ratios, as well as a comparative analysis of the long-term incentive plan.

4.1.5.4 Audit Committee

Members	Date first appointed to the Committee	Number of years spent on the Committee *	Independent
Lucile Ribot, Chair	May 04, 2018	6.11	Yes
Stéphanie Besnier	May 10, 2023	2.11	Yes
Martin Doyen	May 13, 2025	0.11	No
Véronique Saubot	May 10, 2023	2.11	Yes

* At December 31, 2025

Operating procedures

The Committee is quorate when at least two of its members are present and it meets as often as its Chair sees fit or at the request of the Chairman of the Board of Directors or the Chief Executive Officer.

To perform its duties, the Compensation Committee hears contributions from the Chairman of the Board of Directors, the Chief Executive Officer and any relevant Human Resources managers as well as the Secretary of the Board. It also takes advice from independent experts as it sees fit.

The position of Committee Secretary is held by the Group's Chief Human Resources Officer, who drafts the minutes at its meetings.

Number of members		Number of meetings	
4	4	5	5
2025	2024	2025	2024

Independent directors		Attendance rate	
75%	75%	95%	100%
2025	2024	2025	2024

Over two thirds of the members of the Audit Committee are independent, in accordance with the AFEP-MEDEF Code recommendation and the AMF working group on Audit Committees.

Duties

The Charter of the Board defines the duties of the Audit Committee as follows:

"The duties of the Audit Committee include examining and submitting opinions and recommendations to the Board of Directors on:

Financial statements

- the statutory and consolidated annual, half-yearly and quarterly financial statements;
- the scope of consolidation;
- relevance and consistency of accounting methods, by verifying, in particular, the reliability of internal procedures for collecting and checking information;
- method and estimates applied in impairment tests by the Group;
- the Group's debt position;
- any material litigation and off-balance sheet commitments, and their impact on the Group's financial statements;
- procedure applied to producing and circulating accounting and financial information;
- analysis of any remarks made by regulatory authorities (AMF) and the draft replies.

Financial and sustainability information

- the policy and procedures applied to financial communication designed to ensure the Group's compliance with regulatory obligations;
- monitoring of issues relating to the preparation and control of sustainability information, including impacts, risks and opportunities, to ensure compliance and quality, and monitoring the process of preparing this information;
- following relations with investors, financial and non-financial rating agencies and any other interested parties;
- the main components of financial communication relating to the Group and Company financial statements, in particular:
- review of press releases,
- the consistency of these financial statements with the information provided in financial communications, and
- the relevance of the elements used in this communication.

External control

- the proposals for the appointment or reappointment of the Statutory Auditors, in the case of certification of the financial statements, or, where applicable, of the Statutory Auditors and/or the independent third-party organization, in the case of certification of sustainability information. If circumstances warrant, the Committee examines and approves the content of the specifications, the timetable and organization of the call for tenders with a view to their appointment and, where applicable, their renewal, and monitors the smooth running of this call for tenders;
- the Statutory Auditors' work plan for certifying the financial statements, and where applicable, certification of sustainability information and any additional assignments they or other members of their network may be given, as well as the corresponding fees;
- the supervision of the rules for calling upon the services of the Statutory Auditors other than for the statutory audit of the financial statements and where applicable, certification of sustainability information ("authorized non-audit services") and, more generally, compliance with the principles safeguarding the independence of Statutory Auditors and the measures taken by them to mitigate any risk.
- to this end, the Audit Committee reviews and authorizes in advance any authorized non-audit services subject to any conditions laid down by the Board. Exceptionally, where the total annual amount of fees paid for specific assignments does not exceed the percentages or amounts set by the Board, such fees are simply ratified by the Audit Committee by December 31 of each year at the latest;
- the conclusions of due diligence work by Statutory Auditors as well as their recommendations and follow-up actions.

Audit & Internal control

- the annual internal audit programs and internal control assessments and the resources allocated to their implementation;
- the results of the work by the internal and external auditors and the internal control department, following up on any recommendations made, particularly concerning the analysis, corrective measures and preparation of the Group's material risk mapping, monitoring significant sustainability impacts, risks and opportunities, and sustainability information, as well as the way in which risk and significant off-balance sheet commitments are managed and internal audit teams are organized;
- the preparation and content of the annual report of the Board of Directors on the Group's risk factors and internal control.

Risk

- identification, measurement and monitoring by Executive Management of the main risks and opportunities facing the Group in the following areas:
- outside the Group: legal or regulatory developments, crisis or disaster management and cybersecurity, environmental and social issues,
- Group processes: monitoring major disputes, compliance with applicable regulations (including for sustainability), business conduct in accordance with the regulations and Imerys' core ethical values (conduct and ethics, anti-corruption, anti-trust, etc.),
- potential mineral reserves and mineral resources;
- the direction, implementation and monitoring by Executive Management of the Group's comprehensive policy on internal control, risk prevention (organization, policies and procedures, IT infrastructure and systems, telecommunications and digitization, etc.), Group insurance, and any changes that may be introduced;
- the programs and results of the work by internal specialists (auditors, attorneys, etc.) and any external specialists brought in, on risk analysis, control and metrics and the Group's performance in the aforementioned areas;
- other issues likely to have a material financial, accounting or sustainability impact on the Company or the Group."

Activities in 2025

The Audit Committee reviewed Imerys' annual and consolidated financial statements for 2024, as well as the Group's quarterly and half-yearly consolidated financial statements in 2025. As part of that work, it examined the period-end procedures and related draft press releases. Following this work, it was able to recommend that the Board should unreservedly approve the definitive financial statements. The Committee examined, on a quarterly basis, the monitoring of the non-audit services provided by the Statutory Auditors. It also reviewed the ways in which IFRS accounting rules were applied in the specific context of 2025, and in particular monitored the recommendations made by the AMF concerning the preparation of the 2025 financial statements and their implementation in the consolidated financial statements in the Universal Registration Document. It examined changes in the Group's overall effective tax rate and its components, changes in the segment-based presentation, and reviewed the results of impairment tests on the Cash-Generating Units concerned, including the impact of climate change risks in sensitivity analyses.

In the first half of 2025, the Audit Committee reviewed the report on payments to governments made by the Group's entities conducting mining operations.

Throughout 2025, the Committee also monitored developments in the litigation situation relating to the historical activities of the Group's former North American talc entities in the United States.

During the year, several presentations were given on the Group's compliance programs, in particular regarding the fight against corruption. The annual Ethic's Committee report was reviewed.

At the end of each half-year, the Audit Committee examined the operational report produced by the Internal Audit & Control Department. It includes details of audit assignments completed and the follow-up on execution of the action plans put in place after audits in previous years, as well as tests and evaluations of the internal control systems in force in the Group. The Audit Committee also reviewed the audit plan and the specific actions scheduled for 2026. In addition, it studied the Group's updated risk assessment and mapping. Lastly, the Committee reviewed the Statutory Auditors' work program for the 2025 financial statements and considered their reports on the financial and non-financial information for 2024.

The Audit Committee reviewed the information published in the Sustainability Report 2024, to ensure compliance and quality, and monitored the regulatory developments to be implemented in 2025.

Throughout the year, the Committee also discussed the following matters: the activities of the Group Treasury function, including improvements to cash monitoring and localization tools; the major IT projects, in particular cybersecurity risk management; the recognition of major restructuring projects and changes in scope, mainly with respect to the purchase accounting of the assets acquired from Chemviron; the recognition of the costs of the lithium projects; the inventory of the Group's mineral reserves and resources; the review of the financial statements and control environment of joint ventures and associates; the management and status of the main legal risks (including the main legal disputes) and the evaluation of the corresponding provisions; the management of insurance policies and renewal of material policies; the management of post-employment commitments; the assessment of the Group's tax positions in the main countries in which it is based and any potential related tax risks; the management of risks related to product stewardship; the new accounting standards, in particular IFRS 18; and the recognition of virtual power purchase agreements (vPPAs).

Operating procedures

The Audit Committee is quorate when the majority of its members are in attendance. It meets as often as its Chairman sees fit or at the request of two of its members, the Chairman of the Board of Directors or the Chief Executive Officer.

To perform its duties, the Audit Committee hears contributions from the Chief Executive Officer, the Statutory Auditors and the Chief Financial Officer. Alternatively, the Chief Executive Officer or the Chief Financial Officer may invite or be asked by the Committee to invite any other person involved in preparing and auditing the financial statements or managing or preventing risks (including the Finance Department, the Internal Audit & Control Department, the Legal Department), depending on the items on the agenda for the meeting.

The Committee enjoys access to all information available in the Group. It may also visit industrial sites and take the opportunity to speak with any of the Group's operating and support managers as it sees fit in order to carry out its duties. The Committee may also ask for any audit to be conducted, either internally or externally, on any issue it deems to come within its responsibility. The Chairman of the Board of Directors and the Chief Executive Officer must be informed of this decision.

The position of Audit Committee Secretary is held by the Group's Chief Financial Officer, who drafts the minutes at its meetings and communicates them to the Statutory Auditors.

4.1.5.5 ESG Referent Director

On July 27, 2021, the Board of Directors appointed a Director dedicated to environmental, social and governance (ESG) issues. This appointment was aligned with the Board's desire to enhance the Company's governance in ESG issues, especially as regards the AFEP-MEDEF Code recommendations and the Task Force on Climate-related Financial Disclosures and practices observed at Euronext Paris-listed companies, so it can meet investors' and rating agencies expectations.

Following the creation of the Strategy and Sustainability Committee, the Board confirmed, at its meeting of December 12, 2023, the need to maintain the position of ESG Referent Director in order to facilitate the establishment of this Committee. The Board took into account the Group-wide nature of these issues and, to this end, fostered coordination between the work of its various Committees (see section 1.1.2 of Chapter 3 and the Internal Charter of the Board of Directors available on the Company's website). In this respect, it is noted that Véronique Saubot is also a member of the Strategy and Sustainability Committee and the Audit Committee.

ESG issues are presented to the Board at least twice a year.

On February 19, 2026, given the maturity of the Board of Directors and its Committees on sustainability issues and the now cross-cutting integration of these topics into their work, the Board decided not to maintain the position of ESG Referent Director at the end of the 2026 Shareholders' General Meeting.

Duties

The main responsibilities of the ESG Referent Director are as follows:

- The ESG Referent Director assists the Strategy and Sustainability Committee and, where appropriate, the Board, to ensure that: strategic directions adequately integrate environmental and social considerations, in particular when examining and monitoring (i) the execution of the annual or multi-year strategic plan, (ii) the Group's sustainable development roadmap, and (iii) significant shareholdings, acquisitions or investments, as well as commercial or industrial agreements that would commit the long-term future of the Company or the Group;
- he/she ensures that the strategy implemented by Executive Management is aligned with the ESG priorities set by the Board;
- he/she assists the Audit Committee and, where appropriate, the Board, in monitoring issues relating to the preparation and control of sustainability-related information, as well as the mapping and supervision of Group risks;
- he/she ensures that the compensation policy for executive corporate officer includes, where relevant, criteria relating to social and environmental responsibility;
- he/she assists the Board with a review of the ESG information contained in the Universal Registration Document;
- he/she assists the Appointments Committee and, where appropriate, the Board, in matters of diversity, inclusion and equity.

More generally:

- he/she coordinates and ensures consistency between the work of the committees on ESG and sustainable development;
- he/she makes recommendations to the Committees, at their request or directly, concerning any subject related to ESG and sustainable development issues falling within their remit;
- he/she makes suggestions to the Chairman of the Board of Directors to add to the agenda of Board meetings additional points falling within his/her remit.

The ESG Referent Director is selected from among the independent directors and is appointed for the duration of their directorship. Additional compensation is paid in respect of these duties (see paragraph 4.3.1.4 below).

The arrangements concerning the status, remit and powers of the ESG Referent Director are laid out in more detail in the Charter of the Board (available on the Company's website).

Activities in 2025

The ESG Referent Director reviewed and coordinated the presentation of all sustainability themes to the Board of Directors and the Committees, as detailed in Chapter 3, section 1.1.2.2.

4.1.6 Attendance record of Board members

In accordance with the AFEP-MEDEF Code, the following table presents a summary of the 2025 attendance record of each member at meetings of the Board and each specialized Committee on which they sit:

	Board of Directors	Strategy and Sustainability Committee	Appointments Committee	Compensation Committee	Audit Committee
Patrick Kron	100%				
Stéphanie Besnier	100%		100%	100%	100%
Martin Doyen *Director* *Member of the Audit Committee (since May 13, 2025)*	100%			N/A	100%
Laurent Favre	100%	100%		N/A	
Ian Gallienne *Director* Member of the Appointments and Compensation Committees (*until October 27, 2025)*	100%	100%	100%	100%	
Johannes Huth *Director* *Member of the Strategy and Sustainability Committee (since September 30, 2025) and the Appointments and Compensation Committees (since October 30, 2025), and Chairman of the Strategy and Sustainability Committee (since December 10, 2025)*	100%	0%[1]	100%	100%	
Paris Kyriacopoulos	100%	100%			
Annette Messemer	100%	100%	100%	100%	
Lucile Ribot	100%				100%
Véronique Saubot	80%	100%			80%
Carlos Manuel Pérez Fernández	100%				
Bruno Reysset *Employee-representative director* *Member of the Compensation Committee (since February 20, 2025)*	100%			100%	

1 Johannes Huth was appointed at the end of September 2025 but was unable to attend the meeting of the Strategy and Sustainability Committee held in October due to pre-existing work commitments.

4.1.7 Assessment of the Board

The Board conducts its assessment based on the objectives and arrangements laid down in the AFEP-MEDEF Code recommendations and in line with the Charter of the Board. More specifically, the Board devotes an agenda point once every year to a discussion of its operating procedures and its activities and those of its Committees during the previous year. At least once every three years, at an interval decided by its Chairman, the Board conducts or commissions a third-party consultant to conduct a formal assessment. The key findings are included in the Board's Corporate Governance Report. As a reminder, the Board of Directors hired an independent external consultant in 2023/2024 and carried out formal self-assessments in the following financial years.

2024/2025 assessment

The Board carried out a formal self-assessment of its organization, mode of operation and structure, as well as of its Committees and the individual contributions of directors. At its meeting of February 20, 2025 and based on the recommendations of the Appointments Committee, it subsequently approved an action plan aimed at improving certain practices and strengthening the Company's governance. At its meeting held on February 19, 2026, the Board noted the status of the actions taken following the assessment of its operating procedures, reflecting a continuous improvement in its practices, in particular as regards the participation of the Executive Committee, its balanced structure, succession planning for corporate officers, information tools, and the quality of its minutes.

2025/2026 assessment

The Board moved forward with the formal self-assessment of its organization, mode of operation and structure, as well as of its Committees, in order to confirm that the agenda for their work properly covers the scope of their duties and that important issues have been appropriately prepared and discussed. The topics addressed covered operating procedures, content, quality of discussions, structure of the Board and relationships of the Board and Committees, as well as compensation and logistics. This assessment was also an opportunity to ask the directors how they would like each member's individual contributions to be assessed.

This assessment was conducted by distributing one or more digital questionnaires to each member of the Board, depending on how many Committees they are on. The results of this assessment and the suggestions for improvement for financial year 2025 were reviewed by the Appointments Committee at its meeting of February 11, 2026 and then reviewed and discussed by the Board at its meeting of February 19, 2026.

The assessment of the Board and its Committees underscored, for 2025, a generally high level of satisfaction of members of the Board and Committees with their operating procedures and with all the other topics addressed (operating procedures, content and quality of the discussions, structure, relationships of the Board and Committees, compensation, individual contribution and minutes).

Over the last three years, directors have noted, in particular, an improvement in the time spent on sustainable development issues and on the compensation of corporate officers, constructive exchanges that promote effective decision-making, and a high level of satisfaction regarding the relationships between the Board and its Committees.

The areas of improvement suggested by the directors include the optimization of the Board's operating procedures; increased participation; and, for a future appointment, the search for sector expertise or in-depth experience in certain US or Asian markets.

4.2 Executive Management

At the date of this Universal Registration Document, the Group's Executive Management was headed by Alessandro Dazza, whose biography is given below, assisted by an Executive Committee comprising the Group's main operating and functional executives, as described in paragraph 4.2.3 of this chapter.

4.2.1 Chief Executive Officer

Alessandro Dazza

Chief Executive Officer

Born on April 17, 1969

Work address:

c/o Imerys

43, quai de Grenelle

75015 Paris

France

Date appointed: December 17, 2019, effective February 17, 2020

Term of office expires: Unlimited term of office

Main professional activity: Chief Executive Officer

Shares held: 278,134 shares

Biography

Alessandro Dazza graduated from the Politecnico di Milano having studied engineering.

After starting his industrial career in Italy in 1991, he joined Treibacher Schleifmittel in Austria in 1995. He participated in a management buyout with a few executive directors and became a member of its Managing Board. Alessandro Dazza joined Imerys in 2002 when Imerys bought Treibacher Schleifmittel. From 2002 until 2013, Alessandro Dazza held various roles within Imerys and in July 2013, he became Executive Vice President, member of the Executive Committee, in charge of three divisions with total revenue of approximately €2 billion. In November 2018, following the arrival of a new CEO and as a result of a new reorganization, Alessandro Dazza left Imerys. He joined Mondi plc., a leading company in paper and packaging. As a member of the Executive Committee, he was in charge of two divisions with total revenue of approximately €4 billion.

Alessandro Dazza became Imerys' Chief Executive Officer on February 17, 2020.

Offices and positions held at December 31, 2025

Non-Group listed companies

- Chairman of the Board of Directors – AMAG Austria Metall AG – Austria

Other non-Group companies

- N/A

Offices and positions that have expired in the past five years

Non-Group listed companies

- Member of the Executive Committee and CEO of Flexible Packaging and Engineered Materials – Mondi Plc. – United Kingdom

Other non-Group companies

- Member of the Supervisory Board – Silgan Holding Austria – Austria
- Member of the Board of Directors – Tori Spa – Italy

1 Alessandro Dazza worked and held various senior management positions at Imerys from 2002 to 2018 and was a member of the Executive Committee from 2013 to 2018.
2 The declarations made in the "Other information" paragraph of Subsection 4.1.1 of the present chapter also apply to Alessandro Dazza.

4.2.2 Powers

Pursuant to legal and statutory provisions, the Chief Executive Officer holds the broadest powers to act in all circumstances in the Company's name. He exercises these powers within the scope of the Company's corporate purpose and subject to the powers expressly vested by the law in Shareholders' General Meetings and the Board. The Chief Executive Officer represents the Company in its dealings with third parties.

Pursuant to article 18 of the Company's by-laws, the Board may restrict his powers. However, any such restriction is not binding on third parties.

As such and in accordance with the Charter of the Board, paragraph 4.1.3 of the present chapter details all transactions that require approval from the Board prior to their implementation by Executive Management.

The Board may also appoint one or more Deputy Chief Executive Officers based on a proposal by the Chief Executive Officer.

4.2.3 Executive Committee

4.2.3.1 Structure of the Executive Committee

The Group's organization is built around three activities: Performance Minerals, Solutions for Refractory, Abrasives and Construction, and Solutions for Energy Transition (see Chapter 1, section 1.3 Organization). The simplified organization with a limited number of management layers brings the Group closer to its customers and allows it to meet their needs in a more efficient way. The Senior Vice Presidents of the businesses report directly to the Chief Executive Officer.

Support functions (Finance & IT, Human Resources, Sustainable Development, Legal, Strategy and M&A) are centralized at Group level and operate as business partners to the different business lines, while Innovation and Operations report directly to those business lines.

At the date this Universal Registration Document was filed, the Executive Committee had the following members:

Name	Title	Nationality	Date first joined the Group	Date first appointed to the Executive Committee
Alessandro Dazza	**Chief Executive Officer**		**2020***	**2020***
Operating executives				
Philippe Bourg	Senior Vice President Solutions for Refractory, Abrasives & Construction		1996	2018
Guillaume Delacroix	Senior Vice President Performance Minerals EMEA & APAC		2004	2018
Jim Murberger	Senior Vice President Performance Minerals Americas		1996	2018
Senior Vice Presidents of support departments				
Anastasia Amvrosiadou	Group Chief Human Resources Officer		2015	2022
Pierre Lebreuil	Chief Financial Officer		2002	2026
Olivier Pirotte	Chief Strategy and M&A Officer		2015	2015
Emmanuelle Vaudoyer	General Counsel and Secretary of the Board		2023	2023
Leah Wilson	Chief Sustainability Officer		2017	2022

1 Alessandro Dazza worked and held various senior management positions at Imerys from 2002 to 2018. He was a member of the Executive Committee from 2013 to 2018.

4.2.3.2 Duties of the Executive Committee

The Executive Committee plays an informational and advisory role. Its duties are to ensure that the organization, resources and general conduct of the Group's business, as implemented by each member within their individual scope of responsibility and under the authority of the Chief Executive Officer, are in line with the strategy adopted by the Board of Directors and in accordance with the policies and objectives set.

These duties specifically include:

- reviewing presentations made on strategy and the budget to the Board, implementing them and overseeing their execution, and making any adjustments required to ensure compliance with them;
- reviewing the Group's ESG ambitions and objectives in order to promote long-term value creation through its SustainAgility sustainable development program;
- defining key targets for improving overall Group performance (particularly in terms of operational, financial, labor, social and environmental issues, as well as employee health & safety in the workplace), as well as monitoring those targets and implementing any corrective measures necessary;
- reviewing the appropriateness, development and mobility of the Group's managerial resources in view of its current and expected future needs, as well as the main organizational changes envisaged;
- adopting, overseeing the deployment and supervising the implementation of the cross-functional and/or transformational policies and actions that apply across the Group (including Innovation, Sustainability, Human Resources, Communication, Operational Excellence, Geology & Mines, Health & Safety, Ethics and Compliance, Internal Control & Risk Management, Legal, IT Systems & Internal Efficiency), and more generally, all plans, operations and/or measures that are submitted to the Executive Committee by the Chief Executive Officer himself or based on proposals made by other members.

The Executive Committee meets every month, and as often as the best interests of the Group require. It met on 11 occasions in 2025, including a three-day seminar.

The Executive Committee's assessment and management of impacts, risks and opportunities is described in Chapter 3, section 1.1.4 Governance.

4.3 Compensation awarded to corporate officers

The information covered in the present section 4.3 forms an integral part of the Corporate Governance Report, in accordance with article L. 22-10-8 of the French Commercial Code.

Shareholder dialogue

Following the first governance roadshow held in December 2024 and January 2025, the Board of Directors, on the recommendation of the Appointments Committee, made a number of targeted adjustments to the 2025 compensation policy for the Chief Executive Officer aimed at improving the transparency and predictability of certain components and the rules that govern them.

These adjustments mainly concerned the ceiling for and duration of the non-compete indemnity, the rules for granting exceptional components of compensation, and clarifications regarding the conditions for the exercise of the Board's discretionary power.

Taking the expectations expressed during the shareholder dialogue into account resulted in a significant improvement in the results of the votes at the 2025 Shareholders' General Meeting, as illustrated in the table below:

	Votes in favor*
5th resolution – Approval of the compensation policy applicable to the Chairman of the Board of Directors with respect to the 2025 financial year	99.3%
6th resolution – Approval of the compensation policy applicable to the Chief Executive Officer with respect to the 2025 financial year	97.8%
7th resolution – Approval of the compensation policy applicable to members of the Board of Directors with respect to the 2025 financial year	99.4%
8th resolution – Approval of the components of corporate officer compensation with respect to the 2024 financial year, in accordance with article L. 22-10-9 I of the French Commercial Code	98.6%
9th resolution – Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chairman of the Board of Directors with respect to the year ended December 31, 2024	99.3%
10th resolution – Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chief Executive Officer with respect to the year ended December 31, 2024	97.3%

* Figures rounded up.

November 2025 governance roadshow and changes planned for 2026

A governance roadshow was also organized at the end of November 2025: a series of discussions was held with institutional investors and voting advisory firms, with the participation of the Chairman of the Board of Directors or the Chair of the Appointments and Compensation Committees, accompanied by the Secretary of the Board, the Group General Counsel, the Group Chief Human Resources Officer, and the Investor Relations and Financial Communications teams.

Changes planned for 2026

These discussions informed the work of the Compensation Committee and the Board of Directors with a view to the changes planned for 2026. As a result, the improvements proposed by the Board of Directors are as follows:

- strengthen the information relating to the shareholder dialogue, as well as publishing the biographies of director-candidates in the Universal Registration Document,
- change the structure of the compensation system for the Chief Executive Officer by limiting the use of the same ESG performance conditions in annual variable compensation and long-term variable compensation. As part of the 2026 compensation policy for the Chief Executive Officer adopted by the Board of Directors based on the recommendations of the Compensation Committee, a relative performance condition will also be introduced, in line with the expectations expressed during the shareholder dialogue.

These changes are intended to continue to strengthen the alignment of the compensation policy with the Company's performance and long-term strategy and the expectations of shareholders.

4.3.1 2026 Compensation policies applicable to corporate officers (ex-ante votes)

In accordance with articles L. 22-10-8 I and R. 22-10-14 of the French Commercial Code, the compensation policies for the corporate officers set out all components of their fixed and variable compensation and explain the process by which the policy was developed, revised and implemented.

The 2026 compensation policies for the corporate officers (Chairman of the Board of Directors, Chief Executive Officer and members of the Board of Directors) were approved by the Board of Directors at its meeting of February 19, 2026 in line with the recommendations of the Compensation Committee. They will be submitted for approval by the Shareholders' General Meeting on May 12, 2026 (see Chapter 8, paragraph 8.2.3).

All this information and the details of the long-term incentive plan for employees and Senior Managers (see paragraph 4.3.3 of the present chapter) form an integral part of the Corporate Governance Report required by article L. 225-37 of the French Commercial Code.

4.3.1.1 Principles guiding the development, adjustment and implementation of compensation policy

In general, the compensation policies applicable to corporate officers are agreed each year by the Board, based on proposals made by the Compensation Committee. Where necessary, they are reviewed mid-year. The Committee makes its recommendations to the Board based on assessments and comparisons conducted on a regular basis by specialist consultants. To avoid any conflict of interest, the corporate officers do not take part in discussions or voting on compensation components concerning them.

The Board of Directors, with the support of the Compensation Committee, thus ensures the compensation policy protects the Company's corporate interests, is aligned with its strategy and will underpin its long-term success. To this end, the Board pays considerable attention to:

- aligning the policy with the Group's expectations regarding corporate officer performance and engagement, given their level of experience and expertise;
- aligning the policy, especially any components of variable and long-term incentive payments, with the Company's performance as well as its strategy for the short, medium and long term;
- maintaining the competitive alignment with best practice applied by comparable listed French companies in the market and monitor recent changes; and
- ensuring the policy remains appropriate with respect to the compensation of Company employees. Therefore, the performance conditions applicable to variable compensation and long-term incentive plans awarded to corporate officers are aligned with those applicable to other Group employees eligible for this type of compensation.

Derogation from the compensation policy pursuant to article L. 22-10-8, III of the French Commercial Code

The Company reserves the right in exceptional circumstances to depart from the compensation policy for corporate officers (Chairman of the Board and Chief Executive Officer) on a temporary basis where necessary to protect the Company's corporate interest or contribute to its long-term success or viability. These three conditions are cumulative.

Accordingly, the Company's Board of Directors would, in exceptional circumstances, have the option of making adjustments to the compensation policy previously approved by the Shareholders' General Meeting, in respect of the variable compensation components and share-based payments to the Chief Executive Officer, provided that it maintains the alignment between these compensation components and the Company's performance and upholds the principles laid down hereinabove.

The exceptional circumstances referred to could specifically include (i) any major event beyond the Company's control affecting the markets in general and/or the Company's business sector and/or the main competitors to the Company and giving rise to material implications for the Company that could not have been foreseen on the date the compensation policy was determined, (ii) a material change in the Group's scope or (iii) a change in accounting method, unforeseen developments in the regulatory environment, or the unforeseen continuation of the consequences of a global pandemic.

Use of this option needs to be explained and decided upon by the Board, acting on recommendations of the Compensation Committee, which will report on it to the following Shareholders' General Meeting.

Derogation from the compensation policy in the Board of Directors' exercise of its discretionary power

The Board may, based on proposals made by the Compensation Committee, exercise its discretionary power and depart from the compensation policies applicable to corporate officers in two scenarios:

- if a new corporate officer (Chairman of the Board or Chief Executive Officer) is appointed during the year, his/her performance is assessed by the Board of Directors on a discretionary basis based on proposals made by the Compensation Committee;
- if a major event occurs requiring the Board to change one or more criteria, including the ESG criteria, and/or the target objectives for the variable compensation (annual or long-term) of the corporate officers (Chairman of the Board or Chief Executive Officer) to achieve greater consistency between the officer's performance and that of the Company, in accordance with the principles of the compensation policy.

These adjustments may concern quantifiable criteria, mainly as follows:

- in the event of a transaction that significantly changes the Group's scope, the quantifiable criteria may be adjusted to reflect the new scope. The qualitative criteria may also be adjusted if they become obsolete;
- for annual variable compensation: in the event of a change in accounting standards, a change in the presentation of financial reporting indicators during the year or any other significant change that may have a structural and material impact on the parameters used to define the performance conditions, the Board of Directors of the Company may adjust the criteria or the target objectives accordingly;
- for long-term variable compensation: in the event of a change in accounting standards, a change in the presentation of financial reporting indicators, a change in the ESG roadmap or any other significant change that may have a structural and material impact on the parameters used to define the performance conditions when shares are granted, the Board of Directors of the Company reserves the right to adjust the performance conditions or the assessment of the performance conditions established at the time of the grant in order to account for these events and offset their impact on the defined performance objectives.

It should be noted that the adjustments decided on by the Board of Directors, based on the proposals made by the Compensation Committee, will be made subject to the respective ceilings for annual variable compensation and long-term variable compensation. These ceilings are defined in the context of the components of variable compensation awarded to corporate officers under the applicable compensation policy.

In any event, if the Board were to make use of its discretionary power, it would have to justify this use to shareholders, who will have to approve the exercise of this discretionary power with an ex-post vote. The payment of the annual variable component, the long-term variable component and the components of exceptional compensation remains subject to approval by the Shareholders' General Meeting. Lastly, the Compensation Committee will have to draw certain conclusions from the adjustments that should have been made, if any, and then account for them when establishing the compensation policy for the next financial year.

Where necessary (in accordance with article R. 22-10-14 II para. 3 of the French Commercial Code), the 2026 compensation policies (Chairman of the Board of Directors, Chief Executive Officer and Board members) do not provide for any deferral period or for any option to claw back variable compensation from a corporate officer.

The compensation policies will apply to all current and future corporate officers until they are amended.

4.3.1.2 2026 Compensation policy for the Chairman of the Board of Directors

The 2026 compensation policy for the Chairman of the Board of Directors set out below was adopted by the Board of Directors at its meeting of February 19, 2026, in line with the recommendations of the Compensation Committee. The 2026 compensation policy for the Chairman of the Board of Directors is identical to that approved by the Shareholders' General Meeting of May 13, 2025. The general principles set out in paragraph 4.3.1.1 above form an integral part of the present compensation policy.

At the date this Universal Registration Document was filed, the Chairman of the Board of Directors is Patrick Kron.

Chairman of the Board of Directors	
Annual fixed compensation	The fixed component of compensation is determined according to the level of experience and responsibility when the Chairman of the Board of Directors takes up office. It is reviewed every year to ensure it is in line with market practices at comparable companies. The (gross) annual fixed compensation of the Chairman of the Board of Directors is €400,000, unchanged since 2022.

4.3.1.3 2026 Compensation policy for the Chief Executive Officer

The 2026 compensation policy for the Chief Executive Officer was adopted by the Board at its meeting of February 19, 2026, based on the recommendations of the Compensation Committee. The general principles set out in paragraph 4.3.1.1 above form an integral part of the present compensation policy.

In line with the shareholder dialogue conducted during the financial year, the Board of Directors sought to make certain targeted adjustments to the 2026 compensation policy for the Chief Executive Officer in order to clarify it and align it with the Group's long-term strategy. These adjustments include:

- refocusing the ESG criteria taken from the Group's SustainAgility roadmap and applying different criteria for annual variable compensation and long-term variable compensation. This refocusing is in line with market practices, as the variable compensation systems for senior managers of CAC 60 companies are based, on average, on a limited number of performance conditions,
- introducing a relative performance condition measured by total shareholder return (TSR), assessed against a panel of comparable companies, in the long-term performance assessment, as described below.

At the date this Universal Registration Document was filed, the Company's Chief Executive Officer was Alessandro Dazza[(1)].

Chief Executive Officer

Annual fixed compensation

The fixed component of compensation is determined according to the level of experience and responsibility when the Chief Executive Officer takes office. It is then reviewed every year to ensure it is in line with market practices at comparable companies.

Since 2023, the Chief Executive Officer's gross annual fixed compensation has amounted to **€920,000**.

Annual variable compensation

The amount of annual variable compensation will be determined during 2027 by the Board of Directors, after assessing the level of achievement of the performance conditions, subject to approval by the Shareholders' General Meeting of this compensation policy.

Quantifiable criteria relating to financial performance (65% of annual variable compensation)

For the 2026 financial year, the Board decided to maintain the **quantifiable criteria relating to financial performance**, as well as their weighting within annual variable compensation.

Deemed relevant for assessing the Group's operational and financial performance and the implementation of its strategy, their target objectives are identical to the Group **budget targets** as set by the Board of Directors for the 2026 financial year. These targets are not made public for confidentiality reasons.

The financial criteria are set out in greater detail in note (A) below.

Quantifiable criteria relating to ESG performance (15% of annual variable compensation)

The Board reviewed the quantifiable criteria relating to ESG performance, which are taken from the Group's "SustainAgility" roadmap, as approved by the Board of Directors. The roadmap is presented in Chapter 3 and has been updated for the 2026-2030 period.

In this context, the Board of Directors decided to limit **the number of ESG criteria to three** in order to improve clarity and consistency.

The objectives are pre-established, precisely defined and in line with the Group's objectives set in the roadmap.

The ESG criteria are set out in greater detail in note (A) below.

Individual qualitative criteria (20% of annual variable compensation)

The Board of Directors also set out the individual qualitative annual variable compensation criteria applicable to the Chief Executive Officer. The criteria and the objectives are pre-established and precisely defined. As previously, the factors taken into account in assessing these criteria will be disclosed ex-post. These criteria are confidential and so cannot be published in full.

The individual qualitative criteria are set out in greater detail in note (A) below.

Calculation and payment terms:

The target value of annual variable compensation is set at 110% of annual fixed compensation. Annual variable compensation can thus vary between 0% and 165% of annual fixed compensation.

For each criterion, the Board of Directors, on the recommendation of the Compensation Committee, sets:

- the threshold below which no variable compensation is paid;
- the target level corresponding to the achievement of each objective; and
- the maximum ceiling of variable compensation due when each objective is achieved.

The calculation terms are set out in greater detail in note (A) below.

The payment of annual variable compensation is subject to approval by the Shareholders' General Meeting held in 2027 to approve the financial statements for the year ending December 31, 2026.

Multi-annual variable compensation (in cash)[2]

As for the variable component of annual compensation, any multi-annual variable compensation is calculated according to quantifiable and/or individual criteria set by the Board of Directors and based on the recommendations of the Compensation Committee. Multi-annual variable compensation is paid only when all the component parts are known and have been approved by the Shareholders' General Meeting ("ex-post" vote).

Chief Executive Officer

Benefits in kind	– Contributions to unemployment insurance for corporate officers; – life insurance plans (covering death or disability); – health insurance benefits, tax consultants, annual medical.
Severance package	The termination benefit would be payable in the event of a change in control, strategy or a major disagreement over these issues. The amount paid with respect to this package would be subject and proportionate to quantifiable performance conditions relating to free operating cash flow and current operating income over a three-year period prior to departure *(as explained in greater detail in note (B) below)* and capped in any event at two years' annual compensation (average fixed and variable for the last two full financial years) if the term of office exceeds two years. Should Alessandro Dazza leave within the first two financial years, the amount of variable compensation taken into account will reflect the sum of the variable components paid over the period, divided by the number of years in office. No compensation would be due if the Chief Executive Officer voluntarily steps down and is soon able to claim retirement benefits or if he is dismissed for gross or serious misconduct.
Non-compete indemnity	The termination benefit and non-compete indemnity would be capped at 24 months of (gross) annual fixed compensation plus the average of the last two years of (gross) variable compensation for the Chief Executive Officer, calculated on the date of termination of his term of office. The Chief Executive Officer is subject to a non-compete period of six months following the date at which his duties as Chief Executive Officer are terminated. The Board of Directors reserves the right to decide whether or not to enforce this clause (and thus payment of the associated compensation). In the event it is enforced, Alessandro Dazza will receive the equivalent of six months of annual fixed compensation (gross) plus half of the annual variable compensation (gross) for the financial year prior to departure. No compensation will be due if the Chief Executive Officer opts to claim retirement benefits. No compensation will be paid over the age of 65.
Post-employment commitments	The termination benefit and non-compete indemnity would be capped at 24 months of (gross) annual fixed compensation plus the average of the last two years of (gross) variable compensation for the Chief Executive Officer, calculated on the date of termination of his term of office. The Chief Executive Officer is eligible for the following complementary pension plans: a defined contribution plan falling under Article 83 of the French Tax Code, awarded to certain executive directors of the Group, and a complementary defined contribution pension plan falling under Article 82 of the French Tax Code, taken out with an insurance company and operating as retirement savings. The details are as follows: Article 83: this plan was set up on October 1, 2009 and is available to certain executive directors at Imerys. The plan provides for contributions of 8% of the compensation of beneficiaries, capped at eight times the annual French social security ceiling. Beneficiary contributions are set at 3% and Company contributions at 5%. It also allows beneficiaries to top up the mandatory payments with free and voluntary contributions. An independent insurance company has been appointed to manage the scheme; Article 82: this plan provides for contributions of an amount representing 5% of the beneficiary's annual fixed compensation.
Long-term incentives in the form of shares or securities conferring entitlement to capital	The volume, detailed characteristics and performance conditions applicable to the Chief Executive Officer's long-term share incentives are presented in paragraphs 4.3.3.2 A and B of this chapter, including the vesting and lock-up rules determined by the plan in question and the rules regarding restrictions on shareholdings applicable to the executive corporate officers. **These characteristics and associated performance conditions form an integral part of the present compensation policy.**
Exceptional components	**Exceptional compensation[3]** The Board may award exceptional compensation to the Chief Executive Officer when he has been entrusted with specific assignments or duties, the terms and conditions of which are agreed at the time by the Board and based on the recommendations of the Compensation Committee. Such compensation would be paid in cash. This award may be made in the event of a significant transformation, such as a significant acquisition, disposal, merger, demerger, reorganization or restructuring in line with the business plan. It would, in any event, be capped at a maximum of 200% of the (gross) fixed annual salary of the Chief Executive Officer. **Sign-on bonus** The Board may award a future Chief Executive Officer a sign-on bonus reflecting the relevant individual's profile, the terms and conditions of which are agreed by the Board, based on the recommendations of the Compensation Committee, for the sole purpose of offsetting the benefits lost when leaving their previous position.

1 Since February 17, 2020 and for an unlimited term of office. The conditions for removal from office are the same as those applicable to any Chief Executive Officer, in accordance with the company by-laws and regulations, and without prejudice to any severance package or non-compete clause detailed above.

2 At the date this Universal Registration Document was filed, the Board decided not to award multi-annual compensation (in cash) to Alessandro Dazza.

3 At the date this Universal Registration Document was filed, the Board of Directors decided not to award any exceptional compensation to Alessandro Dazza.

Note (A) – Description of the quantifiable and individual criteria and presentation of the calculation procedures applicable to the annual variable compensation of the Chief Executive Officer in 2026

	Description	Weighting	Achievement rate at target*	Maximum achievement rate* (at 150% achievement)	Target objective
Financial criteria	Adjusted EBITDA	32.5%	35.75%	53.6%	2026 budget target
	Free operating cash flow**	32.5%	35.75%	53.6%	2026 budget target
ESG	see details below	15%	16.50%	24.8%	In line with the objectives taken from the SustainAgility roadmap
Individual criteria	see details below	20%	22%	33%	-
Total	-	**100%**	**110%**	**165%**	

* Applied to the annual fixed compensation.
** Before strategic capex

ESG CRITERIA TAKEN FROM THE SUSTAINAGILITY ROADMAP

Topic	Description	Weighting
Diversity & inclusion	Improve the score of the Diversity & Inclusion index and maintain the percentage of women on the Executive Committee(1)	5%
Biodiversity	Fulfill the Group's Act4nature biodiversity commitments	5%
Climate	Meet the Group targets for reducing scope 1 & 2 greenhouse gas emissions	5%

1 This criterion contains two equally weighted components.

INDIVIDUAL QUALITATIVE CRITERIA

Topic	Weighting
Restore the Group's target profitability (EBITDA)	
Finalize the exit from the Chapter 11 process	
Define the Group's future strategic direction post Chapter 11	20%
Return the Group to a growth trajectory	
These targets are not made public in full for confidentiality reasons	

Note (B) – Performance conditions applicable to the severance package of Alessandro Dazza

The severance package is subject to performance conditions related to free operating cash flow and operating income, in particular:

1) Free operating cash flow
   - if free operating cash flow was positive across each of the past three financial years (or each year in office if the time served is less than three years), 100% of severance pay would be due;
   - if free operating cash flow was positive in two of the previous three financial years (or for over two thirds of the number of years spent in office if the time served is less than three years), 66% of the severance payment would be due;
   - if free operating cash flow was positive in one of the previous three financial years (or for over one third of the number of years spent in office if the time served is less than three years), 33% of the severance payment would be due;
   - if free operating cash flow was negative in each of the previous three financial years (or each year in office if the time served is less than three years), no severance payment would be due.
2) Current operating income
   - if the Group's current operating income, calculated at constant scope and exchange rates, fell by over 20% per year over the last three years spent in office prior to departure, the severance payment calculated above would be reduced by 50%;
   - if the Group's current operating income, calculated at constant scope and exchange rates, fell by over 25% per year over the last three years spent in office prior to departure, no severance payment would be due.

4.3.1.4 2026 Compensation policy for the members of the Board of Directors

The present paragraph lays out the 2026 compensation policy for members of the Board of Directors (excluding the Chairman of the Board of Directors, as set out in paragraph 4.3.1.3 of the present chapter). The general principles set out in paragraph 4.3.1.1 above form an integral part of the present compensation policy.

At its meeting of February 19, 2026, the Board decided to keep the budget and compensation allocation band applicable to members of the Board unchanged.

Maximum amount and allocation bands

The maximum gross amount of compensation that may be awarded for the year to members of the Board is determined by the Shareholders' General Meeting. For 2026, this amount has been set at €1,200,000, the same level since May 4, 2018.

The Board is responsible for distributing compensation between its members using a system of allocation bands agreed on and reviewed each year to ensure they remain appropriate and competitive in view of best practice within comparable listed companies in France and any recent changes.

The employee-representative directors receive compensation for their directorships subject to the same terms and conditions and under the same arrangements as the other Board members.

The allocation bands submitted for shareholder approval are as follows:

		Gross amount (€) before tax and social security contributions
Board of Directors	Vice-Chair (if appointed)	– Fixed compensation: 30,000/year – Variable compensation: 4,000/meeting attended[1]
	Members (excl. the Chairman and, if appointed, the Vice-Chair)	– Fixed compensation: 20,000/year – Variable compensation: 4,000/meeting attended[1]
Strategy and Sustainability Committee	Chair	– Fixed compensation: 30,000/year
	All members	– Variable compensation: 3,500/meeting attended[1]
	All other members of the Board (other than the Chairman)	– Variable compensation: 3,500/annual Strategy and Sustainability Committee's annual strategic seminar attended[2]
Audit Committee	Chair	– Fixed compensation: 30,000/year
	All members	– Variable compensation: 4,000/meeting attended[1]
Appointments Committee	Chair	– Fixed compensation: 10,000/year
	All members	– Variable compensation: 3,500/meeting attended[1]
Compensation Committee	Chair	– Fixed compensation: 10,000/year
	All members	– Variable compensation: 3,500/meeting attended[1]
ESG Referent Director	-	– Fixed compensation: 20,000/year[3]

1 Variable compensation is halved for each meeting of the Board or its Committees attended by telephone or video conference. When the Board or Committee meets by tele- or videoconference, at the request of its Chairman or, where applicable, the Committee Secretary, for reasons of applicable health regulations or in the event of exceptional circumstances preventing the Board or Committee from meeting properly (such as natural disasters, major strikes, large-scale events or demonstrations, critical IT incidents, etc.), the Board reserves the right not to apply this discount.

2 All members of the Board of Directors are invited to take part in the Strategy and Sustainability Committee's strategic seminar, which is held once a year. For attending, they receive compensation subject to the same terms and conditions and under the same arrangements as members of the Strategy and Sustainability Committee (except for the Chairman of the Board of Directors who does not receive any special compensation for attending).

3 This compensation is in addition to the fixed and variable compensation for their duties as director and, where appropriate, as a Committee member, performed by the ESG Referent Director.

The Board may award exceptional compensation to corporate officers entrusted with a specific assignment or duties, the terms and conditions of which are agreed at the time by the Board and based on the recommendations of the Compensation Committee.

Such compensation would be paid in cash. Subject to this reservation, total compensation (including benefits in kind) awarded to members of the Board (excluding the Chairman of the Board of Directors) is that shown above.

4.3.2 Compensation of executive corporate officers with respect to the 2025 financial year (ex-post votes)

4.3.2.1 2025 compensation of corporate officers

Compensation paid and/or awarded to corporate officers with respect to the year ended December 31, 2025, was in accordance with the compensation policy applicable to the corporate officers, which was put forward at and fully approved by the 2025 Shareholders' General Meeting.

The present paragraph includes all the disclosures required by the provisions stipulated in article L. 22-10-9 of the French Commercial Code for each corporate officer. Corporate officers do not receive any other compensation from a company within the Imerys scope of consolidation as defined in article L. 233-16 of the French Commercial Code.

In accordance with article L. 22-10-34 of the French Commercial Code and with respect to each corporate officer:

- the Shareholders' General Meeting of May 12, 2026, will be asked to approve the fixed, variable and exceptional components of the total compensation and benefits in kind paid in or awarded with respect to the year ended December 31, 2025;
- the payment of all components of variable and exceptional compensation granted with respect to the year ended December 31, 2025, is subject to approval by the Shareholders' General Meeting of May 12, 2026.

For further details, see Chapter 8, paragraphs 8.2.4.2 to 8.2.4.3.

SUMMARY OF COMPENSATION IN RESPECT TO THE 2025 FINANCIAL YEAR

	Employment contract	Complementary pension plan	Indemnities or benefits awarded in relation to terminating or changing duties	Non-compete indemnity
Patrick Kron, Chairman of the Board of Directors	No	No	No	No
Alessandro Dazza, Chief Executive Officer	No	Yes[1]	Yes	Yes

1 Complementary defined contribution pension plan as defined in articles 82 and 83 of the French Tax Code.

(1) *The amount granted will be paid to Alessandro Dazza, subject to approval by the Shareholders' General Meeting of May 12, 2026.*

(2) *In 2025, these benefits include individual complementary pension plan components and contributions to unemployment insurance for corporate officers (GSC type).*

All compensation and benefits awarded to the Group's key Senior Managers (Executive Committee, including Alessandro Dazza) and recognized in expenses for the years in question are included in note 31 to the consolidated financial statements in Chapter 6, section 6.1.2.

The top 10 compensation amounts paid by the Company with respect to the 2025 financial year were certified by the Statutory Auditors.

Note A – Details regarding Alessandro Dazza's variable compensation with respect to 2025

At its meeting of February 19, 2026, the Board of Directors determined the amount of Alessandro Dazza's annual variable compensation with respect to the 2025 financial year, which will be paid in 2026 subject to approval by the Shareholders' General Meeting of May 12, 2026, as follows:

Criteria	Weighting of criteria in variable compensation	Target attainment rate	Achievement rate	Weighted achievement rate
Adjusted EBITDA	32.50%	92%	46%	15%
Free operating cash flow*	32.50%	98%	92%	30%
Total	**65%**	**95%**	**69%**	**45%**
ESG – see details in 2024 URD**	15%	121%	121%	18%
Individual – see details in 2024 URD	20%	83%	83%	17%

* *Before strategic capex*

** *The 2025 results and 2025 target objectives for the ESG criteria are detailed in Chapter 3, where it is noted that all the objectives met or exceeded the target with the exception of the criteria relating to the Diversity & Inclusion Index and improving water management.*

Assessment of the Board

With regard to the individual criteria, the Board of Directors recognized the Group's resilience and strategic direction in a year marked by a complex macroeconomic environment and a challenging market context. Imerys has made significant progress, particularly in the "Solutions for Energy Transition" business area. The strategic management of the portfolio remained a key pillar of the year's performance. The Group continued to grow through targeted value-creating bolt-on acquisitions. In addition, the progress on the lithium projects underscores Management's commitment to positioning Imerys at the forefront of the global energy transition. The Board of Directors noted that the Chapter 11 process for the North American talc entities moved forward in 2025, with the confirmation hearing held in February 2026. In addition, given the difficulties encountered in all major end markets, the Group has implemented proactive business initiatives to increase its market share while maintaining price discipline and continued cost management. Overall, the Board of Directors recognized Management's ability to maintain a sustained focus on strategic execution and operational discipline. Combined with an exceptional sustainable development performance that has exceeded the targets set, this continues to strengthen the Group's fundamental position and its ability to capitalize on the future recovery of the markets.

As a result, the variable compensation awarded to Alessandro Dazza in respect of 2025 came to €809,600. This amount reflects the achievement of 95% of quantifiable criteria relating to financial performance reflected in a 69% payment rate, 121% of quantifiable criteria relating to ESG performance, and 83% of qualitative individual criteria. This results in an annual variable compensation corresponding to 80% of the annual variable compensation target for 2025.

4.3.2.2 Compensation of members of the Board of Directors in respect of the 2025 financial year (excluding the Chairman of the Board)

The Board's structure (as set out in section 4.1 of the present chapter) is and was throughout 2025 in compliance with the statutory diversity requirements. Therefore, no suspension was applied to the compensation awarded to members of the Board, as provided for in article L. 225-45 para. 2 of the French Commercial Code.

The amounts set out in the table below represent total compensation (made up solely of the fixed and variable compensation in line with the allocation bands detailed in paragraph 4.3.1.4 above and excluding any other compensation or benefit in kind) paid or granted in respect of 2025 by the Company or its controlling shareholders to each member of the Board of Directors (excluding the Chairman of the Board of Directors) with respect to the offices, responsibilities or other duties performed within or on behalf of the Group, with the exception of the compensation paid and/or granted to the two employee-representative directors with respect to their positions as employees in the Group.

Compensation is paid to members of the Board (other than the Chairman of the Board of Directors) in arrears every half year. Consequently:

- the amount of compensation "paid" in 2025 includes the amount with respect to the second half of 2024 and the amount with respect to the first half of 2025;
- the amount of compensation "granted" in 2025 includes the amount due with respect to the first and second half of 2025.

For details of the compensation paid and awarded to the Chairman of the Board of Directors in 2025, see paragraph 4.3.2.1 of the present chapter.

Table summarizing compensation of members of the Board of Directors

It should be noted that:

- all the information indicated in the following table is expressed as gross amounts before tax and social security contributions;
- fixed compensation is prorata temporis for the members of the Board whose terms of office expired or began during the year;
- variable compensation corresponds to the proportion of compensation dependent on the actual presence of the director at meetings of the Board or its Committees.

Total	**€628,755**	**€589,532**	**€629,873**[1]	**€560,124**[1]

1 These amounts do not include amounts paid or granted to Marie-Françoise Walbaum, who stepped down from the Company's Board of Directors on May 14, 2024.

Furthermore, it should be noted that:

- the compensation of members of the Board of Directors (excluding the Chairman, as stated above) granted with respect to the 2025 financial year falls within the maximum gross amount set by the Shareholders' General Meeting and the applicable allocation bands;
- no undertaking of any kind whatsoever was made during or in respect of 2025 to members of the Board (indemnities or benefits due or likely to fall due as a result of the start, termination or change of their duties or subsequently thereto, including pension commitments and other annuities);
- the disclosures required by article L. 22-10-9 I paras. 8 and 10 of the French Commercial Code are not applicable to members of the Board of Directors with respect to the 2025 financial year;
- members of the Board of Directors do not receive any other compensation (except for compensation paid and/or granted to the two employee-representative directors with respect to their positions as employees in the Group) from a company within the Imerys scope of consolidation as defined in article L. 233-16 of the French Commercial Code.

4.3.3 Long-term incentive plans

4.3.3.1 Stock options

The Company's comprehensive stock option grant policy is agreed by the Board, based on proposals from the Compensation Committee. At its meeting of April 25, 2013, the Board decided to only grant performance shares, which explains why no stock options have been granted since the April 2012 plan.

Since 2022, no stock options have been held by any corporate officer currently in office or who held office in 2025 or by any employee of the Company.

The tables of the AMF relating to allocation of stock options have not been reproduced as not applicable.

A – Previous stock option grants

N/A

B – Changes in the number of options in 2025

N/A

4.3.3.2 Performance shares

A – Comprehensive performance share grant policy

The Company's comprehensive performance share grant policy is agreed by the Board of Directors, based on proposals from the Compensation Committee. The main characteristics of grants made by the Board of Directors are as follows:

- grants take the form of performance shares that, in principle, are fully subject to financial performance targets;
- except in exceptional circumstances, plans are annual and grants are usually made on the day of the Shareholders' General Meeting;
- actual or likely beneficiaries of performance share grants include the Group's executive directors (members of the Executive Committee as well as the main operating and support executives reporting to them) and employees whose career potential or individual performance has been recognized as outstanding.

Vesting period

In accordance with current legal provisions, free shares are subject to a vesting period that may not be less than one year following the grant date (since the "Macron law" of August 6, 2015) or two years for grants made before August 8, 2015, subject, in principle, to fulfilling certain business and financial performance criteria that cannot be assessed on the basis of a single year. The number of definitively vested shares is subject and proportionate to meeting these targets.

Loss of shares

If the beneficiary leaves the Group before the end of the vesting period for any reason (including, in principle, if the company by which they are employed leaves the Group's scope of consolidation), they will lose in principle (subject to derogation granted by the Board of Directors or the delegation of its authority), all rights to performance shares, except in the event of death, long-term disability or retirement, in which case their rights will be maintained according to the specific terms and conditions of each plan.

Lock-up periods for vested shares

Since the aforementioned Macron law, a lock-up period (between the vesting date and the availability date) is no longer mandatory for free share grants. Nevertheless, the total duration of vesting and lock-up periods for performance share grants may not be less than two years.

Following any such lock-up period, beneficiaries are able to transfer or sell the shares as they wish.

Restrictions applicable to the Chief Executive Officer

Related to grants:

- in accordance with the AFEP-MEDEF Code, the grant to corporate officers is capped at 0.5% of the Company's share capital, and
- the performance shares granted may not exceed 18 months of gross annual compensation (fixed component + maximum variable compensation) (IFRS 2 value of the performance shares awarded).

Related to shareholdings:

Based on the recommendations of the Compensation Committee and in accordance with the provisions of articles L. 225-185, L. 22-10-57, L. 225-197-1 and L. 22-10-59 of the French Commercial Code, the Board confirmed the restrictions on shareholdings applicable to shares granted to the Chief Executive Officer initially agreed in 2010, which include:

- obligation to hold shares in registered form until the termination of their duties:
- a number of performance shares that is at least equal to 25% of the total number of shares that will vest at the end of the relevant vesting period,
- until the total amount of shares that they hold and will continue to hold, upon the exercise of stock options (where applicable) and the end of performance shares' lock-up period, reaches 300% of their annual fixed compensation for the prior year at the relevant date.

The total investment in shares of the Company must take into account all the shares held by the Chief Executive Officer at the date in question, regardless of their origin (purchased on the market, acquired by exercising stock options or acquired through performance share plans).

Furthermore, the Group's policy prohibits the Chief Executive Officer from making any leveraged or speculative transactions on Imerys shares as provided for in the AFEP-MEDEF Code recommendation.

The Chief Executive Officer has therefore pledged not to make use of any hedging instruments in respect of any performance shares that may be granted to him during his term of office.

B – Performance share plans in 2026 (2026-2028)

In order to improve the alignment of interests between corporate officer compensation and shareholder performance, the Board of Directors approved two separate performance share plans for 2026: a plan applicable to the Chief Executive Officer and members of the Executive Committee and a plan for other beneficiaries. These two plans share a common structure and rules, with the exception of the total shareholder return (TSR) criterion, which is used only for the Chief Executive Officer and members of the Executive Committee. As a result, the weighting of the criteria is different for the two plans.

The 2026 performance share plans incorporate the provisions of the general performance share allocation policy detailed above (A).

Vesting period

All performance shares will vest according to the extent to which the objectives have been achieved, three years after being granted. Consequently, in accordance with article L. 225-197-1-I, paragraph 7 of the French Commercial Code, these shares are not subject to any lock-up period once vested.

Condition of ongoing employment

Full and final vesting of any performance shares to be awarded will be subject to a condition of ongoing employment.

Performance conditions

In line with the shareholder dialogue conducted during the financial year, the Board of Directors sought to make certain targeted adjustments to the performance conditions for the long-term incentives. These adjustments include:

- introducing a relative performance condition measured by total shareholder return (TSR), assessed against a panel of comparable companies, in the long-term performance assessment, as described below (applicable only to the Chief Executive Officer and members of the Executive Committee),
- refocusing the ESG criteria taken from the Group's SustainAgility roadmap, limiting them to three, in order to clarify the performance conditions and limit any overlap between those used for annual variable compensation and those used for long-term variable compensation. This refocusing is in line with market practices, as the long-term variable compensation systems for senior managers of CAC 60 companies are based, on average, on a limited number of performance conditions,

Quantifiable criteria relating to financial performance

The financial criteria used are:

- the Group's current net income,
- the Group's free operating cash flow, and
- where applicable, relative total shareholder return (TSR): the purpose of this criterion is to compare the performance of the Imerys share with the median of the TSRs of a panel of peers. The reference panel was approved by the Board of Directors, based on proposals made by the Compensation Committee. This panel is composed of international companies of comparable size and sector. Its composition is not made public for confidentiality reasons. TSR will be measured on an annual calendar basis over the 2026-2028 period.

Full and final vesting of any performance shares to be awarded will be proportionate to the achievement of performance targets common to all beneficiaries (except for TSR).

The objectives based on these criteria are predefined and specific. They are not made public for confidentiality reasons. The targets related to current net income and free operating cash flow are identical to the applicable budget targets.

Quantifiable criteria relating to ESG performance

The ESG criteria include a climate criterion and are taken from the Group's SustainAgility sustainable development roadmap. The 2026 targets are predetermined and defined in line with the objectives in the Group's SustainAgility roadmap, as adopted by the Board of Directors.

Chief Executive Officer and Executive Committee		**Senior Managers & Key Talent**	
Performance conditions	Weighting	Performance conditions	Weighting
Current net income	30%	Current net income	50%
Free operating cash flow*	25%	Free operating cash flow*	35%
Relative TSR	30%	ESG *(see details below)*	15%
ESG *(see details below)*	15%	-	-
** Before strategic capex*		** Before strategic capex*	

Topic	Quantifiable criteria relating to ESG performance	Weighting
Safety	Achieve the Group's total incident frequency rate (TIFR) target	5%
Sustainability	Achieve the Group's product portfolio life cycle analysis (LCA) coverage target	5%
Climate	Achieve the Group's reduction of scope 1 & 2 greenhouse gas emissions target	5%

Calculation procedures

The performance achieved is measured annually and averaged at the end of the plan period (2026-2028). In any event, it cannot exceed 100% achievement at the end of the plan.

At the end of each year of the plan period (2026-2028) for each of the following criteria: current net income, free operating cash flow, and ESG criteria*:

- if the criteria are met by less than 70%, the plan's annual performance would be zero;
- if the criteria are met at 90%, the plan's annual performance would be 50%;
- if the criteria are met at 100%, the plan's annual performance would be 100%;
- if the criteria are met at or by more than 120%, the plan's annual performance would be 120% (subject to the average performance ceiling at the end of the plan period).

For the relative TSR criterion, at the end of each year of the plan period (2026-2028)*:

- if the criterion is met by less than -5%, the plan's annual performance for this criterion would be zero;
- if the criterion is met at 0%, the plan's annual performance for this criterion would be 50%;
- if the criterion is met at +3%, the plan's annual performance for this criterion would be 100%;
- if the criterion is met at or by more than +5%, the plan's annual performance for this criterion would be 120% (subject to the average performance ceiling at the end of the plan period).

* Linear interpolation between the different thresholds.

The achievement of the performance conditions will be, after review by the Compensation Committee, decided by the Board at the end of each financial year of the period considered on the basis of the Group's consolidated financial statements. All performance shares will vest according to the extent to which the objectives have been achieved and subject to ongoing employment, three years after being granted. Consequently, in accordance with article L. 225-197-1-I, paragraph 7 of the French Commercial Code, these shares would not be subject to any lock-up period once vested.

Allocation to the Chief Executive Officer for the 2026 Plan

The Board of Directors plans to proceed, as a long-term incentive for the Chief Executive Officer, with a free allocation to his benefit of 95,000 performance shares (i.e. 0.11% of the share capital as of December 31, 2025) subject to approval of the Chief Executive Officer's 2026 compensation policy at the Shareholders' General Meeting on May 12, 2026. This increased allocation is justified by the introduction of TSR as a performance condition, which strengthens the alignment with shareholders and ties a higher level of compensation to actual value creation.

C – Performance share plan adopted in 2025 (2025-2027)

In 2025, as part of this plan, the Board of Directors granted 464,400 performance shares to 246 Group managers residing in France or overseas, including 85,000 shares to the Chief Executive Officer (or 0.1% of the share capital). With the exception of Alessandro Dazza, Chief Executive Officer, the 10 beneficiaries awarded the highest number of performance shares were granted a total of 123,000 shares.

The vesting of the performance shares granted with respect to the 2025 plan, as well as their number, is subject and proportionate to the condition of ongoing employment and to the achievement of targets common to all beneficiaries.

The Board, on recommendation of the Compensation Committee, was able to verify the demanding nature of these objectives, which are based entirely on quantifiable criteria relating to the Group financial and ESG performance *(see note (C) below)* over the period 2025-2027. In accordance with the applicable compensation policy, the ESG criteria for years 2026 and 2027 included in the 2025 performance share plan will be adjusted to reflect the update of the SustainAgility roadmap for the 2026-2030 period, as adopted by the Board of Directors.

After a review by the Compensation Committee, the Board of Directors will record their achievement at the end of each financial year in the period under consideration based on the Group's consolidated financial statements. All performance shares will vest according to the extent to which the objectives have been achieved and subject to ongoing employment, three years after being granted. Consequently, in accordance with article L. 225-197-1-I, paragraph 7 of the French Commercial Code, these shares are not subject to any lock-up period once vested.

Performance shares granted to a corporate officer in 2025

	No. and date of plan	Number of shares granted during the year	Value of shares using the method applied in the consolidated financial statements	Vesting date	Available date	Performance conditions
Alessandro Dazza, Chief Executive Officer	May 13, 2025	85,000, i.e. 0.1% of the Company's share capital at December 31, 2024	2,092,645*	05/13/2028**	05/13/2028**	Yes
Patrick Kron, Chairman of the Board of Directors	N/A	N/A	N/A	N/A	N/A	N/A

* The valuation of the shares has been established taking into account the performance conditions to be achieved by the Chief Executive Officer, in accordance with the methodology for calculating the charge according to IFRS 2 and on the basis of assumptions used for this purpose.

** The vesting date and the end of the lock-up period correspond to the later of the following two dates: the third anniversary of the grant date or the date of the Shareholders' General Meeting to approve the financial statements of the last reference year.

04

Performance shares awarded to corporate officers that exited their lock-up period in 2025

End of lock-up period[3]	05/13/2028	05/14/2027	05/09/2026	05/09/2025
Performance conditions, with weighting stated *(as a % of each criterion)*	*See note (D) below*	*See note (C) below*	See note (B) below	*See note (A) below*
Total number of shares vested at December 31, 2025	0	0	0	347,059
Total number of shares canceled or forfeited at December 31, 2025[4]	9,000	21,100	38,450	90,191
Remaining performance shares at December 31, 2025	455,400	430,500	407,850	0

1 For the avoidance of all ambiguity, the corporate officers included in the category above are those in office at December 31, 2025 and/or at the date this Universal Registration Document was filed.

2 Representing for the 2025 plan, 0.1% of the share capital at December 31, 2024; for the 2024 plan, 0.1% of the share capital at December 31, 2023; for the 2023 plan, 0.1% of the share capital at December 31, 2022; and for the 2022 plan, 0.09% of the share capital at December 31, 2021.

3 For shares awarded to all beneficiaries, irrespective of their tax residence. The vesting date and the end of the lock-up period correspond to the later of the following two dates: the third anniversary of the grant date or the date of the Shareholders' General Meeting to approve the financial statements of the last reference year.

4 After beneficiaries leave the Group or fail to meet the performance conditions.

In 2025, 59,291 performance shares were canceled, while 347,059 performance shares vested and were transferred to their respective beneficiaries.

The total number of performance shares outstanding at December 31, 2025 equaled 1,293,750, representing 1.52% of Imerys' share capital after dilution at that date.

Note A – Details regarding the 2022 performance share plan (2022-2024)

The 2022 performance share plan vested in May 2025 with a level of achievement of **96.61%**. 72,457 performance shares (valued at €1,982,477) from the 2022 performance share plan were definitively vested by Alessandro Dazza.

Criteria conditions applicable to the 2022 performance share plan	Weighting	Overall achievement rate during the period (2022-2024)
Current net income, per share	60.0%	109.73%
Free cash flow	40.0%	76.93%

Note B – Details regarding the 2023 performance share plan (2023-2025)

The 2023 performance share plan will expire in May 2026, at which time the final vesting of the shares will occur. The overall level of achievement of the performance conditions was determined by the Board of Directors on February 19, 2026 and was **92.96%**.

Criteria conditions applicable to the 2023 performance share plan	Weighting	Overall achievement rate during the period (2023-2025)
Current net income	50.0%	84.66%
Free operating cash flow	35.0%	106.96%
ESG *(see details below)*	15.0%	87.99%

Topic	Quantifiable criteria relating to ESG performance taken from the SustainAgility roadmap
Safety	Improve Group Safety Culture Maturity to Level 3.3 across all Business Areas by the end of 2025
Diversity and Inclusion	Increase the Diversity & Inclusion Index score to 100% by the end of 2025
Product Sustainability	Assess the Imerys portfolio according to the sustainability criteria, covering at least 75% (by revenue) by the end of 2025
Business Ethics & Compliance	Improve the Group's external sustainability rating by 7% by the end of 2025 compared to the 2022 assessment
Biodiversity and Land Rehabilitation	Reduce impact on biodiversity by fulfilling our Act4nature commitments and conducting biodiversity audits on the 20 priority sites by the end of 2025
Climate change mitigation	Reduce Group scopes 1 & 2 greenhouse gas emissions (tCO_2eq) by 42% from base year 2021 in alignment with a 1.5°C trajectory by the end of 2030

The results for 2025, 2024 and 2023 are published in the respective Universal Registration Documents in Chapter 3.

Note C – Details regarding the 2024 performance share plan (2024-2026)

Criteria conditions applicable to the 2024 performance share plan	Weighting
Current net income	50.0%
Free operating cash flow	35.0%
ESG *(see details below)*	15.0%

Topic	Quantifiable criteria relating to ESG performance taken from the SustainAgility roadmap for 2024 and 2025
Safety	Improve Group Safety Culture Maturity to Level 3.3 across all Business Areas by the end of 2025
Diversity and Inclusion	Increase the Diversity & Inclusion Index score to 100% by the end of 2025
Product Sustainability	Assess the Imerys portfolio according to the sustainability criteria, covering at least 75% (by revenue) by the end of 2025
Business Ethics & Compliance	Improve the Group's external sustainability rating by 7% by the end of 2025 compared to the 2022 assessment
Biodiversity and Land Rehabilitation	Reduce impact on biodiversity by fulfilling our Act4nature commitments and conducting biodiversity audits on the 20 priority sites by the end of 2025
Climate change mitigation	Reduce Group scopes 1 & 2 greenhouse gas emissions (tCO_2eq) by 42% from base year 2021 in alignment with a 1.5°C trajectory by the end of 2030

The results for 2025 and 2024 are published in the respective Universal Registration Documents in Chapter 3.

In accordance with the applicable compensation policy, the ESG criteria for year 2026 included in the 2024 performance share plan will be adjusted to reflect the update of the SustainAgility roadmap for the 2026-2030 period, as adopted by the Board of Directors. These ESG criteria are limited to three and relate to (i) the achievement of the Group's total incident frequency rate (TIFR) target (5%), (ii) the achievement of the Group's product portfolio life cycle analysis (LCA) coverage target (5%), and (iii) the achievement of the Group's reduction of scope 1 & 2 greenhouse gas emissions target (5%).

Note D – Details regarding the 2025 performance share plan (2025-2027)

Criteria conditions applicable to the 2025 performance share plan	Weighting
Current net income	50.0%
Free operating cash flow	35.0%
ESG *(see details below)*	15.0%

Topic	Quantifiable criteria relating to ESG performance taken from the SustainAgility roadmap for 2025
Safety	Improve Group Safety Culture Maturity across all Business Areas
Diversity and Inclusion	Increase the Diversity & Inclusion Index score
Product Sustainability	Assess the Imerys portfolio according to sustainability criteria
Business Ethics & Compliance	Improve the Group's external sustainability rating
Biodiversity and Land Rehabilitation	Reduce impact on biodiversity by fulfilling our Act4nature commitments and conducting biodiversity audits on priority sites
Climate change mitigation	Reduce Group scopes 1 & 2 greenhouse gas emissions (tCO_2eq) by 42% from base year 2021 in alignment with a 1.5°C trajectory by the end of 2030

The results for 2025 are published in Chapter 3.

In accordance with the applicable compensation policy, the ESG criteria for years 2026 and 2027 included in the 2025 performance share plan will be adjusted to reflect the update of the SustainAgility roadmap for the 2026-2030 period, as adopted by the Board of Directors. These ESG criteria are limited to three and relate to (i) the achievement of the Group's total incident frequency rate (TIFR) target (5%), (ii) the achievement of the Group's product portfolio life cycle analysis (LCA) coverage target (5%), and (iii) the achievement of the Group's reduction of scope 1 & 2 greenhouse gas emissions target (5%).

4.3.4 Executive-employee pay ratios and year-on-year change

Ratio

The ratios and annual change over a five-year period, as presented in the following tables, include the compensation awarded to the Chairman and Chief Executive Officer, the Chief Executive Officer, and Chairman of the Board of Directors and (i) the mean average salary per full-time equivalent paid to employees of the Company (excluding corporate officers) and (ii) the median average salary per full-time equivalent paid to employees of the Company (excluding corporate officers).

Chief Executive Officer (ratio for France)	2021	2022	2023	2024*	2025**
Ratio to mean average salary	28.62	27.95	35.27	33.65	29.23
Ratio to median average salary	45.22	40.42	48.61	47.67	42.41

* The 2024 values have been adjusted to follow the same calculation method as that applied in 2025.
**In the France scope, the Ratio to mean average salary equaled 52.25 and the Ratio to median average salary equaled 66.94 (i.e. 1,594 employees).

Chairman of the Board of Directors	2021	2022	2023	2024	2025*
Ratio to mean average salary	1.80	2.77	3.10	2.88	2.76
Ratio to median average salary	2.80	4.00	4.27	4.08	4.01

* In the France scope, the Ratio to mean average salary equaled 4.92 and the Ratio to median average salary equaled 6.30 (i.e. 1,594 employees).

Year-on-year change

		2021	2022	2023	2024	2025
Annual compensation, Chairman & CEO						
Annual compensation, CEO		3,981,630	4,041,973	4,551,566	4,669,255**	3,891,010
Annual compensation, Chairman of the Board of Directors		250,000	400,000	400,000	400,000	400,000
Mean average salary (full-time equivalent) of Company's employees*		139,101	144,634	129,039	138,741	144,688
Performance	Current net income (€ million)	288	363	231	264	146
	Current free operating cash flow (€ million)	255	114	286	209	127
	ROCE	8.6%	10.3%	7.4%	7.8%	5.2%

* In the France scope, the mean average salary (full-time equivalent) was €81,287 (i.e. 1,594 employees).
** The 2024 values have been adjusted to follow the same calculation method as that applied in 2025.

This data was prepared in accordance with the French official Order of November 27, 2019, on compensation of corporate officers of listed companies.

In accordance with regulatory requirements, the compensation components were measured based on Imerys S.A. and performance data at Group level on a consolidated basis.

The compensation components considered include the amounts paid in or granted with respect to the given year, namely fixed compensation paid during the year Y, variable components paid in year Y with respect to year Y-1, where applicable exceptional compensation paid in year Y, performance shares granted in year Y (based on their IFRS value), employee savings schemes and the value of benefits in kind.

The terms and conditions to determine ratios and set performance are based on analyzing the data available to companies at February 19, 2026, the date at which the Board of Directors met. This information could be subject to change depending on any clarifications made by regulatory and/or market authorities in the future.

4.4 Transactions by corporate officers in Company shares

4.4.1 Trading policy

Inside information and insider trading policy

In accordance with the policy to prevent insider trading applied throughout the Group, (Insider Trading Policy, most recently updated on November 2, 2021), corporate officers and related persons must refrain from carrying out any transaction, including forward transactions, in Imerys shares if they directly or indirectly hold inside information not yet available to the public. In order to make it easier to implement this policy, the Secretary of the Board acts as Ethics Officer, tasked with giving an opinion prior to completing any transactions in the Company's shares considered by the Group's directors and key Senior Managers, at their request. The opinion expressed by the Ethics Officer is merely consultative in nature.

Closed periods

The Insider Trading Policy also requires the Group's Directors and senior executives to refrain from completing any transaction in Imerys shares (including hedging) ahead of public announcements of the Group's quarterly, half-year and annual results, known as "closed periods". Insiders include corporate officers and any people who may have regular or intermittent access to sensitive information about the Company and its subsidiaries prior to it being made available to the public, as well as anyone with close ties to these people.

The closed periods cover a number of days leading up to the publication of the Group's results as well as the day of the announcement. This period lasts for 30 days prior to the publication of annual and half-yearly financial statements, and 15 days before quarterly results.

The schedule of announcements of the Group's consolidated results over the next 12 months, as well as the resulting closed periods are communicated to directors. It may be consulted at any time via the Group's website and is available on request from the Group's Financial Communication Department.

4.4.2 Summary of transactions in 2025

Pursuant to the provisions of article 223-26 of AMF's General Regulations, the following table presents a summary of the transactions made in Imerys shares throughout 2025 by corporate officers and any individuals connected to them, where applicable. These transactions must be declared to the AMF in accordance with the provisions of article L. 621-18-2 of the French Monetary and Financial Code. All such declarations are available on AMF's website *(www.amf-france.org)*.

Person declaring transaction	Position	Financial instrument	Number of shares	Number of transactions	Type of transaction	Gross amount [1] of transactions
Alessandro Dazza	Chief Executive Officer	Shares	72,457	1	Acquisition of performance shares	N/A
Johannes Huth	Director	Shares	1,000,000	9[2]	Acquisition of shares	N/A

(1) Before tax, fees and costs.
(2) These transactions were carried out on November 6, 7, 11, 13, 14, 18 and 20, 2025.

COMMENTS ON FISCAL YEAR 2025

5.1	Highlights	320
5.2	Commentary on the results	323
5.3	Performance by activity	326
5.4	Outlook	327
5.5	Definitions and reconciliation of alternative performance measures to IFRS indicators	328
5.6	Activity and earnings of Imerys S.A. in 2025	329

5.1 Highlights

Imerys meets FY 2025 guidance and targets structural cost savings of €50–60m

- 2025 full-year (€3,384 million) and Q4 (€801 million) revenue broadly stable on a like-for-like basis vs last year (-0.7%), reflecting firm pricing amid subdued industrial activity and construction demand in North America and Europe
- 2025 adjusted EBITDA at €546 million, within guidance despite currency headwinds (€22 million). Resilient year-on-year performance (-0.4%) at constant exchange rates and excluding perimeter effects and joint-venture contribution, supported by disciplined pricing and ongoing cost management. Q4 2025 showed similar trend
- 2025 net income group share at -€409 million, mainly impacted by a non-cash goodwill impairment charge (€467 million) of the Solutions for Refractory, Abrasives and Construction business
- Cash dividend proposal of €0.75 per share, with payout ratio consistent with prior years
- Sound financial structure and Investment Grade credit rating confirmed, with net current free operating cash flow at €127 million before strategic capital expenditures
- Launch of a cost and performance improvement program ("Project Horizon") targeting €50–60 million of annual run-rate savings to be implemented in 2026 and 2027
- EMILI lithium project: €50 million investment by the French State for minority stake
- Pierre Lebreuil promoted to the position of Imerys Chief Financial Officer, effective February 19, 2026

Consolidated results[1],[2] *(€ millions)*	**FY 2024**	**FY 2025**	**Change 2025 / 2024**	**Change 2025 / 2024 like-for-like**

1 The definition of alternative performance measures can be found in the section 5.5 of this Chapter.

2 Figures may not add up due to rounding.

3 Mainly attributable to the disposal of the assets serving the paper market (July 2024), and the acquisition of perlite and diatomite business (January 2025).

4 Share of net income from joint ventures contributed 3.0 and 0.9 percentage points to 2024 and 2025 adjusted EBITDA margin, respectively.

5 This includes goodwill impairment for the Solutions for Refractory, Abrasives and Construction business for -€467 millions.

6 Weighted average number of outstanding shares: 84,569,253 in 2025 compared with 84,577,709 in 2024.

The 2025 consolidated financial statements were approved by the Board of Directors at its meeting of February 19, 2026. The audit procedures on the consolidated accounts are finalized. The audit report will be issued after the finalization of the procedures for the verification of the management report, and the presentation of the accounts to be included in the Universal Registration Document, in the format provided for in the ESEF Regulation.

Alessandro Dazza, Chief Executive Officer, said:

"Meeting our adjusted EBITDA guidance for 2025 in a low demand and adverse currency environment in our core markets illustrates our commercial efforts, disciplined approach to costs and great teams. We are actively implementing a cost and performance improvement program—Project Horizon—aimed at delivering €50-60 million of annual run rate savings. These are structural changes that will improve our operational efficiency, competitive position, mitigate cost inflation and ultimately enhance margins as market conditions normalize. Building on our track record of execution, the French State's investment in our EMILI lithium project strengthens our commitment to becoming a key player in the French and European energy transition."

Proposed dividend

At the Shareholders' General Meeting of May 12, 2026, the Board of Directors will propose an ordinary cash dividend of €0.75 per share[1]. This represents a distribution of €64 million, or a pay out of 44% of the annual net income from current operations, Group share, for 2025, consistent with previous years.

FY 2025 highlights and post-closing events

Cost and performance improvement plan - Project Horizon

In October 2025, the Group announced the launch of a cost and performance improvement program aimed at achieving targeted profitability. Project Horizon will consolidate the Group's competitive edge, drive efficiencies and facilitate the agility needed in the current ever-changing environment. It focuses on simplifying and streamlining the organization, structurally lowering the cost base, adjusting the industrial footprint, and rationalising production capacity worldwide. This program is subject to the completion of the required social and legal processes. At maturity, Project Horizon targets annual gross cost savings of at least €50–€60 million vs. the 2025 cost base, with more than 50% of the benefits expected in 2026 and full run-rate impact in 2027. Cash implementation costs are expected to represent approximately one year of savings.

Non-cash impairment charge of the Solutions for Refractory, Abrasives and Construction business area

The Group recognized a non-cash goodwill impairment charge of €467 million of its Solutions for Refractory, Abrasives and Construction business area on 31 December, 2025, triggered by substantially more difficult market conditions. The European Union anti-dumping measures on fused alumina imports from China, which came into force on 16 January 2026, provide less protection than initially announced in July 2025. As a result, they are insufficient to significantly offset the effects of continued competitive pressure from Chinese producers experienced throughout 2024 and 2025 in a context of persistently low industrial activity and high energy prices in Europe.

This impairment has no impact on the Group's cash position or financing capacity. It purely reflects an accounting adjustment based on changed market assumptions and does not impact the soundness of the business. A progressive recovery in the performance of the Solutions for Refractory, Abrasives and Construction business is nevertheless expected, as shown by a 1% like-for-like revenue growth in H2 2025 compared with the prior year.

Update lithium projects - Acquisition by the French State's of a stake in the EMILI lithium project

As announced on February 11, **Banque des Territoires, acting on behalf of the French government,** is investing in the EMILI project by acquiring a minority stake in the project. The transaction is expected to be finalised in the coming months[2]. Banque des Territoires is acting as the operator of the 'critical metals' component of France 2030. This investment marks a key milestone in the continued development of the EMILI project, a major project of national interest, recognized as strategic at the European level. The Government's €50 million investment is intended to support the EMILI project up to the finalization of the definitive feasibility study, a major milestone scheduled for early 2027. This study is a critical gating item before any final investment decision can be made regarding the future lithium production site located in Allier.

Separately, Imerys has decided to place its **Imerys British Lithium (IBL)** project on "care and maintenance". While all active development of the IBL project will be suspended, the Group confirms that it remains a strategically valuable project, as has been demonstrated through the recent scoping study finalized early 2026.

Chapter 11 update

The confirmation hearing of the Plan of Reorganization of the North American talc entities in their Chapter 11 cases resumed at U.S. Bankruptcy Court in Delaware on February 2 and concluded on February 6, 2026. We anticipate the Bankruptcy Court must issue its ruling in the weeks ahead. The potential confirmation of the Plan of Reorganization by the Bankruptcy Court must then, subject to any appeal, be reviewed and affirmed by the U.S. Federal District Court. The provision currently recognized in Imerys' financial statements (€99.7 million) is considered appropriate to cover the expected financial impact of the Plan of Reorganization and the resolution of the Group's historic liabilities relating to the North American talc operations.

Pierre Lebreuil promoted to the position of Imerys Chief Financial Officer, effective February 19, 2026

Pierre Lebreuil is appointed Chief Financial Officer and member of the Executive Committee effective February 19, 2026. Pierre joined Imerys in 2002 and has held several finance and operational positions before being appointed deputy CFO in 2020. He graduated from Ecole des Mines de Paris.

Corporate governance

At its meeting on February 19, 2026, Imerys' Board of Directors agreed on the resolutions to be submitted for approval by the Shareholders' General Meeting on May 12, 2026. They include in particular the re-appointment of Stéphanie Besnier and Véronique Saubot, the ratification of Johannes Huth's co-optation and the appointment of Michael Ogrinz to the Board. The term of office of Annette Messemer, Ian Gallienne and Martin Doyen will cease at the close of the Shareholders' General Meeting 2026. Consequently, the Board of Directors would be reduced to 8 directors (of which 5 independent) plus 2 employee representatives. Full details regarding the proposed changes to the composition of the Board and its Committees are set in the Chapter 4.

1 Ex-dividend and payment date would be May 20, 2026 and May 22, 2026 respectively.
2 The investment remains subject to obtaining the necessary regulatory approvals.

Sustainability

Successful completion of 2023-2025 SustainAgility program and launch of new 2030 sustainability roadmap

With the completion of Imerys 2023-2025 SustainAgility program, the Group confirms the strength of its commitments to sustainable development. Imerys has successfully achieved nearly all of its objectives (14 out of 16), demonstrating the integration of sustainability into its core industrial operations and strategy.

Main objectives/ KPIs	FY 2022 (baseline)	FY 2025	Target 2025
Empowering our people			
Total recordable accident frequency rate[1]	2.43	2.62	2.50
Increase the score of the Diversity, Equity & Inclusion Index[2]	0%	93%	100%
Growing with our customers			
Business ethics and responsible purchasing management: proportion of suppliers assessed against environmental, social and governance criteria[3]	53%	75%	75%
Group Ecovadis score	69	79	74
Caring for our planet			
Reduce Group scope 1 & 2 greenhouse gas emissions (tCO2eq) by 42% from 2021 base year in alignment with a 1.5°C trajectory by the end of 2030	0% (2021 base year)	-28%	-42% (2030)
Reduce Group scope 3[4] greenhouse gas emissions (tCO2eq) by 25% from 2021 base year by the end of 2030	0% (2021 base year)	-22%	-25% (2030)

1 *Includes all accidents without lost time whenever a healthcare professional is involved in the treatment, even if only for first aid.*

2 *Imerys' Diversity, Equity & Inclusion Index is a composite metric used to track diversity, equity and inclusion across a range of dimensions including gender balance, pay equity, nationality, disability, as well as inclusion.*

3 *By expenditure.*

4 *Scope 3 categories covered under the target: purchased goods and services, capital goods, fuel and energy related activities, upstream and downstream transportation and distribution, waste generated in operations, business travel, employee commuting, and investments.*

Imerys 2025 decarbonization performance in line with Group targets validated by the SBTi

With regards to climate change, Imerys decreased its **scope 1 & 2 GHG emissions** by 28% compared to its 2021 base year. This performance positions the Group ahead of the trajectory needed to reach its ambitious 2030 goal of a 42% decrease:

- Key scope 1 and 2 decarbonization initiatives designed and implemented since 2021, including energy efficiency and recovery, fuel switching and the purchase of low-carbon and renewable electricity contributed to this reduction.
- This achievement also allows the Group to confirm its intermediary Sustainability Performance Target (SPT) set for its 2021 Sustainability Linked Bond (SLB) to achieve a reduction of its scope 1 and 2 GHG emissions relative to revenue (tCO2/M€) by 22.9% in 2025 vs 2018 (target surpassed at -27%), thus avoiding the 25bps premium on its coupon in 2026.

Best in class extra-financial performance recognized by main ESG rating agencies

The Group achieved the CDP A list (top 4% of all companies assessed) of global environmental leaders in 2025 for the second year, demonstrating its commitment to transparent disclosure of high-quality data and ambitious targets regarding the decarbonization of its operations and value chain.

More globally, the Group's best in class extra financial performance, well above peers, is recognized by the main leading ESG rating agencies, reflecting its continuous commitment to sustainability and responsible business practices, as well as increased transparency. This performance is evidenced by an improved EcoVadis score of 79/100 (up from 73/100 in 2024), placing the Group in the top 4% of all companies assessed, earning a Gold medal.

New SustainAgility 2030 plan: focusing on objectives to meet key stakeholder's expectations

Building on the momentum of the results of previous years, the Group has just launched a new "SustainAgility 2030" program. With this new 5 year cycle, Imerys reconfirms its sustainability ambition, while it strengthens and focuses on ten objectives aligned with stakeholders' expectations. Reflecting the double materiality assessment updated in 2025 and aligned with the guidelines of the CSRD, SustainAgility 2030 serves as a catalyst for growth and resilience.

5.2 Commentary on the results

Revenue

Consolidated results (€ millions)	2024	2025	Change 2025 / 2024 Reported change	Like-for-like change	Volumes	Price mix
First quarter	926	871	-6.0%	+0.7%	-0.7%	+1.4%
Second quarter	992	886	-10.7%	-1.5%	-3.3%	+1.7%
Third quarter	855	827	-3.3%	-1.3%	-2.3%	+1.1%
Fourth quarter	832	801	-3.7%	-0.7%	-1.8%	+1.1%
Total	**3,605**	**3,384**	**-6.1%**	**-0.7%**	**-2.0%**	**+1.3%**

Fourth-quarter revenue reached **€801 million**, a **0.7% like-for-like,** year-on-year **decline**, in line with previous quarters. The **3.7% reported decrease** was mostly driven by negative foreign exchange impacts, primarily due to the depreciation of the USD against the Euro.

In 2025, revenue declined by 0.7% on a like-for-like basis. Weak industrial activity in Europe and softer construction demand in North America and Europe were partly offset by continued momentum in the conductive additive and polymer businesses. Pricing held firm at +1.3%. On a reported basis, revenue was down 6.1% year-on-year, reflecting perimeter effect of -3.2% and currency headwinds of -2.3%.

Adjusted EBITDA

Consolidated results (€ millions)	2024	2025	Change 2025 / 2024
First quarter	188	128	-31.9%
Second quarter	197	154	-21.8%
Third quarter	148	140	-5.7%
Fourth quarter	143	125	-12.8%
Total adjusted EBITDA	**675**	**546**	**-19.1%**
of which share in net income from joint ventures	*110*	*31*	
of which perimeter	*40*	*9*	
Margin[1]	18.7%	16.1%	

1 Share of net income from joint ventures contributes 3.0 and 0.9 percentage points to FY 2024 and FY 2025 adjusted EBITDA margin, respectively.

Adjusted EBITDA for the fourth quarter of 2025 matched prior-year levels, once adjusted for currency fluctuations, changes in perimeter and joint venture performance.

Adjusted EBITDA for the full year 2025 decreased by 19.1%, reflecting lower contributions from joint ventures (-€74 million excluding FX impact), perimeter changes (-€31 million) and unfavorable exchange rate effects (-€22 million).

Imerys achieved an adjusted EBITDA margin of 16.1% for the full year 2025. This was supported by improved performance in Graphite & Carbon, resilient activity in Performance Minerals, continued price discipline and cost management.

Current net income

Current net income, Group share, totaled €21 million in Q4 2025, down 57.0% vs. Q4 2024 due to reduced current operating income and higher net financial costs.

For the full year 2025, current net income, Group share, was €146 million, a 44.2% decrease versus last year mainly explained by reduced current operating income.

Net income

Net income, Group share, totaled -€519 million in the fourth quarter of 2025, after other income and expenses of -€540million, most of which related to the non-cash goodwill impairment of the Solutions for Refractory, Abrasives and Construction business (€467 million), Project Horizon (€41 million) and Imerys British Lithium (€31 million) project-related write-offs. Consequently, for the full year 2025 net income, Group share, amounted to -€409 million.

Net current free operating cash flow

(€ millions)	2024	2025
Adjusted EBITDA	675	546
Increase (-) / decrease (+) in operating working capital	4	(26)
Notional tax on current operating income	(90)	(64)
Elimination of share of net income from JVs	(110)	(31)
Dividends received from JVs	75	7
Others	10	13
Net current operating cash flow (before capital expenditure)	**564**	**445**
Right of use assets (IFRS 16)	(65)	(51)
Capital expenditure	(364)	(317)
of which strategic capital expenditures	(73)	(49)
Net current free operating cash flow (before strategic capex)	**209**	**127**
Net current free operating cash flow	**136**	**78**

Imerys generated a **net current free operating cash flow** of €78 million in 2025, and €127 million excluding strategic capex (related to lithium projects).

In 2025, the Group booked capital expenditures (excluding strategic capex) of approximately €250 million, below the estimate provided in H1 2025 and historical levels. The Group believes this level of capital expenditure is adequate to sustain the long-term competitiveness and performance of its mining resources and asset base.

Free cash flow generation was primarily impacted by a decrease in dividends received from joint ventures, which fell from €75 million in 2024 to €7 million in 2025.

(€ millions)	2024	2025
Net current free operating cash flow	**136**	**78**
Acquisitions and disposals	-39	0

Financial result paid	-80	-51
Exchange rates	-36	36
Change in net financial debt	**-159**	**-117**

The 2025 change in net financial debt was primarily driven by dividend payments and financial expenses

(€ millions)	2024	2025
Opening net financial debt	**-1,118**	**-1,275**
Change in net financial debt	-159	-117
Assets held for sale	3	0
Closing net financial debt	**-1,275**	**-1,391**

Financial structure

(€ millions)	Dec 31, 2024	Dec 31, 2025
Net financial debt	1,275	1,391
Shareholders' equity	3,301	2,615
Net financial debt / shareholders' equity	**38.6%**	**53.2%**
Net financial debt / adjusted EBITDA	**1.9x**	**2.5x**

As of December 31, 2025, net financial debt totaled €1,391million, which corresponds to a net financial debt to adjusted EBITDA ratio of 2.5x.

The Group's financial strength is demonstrated by the "Investment Grade" credit ratings confirmed by Standard and Poor's (December 10, 2025, BBB-, stable outlook) and Moody's (September 16, 2025, Baa3, stable outlook).

5.3 Performance by activity

Performance Minerals

Q4 2024	Q4 2025	Like-for-like change	Consolidated amount (€ millions)	2024	2025	Like-for-like change	Reported Change
219	197	-2.4%	Revenue Americas	986	841	-1.3%	-14.7%
292	292	-2.0%	Revenue Europe, Middle East and Africa and Asia-Pacific	1,327	1,249	-1.7%	-5.8%
(20)	(15)	-	Eliminations	(109)	(69)	-	-
490	**474**	**-1.5%**	**Total revenue**	**2,204**	**2,022**	**-1.3%**	**-8,3%**
-	**-**	**-**	**Adjusted EBITDA**	**395**	**361**	**4.0%**	**-8.7%**
-	-	-	Adjusted EBITDA margin	17.9%	17.8%	-	-

Full year 2025 revenue generated by **Performance Minerals** reached €2,022 million, a 1.3% decline vs last year on a like-for-like basis.

In 2025 revenue for the Americas was down 1.3% at constant scope and exchange rates at €841 million for the full year. Sales volumes (-3.1%) were impacted by a weak residential market in the US, amid high interest rates and unsold housing inventory, as well as a soft filtration market. Prices held well at +1.8%. Currencies had a significant negative impact of -4.4%, intensifying over the year. Fourth quarter 2025 performance was down 2.4% at constant scope and exchange rates, with volumes further impacted by residential market conditions.

Revenue in 2025 for Europe, Middle East, Africa and Asia-Pacific decreased by -1.7% at constant scope and exchange rates compared to last year. Low volumes (-2.8%) were driven by sluggish construction and automotive markets, partly offset by a resilient consumer market. Prices increased by 1.1%. Fourth-quarter performance was in line with previous quarters, with similar market trends.

Performance Minerals full year 2025 adjusted EBITDA stood at €361 million, **4% above last year** at constant scope and exchange rates, benefiting from price discipline and cost management. Now fully integrated, the diatomite and perlite business acquired in January 2025 from Chemviron, delivered adjusted EBITDA ahead of expectations, driven by the rapid implementation of significant synergies.

Solutions for Refractory, Abrasives and Construction

Q4 2024	Q4 2025	Like-for-like change	Consolidated amount (€ millions)	2024	2025	Like-for-like change	Reported change
286	271	0.1%	Revenue Refractory, Abrasives & Construction	1,190	1,128	-2.1%	-5.2%
-	**-**	**-**	**Adjusted EBITDA**	**151**	**129**	**-9.9%**	**-14.8%**
-	-	-	Adjusted EBITDA margin	12.7%	11.4%	-	-

In 2025, Solutions for Refractory, Abrasives and Construction generated revenue of €1,128 million, a 2.1% decrease compared to the previous year at constant scope and exchange rates. Sales to the refractory market lagged, impacted by low industrial activity in Europe and in Asia, while the US market proved resilient. European Union preliminary anti-dumping duties on fused alumina imports from China had a limited impact on the second half of year sales. Sales to the construction sector were impacted by muted end markets both in the USA and in Europe. Prices remained steady (+2%).

The business posted positive organic growth in the fourth quarter (as in Q3 2025), driven by commercial actions and strong sales of advanced ceramics products.

Adjusted EBITDA declined by 9.9% at constant scope and exchange rates, reflecting lower volumes and, partly offset by a positive price/cost balance and cost-saving initiatives.

Solutions for Energy Transition

2024 Graphite & Carbon	2024 TQC (50%)	2024 SET	Solutions for Energy Transition (€ millions)	2025 Graphite & Carbon	2025 TQC (50%)	2025 SET	Like-for-like change	Reported change
215	-	215	Revenue	238	-	238	+11.0%	+10.8%
42	-	42	Adjusted EBITDA	60	-	60	+39.7%	+41.2%
-	98	98	Share in net income from JVs	-	17	17	-	-82.1%
-	**-**	**140**	**Adjusted EBITDA**	**-**	**-**	**77**	**-**	**-45%**

Q4 2024	Q4 2025	Like-for-like change	Graphite & Carbon (€ millions)	2024	2025	Like-for-like change	Reported change
56	57	1%	Revenue	215	238	+11.0%	+10.8%
-	**-**	**-**	**Adjusted EBITDA**	**42**	**60**	**+39.7%**	**+41.2%**
-	-	-	Adjusted EBITDA margin	19.6%	25.0%	-	-

Sales for the full year of 2025 for Graphite and Carbon reached €238 million, a +11% increase at constant scope and exchange rates. Growth was driven by growing end markets, primarily electric vehicles (EV), along with new product launches, and a solid conductive polymers business. Fourth-quarter revenue was stable as some external and temporary factors delayed sales by several millions euro.

Graphite and Carbon reported an adjusted EBITDA of €60 million for 2025, representing a 41.2% improvement over the previous year. This was primarily attributable to significant volume expansion, with the adjusted EBITDA margin gaining 5.4 percentage points to reach 25%.

The Quartz Corporation (100%) (€ millions)	2024	2025	Reported change
Revenue	334	167	-49.9%
EBITDA[1]	249	60	-75.9%
Adjusted EBITDA margin	**74.5%**	**35.8%**	**-**
Net income	196	35	-82.1%

1 For the definition of TQC's EBITDA, see Imerys 2024 Universal Registration Document

The Quartz Corporation (high-purity quartz joint venture, 50% owned by Imerys) generated €167 million revenue (at 100%), a 50% drop from a record-breaking previous year. The performance was affected by a disrupted solar value chain, even if inventories are now reaching healthier levels. This is reflected by the positive revenue trend of H2 2025 at €85 million, an improvement vs. H1 2025 and H2 2024. Net income fell to €35 million.

5.4 Outlook

With markets showing no significant improvement in early 2026, Imerys will require more visibility before it can commit to improved 2026 performance versus 2025. Disciplined execution across all strategic directions and continued innovation will remain key priorities as the Group moves forward.

The information below is not part of the Management Report approved by the Board of Directors on February 19, 2026.

The Group's activity in the countries involved in the main ongoing conflicts in the Middle East represents less than 1.0% of its consolidated revenue for 2025 and does not include any presence in Iran. It mainly consists of a subsidiary in Bahrain which, as of the date of this document, continues to operate. This entity represents less than 0.7% of the Group's revenue and non-current assets for 2025.The Group pays particular attention to developments in these conflicts, notably for their potential repercussions on energy costs and the transport of goods. In this context, the safety of the Group's employees and partners present in the affected areas remains an absolute priority for the Group.

5.5 Definitions and reconciliation of alternative performance measures to IFRS indicators

Imerys' management process is based on the following non-IFRS measures that are selected for planning and reporting purposes. The Group's management believes these measures provide valuable additional information for users of the financial statements in understanding the Group's performance. These non-IFRS measures should be considered as complementary to the comparable IFRS measures. They include in particular "current" indicators that are important to measure the recurring performance of the business, excluding significant items that, because of their nature and their unusual occurrence, can not be considered as inherent to the recurring performance of the Group.

Alternative Performance Measures	Definitions and reconciliation to IFRS indicators
Growth at constant scope and exchange rates (also called life-for-like change, LFL growth organic or internal growth)	Calculated by stripping out the impact of currency fluctuations as well as acquisitions and disposals (scope effect). Restatement of the currency effect consists of calculating aggregates for the previous year at the exchange rate of the current year. The impact of exchange rate instruments qualifying as hedging instruments is taken into account in current data. Restatement of Group structure to take into account newly consolidated entities consists of: – subtracting the contribution of the acquisition from the aggregates of the current year, for entities entering the consolidation scope in the current year; – subtracting the contribution of the acquisition from January 1 of the current year, until the last day of the month of the current year when the acquisition was made the prior year, for entities entering the consolidation scope in the prior year. Restatement of entities leaving the consolidation scope consists of: – subtracting the departing entity's contribution from the aggregates of the prior year as from the first day of the month of divestment, for entities leaving the consolidation scope in the current year; – subtracting the departing entity's contribution from the aggregates of the prior year, for entities leaving the consolidation scope in the prior year.
Volume effect	The sum of the change in sales volumes of each business area between the current and prior year, valued at the average sales price of the prior year.
Price mix effect	The sum of the change in average prices by product family of each business area between the current and prior year, applied to volumes of the current year.
Current operating income	The operating income before other operating income and expenses (income from changes in control and other non-recurring items).
Net income from current operations	The Group's share of income before other operating income and expenses, net (income from changes in control and other non-recurring items, net of tax) and income from discontinued operations.
Adjusted EBITDA	Effective January 1, 2024 adjusted EBITDA is calculated from current operating income before operating amortization, depreciation, impairment losses and adjusted for changes in operating provisions and write-downs. It includes the share in net income of joint ventures (instead of dividends received, in the prior definition) to better reflect their contribution to the Imerys Group.
Net current free operating cash flow	Calculated from current operating income before operating amortization, depreciation and impairment losses and adjusted for changes in operating provisions and write-downs, share in net income and including dividends received from joint ventures and associates, adjusted for notional income tax on current operating income, changes in operational working capital requirement, proceeds from divested intangible and tangible assets, paid intangible and tangible capital expenditure and changes in right-of-use assets.
Net financial debt	Difference between financial liabilities (borrowings, financial debts, and IFRS 16 liabilities) and cash and cash equivalents.
Notional income tax rate	Income tax rate on current operating income.

5.6 Activity and earnings of Imerys S.A. in 2025

Income statement

Operating income amounted to €176.6 million (€157.5 million in 2024), up €19.2 million (12%), and originated from services rendered by the holding company to its subsidiaries. Operating expenses came to €221.1 million (€196.1 million in 2024) up €25 million (13%), primarily due to the Carrying amount of intangible assets and property, plant and equipment disposed of, which had been allocated to Exceptional income (loss) before the implementation of ANC Regulation No. 2022-06 on January 1, 2025.

Revenue from subsidiaries and affiliates amounted to €358.2 million, down €35.4 million on 2024. Imerys S.A. manages the currency risk related to changes in directly or indirectly held foreign net assets, as well as that resulting from loans and advances granted to subsidiaries and affiliated entities under cash pooling agreements, by adjusting the proportion of its debt denominated in foreign currencies. In 2025, Imerys S.A. recognized in this respect a net foreign exchange gain of €25.8 million (compared with a €20.6 million net foreign exchange loss in 2024). Increases and decreases in financial provisions are presented in note 11 to the statutory financial statements.

There were no exceptional losses (-€1.6 million in 2024). The increase in provisions included a provision for Chapter 11 charges in relation to the Group's North American talc subsidiaries for €15.9 million: see Highlights of the year in the statutory financial statements.

In accordance with the terms of the tax consolidation agreements signed by each Imerys group company in France, the tax expense or income recognized in the financial statements of Imerys S.A. is made up of the tax expense of Imerys S.A., calculated on a stand-alone basis and the net amount of additional expenses and income resulting from tax consolidation. In this respect, Imerys S.A. recognized income of €15.7 million in 2025 (€14.7 million in 2024).

Net income amounted to €317 million in 2025 (€279.6 million in 2024).

At the Shareholders' General Meeting of May 12, 2026, the Board of Directors will propose a dividend of €0.75 per share, down €0.7 on the 2024 dividend (€1.45 per share, with an alternative payment option in the form of additional shares for all or part of the dividend) representing a total estimated payout of €63.7 million – equal to 14% of consolidated current income, Group share (proposed appropriation of profit: see note 28 to the statutory financial statements and paragraph 8.1.1 of Chapter 8 of the Universal Registration Document).

HIGHLIGHTS OF THE YEAR AND CHANGES IN SCOPE OF CONSOLIDATION

Note 1. Significant items for the period

2024 and 2025 significant events

This paragraph helps readers to easily identify the main notes addressing significant events that occurred during the financial year.

- In 2025:
  - launch of Horizon project (see below): notes 14 and 21;
  - partial impairment of goodwill allocated to the RAC segment, amounting to €467.4 million: see below, as well as notes 14, 19 and 22;
  - impairment of the assets of the lithium project in UK: see below, as well as notes 14, 19, 20, 21 and 22;
  - developments in the operational litigation related to the historical talc business in North America: note 26.2;
- In 2024, disposal of the business serving the paper market: notes 14 and 26.3.

Horizon project in 2025

In October 2025, the Group announced the launch of a cost and performance improvement program aimed at achieving targeted profitability. Project Horizon will consolidate the Group's competitive edge, drive efficiencies and facilitate the agility needed in the current ever-changing environment. It focuses on simplifying and streamlining the organization, structurally lowering the cost base, adjusting the industrial footprint, and rationalizing production capacity worldwide. This program is subject to the completion of the required social and legal processes.

Impairment – RAC segment in 2025

During the annual impairment test on goodwill allocated to the RAC CGU, the Group recognized a €467.4 million impairment loss.

This is triggered by substantially more difficult market conditions. The European Union anti-dumping measures on fused alumina imports from China, which came into force on January 16, 2026, provide less protection than initially announced in July 2025. As a result, they are insufficient to significantly offset the effects of continued competitive pressure from Chinese producers experienced throughout 2024 and 2025 in a context of persistently low industrial activity and high energy prices in Europe.

A progressive recovery in the performance of the Solutions for Refractory, Abrasives and Construction business is nevertheless expected, as shown by a 1% like-for-like revenue growth in H2 2025 compared with the prior year. This recovery should be supported by targeted business initiatives, the expected benefits of the Horizon project, and a gradual improvement in the markets served.

Note 22 provides details of the calculation of the impairment loss recognized in 2025 in the Group's consolidated financial statements.

Lithium projects

The Group is currently involved in two lithium production projects; the main project is in France and the other is in the United Kingdom. As such, some of the costs incurred by the Group have been capitalized, mainly as intangible assets, as the costs primarily relate to the development of lithium extraction, concentration, and conversion processes (note 20).

Banque des Territoires, acting on behalf of the French government, is investing in the EMILI project, acquiring a minority stake in February 2026 (note 34). The transaction is expected to be finalized in the coming months. *Banque des Territoires* is acting as the operator of the 'critical metals' component of France 2030.

This investment marks a key milestone in the continued development of the EMILI project, a major project of national interest, recognized as strategic at the European level.

The Government's €50 million investment is intended to support the EMILI project up to the finalization of the definitive feasibility study, a major milestone scheduled for early 2027. This study is a critical gating item before any final investment decision can be made regarding the future lithium production site located in Allier.

The amounts capitalized by the Group in connection with this project amounted to €105.6 million in the statement of financial position at December 31, 2025.

Separately, Imerys has decided to place its Imerys British Lithium (IBL) project on "care and maintenance". While all active development of the IBL project will be suspended, the Group confirms that it remains a strategically valuable project, as has been demonstrated through the recent scoping study finalized early 2026.

As a consequence, the capitalized assets of the IBL project were impaired in full for €28.5 million, along with the related goodwill for €2.0 million (note 14).

Changes in scope of consolidation

Acquisitions

Chemviron (PM EMEA & APAC segment)

On December 31, 2024, Imerys finalized the 100% acquisition of two companies from the Chemviron group, operating in France and Italy. This consolidated Imerys' portfolio of assets, with mining reserves of perlite and diatomite in particular. The final purchase price was €49.1 million; the fair value measurement of the assets and liabilities acquired at the acquisition date was finalized and the adjustments recognized on a prospective basis in 2025 (the adjustments were not material), as shown in the following table:

(€ million)	**Provisional amounts (12/31/2024)**	Adjustments	**Final amounts (12/31/2025)**
Intangible assets	10.4	(5.5)	4.9
Mining assets	6.1	(4.2)	1.9
Property, plant and equipment	17.9	7.7	25.6
Other non-current assets	0.0	-	0.0
Other current assets	24.9	5.3	30.1
Cash	6.9	-	6.9
Total assets (A)	**66.2**	**3.3**	**69.5**
Provisions for employee benefits	2.2	(0.0)	2.1
Other provisions	1.8	2.1	3.9
Other non-current liabilities	1.2	(0.1)	1.1
Current liabilities	13.6	1.5	15.1
Total liabilities (B)	**18.7**	**3.4**	**22.2**
Net of assets and liabilities acquired (C = A - B)	**47.4**	**(0.2)**	**47.3**
Purchase price (D)	49.3	(0.2)	49.1
Goodwill recognized (E = D - C)	**1.9**	**(0.0)**	**1.8**

The amount presented in the table of the Group's consolidated cash flows breaks down as follows:

(€ million)	**2024**		**2025**
Purchase price	(49.3)		0.2
Price adjustment	(3.6)		3.6
Cash acquired	6.9		-
Cash flows from gaining control	**(45.9)**		**3.7**

If the Group had acquired the two companies on January 1, 2024, their 2024 revenue would have amounted to around €50 million.

Disposals

Business serving the paper market (PM Americas and PM EMEA & APAC segments)

In March 2024, Imerys received a proposal from Flacks Group, a US investment fund, to purchase a group of mining and industrial assets serving the paper market in America, Europe and Asia. The assets and liabilities related to this transaction were classified as held for sale under IFRS 5, and depreciation and amortization ceased to be recognized as of this date; an impairment loss of -€11.3 million and transaction costs of -€18.8 million related to the disposal of this business were recognized at December 31, 2024 (note 14).

The sale of the business to the Flacks Group investment fund was finalized on July 5, 2024 for a sale price of €146.5 million, the payment of which is spread over time, according to the future performance of the assets transferred. The discounted value of the price recognized in other non-current receivables (note 24.2) also takes into account Imerys' best estimate of the risk related to the proceedings with Flacks Group (note 26.3).

The carrying amount of the asset sold was €63.3 million at July 5, 2024. Translation differences reclassified to profit or loss as part of this transaction stood at -€301.4 million. The net loss on disposal amounted to -€316.0 million.

At December 31, 2024, Imerys still held three entities serving the paper market in Asia. These entities were expected to be sold to Flacks Group under the sale agreement but it had not yet been possible to complete the corresponding transactions at December 31, 2024.

In the second half of 2025, as the sale of these entities to Flacks Group was no longer highly probable, the assets involved in this transaction and the liabilities related to these assets ceased to be presented as assets and liabilities held for sale (note 26.3). Depreciation and amortization not recognized for these entities in financial year 2024 were recognized in 2025 in "Other operating income and expenses" for a non-material amount.

The breakdown of contributions in the Consolidated Statement of Financial Position at December 31, 2024 is presented below.

ASSETS AND LIABILITIES HELD FOR SALE IN THE BUSINESS SERVING THE PAPER MARKET

(€ million)	**2024**
Non-current assets	10.7
Current assets	11.1
Assets held for sale	**21.7**
Non-current liabilities	4.0
Current liabilities	4.9
Liabilities related to assets held for sale	**8.9**

BASIS OF PREPARATION

Note 2. Accounting principles

2.1. Statement of compliance

Pursuant to European Regulation No. 1606/2002 of July 19, 2002, the consolidated financial statements of Imerys, a group operating in the industrial minerals sector, headquartered at 43 quai de Grenelle, Paris, France and whose share is listed on compartment A of the Euronext Paris market, have been prepared at December 31, 2025 in accordance with the *International Financial Reporting Standards* (IFRS) adopted within the European Union at the end of the reporting period (hereinafter "the Principles"). The consolidated financial statements were approved on February 19, 2026 by the Board of Directors of Imerys S.A., the parent company of the Group, on a going concern basis, in millions of euros with one decimal rounded to the nearest tenth. Consequently, the sum of the rounded amounts may differ slightly from the reported total.

2.2. Optional provisions

Some provisions in the Principles allow for recognition and measurement options. Amortized or depreciated historical cost provides the basis for measuring intangible assets (note 20), mining assets (note 21) and property, plant and equipment (note 21). Inventories are measured on the basis of their characteristics in accordance with "First-In, First-Out" (FIFO) accounting or the weighted average cost method (note 23). The rules of hedge accounting are applied to the recognition of derivatives for hedging foreign exchange rate, interest rate and energy price risks (note 27.4).

2.3. Absence of guidance

In the absence of any applicable standard or interpretation or sufficient detail of the existing standards and interpretations, Executive Management has defined recognition and measurement policies for the following two areas: greenhouse gas allowances (note 20) and mining assets (note 21).

2.4. Alternative Performance Measures (APMs)

Definition of APMs. APMs are performance indicators that Imerys uses in addition to those reported in accordance with IFRS. The definition of APMs is provided in the notes to the financial statements, so that the users of the financial statements may understand how they are measured and relate to standardized indicators. The main APMs defined by Imerys include current operating income and other operating income and expenses (Notes to the Consolidated Income Statement – Accounting policy) as well as net financial debt and adjusted EBITDA. APMs are not displayed with more prominence or emphasis than standardized indicators.

Modification of APMs. APMs are applied consistently over time and only changed to make them more reliable and more relevant.

2.5. Presentation of financial statements

Some reclassifications relating to the presentation of comparative data may have been made in order to comply with the current year's presentation or with IFRS.

Note 3. Changes in accounting policies and errors

Accounting policy

Accounting policies are identical from one year to the next and are modified either on a mandatory basis to apply a new standard or interpretation (note 3.1), or on a voluntary basis to improve the reliability or relevance of information (note 3.2). Changes in accounting policies are applied retrospectively, unless specific transition measures have been identified in the standard or interpretation. The financial statements for all reported periods are modified, as if the new policy had always applied.

Material errors are corrected retrospectively.

3.1. Mandatory changes

Early adoption

Imerys did not early adopt any standard or interpretation in 2025.

Adoption upon effective date

Amendments to IAS 21 – "Lack of Exchangeability". These amendments specify how an entity should assess whether a currency is exchangeable and how to determine a spot exchange rate when a currency is not exchangeable. These amendments also require the disclosure of information that enables users of the financial statements to understand the impact of a currency's lack of exchangeability. Following analysis of the provisions of these amendments, no material impacts were identified.

3.2. Voluntary changes

No voluntary changes were applied in 2025.

In 2024, the Group opted to present interest paid in net cash flows related to financing activities (previously in net cash flows related to operating activities), in accordance with what is authorized under IAS 7, as the Group considered that this presentation provides a better economic translation of cash flows.

Note 4. Standards and interpretations effective after the closing date

In line with the European Union's latest IFRS endorsement status report published by the European Financial Reporting Advisory Group (EFRAG), Imerys will apply the following standards and interpretations as from the specified dates.

Application in 2026

Amendments to IFRS 7 and IFRS 9 – "Amendments to the Classification and Measurement of Financial Instruments". These amendments specify how the standards should be applied in the event of settlement of liabilities using electronic payment systems, and the classification of financial instruments with contingent characteristics, including ESG. The provisions of these amendments are currently being analyzed and no material impact has been identified to date.

Amendments to IFRS 7 and IFRS 9 – "Contracts Referencing Nature-dependent Electricity". These amendments clarify the application of the own-use exemption for power purchase agreements and the conditions for hedge accounting. The provisions of these amendments are currently being analyzed and no material impact has been identified to date.

Application in 2027

IFRS 18 "Presentation and Disclosure in Financial Statements". IFRS 18 lays down general and specific provisions on the presentation of information in the balance sheet, the income statement and the statement of changes in equity. It also stipulates the information to be provided in the notes to the financial statements. It replaces IAS 1"Presentation of Financial Statements". The provisions of this standard are currently being analyzed.

Amendments to IAS 21 – "Translation to a Hyperinflationary Presentation Currency". The provisions of this amendment will not have any material impact.

Note 5. Climate issues

Sustainable development is an integral part of the Group's strategy. It implements the *SustainAgility* program by focusing on three areas: Empowering our people, Growing with our customers and Caring for our planet, which put climate at the center of the Group's model of sustainable value creation.

The Group sees the transition to a low-carbon economy not only as a material strategic risk, but also as a lever for industrial transformation and a vehicle for long-term growth.

Comprehensive developments in non-financial performance and sustainability indicators are presented in Chapter 3 of the Universal Registration Document.

5.1. Decarbonization commitments

The Group has embarked on a path to reduce its greenhouse gas (GHG) emissions by setting targets for 2030 that have been formally validated by the Science-Based Targets initiative (SBTi). The objectives and the status of progress at December 31, 2025 are as follows:

- 42% reduction in Scope 1 and 2 emissions in absolute terms by 2030, relative to the base year 2021. At the end of the 2025 financial year, the relevant emissions had been reduced by 28% on aggregate since 2021.
- Reduction in Scope 1 and 2 emissions per million euros of revenue of 22.9% by 2025 and 36% by 2030, relative to the base year 2018. At the end of the 2025 financial year, the relevant emissions had been reduced by 27% on aggregate since 2018.
- 25% reduction in Scope 3 emissions by 2030, relative to the base year 2021. At the end of the 2025 financial year, the relevant emissions had been reduced by 22% on aggregate since 2018.

This decarbonization strategy draws on several levers, including the increased use of renewable energies: Imerys secures its supply through long-term, on-site or virtual power purchase agreements (PPA or vPPA). Note 27 summarizes the treatment of the two vPPA signed by the Group in 2025.

5.2. Carbon allowances and credits

In line with the recommendations of the SBTi, Imerys prefers to reduce its direct and indirect emissions without using carbon offsetting mechanisms to achieve its 2030 targets. The management of regulatory emissions allowances (in different jurisdictions) remains the only financial mechanism that has an impact on the Group's financial statements. Note 20 summarizes their accounting treatment and impacts.

5.3. Incorporating sustainability into financing (Sustainability-Linked Bonds)

In line with its climate strategy, Imerys has incorporated environmental performance criteria into its financing structure by issuing Sustainability-Linked Bonds (SLB). The financial cost of these instruments is directly correlated with the achievement of Scopes 1 and 2 emission reduction targets. If the intermediate milestones have not been reached on the observation dates, a mechanism triggers an automatic increase in the coupon of these bonds. Details of the financial commitments are set out in note 27.

5.4. Governance and alignment of incentives

The oversight of climate issues takes place at the highest level of Group governance, ensuring alignment between environmental objectives and directors' interests.

For the Chief Executive Officer, 15% of annual variable remuneration is linked to ESG performance targets. Similarly, his long-term remuneration under performance share plans (described in note 11), as well as that of the Executive Committee and certain senior executives of Imerys, is also directly linked to the attainment of ESG performance targets.

These quantifiable ESG criteria include a climate criterion that specifically corresponds to the Scope 1 and 2 emissions reduction target aligned with a trajectory of 1.5°C (see section 4.3 of this Universal Registration Document for details of the criteria and results obtained).

5.5. Analysis of resilience and impacts on financial statements

The Group relies on the TCFD (Task Force on Climate-related Financial Disclosures) reference framework and CMIP (Coupled Model Intercomparison Project) scientific projections to assess the exposure of its assets to climate risks:

- Transition risks: the potential financial impact related to emissions trading systems and the associated carbon taxes is estimated to be in the range of €63 to €98 million per year by 2030, before taking into account mitigation measures and the passing on of carbon prices to the Group's customers.
- Asset valuation: in accordance with the provisions of note 22, climate risks are incorporated into impairment tests by means of sensitivity analyses. Analyses conducted under a global warming scenario of +2°C confirm the resilience of carrying amounts, with no need to recognize impairment losses in this case.

For a detailed description of the parameters and sensitivity tests, see note 22.

Note 6. Estimates and judgments

When preparing the financial statements, Executive Management makes a certain number of estimates and judgments regarding the recognition and measurement of the Group's assets and liabilities. These decisions seek to respond to the uncertain nature of the risks and opportunities facing the Group's operations, in particular the risks and opportunities arising from climate change.

After having signed the United Nations Global Compact in 2016, Imerys defined its SustainAgility approach in 2018 to better integrate considerations related to the climate and sustainable development into the Group strategy in an effort to reduce the risks and open up new opportunities to create long-term value.

As part of this approach, risks and opportunities are considered by assessing market changes, physical risks and changes in the energy mix.

Estimates. Estimates are intended to provide a reasonable assessment of the most recent reliable information available about elements of uncertainty. They are revised to reflect changes in circumstances, newly available information and past experience. Changes in estimates are recognized for future periods. The following significant estimates made by Executive Management are discussed in detail separately in the notes:

- definition, for impairment tests performed on non-financial assets, of the duration and amount of future cash flows as well as the discount rates and perpetual growth rates used to calculate the value in use of the tested assets;
- actuarial assumptions applied to defined benefits plans (note 26.1); and
- assessment of the probability of settlement as well as the amount of obligations, the planned schedule of future payments and the discount rates required to recognize and measure provisions (note 26.2).

Judgments. Judgments are made by analyzing and categorizing elements, transactions and situations. When a judgment is revised, it is recognized for future periods like for changes in estimates, except if the judgment has been revised to correct an error. The following significant judgments made by Executive Management are based on the following elements, which are detailed separately in the notes:

- assessment of the considerable likelihood of a plan to sell non-current assets or groups of directly related assets and liabilities (note 1) ;
- definition of the levels at which cash-generating units are tested and impairment indicators for impairment tests performed on non-financial assets (note 22).

INFORMATION BY SEGMENT

Note 7. Information by segment

Accounting policy

Imerys delivers high value-added functional solutions to a wide variety of industries, ranging from process manufacturing to consumer goods. In each of its operating segments, the Group draws on its understanding of applications, technological knowledge and expertise in material science to deliver solutions by beneficiating its mineral resources, synthetic minerals and formulations. Imerys' solutions contribute essential properties to customers' products and their performance, such as heat resistance, hardness, conductivity, opacity, durability, purity, lightness, filtration, absorption and water repellency, for example.

Imerys' segment information is presented based on its four operating segments, as described below:

- Performance Minerals (PM) comprises two operating segments: Europe, Middle East, Africa and Asia Pacific (PM EMEA & APAC) on the one hand and America (PM Americas) on the other hand, which are presented separately as well as the inter-segment eliminations and other adjustments at the level of this group (Other PM). These two segments mainly serve the plastics, paints & coatings, filtration, life sciences, ceramics and building products markets, and the paper market up to June 30, 2024;
- Refractory, Abrasives & Construction (RAC): this operating segment serves the refractory, foundry, abrasives and building chemistry markets;
- Solutions for Energy Transition (SET) comprises the Imerys Graphite & Carbon (IG&C) operating segment, mainly serving the mobile energy market, and Imerys' shareholding in The Quartz Corporation (TQC), a 50%-owned joint venture, serving the solar and semiconductor markets with high-purity quartz solutions.

Each of the operating segments manufactures and sells goods and services presenting geological, industrial and commercial synergies and is monitored each month by Executive Management in its business reporting on the Consolidated Income Statement, adjusted EBITDA and capital employed.

Executive Management considers that the holding structure that handles the Group's centralized financing does not constitute a segment, nor do the ongoing strategic investments in lithium projects. Their aggregates are therefore presented in a reconciliation column with the inter-segment eliminations (Other).

Financial information by segment is measured in accordance with the principles set out in the Principles (note 2). Transactions between segments are measured at the price upon which two independent parties would have agreed on an arm's length basis.

CONSOLIDATED INCOME STATEMENT

The following tables present a breakdown of revenue by segment before and after any inter-segment eliminations, as well as the main levels of the Consolidated Income Statement. Revenue from transactions made by Imerys with each of its external customers never exceeds the threshold of 10.0% of the Group's revenue.

AT DECEMBER 31, 2025

(€ million)	PM Americas	PM EMEA & APAC	Other PM	Total PM
Revenue	**840.9**	**1,249.4**	**(68.7)**	**2,021.6**

Information by region

Components of country risk. Due to the Group's mining activity and the variety of its end markets, its entities operate across many countries. Therefore, Imerys may be exposed to certain risks specific to these countries that may impact its financial statements in the future.

Country risk includes two factors. The first concerns the transfer and convertibility risk, i.e. the risk that government-imposed capital and exchange controls by a sovereign entity would prevent or materially impede the ability to convert local currency into foreign currency and/or transfer funds to non-resident creditors. The second factor takes into account the risks related to the overall economic context, mainly in relation to the quality of public and private governance, as well as the risk of conflicts, expropriation, or civil and political instability.

Transfer and convertibility risk. The transfer and convertibility component of the country risk resulted in an unavailable cash balance of €1.9 million at December 31, 2025 (€3.4 million at December 31, 2024) (note 27.2 – Reconciliation of net financial debt).

Risks related to the overall economic context. The risks related to the overall economic context are taken into account in the country-market risk premium of the discount rates used for impairment tests (note 22). However, the majority of the Group's sources of supply and end markets are located in developed countries, which limits Imerys' exposure to country risk.

In order to identify high-risk countries, Imerys uses the "Business Climate" risk assessment published by Coface, the leading French insurance company specialized in international credit insurance, which measures the potential influence of a country's economic, financial and political outlook on businesses' financial commitments. Coface's risk assessment uses an eight-level ranking system from A1 to E, in ascending order of risk. Countries in which the Group operates ranked in categories C to E, the highest levels of risk, include Egypt (category C), Ukraine and Russia (category D).

In addition, Imerys may decide, where necessary, to conduct studies on specific situations.

The following table presents a breakdown of revenue by geographical location of Group operations:

(€ million)	2025	2024
France	611.8	595.5
Other European countries	1,184.6	1,266.2
United States of America	886.3	953.5
Other North American countries	78.7	102.7
Asia – Oceania	426.9	473.7
Other countries	195.4	213.4
Revenue by geographical location of Group operations	**3,383.7**	**3,604.9**

In 2025, countries rated C to E by Coface's "Business Climate" risk assessment accounted for 0.31% of Group revenue (0.13% in 2024) and 0.85% of current operating income (0.15% in 2024).

The following table presents a breakdown of revenue by geographical location of customers:

(€ million)	2025	2024
France	227.9	208.4
Germany	371.0	393.8
Other European countries	852.3	882.2
United States of America	775.2	835.1
Other North American countries	148.2	175.2
Asia – Oceania	659.8	721.1
Other countries	349.3	389.2
Revenue by geographical location of customers	**3,383.7**	**3,604.9**

The following table presents the carrying amount of intangible assets and property, plant and equipment by geographical origin of the asset:

(€ million)	2025 Intangible assets, right-of-use assets, mining assets and property, plant and equipment	2024 Intangible assets, right-of-use assets, mining assets and property, plant and equipment
France	667.1	696.9
Other European countries	612.6	624.5
United States of America	566.8	616.1
Other North American countries	37.4	35.2
Asia – Oceania	212.3	243.3
Other countries	283.1	296.7
TOTAL	**2,379.3**	**2,512.7**

Countries rated C to E by Coface's "Business Climate" risk assessment accounted for 0.31% of the Statement of Financial Position (0.21% at December 31, 2024) and -1.13% of consolidated equity, Group share (-0.59% at December 31 2024).

NOTES TO THE CONSOLIDATED INCOME STATEMENT

Accounting policy

Income and expenses recognized in the Consolidated Income Statement are aggregated based on their nature and according to their relative magnitude, and are only offset when required by a standard or interpretation. Comparative information is presented for the prior year Y-1, while comparative information for Y-2 is incorporated by reference (Chapter 9, Section 9.4 of the Universal Registration Document).

The Income Statement is structured across two main levels: operating income and financial income (loss). Although in the majority of cases, the allocation of transactions by level of profit or loss does not require any specific comment, the options available in some standards and the absence of guidance from other standards have led Executive Management to make certain judgments and decisions about presentation.

The following three tables present these decisions and specify the corresponding note.

Operating income. Operating income is made up of current operating income and other operating income and expenses. Current operating income (notes 8 to 12) includes revenue generated by Imerys as well as the following items:

	Notes
Share-based payment expenses	11
Changes in employee benefits excl. restructuring	
– Plan curtailments, settlements and amendments	11
– Contributions to funds and direct payments to beneficiaries	11
– Decrease in provisions for contributions and direct payments	11
– Administrative fees for open plans	11
Hedge accounting	
– Ineffective portion of operational hedge instruments	15
– De-designations. Amortization of the effective portion of an operational hedge instrument measured at the date of the voluntary interruption of the hedge	15
Asset disposals excl. restructuring	12

Other operating income and expenses. Other operating income and expenses is composed of gain (loss) from obtaining or losing control and other non-recurring items (note 14). In accordance with ANC Recommendation No. 2020-01 issued by France's national accounting standards board on how to present IFRS financial statements, it corresponds to items of income and expenses resulting from a limited number of clearly identified, non-recurring and significant events, such as the impact in profit or loss of obtaining or losing control of a business, restructuring including any related asset disposals, impairment loss recognized against goodwill or major disputes. In particular, since applicable standards do not define restructuring as an infrequent or unusual occurrence, Executive Management has put in place approval criteria to ensure that only management decisions defined as both restructuring and non-recurring may be recognized in other operating income and expenses.

	Notes
Gain (loss) from obtaining or losing control	14
Impairment loss recognized against goodwill	14
Restructuring	14
Asset disposals due to restructuring	14
Changes in employee benefits due to restructuring	
– Plan curtailments, settlements and amendments	14
– Contributions and direct payments to beneficiaries	14
– Decrease in provisions for contributions and direct payments	14
Major disputes	14
Share in net income from non-recurring operations of associates	14

Financial income (loss). Financial income (loss) is primarily made up of the cost of debt, exchange rate fluctuations, the financial components of defined benefits plans, the unwinding of discounts on provisions and impairment loss on financial assets (note 16), as well as the following specific items:

	Notes
Hedge accounting	
– Ineffective portion of financing hedge instruments	15
– De-designations. Amortization of the effective portion of a financing hedge instrument measured at the date of the voluntary interruption of the hedging relationship	15
– De-designations. Change in the fair value of an operational or financing hedge instrument after the voluntary interruption of the hedging relationship	15
Unrealized and realized translation gains (losses) on operating and financial transactions	16
Financial changes in employee benefits	16
– Unwinding	16
– Normative return on assets	16
– Contributions to under-funded closed plans with mandatory funding requirement	16
– Administrative fees for closed plans with mandatory funding requirement	16
– Decrease in provisions for closed plans with mandatory funding requirement	16

Note 8. Revenue

Accounting policy

Revenue is made up of two elements: (i) sales of goods, i.e. material specialties generally extracted from mineral deposits controlled by the Group and beneficiated in its plants, and (ii) services rendered, mainly invoicing customers the cost of shipping goods and providing industrial services. The contractual commitments made by the Group to transfer these goods and services to customers are categorized as performance obligations.

When control of goods or services is transferred to customers, the performance obligation is deemed to have been satisfied and the revenue is recognized. Material specialties are therefore transferred to customers at a given point in time, which coincides with the transfer of all the risks and rewards defined in the contractual incoterms. The contract includes multiple incoterms due to the specificities of packaging (bulk, powder, paste, slurry, etc.) and freight (sea, rail, road, etc.). However, while certain services, such as molding work, are rendered at a given point in time, most other services are transferred to customers over time. This is the case for shipping services, the revenue for which is recognized after the delivery has been made.

Warranty obligations on the sale of goods and rendering of services offer customers guarantees about the specifications agreed in the contracts, rather than an additional service on top of these guarantees. Consequently, warranties are not recognized as performance obligations but as provisions (note 26.2).

Sale of goods and rendering of services are measured at the amount of the transaction, minus trade and volume rebates, as well as discounts for early payment.

Activity for the period

Due to the diversity of the Group's operations and geographic spread, Imerys is not materially affected by seasonal variations but may nevertheless be affected by economic cycles in certain markets, in particular the steel, automotive and construction industries.

The following table presents a breakdown of revenue by sale of goods and rendering of services.

(€ million)	**2025**	**2024**
Sale of goods	3,094.6	3,291.4
Rendering of services	289.1	313.4
TOTAL	**3,383.7**	**3,604.9**

The following table presents a different breakdown of revenue by the time at which goods or services are transferred to customers.

(€ million)	2025	2024
Goods and services transferred to customers at a point in time	3,106.2	3,303.4
Services transferred to customers over time	277.5	301.5
TOTAL	**3,383.7**	**3,604.9**

Furthermore, other breakdowns of revenue are presented in Information by segment: by segment before and after inter-segment eliminations, by geographical location of Group operations and by geographical location of customers.

Note 9. Raw materials and consumables used

Note 11. Staff expenses

Staff expenses correspond to all compensation granted in the normal course of business for the current service of staff members or at the end of their employment.

This compensation includes short-term benefits, notably salaries, bonuses, profit-sharing and the corresponding social security contributions, retirement benefits and post-employment health insurance (note 26.1), other long-term employee benefits (note 26.1) and termination benefits (note 26.2).

In 2025, Imerys' average headcount totaled 12,445 employees (12,896 employees in 2024).

TOTAL	**(861.2)**	**(888.6)**

06

Description of share-based payments plans

Since 2008, the Group's long-term incentive scheme has involved granting conditional free performance shares acquired on the market. The corresponding expense is recognized in other employee benefits and amounted to €11.1 million in 2025 (€11.9 million in 2024).

The management principles applied to share-based payments are agreed by the Board of Directors based on proposals made by the Compensation Committee. With the exception of grants made as part of the Group's employee shareholding operations, free shares are in principle subject and proportionate to the achievement of economic and/or financial performance objectives set by the Board of Directors.

Share-based payment plans are annual and the total number of rights granted each year is adjusted in accordance with the Group's overall performance or specific events.

The actual or probable beneficiaries include the Group's executives (such as the Chief Executive Officer, members of the Executive Committee, of management committees for operational activities, as well as key support functions executives) and certain key employees reporting to them, as well as managers with very high potential and employees with an outstanding contribution to the Group's performance.

Accounting policy

The fair value of current service against the grant of Imerys free shares is measured in reference to the fair value of instruments at the grant date. This measurement takes into consideration the life of instruments, the underlying share price, the average dividend rate as well as the turnover rate of beneficiaries.

In the majority of cases, the rights vest depending on employees' length of service in the Group and the fair value of current service is spread in profit or loss over the vesting period, offset by an increase in equity. The accounting treatment is identical when, in addition to the length of service condition, the rights vest subject to the achievement of pre-determined economic performance conditions.

Assumptions related to the probability of rights vesting are revised at each closing date. The turnover rate of beneficiaries is adjusted definitively as vesting periods are closed.

SHARE-BASED PAYMENT EXPENSES

	Number of free shares	Maturity	Turnover rate	Average dividend rate	Probability of meeting performance conditions	Fair value (€)	Total cost by plan (€M)	**Cost of the plan in 2025 (€M)**	Cost of the plan in 2024 (€M)

Grants received	1.0	3.4
Net change in operating provisions and write-downs	10.6	9.8
TOTAL	**37.1**	**37.6**

Note 13. Joint ventures and associates

Accounting policy

Imerys uses the equity method to account for its investments under joint control (joint ventures, i.e. those whose financial and operating strategy are subject to a unanimous vote from Imerys and a third party) as well as its investments over which it exercises significant influence (associates, i.e. those whose financial and operating policies are governed by a third party and Imerys only participates in the policies, without having control over them).

The stakes held in the net assets and earnings of such entities are presented in distinct lines in operating income and assets.

Share of equity and net income

	Share of net income		Share of equity	
(€ million)	2025	2024	2025	2024

Equity	**245.6**	**238.4**
Non-current liabilities	97.9	118.5
Current liabilities	28.1	66.3

The following table presents the reconciliation between the equity of the joint ventures and associates, as disclosed at 100.00% in the previous table and as recognized in the assets of Imerys in accordance with the equity method.

	2025				**2024**			
(€ million)	Equity	Stakes of other shareholders	Goodwill	Imerys stake	Equity	Stakes of other shareholders	Goodwill	Imerys stake
The Quartz Corporation	245.6	(123.1)	2.0	124.5	238.4	(119.5)	2.3	121.2
Other investments	101.2	(58.0)	2.2	45.5	96.4	(57.1)	2.2	41.6
TOTAL	**346.8**	**(181.1)**	**4.2**	**170.0**	**334.9**	**(176.6)**	**4.5**	**162.8**

Note 14. Other operating income and expenses

(€ million)	2025	2024
Gain (loss) from obtaining or losing control	**(9.3)**	**(335.6)**
Transaction costs	(7.5)	(21.5)
Income from disposals of consolidated businesses	(1.8)	(314.1)
Other non-recurring items	**(566.9)**	**(38.6)**
Impairment loss on goodwill	(469.4)	-
Impairment loss on assets	(67.1)	(20.9)
Income from non-recurring asset disposals	(0.1)	0.1
Restructuring and dispute-related expenses	(28.6)	(15.2)
Other non-operating income and expenses	(1.8)	(2.5)
Other operating income and expenses	**(576.2)**	**(374.2)**

In 2025, gross "Other operating income and expenses" amounted to -€576.2 million, of which -€467.4 million related to goodwill impairment associated with the RAC operating segment (notes 1 and 22), -€67.1 million in impairment of individual assets, including -€38.2 million for the operating segments affected by the Horizon project and -€28.5 million for the assets of the IBL project (notes 1, 20, 21 and 22).

In 2024, gross "Other operating income and expenses" amounted to -€374.2 million, of which -€346.3 million related to the disposal of the business serving the paper market. This amount mainly breaks down as follows: -€301.6 million related to the reclassification to profit or loss of the translation reserve associated with assets for this business, -€11.3 million related to the impairment of assets, and -€18.8 million in transaction costs (note 1).

Note 15. Financial instruments

Accounting policy

Financial instruments are defined as any contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity.

Financial instruments are divided into categories set by IFRS 9 in order to reflect their business model and contractual cash flow characteristics as well as to determine how they must be measured and recognized.

Amortized cost. Financial assets are measured at amortized cost when the objective of the business model is to collect the contractual cash flows, which meet the definition of a basic loan. This applies to trade receivables from revenue (note 8), as well as cash, i.e. cash on hand, bank deposits and cash equivalents. Cash equivalents are highly liquid investments indexed on a money market rate and the value of which is known or subject to very little change in value. In the Statement of Cash Flows, cash and cash equivalents also include bank overdrafts presented as a liability.

Borrowings (note 27.2 – Reconciliation of net financial debt) are also included in the amortized cost category. They are initially measured at the fair value of the amount borrowed, minus any transaction costs. They are subsequently measured at amortized cost using the effective interest rate method.

The Group purchases raw materials and energy for its own use and not for trading purposes. Consequently, the purchase contracts are recognized as trade payables and not as derivatives. Trade payables and other financial liabilities (note 27.1) are measured at amortized cost.

Fair value through profit or loss. Financial assets held in this category follow another business model or do not comply with the SPPI criterion. They are non-derivative financial assets held for trading and recognized as assets between the dates of purchase and disposal. Any change in fair value is recognized in other financial income (expenses) (note 16) at market prices published at the end of the reporting period.

Assets designated at fair value through profit or loss also include investments in non-listed companies over which the Group does not exercise control, joint control or significant influence (note 24.2), as well as non-hedge derivatives (note 27.4).

Analysis of financial instruments by category

Notes 15, 16, 24.1 and 27.1 analyze the income, expenses, assets and liabilities from financial instruments by categories, which are presented in columns. They distinguish between the categories applied by default to all non-hedged items and those to which hedge accounting is applied on an exceptional basis.

The categories of amortized cost and fair value through profit or loss set out in IFRS 9 and defined above apply to the majority of non-hedged items.

Hedged items and hedging instruments are categorized by their qualifications as a fair value hedge or cash flow hedge (note 27.4 – Accounting policy), distinguishing in separate columns the value of hedged items and hedging instruments and in separate lines the type of risk hedged (note 27.5 – Currency risk – Interest rate risk – Energy price risk).

Furthermore, in order to make the reconciliation between the IFRS 9 categories and the financial statements, notes 15, 16, 24.1 and 27.1 include a column containing the following items not covered by IFRS 9: share-based payments (IFRS 2), mining assets (IFRS 6), inventories (IAS 2), income tax assets and liabilities (IAS 12), property, plant and equipment (IAS 16), employee benefits-related assets and liabilities (IAS 19), subsidies and grants (IAS 20), provisions (IAS 37), intangible assets and prepaid expenses (IAS 38), overburden assets (IFRIC 20) and levies and taxes (IFRIC 21).

The categorization of financial assets (note 24.1) and liabilities (note 27.1) is applied across all divisions of the Group to the change in profit or loss (notes 15 and 16). For example, revenue is included in amortized cost as its consideration in trade receivables or cash and cash equivalents belong to this category in assets.

The following tables present income and expenses before income taxes recognized in profit or loss and equity by category of financial instruments. The balances of other financial income (expenses) are analyzed in more detail in note 16.

Note 17. Income taxes

Accounting policy

Income taxes are made up of two components: (i) taxes paid in France and overseas on taxable profits, including similar contributions calculated on the basis of the difference between income and expenses, such as the French Added Value Contribution (Cotisation sur la Valeur Ajoutée des Entreprises or CVAE); and (ii) withholding taxes paid by entities on dividends they distribute to the Group.

Income taxes are broken down into current taxes and deferred taxes.

Current income taxes are recognized as a liability until they have been paid and as an asset when the amount paid exceeds the amount due.

Deferred tax assets and liabilities are recognized on all taxable temporary differences between the tax and consolidated values of assets and liabilities, with the main exception of those relating to the initial recognition of goodwill and, in the case of taxable temporary differences, between the book value and tax value of investment securities, when the Group is able to control the date of reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

A deferred tax asset is recognized in respect of deductible temporary differences, tax losses and tax credits only if it is probable that a future taxable profit will enable these items to be offset, or if there are taxable temporary differences in the same tax entity that expire during the period in which these items remain recoverable.

Imerys applies the tax rates and rules that have been enacted or substantively enacted at the end of the reporting period and will be applicable over the period of reversal of the temporary difference. Deferred tax assets are not discounted.

The amount of current taxes takes into account the uncertainties relating to the measurement of income taxes. Each uncertainty is assessed individually, unless it affects several entities in the same way. The assessment of uncertainties is based on the presumption that the tax authorities have full knowledge of all relevant information when examining any amounts reported to them and considers whether it is probable that the relevant authority will accept each tax treatment.

Judgments and estimates made about uncertainties are reassessed if facts and circumstances change.

Deferred tax assets and liabilities are offset by tax entity, i.e. by legal entity or tax consolidation group. Current and/or deferred taxes are recognized in the same level of income as the base to which they relate. This principle of matching tax to tax base also applies to transactions recognized directly in equity.

Tax consolidation groups

In several countries, Imerys has set up tax consolidation systems to offset taxable profits and losses within the consolidated group. Such tax consolidation systems exist in France, the US, the UK, Spain, Germany and Italy.

Income taxes paid

In 2025, income taxes paid in cash or using tax credits amounted to -€47.6 million (-€66.1 million in 2024).

Tax losses carried forward

Deferred tax assets are recognized in respect of tax loss carryforwards when they are deemed to be recoverable and over an expected recovery period.

The valuation of deferred tax assets recognized in this respect is based on an analysis of the history of losses, whether it is probable these losses will be incurred again in future, the business outlook and national legislation limiting the use of tax losses carried forward.

At December 31, 2025, these deferred tax assets amounted to €39.7 million (€38.4 million at December 31, 2024). Conversely, tax losses and tax credits for which no deferred tax asset has been recognized because their recovery is considered uncertain amounted to €466.4 million and €10.3 million, respectively, at December 31, 2025 (€540.3 million and €33.0 million, respectively, at December 31, 2024) of which €423.7 million and €5.1 million, respectively, expire after 2030 or can be carried forward indefinitely.

The tax losses for which no deferred tax asset has been recognized are mainly located in France (€208.1 million at December 31, 2025; €215.2 million at December 31, 2024) and the United States (€84.9 million at December 31, 2025; €164.9 million at December 31, 2024).

Deferred taxes are calculated using tax rates applicable for the years in question, in accordance with the tax legislation in force in each country.

Temporary differences controlled by the Group

No deferred tax liability is recognized for taxable temporary differences between the book value and tax value of investment securities, when Imerys is able to control the date of reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The Group estimates that the unrecognized deferred tax liability in this respect at December 31, 2025 amounts to €6.9 million (€7.4 million at December 31, 2024).

Tax news

The GloBE/Pillar 2 international tax reform came into effect on January 1, 2024. Imerys would be liable for any payments within its own scope; after analysis, these new rules do not have any material impact for the Group in 2024 or 2025, and no tax expense was recognized in this regard.

INCOME TAXES RECOGNIZED IN PROFIT OR LOSS

Note 18. Earnings per share

Accounting policy

In its financial statements, Imerys presents both basic earnings per share and diluted earnings per share. Basic earnings per share is equal to net income attributable to holders of ordinary shares divided by the weighted average number of ordinary shares outstanding over the period, i.e. excluding treasury shares (note 25).

Basic earnings per share can be broken down as basic net income per share from current operations and basic net income per share.

Diluted earnings per share simulates the dilutive effect of free shares (note 11). The previously defined weighted average number of ordinary shares is increased by the average number of ordinary shares that would have been issued between the start and the end of the reporting period if all dilutive instruments had been exercised by the end of the reporting period.

The number of dilutive shares is equal to the difference between the number of shares to be issued through free shares and the number of shares that would be issued at the average market price over the year for an issue of the same amount. To calculate the amount of this issue, each free share is valued at the fair value of services to be rendered with an exercise price of zero. The surplus number of shares to be issued as free shares above the number of shares issued under market conditions corresponds to the number of dilutive shares.

Earnings per share

No significant transaction has changed the number of ordinary shares and potential ordinary shares between December 31, 2025 and February 19, 2026, the date on which the financial statements were approved for publication by the Board of Directors.

Weighted average number of shares used to calculate basic earnings per share	84,569,253	84,577,709
Dilutive effect of free shares	1,264,725	1,229,013
Weighted average number of shares used to calculate diluted earnings per share	85,833,978	85,806,722
Basic earnings per share, Group share *(in €)*	**(4.83)**	**(1.12)**
Basic earnings per share, Group share	(4.83)	(1.12)
Basic earnings per share from current operations, Group share	1.73	3.10
Diluted earnings per share, Group share *(in €)*[1]	**(4.83)**	**(1.12)**
Diluted earnings per share, Group share	(4.83)	(1.12)
Diluted earnings per share from current operations, Group share	1.71	3.05

1 When basic earnings per share are negative, diluted earnings per share are deemed to be equal to basic earnings per share; the instruments are thus considered anti-dilutive.

NOTES TO THE CONSOLIDATED STATEMENT OF FINANCIAL POSITION

Accounting policy

The assets and liabilities recognized in the Consolidated Statement of Financial Position are grouped by materiality and ranked in ascending order of liquidity and due date distinguishing between non-current and current items, according to whether they will be recovered or settled in more or less than 12 months after the end of the reporting period. They are only offset or include revenue or expenses in their cost when required by a standard or interpretation. Comparative information is presented for the prior year Y-1, while comparative information for Y-2 is incorporated by reference (Chapter 9, Section 9.4 of the Universal Registration Document).

Note 19. Goodwill

Accounting policy

Goodwill is recognized when the acquisition price of a business is greater than the sum of the fair value of the identifiable assets acquired and liabilities assumed. Goodwill is recognized at the date control is acquired. Transaction costs are recognized as they are incurred in profit under other operating income and expenses (note 14). When the value of the identifiable net assets of the acquired business is greater than its acquisition price, negative goodwill is credited to the acquirer's profit or loss account for the reporting period in which the entity was acquired under other operating income and expenses (note 14).

The definitive value of goodwill is finalized within 12 months following the date at which control was acquired. Goodwill for a foreign company is measured in the functional currency of the company and translated in accordance with the rules applicable to translating financial statements of foreign operations. Goodwill is not amortized. It is allocated to the Cash Generating Units (note 22) that benefit from the synergies resulting from the acquisition.

Goodwill is initially tested for impairment before the end of the reporting period during which the entity was acquired and subsequently at least once a year or more frequently if there is an indication that it may be impaired. Impairment loss on goodwill is recognized in other operating income and expenses (note 14) and cannot be reversed.

When a business is listed for sale, a share of goodwill from the Cash Generating Unit to which it belongs is allocated to the business and included in its carrying amount. The share of goodwill is allocated based on the relative fair value of the business put up for sale and the remaining components of the Cash Generating Unit.

Estimates

The value of the assets and liabilities of an acquired business is estimated by Executive Management on the basis of a series of assumptions. Assets and liabilities are measured at their acquisition-date fair value except for certain items measured in accordance with specific rules, such as income taxes, measured using the principles set out in note 17, or employee benefits, measured using the principles set out in note 26.1. When making its estimates, Executive Management may consult third-party specialists, in particular to estimate the value of assets and liabilities that are material or that require complex valuation techniques.

Table of changes

The goodwill recognized on acquisitions represents in particular the development prospects of the acquired businesses within Imerys.

Impairment loss on goodwill is presented in note 22. When an impairment loss is recorded against goodwill, it is only maintained on the Statement of Financial Position in the event of a partial write-down, as presented in the following table. When goodwill is fully impaired, the gross amount and impairment loss are removed from the Statement of Financial Position and no longer appear in the table.

In 2025, the Group recognized a total impairment loss of €469.4 million on its goodwill, comprising the goodwill allocated to the RAC CGU (for €467.4 million) and that allocated to the IBL project (for €2.0 million), see note 1. In 2024, the Group made the acquisition, from the Chemviron group, of two companies in France and Italy (note 1). The allocation of the purchase price was finalized in 2025 and goodwill was adjusted to €1.8 million in 2025 (provisional goodwill of €1.9 million at December 31, 2024).

(€ million)	**2025**	**2024**
Carrying amount at the beginning of the period	**1,859.9**	**1,839.1**
Gross amount	*1,941.9*	*2,027.3*
Impairment	*(82.0)*	*(188.2)*
Incoming entities[1]	-	5.8
Outgoing entities[2]	-	-
Impairment	(469.4)	-
Exchange rate differences and other movements	(43.2)	15.0
Carrying amount at the end of the period	**1,347.3**	**1,859.9**
Gross amount	*1,890.7*	*1,941.9*
Impairment	*(543.5)*	*(82.0)*

1 Of which in 2024, provisional goodwill of €1.9 million recognized with respect to the acquisition of two companies from the Chemviron group (note 1).

2 In 2024, outflow of goodwill with respect to the business serving the paper market for €110.0 million gross, fully written off (note 1).

Note 20. Intangible assets

Accounting policy

Intangible assets controlled by Imerys are recognized as assets over their useful life. They are measured at acquisition cost, minus accumulated amortization and any impairment loss.

The expenditure incurred by the research teams at Imerys in their efforts to improve the quality and properties of the Group's products is generally in response to customers' specific requirements. Such costs are therefore recognized immediately as an expense in current operating income. They are capitalized only if they correspond to a new or improved industrial process that is both technically feasible and a driver of future economic benefits, meaning if the project has been clearly defined and the expenses identified separately and reliably assessed; the technical feasibility of the project has been demonstrated; Imerys intends to complete the project to use or sell it; adequate technical and financial resources are available to complete the project; and if there is a likelihood that the project will generate future economic benefits for the Group. Such is the case for the Group's lithium projects.

The capitalized amounts correspond to the development spending made that is directly attributable to the project.

In the absence of any applicable standard or interpretation, Executive Management considers greenhouse gas emission rights as an intangible asset. Imerys uses this allocation with the sole intent of justifying its emissions volume and not for trading purposes by making forward purchases or sales. Rights granted free of charge are recognized to have zero value and rights acquired on the market are recognized at acquisition cost. If at the end of the reporting period, the total rights allocation is not sufficient to cover actual emissions, a provision is recognized in current operating income for the value of the rights to be acquired, measured at market value (net liability method) (note 26.2). Disposals only relate to surplus rights and are recognized in current operating income as asset disposals (note 12).

Executive Management makes estimates regarding the amortization methods applied to intangible assets.

Estimates

In the ordinary course of its business, Imerys uses intangible assets for which Executive Management believes the best way to estimate consumption of future economic benefits is by using the straight-line amortization method over the assets' useful life applied as follows:

- software: 1 to 5 years
- trademarks, patents and licenses: 5 to 40 years;
- industrial processes and others: estimated useful life, specific to the project.

The Group's greenhouse gas emission rights cannot be amortized.

Emission rights

Imerys is subject to greenhouse gas regulation schemes at 10 of its facilities in Europe, one facility in the UK and one facility in the US.

As the estimated volume of greenhouse gas emissions exceeded the Group's emission rights in 2025, Imerys set aside a provision of €9.3 million at December 31, 2025 to cover the deficit (€9.0 million at December 31, 2024).

Moreover, the carrying amount of emission rights acquired on the market totaled €5.9 million at December 31, 2025 (€16.4 million at December 31, 2024).

TABLE OF CHANGES

(€ million)	Software	Trademarks, patents and licenses	Industrial processes	Emission rights	Assets in progress and others	**Total**
Carrying amount at January 1, 2024	**68.3**	**138.6**	**12.0**	**14.5**	**99.9**	**333.3**

Amortization and impairment	*(105.5)*	*(10.8)*	*(4.5)*	-	*(115.7)*	*(236.5)*

1 In 2025, €26.5 million for lithium activities in France (€26.0 million in 2024), and €11.5 million for lithium activities in the UK (€7.1 million in 2024).

2 In 2025, -€27.2 million for the assets of the IBL project (note 1).

Note 21. Property, plant and equipment

Accounting policy

Freehold property, plant and equipment. Items of property, plant and equipment for which Imerys owns the property rights are initially measured at acquisition or production cost.

The cost of property, plant and equipment includes the cost of borrowings that finance their construction or production, when this process takes a substantial period of time. Where applicable, the cost of property, plant and equipment is reduced by the value of government grants awarded to finance their acquisition or construction.

Maintenance and repair costs are immediately recognized as an expense in current operating income.

The cost of property, plant and equipment also includes the discounted value of restoring or dismantling obligations, where a present obligation exists, in particular for satellite industrial facilities built on land owned by customers (note 26.2).

Items of property, plant and equipment are subsequently measured at cost, minus accumulated depreciation and any impairment loss. Executive Management makes estimates regarding the depreciation methods applied to property, plant and equipment.

Leasehold property, plant and equipment. All contracts that convey the right to use an item of non-substitutable property, plant and equipment for a period of time in exchange for consideration are recognized as right-of-use assets with a corresponding lease liability (note 27.2 – Reconciliation of net financial debt).

This treatment applies to all leases except mine land leases, which are recognized in the manner described in the following paragraph, as well as immaterial leases (leases with terms of 12 months or less and of low-value assets), for which payments are recognized as an expense (note 10). Easements, especially for pipelines used to connect mineral deposits, processing facilities and shipping facilities are analyzed as non-mine land leases.

Right-of-use assets are initially measured at the value of the lease liability, plus any initial direct costs and equipment dismantling costs where necessary.

Lease liabilities are measured at the discounted value of future fixed lease payments due in accordance with a contractual payment schedule, adjusted for rent-free periods. Payments are therefore scheduled through to the reasonably certain end date of the lease, reflecting the date beyond which the lease ceases to be legally enforceable. This date represents the end of the lease, adjusted for any options the lessee is able to exercise regarding early termination or extension and any restrictions the lessor is able to exercise. The lease payments taken into account in the calculation of the lease liabilities include the unconditional payments due in exchange for the right to use the asset, as well as the cost related to the early termination, extension or purchase clauses when it is reasonably certain they will be exercised.

The liability calculation excludes any variable payment related to the use of the asset (for example, a payment dependent on the actual number of hours a piece of mining equipment is used), as well as any payment for services rendered by the lessor (for example, rail car maintenance).

In the absence of implicit interest rates, future payments determined in this way are discounted using the lessees' incremental borrowing rate. These rates are calculated over the duration of each lease by applying the risk-free rate of the lease currency, increased by Imerys' credit spread in euros and adjusted for the difference between credit default swaps in France and the lessees' country.

The first-time deferred tax assets and liabilities are recognized, they are calculated separately for lease liabilities and right-of-use assets, respectively.

In subsequent years, right-of-use assets are amortized in current operating income and lease liabilities are measured at amortized cost, which generates an interest expense that is recognized in financial income (loss).

When an option is exercised, the lease must be reassessed to symmetrically adjust the carrying amounts of the lease liability and the right of use. Any modification to leases gives rise to such a symmetrical adjustment, except when the scope of the lease is restricted to reduce the capacity of the asset leased or the duration of the lease. In this situation, the carrying amount of the lease liability and the right of use are reduced in proportion to the reduction of the scope, generating an impact recognized in current operating income (note 10).

In the financial statements, the following items are presented separately: right-of-use assets, lease liabilities, amortization and depreciation in current operating income generated by right-of-use assets and the interest expense generated by lease liabilities in financial income (loss). In the Consolidated Statement of Cash Flows, the cash payment for the principal portion of the lease liability is presented in "Repayments of lease liabilities" for financing activities and the cash payment for the interest portion of the lease liability is presented in "Interest paid".

Mining assets. In the absence of any specific applicable standard or interpretation, Executive Management has defined the following methods to recognize and measure mining assets.

Prospection expenditure, i.e. searching for new sites with mineral producing potential and studying the technical feasibility and commercial viability of a geographical area, is immediately recognized as an expense in current operating income.

Mineral reserves are included in property, plant and equipment. Freehold mineral deposits are initially measured at acquisition cost minus subsoil. Leasehold mineral deposits are measured at a value of zero if the lease is entered into in the ordinary course of business. Costs incurred to determine the tonnage of ore present in the deposit are added to the acquisition cost. If the lease is acquired through a business combination, the acquisition cost of the deposit is measured at the fair value of the ore.

Overburden work, i.e. the process of removing the topsoil to gain access to the deposit, is considered a component of mineral reserve assets. The initial measurement of overburden work includes the production cost and the discounted value of restoration obligations as a result of the deterioration caused by such work.

Mineral reserves and overburden assets form the "Mining assets" column in the table of changes below.

Estimates

In the ordinary course of its business, Imerys uses property, plant and equipment, the consumption of which is represented by depreciation. Executive Management believes that for most of these assets, the best way to estimate this consumption is by using the straight-line method over the assets' useful life applied as follows, taking into account the useful lives of the components where appropriate:

- Office buildings: 10 to 50 years;
- Industrial buildings: 10 to 30 years;
- Improvements to office and industrial buildings: 5 to 15 years;
- Machinery, tooling, facilities and equipment: 5 to 20 years;
- Vehicles: 2 to 5 years.

Right-of-use assets held through leases are depreciated over the reasonably certain term of the lease. If the lessee is considering exercising their right to purchase the asset, the useful life of the asset leased is applied. Rights of use are depreciated or amortized on a straight-line basis. Freehold and leasehold equipment is depreciated over its useful life, up to the end of the reasonably certain term of the lease.

Mining assets are subsequently measured at cost, minus accumulated depreciation and any impairment loss. Executive Management makes estimates regarding the depreciation methods applied to mining assets.

Mining assets are allocated to Cash Generating Units (note 22) in the same way as the Group's other assets and are subject to the same impairment tests.

Furthermore, Executive Management does not consider the straight-line depreciation method appropriate to reflect the consumption of property, plant and equipment related to mining activities such as mineral reserves (representing €249.4 million at December 31, 2025 and €276.7 million at December 31, 2024) and overburden assets (€146.1 million at December 31, 2025 and €145.6 million at December 31, 2024), as well as certain industrial assets where the realization of the economic benefit is directly related to the level of production. Depreciation of mining assets is therefore estimated in units of production on the basis of actual extraction, while operational monitoring units such as production or operating hours are used to estimate depreciation of industrial assets.

A mineral reserve is depreciated to the quantity of the geological inventory of the deposit minus discounts for the geological uncertainty inherent to the resources. Overburden assets, a component of mineral reserve assets, are depreciated over the quantity of reserve to which they specifically give access. Subsoil, i.e. the area of land not part of the mineral deposit, is not depreciated since it is not consumed by mining operations.

Table of changes

The following table shows the change in the carrying amount of property, plant and equipment owned by the Group between the beginning and end of the periods presented.

The "Right-of-use assets" column presents the change in rights conveyed by leases to use property, plant and equipment.

The "Mining assets" column includes the carrying amount of mineral deposits that Imerys owns or leases, as well as the overburden work required to gain access to the deposit.

The other columns in the table analyze the change in freehold movable and immovable property, depending on their nature.

(€ million)	Land and buildings	Plant and equipment	Down payments and plants under construction	Other property, plant and equipment	**Property, plant and equipment**	**Right-of-use assets**	**Mining assets**	**Total**

1 +€10.3 million in 2025 and -€10.3 million in 2024, both with respect to the business serving the paper market (note 1).

2 In 2025, -€38.2 million relating to assets impacted by the Horizon project, and -€1.3 million relating to the assets of the IBL project (note 1).

Leases

The Group negotiates leases to obtain from lessors the right to use certain mining, industrial and logistics equipment, as well as immovable administrative, industrial and logistical property. At December 31, 2025, the value of these rights, recognized in "Right-of-use assets", amounted to €144.7 million (€154.9 million at December 31, 2024). The following table presents the change in the carrying amount of right-of-use assets by asset type.

(€ million)	Industrial land, plants and warehouses	Offices and housing	Rail cars	Mining equipment	Other equipment	Right-of-use assets

Gross amount	*83.3*	*90.6*	*28.8*	*67.1*	*53.4*	*323.2*
Depreciation and impairment	*(38.7)*	*(70.0)*	*(15.2)*	*(31.8)*	*(22.8)*	*(178.5)*

1 +€0.8 million in 2025 and -€0.8 million in 2024, both with respect to the business serving the paper market (note 1).

The right-of-use and lease liability model is applied to all leases, except leases with a term of 12 months or less, leases of low-value assets and variable lease payments and services, which are recognized in expenses. At December 31, 2025, this amount totaled -€26.0 million (-€27.8 million at December 31, 2024, as detailed in note 10).

At December 31, 2025, lease liabilities recognized against right-of-use assets amounted to €151.4 million (€159.9 million at December 31, 2024, as detailed in note 27.2 – Reconciliation of net financial debt) and generated an interest expense of -€6.1 million (-€5.9 million at December 31, 2024), recognized in financial income (loss).

Cash payments for right-of-use contracts recognized in 2025 totaled -€52.9 million (-€54.7 million at December 31, 2024), broken down as -€46.8 million for the principal (-€48.8 million at December 31, 2024) and -€6.1 million in interest (-€5.9 million at December 31, 2024), in financing activities, respectively, in the Consolidated Statement of Cash Flows.

Cash payments made in 2025 for leases with a term of 12 months or less, leases of low-value assets and variable lease payments and services do not differ materially from the amounts recognized in expenses (note 10).

Note 27.5 – Borrower's liquidity risk presents the schedule of future cash payments for lease liabilities in that of financial liabilities.

The Group does not generate any material revenue from leasing the freehold assets it owns, nor from the sub-lease of assets leased.

Note 22. Impairment tests

Accounting policy

Impairment tests on goodwill are performed every 12 months at the end of the reporting period. An impairment test compares the carrying amount of assets to their recoverable amount. This recoverable amount is equal to its fair value minus costs to sell or its value in use, whichever is higher. Fair value corresponds to the selling price. Value in use is measured by discounting the future cash flows generated by the continuous use of assets and, eventually, disposal. Consequently, the recoverable amount of an asset may not be considered an indicator of the price at which that asset could be sold.

In addition to the annual impairment test on goodwill, impairment indicators may trigger immediate testing in the event of an unfavorable development. Furthermore, financial and operational managers of the businesses ensure that the individual assets do not present any impairment risk.

Impairment loss is recognized as soon as the recoverable amount of an asset falls below its carrying amount. Any increase in the recoverable amount of an asset results in the reversal of the previously recognized impairment loss, up to the carrying amount that would have been obtained in the absence of impairment. Impairment losses on goodwill cannot be reversed.

Executive Management makes judgments to define impairment indicators and the levels at which goodwill is tested. Executive Management estimates the timeframe and amount of cash flow forecasts as well as the discount rates used to calculate the value in use.

Judgments

Levels of tests on goodwill. Goodwill impairment tests are carried out at the level of each Cash Generating Unit (CGU). A CGU represents the smallest identifiable group of assets generating cash inflows independent of those from other assets or groups of assets.

These CGUs, which are subject to independent asset groupings within the Group, also correspond to the various operating segments monitored by Executive Management: Performance Minerals, Europe, Middle East, Africa and Asia-Pacific (PM EMEA & APAC) and Performance Minerals, Americas (PM Americas) for the entire Performance Minerals (PM) segment, Refractory, Abrasives & Construction (RAC) and Graphite & Carbon (IG&C).

Other than goodwill, all assets within the Group including right-of-use assets net of lease liabilities and mining assets are covered within the scope of these tests.

Impairment indicators. Executive Management makes judgments as to which events should trigger an impairment test. They mainly include significant changes in the business, interest rates, technology, obsolescence, return on assets and the value of market capitalization falling below consolidated equity. An adverse change to one of these factors will trigger an immediate impairment test.

With regard to the investment (accounted for using the equity method) in The Quartz Corporation joint venture, the Group's test revealed no impairment loss to be recognized.

Estimates

Recoverable amount. The recoverable amount of an asset is equal to its fair value minus costs to sell or its value in use, whichever is higher. In practice, fair value is able to be reliably measured for individual assets only, where it corresponds to the transaction price of recently disposed similar assets. Value in use is the most frequently used basis of assessment in impairment tests.

Cash flow forecasts. The cash flow forecasts used for impairment tests at December 31, 2025 are taken from the 2026 budget approved by the Board of Directors and the 2026-2030 plan approved by Executive Management. This mid case was developed using independent analysis of underlying markets. To calculate the perpetual growth rate, Imerys uses the Gordon-Shapiro perpetual growth model.

Discount rates. The discount rate used to calculate value in use is determined using the weighted average cost of capital in the industrial minerals sector, i.e. an estimate of the rate of return demanded by the community of industry lessors, on both equity and debt instruments, including those related to leases.

This rate, set at 8.40% for 2025 (8.30% for 2024) is adjusted for a country-market risk premium, which, depending on the assets tested, ranged from +90 to +124 basis points (+80 to +121 basis points in 2024). In 2025, the average discount rate after income taxes amounted to 9.46% (9.25% in 2024).

The calculations after income taxes are the same as those that would be performed with cash flows and rates before income taxes, as required by applicable regulations.

Lithium projects. With regard to the non-current assets related to the EMILI project in France, Imerys considers that their recoverable amount, updated on the basis of the business plan and lithium futures projections, is greater than their carrying amount. As such, no impairment has been recognized. The capitalised assets of the IBL project in UK were, on their part, fully impaired, following the placement of the project under "maintenance and care" (note 1).

In the following table, the discount and perpetual growth rates used to calculate the value in use are weighted by the cash flow forecasts of assets tested.

	2025		2024	
	Discount rate	Perpetual growth rate	Discount rate	Perpetual growth rate
Performance Minerals (PM)	**9.54%**	**2.12%**	**9.32%**	**2.37%**
Performance Minerals, America (PM Americas)	9.40%	2.44%	9.10%	2.76%
Performance Minerals Europe, Middle East and Africa and Asia Pacific (PM EMEA & APAC)	9.64%	1.89%	9.51%	2.01%
Refractory, Abrasives & Construction (RAC)	**9.37%**	**2.10%**	**9.18%**	**2.28%**
Graphite & Carbon (IG&C)	**9.30%**	**2.06%**	**9.16%**	**2.26%**
TOTAL	**9.46%**	**2.11%**	**9.25%**	**2.33%**

Changes in cash flow forecasts, discount rates and perpetual growth rates have the most significant impact on the Group's financial statements.

Imerys conducted simulations to measure the impairment that would be recognized as a result of adverse changes to the assumptions retained in the mid case at December 31, 2025.

Executive Management deems the various adverse changes used for the sensitivity tests to be reasonably possible in the context of the test. They are as follows:

- 5.00% decrease in cash flow forecasts;
- 1.00% increase in the discount rate; and
- 1.00% decrease in the perpetual growth rate.

Furthermore, Imerys carried out an exercise to calculate its sensitivity to risks arising from climate change. The Group has thus examined the risks envisaged with respect to the global warming scenario of +2°C by 2030, as projected by the Intergovernmental Panel on Climate Change (IPCC) published in the "Sixth Assessment Report of the Intergovernmental Panel on Climate Change" in 2021. Executive Management has estimated the frequency of planned closure for each site, as well as the corresponding cash flow losses. The sensitivity calculated in terms of risks and opportunities related to climate issues did not indicate any impairment, other than that of the RAC CGU.

As summarized in the table below, the sensitivity calculated in the mid case scenario indicates an impairment risk for the PM EMEA & APAC CGU. The business plan used for the test assumes a moderate recovery in the markets served by the CGU and includes the impacts of the Horizon project.

For the RAC CGU, the amounts presented below correspond to the expense that would be recognized in addition to the impairment loss already recorded.

	Mid case			
(€ million)	5% decrease in cash flows	1% increase in the discount rate	1% decrease in the perpetual growth rate	Risks arising from climate change
Performance Minerals (PM)				
Performance Minerals, America (PM Americas)	None	None	None	None
Performance Minerals Europe, Middle East and Africa and Asia Pacific (PM EMEA & APAC)	(31)	(138)	(81)	None
Refractory, Abrasives & Construction (RAC)	(58)	(142)	(89)	(21)
Graphite & Carbon (IG&C)	None	None	None	None

The table below shows the change in financial assumptions under which an impairment loss would be recognized.

	Assumptions break-even points		
(€ million)	Decrease in cash flows	Increase in the discount rate	Decrease in the perpetual growth rate
Performance Minerals (PM)			
Performance Minerals, America (PM Americas)	(18.20)%	+1.52%	(2.18)%
Performance Minerals Europe, Middle East and Africa and Asia Pacific (PM EMEA & APAC)	(3.14)%	+0.25%	(0.37)%
Refractory, Abrasives & Construction (RAC)	n/a	n/a	n/a
Graphite & Carbon (IG&C)	(54.30)%	+8.28%	n/a

Annual impairment test on goodwill

Following tests conducted in 2025, it was found that the recoverable amount of the RAC CGU's assets was €467.4 million less than their carrying amount. An impairment loss was therefore recognized on that basis and was fully allocated to the goodwill of this CGU (note 1).

The annual impairment test did not lead to the recognition of any impairment loss in 2024. The following table presents the carrying amount of goodwill at the closing date.

	2025	2024
(€ million)	Carrying amount	Carrying amount
Performance Minerals (PM)	**1,055.5**	**1,078.3**
Performance Minerals, America (PM Americas)	405.4	423.8
Performance Minerals Europe, Middle East and Africa and Asia Pacific (PM EMEA & APAC)	650.2	654.5
Refractory, Abrasives & Construction (RAC)	**264.1**	**751.5**
Graphite & Carbon (IG&C)	**26.8**	**27.2**
Other	**0.8**	**2.9**
TOTAL	**1,347.3**	**1,859.9**

Impairment tests on individual assets

An adverse change in impairment indicators may trigger an immediate impairment test on individual assets, in addition to the annual impairment test on goodwill. Financial and operational managers of the businesses pay particular attention to identifying impairment indicators for individual assets.

In 2025, as in 2024, Imerys recognized impairment in respect of the industrial production facilities in "Other operating income and expenses" for a total amount of €67.1 million (€23.4 million in 2024), of which €38.2 million relates to assets impacted by the Horizon project and €28.5 million to the assets of the IBL project (€11.3 million for the business serving the paper market in 2024) (note 14 and note 1).

Note 23. Inventories

Accounting policy

Inventories are recognized as assets at the date at which the risks, rewards and control are transferred to Imerys. When sold, inventories are recognized as an expense in current operating income at the same date as the corresponding revenue.

Inventories are measured at cost of production or net realizable value, whichever is lower. When production is below normal capacity, fixed production overheads specifically exclude any idle capacity costs.

Inventories with similar characteristics are measured using the same method. The Group uses "First-In, First-Out" (FIFO) accounting and the weighted average cost method to measure raw materials.

If the cost of production is not recoverable, it is written down to its net realizable value in accordance with the physical condition of the stock or the forecast movement of existing stock at the end of the reporting period for the type of inventory considered. Due to the vast range of minerals extracted and beneficiated by the Group, it is not possible to systematically estimate inventory write-downs simply based on turnover rate.

Gross amount and write-down of inventories

	2025			2024		
(€ million)	Gross amount	Write-down	Carrying amount	Gross amount	Write-down	Carrying amount
Raw materials	319.2	(14.3)	305.0	331.8	(17.1)	314.7
Work in progress	146.4	(2.7)	143.7	141.0	(4.0)	136.9
Finished goods	178.4	(11.5)	166.9	208.3	(10.9)	197.4
Merchandise	85.0	(2.4)	82.6	78.4	(2.6)	75.7
TOTAL	**729.0**	**(30.9)**	**698.1**	**759.5**	**(34.7)**	**724.7**

Note 24. Financial assets

24.1. Categories of financial assets

The following tables present the value of financial instruments with respect to consolidated assets. The categories used to present the carrying amounts of financial instruments are explained in note 15. The totals distinguish between operational hedge derivatives (hedge of operational currency risk and energy price risk) and financial hedge derivatives (hedge of financing currency risk, interest rate risk and conversion of financial statements risk). Financial hedge derivatives are used to calculate net financial debt (note 27.2 – Reconciliation of net financial debt). The carrying amounts represent fair value, insofar as they correspond to the amount of cash to be received.

AT DECEMBER 31, 2025

24.2. Trade receivables, other receivables and other financial assets

Accounting policy

After their initial recognition, receivables are measured at their amortized cost. A write-down is recognized for the value of expected credit losses. Such losses correspond to the estimated weighted probability of credit losses, i.e. the expected loss of cash over the life of the trade receivable, minus cash to be received from credit insurance where applicable (note 24.3).

A receivable sold to a banking institution for financing purposes is only derecognized if the factoring agreement also transfers to the factor all the risks and rewards incidental to the receivable. The cash flow received from the factor is included in operating cash flows (Consolidated Statement of Cash Flows).

Table of changes

At December 31, 2025, other non-current financial assets corresponded to €27.2 million in surplus and reimbursement rights of employee benefit plans (€20.7 million at December 31, 2024) (note 23.1) and €14.9 million in loans and deposits (€12.0 million at December 31, 2024). Related changes, recognized as other comprehensive income, stood at €0.1 million in 2025 (-€0.2 million at December 31, 2024) (Consolidated Statement of Comprehensive Income). A significant proportion of other non-current receivables and related write-downs is made up of tax receivables excluding income taxes in Brazil, and the sale price of the businesses serving the paper market not yet received and discounted (note 1). Other current receivables are also mainly made up of tax receivables excluding income taxes.

(€ million)	Other non-current financial assets	Other non-current receivables	Trade receivables	Other current receivables	Other current financial assets	**Total**

1 Of which €370.0 million in acquisitions of investment securities in 2025 and -€670.0 million in disposals of investment securities in 2024.

2 +€3.6 million in 2025 and -€3.6 million in 2024, both with respect to the business serving the paper market (note 1).

Factoring

Under this ad hoc factoring program, Imerys retains an ongoing involvement with the assigned receivables through the dilution risk, as well as through the obligation to pass over to the factor the cash flows received from customers. Most of the risks and benefits in respect of the assigned receivables have been transferred to the factor and these receivables have been derecognized. The carrying amount of these derecognized receivables at December 31, 2025 was €122.1 million (€95.0 million at December 31, 2024). The maximum outstanding amount was approximately €175.0 million (€175.0 million at December 31, 2024).

24.3. Managing risk in respect of financial assets

Credit risk

Description of the risk. Credit risk is the risk that a debtor of Imerys will not repay their debt at the agreed due date. It mainly affects the trade receivables category.

Risk management. Credit risk is monitored at entity level by analyzing the breakdown of receivables by maturity. Generally due between 30 and 90 days, the Group's receivables are not covered by any material financing component. The following table presents a breakdown by maturity at the end of the reporting period:

(€ million)	2025	2024
Receivables not yet due	**288.3**	**320.1**
Receivables due	**99.9**	**75.1**
1 to 30 days	69.9	42.4
31 to 60 days	9.7	8.6
61 to 90 days	4.9	10.0
More than 90 days	15.4	14.1
TOTAL	**388.2**	**395.2**

At the end of the reporting period, receivables and other financial assets are written down to their recoverable amount (note 24.2). Group entities may hedge credit risk through credit insurance contracts or warranties (note 32 – Commitments received).

At December 31, 2025, the Group's maximum exposure to credit risk before credit insurance and warranties, i.e. gross receivables net of write-downs, amounted to €1,004.4 million (€654.5 million at December 31, 2024). The following table presents the change in write-downs of receivables and other financial assets:

(€ million)	Other non-current financial assets	Other non-current receivables	Trade receivables	Other current receivables	Other current financial assets	Total
Balance at January 1, 2024	**(8.1)**	**(28.6)**	**(13.2)**	**(3.9)**	**(2.0)**	**(55.8)**
Change in the scope of consolidation	-	25.1	0.3	0.2	-	25.6
Increase	(0.9)	(0.4)	(4.3)	(0.1)	-	(5.7)
Utilizations	4.9	-	5.4	1.0	1.4	12.7
Other	-	0.2	-	(0.2)	-	0.0
Exchange rate differences	-	2.9	-	0.1	-	3.0
Balance at December 31, 2024	**(4.1)**	**(0.9)**	**(11.8)**	**(2.9)**	**(0.6)**	**(20.3)**
Increase	(0.3)	(14.9)	(6.2)	(0.4)	-	(21.8)
Utilizations	0.3	-	4.8	0.4	-	5.6
Exchange rate differences	0.1	-	0.3	0.2	0.1	0.7
Balance at December 31, 2025	**(4.0)**	**(15.7)**	**(12.9)**	**(2.7)**	**(0.6)**	**(35.9)**

Transactional currency risk

Description of the risk. Transactional currency risk is the risk whereby a cash flow denominated in foreign currency may deteriorate due to unfavorable fluctuations in its cross-entry in functional currency. In assets, transactional currency risk mainly affects trade receivables.

Risk management. In assets, transactional currency risk is managed in accordance with the same principles as the transactional currency risk related to financial liabilities (note 27.5 – Transactional currency risk).

Note 25. Equity

Capital management principles

The management of capital covers three main fields: consolidated equity, share-based payments and share buybacks.

Consolidated equity is managed to maintain a stable financial structure that generates dividends for shareholders by increasing earnings at a sustained, regular pace.

Free shares granted to certain key employees help Imerys in retaining them to reach this objective (note 11).

Share buyback programs are intended to improve the transaction liquidity and price stability of the Imerys share as well as make certain share-based payments and cancellations necessary to offset the dilutive impact of vested free share grants.

Consolidated equity is composed of the share capital and premiums of Imerys S.A. as well as its consolidated income and reserves. There are no hybrid instruments that combine the characteristics of debt and equity instruments. At December 31, 2025:

- consolidated equity amounted to €2,614.9 million (€3,300.7 million at December 31, 2024), on the basis of which the Board of Directors has proposed a dividend of €0.75 per share, giving a total dividend of €63.7 million;
- 1,293,750 free shares were granted to certain employees and executive corporate officers that have not yet been exercised or have not yet vested, which represent 1.50% of the share capital of Imerys after dilution (1.43% of the share capital after dilution at December 31, 2024);
- after transactions made throughout the year to purchase, sell, cancel or transfer shares, Imerys held 548,663 Imerys shares (527,416 shares at December 31, 2024).

The Imerys S.A. share capital is subject to a number of mandatory requirements under the French Code of Commerce *(Code de commerce)*. These requirements do not have any material impact on the financial statements. Furthermore, part of the Group's financing is secured through debt instruments, issued on the condition of compliance with a covenant related to the amount of consolidated equity. The covenant and the corresponding value recorded at the end of the reporting period are presented in note 27.5 – Borrower's liquidity risk.

Accounting policy

Treasury share buybacks by Imerys S.A. are recognized at acquisition cost against equity reduction. The price of any subsequent disposal is directly recognized in equity.

Activity for the period

	2025			2024		
(number of shares)	Shares issued	Treasury shares	Outstanding shares	Shares issued	Treasury shares	Outstanding shares
Number of shares at the beginning of the period	84,940,955	(527,416)	84,413,539	84,940,955	(507,121)	84,433,834

Treasury share transactions	-	(21,247)	(21,247)	-	(20,295)	(20,295)
Number of shares at the end of the period	**84,940,955**	**(548,663)**	**84,392,292**	**84,940,955**	**(527,416)**	**84,413,539**

At December 31, 2025, Imerys' fully paid-up share capital totaled €169,881,910, divided into 84,940,955 shares, each with a par value of €2 (€169,881,910 divided into 84,940,955 shares, each with a par value of €2 at December 31, 2024).

The share capital did not change and the number of voting rights did not undergo any significant change between December 31, 2025 and February 19, 2026, i.e. the date on which the annual financial statements at December 31, 2025 were approved by the Board of Directors.

Note 26. Provisions, contingent liabilities and disputes

26.1. Provisions for employee benefits

In accordance with the regulatory framework and business practices in each country, Imerys makes contributions to pension plans for its employees. Benefits are granted either through defined contributions plans, the future value of which is not guaranteed by Imerys (note 11), or defined benefits plans, the future value of which is guaranteed by Imerys by the provisions analyzed in this note.

(€ million)	2025	2024
Pension plans	70.2	70.6
Health insurance	10.4	11.8
Other long-term employee benefits	14.2	15.0
TOTAL	**94.8**	**97.4**

Accounting policy

Defined contributions plans. In accordance with the regulatory framework and business practices in each country, Imerys makes contributions to pension plans for its employees by making, either on a mandatory or voluntary basis, contributions to third-party institutions such as pension funds, insurance companies or financial institutions.

These plans, called defined contributions plans, do not provide beneficiaries with a guarantee of the total benefit that will be paid in the future.

Contributions to these plans are recognized as staff expenses (note 11).

Defined benefits plans. In contrast, Imerys provides beneficiaries of defined benefits plans with a guaranteed future benefit.

The corresponding obligations are measured using the Projected Unit Credit Method by means of economic and demographic actuarial assumptions. These assumptions are used to measure the value of the rights acquired by beneficiaries on the basis of an estimated salary at retirement date.

Provisions and assets are recognized for the discounted value of the obligation, minus the fair value of plan assets, and capped where necessary.

The rates used to discount obligations and calculate the normative return on assets in profit or loss are fixed by reference to the rates of bonds issued by AA-rated companies (high quality) within the main iBoxx GBP and USD Corporate AA indices. Where negative interest rates arise, they are applied as published, without a lower limit of zero.

Executive Management makes estimates concerning actuarial assumptions.

Contributions to the funds and direct payments to beneficiaries are recognized in current operating income (note 11) except for contributions and payments related to restructuring operations, which are recognized in other operating income and expenses (note 14) and contributions to under-funded closed plans with mandatory funding requirements, which are recognized in financial income (loss) (note 16). Contributions recognized in financial income (loss) are intended to recover the deficit of closed plans (absence of current service) with mandatory funding requirements. In this respect, each euro of service rendered before the plan was closed has been funded by a contribution of the same amount in current operating income. However, a drop in discount rates, increase in inflation rates and reduction in the fair value of investments has broken this initial balance and additional contributions are now required to restore it. The impact of these contributions is neutralized by decreases in provisions recognized in each of these three levels of profit or loss.

Other items of change in post-employment plans are recognized in current operating income (note 11), except for amendments, curtailments and settlements related to restructuring operations, which are recognized in other operating income and expenses (note 14) and unwinding of obligations and normative return on assets, which are recognized in financial income (loss) (note 16).

Administrative fees are recognized in current operating income (note 11) except for administrative fees for under-funded closed plans with mandatory funding requirements, which are recognized in financial income (loss) (note 16).

Plan amendments, curtailments and settlements are immediately recognized in profit or loss.

Actuarial differences and caps on post-employment plan assets are fully recognized in other comprehensive income, net of asset management fees, with no subsequent reclassification to profit or loss.

Characteristics of defined benefits plans

At December 31, 2025, the Group's defined benefits obligations totaled €843.9 million (€910.5 million at December 31, 2024). made up of retirement benefits, post-employment health insurance and other pre-retirement benefits such as long-service awards. The obligations, presented as negative values in the following table, are mainly incurred in the UK and the US:

	2025				2024			
(€ million)	UK	US	Other countries	**Total**	UK	US	Other countries	**Total**
Pension plans	(512.2)	(156.8)	(150.3)	(819.3)	(554.7)	(179.9)	(149.1)	(883.7)
Post-retirement health insurance	-	(6.6)	(3.8)	(10.4)	-	(8.0)	(3.8)	(11.8)
Other pre-retirement benefits	-	-	(14.2)	(14.2)	-	-	(15.0)	(15.0)
TOTAL	**(512.2)**	**(163.4)**	**(168.3)**	**(843.9)**	**(554.7)**	**(187.9)**	**(167.8)**	**(910.5)**

At December 31, 2025, 14,878 beneficiaries were covered by these obligations (15,060 beneficiaries at December 31, 2024), including employees who have been granted rights in return for current service within the Group (active beneficiaries), employees who will no longer acquire rights in return for current service within the Group as well as former employees still in employment outside the Group (deferred beneficiaries) and former employees now in retirement (retired beneficiaries). The following table breaks down the main characteristics of these beneficiaries:

	2025				2024			
	UK	US	Other countries	**Total**	UK	US	Other countries	**Total**
Headcount								
Active beneficiaries	207	497	6,203	6,907	235	562	6,116	6,913
Deferred beneficiaries	1,102	899	445	2,446	1,191	974	463	2,628
Retired beneficiaries	3,788	1,351	386	5,525	3,810	1,340	369	5,519
Total	**5,097**	**2,747**	**7,034**	**14,878**	**5,236**	**2,876**	**6,948**	**15,060**

Years of service								
Number of years of past service of active beneficiaries	33	18	12	13	32	18	12	14

At December 31, 2025, 77.9% of the Group's total obligation was accounted for by just two plans (78.6% at December 31, 2024) – the Imerys UK Pension Scheme (Imerys UK) and the Imerys USA Retirement Growth Account Plan (Imerys USA). The following table breaks down the main characteristics of these two plans:

	2025		2024	
	Imerys UK	Imerys USA	Imerys UK	Imerys USA

1 The annuity is calculated according to the number of years of service accumulated, annual salary at retirement and an average of the three last annual salaries.

2 Capital with guaranteed interest rate (Cash Balance Plan).

3 The employer is required to fund each unit of service accumulated at 100.0% on the basis of a funding valuation.

Managing employee benefits risk

Risk description. Through the financial management of employee benefits, Imerys seeks to control the funding ratio of obligations, i.e. the ratio between the value of plan assets and the value of obligations.

The funding ratio of obligations may deteriorate due to a decorrelation between a change in value (in particular negative) of plan assets and a change in value (in particular positive) of obligations. The value of plan assets may be reduced by a deterioration in the fair value of investments.

The value of obligations may rise for (i) all plans after a drop in discount rates or (ii) benefits paid as life annuities, either due to an increase in the inflation rates used to remeasure the obligations of certain plans, or due to an increase in the life expectancy of beneficiaries.

Risk management. In order to control the funding ratio of obligations, Imerys aims first and foremost to optimize the value of plan assets. Investment strategies are therefore devised to deliver a steady return while also taking advantage of opportunities with limited or moderate risk levels. The choice of investments is specific to each plan and factors in the duration of the plan as well as minimum funding regulatory constraints.

Since 2011, Imerys has pursued a specific strategy to control the funding ratio of obligations in the UK in particular, which defines plan asset investments to match the obligation. The strategy, known as Liability Driven Investment (LDI), controls the funding ratio of the obligation by pegging cash inflows to cash outflows over the duration of the obligation. In practice, it involves structuring the portfolio of plan assets so that the cash inflows generated by the return on investments match the cash outflows generated by the payment of benefits. It hedges the risk of an increase in the obligation due to a drop in discount rates (or an increase in inflation rates) by covering a portion of the value of the regularly revised obligation.

Financing employee benefits

Imerys finances the majority of employee benefits with investments unavailable to third parties in trusts or insurance contracts legally separate from the Group.

At December 31, 2025, the value of these investments designated as plan assets amounted to €776.3 million (€833.7 million at December 31, 2024).

Imerys also holds reimbursement rights, i.e. investments held directly by the Group, which amounted to €0.2 million at December 31, 2025 (€0.2 million at December 31, 2024).

Therefore, the funding ratio of obligations equaled 92.0% at December 31, 2025 (91.6% at December 31, 2024). The total deficit of funded plans and unfunded plans amounted to €67.6 million at December 31, 2025 (€76.6 million at December 31, 2024), as disclosed in the following table:

	2025				2024			
(€ million)	UK	US	Other countries	**Total**	UK	US	Other countries	**Total**
Obligations funded by plan assets	(512.2)	(155.9)	(97.4)	(765.4)	(554.7)	(178.6)	(98.8)	(832.1)
Obligations funded by reimbursement rights	-	-	(0.3)	(0.3)	-	-	(0.3)	(0.3)
Plan assets	533.8	160.5	82.0	776.3	567.4	186.2	80.2	833.7

In 2025, the assets held by Imerys to finance employee benefits generated €39.9 million in actual interest earnings (-€16.6 million in 2024), i.e. an actual rate of return, including currency effects, of 5.0% in 2025 (-2.0% in 2024), as presented in the following table.

In accordance with applicable legal and regulatory standards, this return was only credited to financial income (loss) to the extent of a normative share of €39.2 million in 2025 (€35.2 million in 2024), calculated on the basis of the risk-free rate used to discount the obligations. The surplus of the actual return above the normative return was credited to other comprehensive income for €0.7 million in 2025 (-€51.8 million in 2024).

	2025				**2024**

Estimates

Executive Management makes estimates regarding the actuarial assumptions used to measure defined benefits plans. The following assumptions are weighted by the amount of obligations or assets, depending upon the item to which they apply.

	2025				2024			
	UK	US	Other countries	**Total**	UK	US	Other countries	**Total**
Discount rate	5.40%	4.91%	3.31%	4.89%	5.40%	5.28%	3.00%	4.93%
Retail price index	2.90%	-	1.54%	2.73%	3.00%	-	1.50%	2.80%
Salary increase rate	2.75%	-	2.79%	2.76%	2.90%	-	2.97%	2.91%
Changes in medical expense rates	-	-	5.53%	5.53%	-	-	7.48%	7.48%
Duration *(years)*	10	9	10	10	10	9	11	10

Among these estimates, it is the discount rate that has the most significant impact on the Group's financial statements.

The following table presents the impact of a reasonably estimated change in discount rates following a possible decrease (lower case) or increase (higher case) in the assumption applied to the financial statements at December 31, 2025 (actual 2025).

The impact of these changes is measured on three aggregates (obligation, net interest and current service cost) in the two monetary zones in which the most significant obligations have been undertaken (UK and US).

The reasonably estimated change in discount rates has been set at 50 basis points, based on the weighted average change in discount rates in the UK and the US over the last five years.

(€ million)	Lower case	**Actual 2025**	Higher case
UK			
Discount rate	4.90%	5.40%	5.90%
Obligation at the closing date	(538.1)	(512.2)	(488.5)
Net interest in 2026 profit or loss[1]	0.0	1.4	3.0
Current service cost in 2026 profit or loss[2]	-	-	-
US			
Discount rate	4.41%	4.91%	5.41%
Obligation at the closing date	(171.1)	(163.4)	(156.2)
Net interest in 2026 profit or loss[1]	(0.5)	(0.2)	0.2
Current service cost in 2026 profit or loss[2]	(0.1)	(0.1)	(0.1)

1 Unwinding of the obligation, net of normative return on assets.

2 Plan closed and frozen since April 1, 2015.

Other current provisions	*29.5*	*33.8*

Accounting policy

A provision is recognized as soon as it becomes likely that a present obligation will require settlement and a reliable estimate can be made of the amount of that obligation. Provisions are recognized against profit or loss, except provisions for dismantling and certain provisions for restoration, which are included in the cost of the assets of which the construction created the obligation. This treatment mainly applies to certain industrial facilities and mining overburden assets. Provisions are measured using the best estimate of the amount required to settle the obligation.

Discounts are not applied to provisions that are expected to be settled within 12 months after the end of the reporting period and those that may be settled at any time. Discounts are applied to provisions that are not expected to be settled within 12 months after the end of the reporting period. This treatment applies in particular to provisions accrued with respect to environmental obligations for pollution remediation (€12.1 million at December 31, 2025 and €11.2 million at December 31, 2024), obligations to dismantle plants (€92.1 million at December 31, 2025 and €104.2 million at December 31, 2024) and obligations to restore mining sites that are no longer operational (€127.7 million at December 31, 2025 and €136.7 million at December 31, 2024).

The discount rates used are determined using the gross discount rates and projected inflation rates for the countries where the entities bearing the relevant obligations are located, and take into account the duration of these obligations.

Changes in discounted provisions after revisions to the amount of the obligation, the timing of settlement or the discount rate are recognized in profit or loss or as an adjustment to the cost of assets for provisions recognized against assets. Unwinding is recognized as a debit in other financial income (expenses) (note 16). Executive Management makes estimates to assess the probability of settlement, the amount of the obligation, the expected timing of future payments and the discount rates.

Estimates

Probability of settlement and amount of the obligation. The probability of settlement and the amount of the obligations are estimated by Executive Management, which generally calls upon in-house experts to approve the key assumptions, taking into account the anticipated effects, regulatory changes where applicable, and independent counsels regarding material disputes and claims. The resulting estimates are liable to change depending on the unknowns involved in each dispute. They relate to allegations of personal injury or financial losses regarding the potential civil liability of the Group and breaches of contractual obligations or regulations covering social, real estate and environmental issues. The provisions for these risks are included in the €153.3 million set aside for legal, social and regulatory risks in the table of changes published at the end of this note.This amount includes in particular the balance of the provision set aside to resolve the litigation involving the Group's former talc operations in the US, the materiality of which requires specific explanation.

Litigation involving the Group's talc operations

On February 13, 2019, the Group's three North American talc subsidiaries (the "North American Talc Subsidiaries") decided to file for the protection, with immediate effect, of the special legal process of Chapter 11 under US bankruptcy law in order to permanently resolve the potential liabilities related to their historic commercial talc operations in the United States. Under Chapter 11, the Group remains the legal owner of the share capital of the North American Talc Subsidiaries, but their businesses are under the judicial control of the relevant Federal Court for the District of Delaware (the "Bankruptcy Court"). This Court oversees the continuing operations of the entities concerned as well as the conclusion and execution of a business reorganization plan that the North American Talc Subsidiaries have sought to negotiate with representatives of existing and future potential talc claimants (the "Representatives of Claimants") in lawsuits initiated against them. The Chapter 11 process suspended all ongoing litigation proceedings and enjoined any further claims being brought against these entities relating to their talc operations.

Given effective control of the North American Talc Subsidiaries was transferred on February 13, 2019 to the court to repay creditors, the assets and liabilities held by the North American Talc Subsidiaries were removed from the scope of consolidation of the Group's financial statements from this date forward, which led to an additional expense of €5.6 million being recognized in other operating income and expenses. Negotiations between the North American Talc Subsidiaries, the Group and the Representatives of Claimants led to the agreement on May 15, 2020 of a joint reorganization plan (the "Plan"), which was filed on the same day with the Bankruptcy Court. The Plan provides that once the necessary approvals have been obtained, the North American Talc Subsidiaries will come out of the Chapter 11 process and the Group will be released from all existing and future talc related liabilities arising out of past operations of the North American Talc Subsidiaries, as such liabilities will be channeled into a dedicated trust to be established (the "Trust").

Following the approval in January 2021 by the Bankruptcy Court of the disclosure statement filed in conjunction with the Plan and in accordance with its terms, the North American Talc Subsidiaries sold their assets to Magris Resources, a Canadian investment fund, for USD223.0 million on February 17, 2021.

In April 2021, the Plan was approved at a qualified majority exceeding the 75% voting threshold of the creditors and claimants against the North American Talc Subsidiaries which is required under the applicable laws. However, in October 2021, the Bankruptcy Court issued a ruling that certain ballots cast in favor of the Plan will not be counted and, as a consequence, the approval of the Plan fell just short of the required 75% majority vote.

As a result, the North American Talc Subsidiaries, the Representatives of Claimants, and other stakeholders in the Chapter 11 process engaged in mediation and negotiations, with a successively extended timeline approved by the Bankruptcy Court, to reach a revised Plan (the "Revised Plan") that will achieve the required 75% majority approval vote.

The progress in the mediation and negotiation process to agree on a Revised Plan was delayed by the distraction of certain parties caused by three successive Chapter 11 petitions commenced by newly formed subsidiaries of the Johnson & Johnson group ("J&J") specifically created for this purpose. These separate and specific Chapter 11 cases have been highly contested judicially and have led the different relevant Courts to dismiss the successive petitions in January and August 2023 and then in March 2025.

The mediation and negotiations between the relevant parties finally succeeded in an agreement on a Revised Plan which was first filed in January 2024 before the Bankruptcy Court and thereafter supplemented by several successive amendments.

In October 2024, the Bankruptcy Court approved a settlement agreement between J&J and all relevant parties involved in the Chapter 11 cases of the North American Talc Subsidiaries and Cyprus Mines, one of the previous owners of certain talc assets of North American Talc Subsidiaries which had initiated in April 2021 a concurring Chapter 11 process before the same Bankruptcy Court. This agreement provides for the settlement of all claims between the relevant signing parties, including those relating to indemnity claims of the North American Talc Subsidiaries and Cyprus Mines against J&J, in consideration of the payment by J&J of at least USD505 million to the North American Talc Subsidiaries and Cyprus Mines, or the Trust (the "J&J Settlement"). In accordance with its obligations, J&J started in February 2025 and completed in January 2026 its payment of the full settlement amount due to the North American Talc Subsidiaries to an escrow account opened in their name.

Following the filing of the last amended version of the Revised Plan and associated documents, incorporating in particular the J&J Settlement terms and the alignment of joint and concurring approval processes of the respective Chapter 11 cases of Cyprus Mines and the North American Talc Subsidiaries, the Bankruptcy Court entered in November 2024 an order approving, among other things, the new disclosure statement of the Revised Plan and the solicitation of votes on this Plan from the creditors of the North American Talc Subsidiaries and claimants against them.

In January 2025, the Revised Plan was approved by more than 90% of these voting creditors and claimants and therefore exceeded the 75% legally required approval threshold. Following the approval of the Revised Plan and as provided under its terms since May 2020, Imerys Talc Italy decided to file for Chapter 11 protection and join the Revised Plan in March 2025.

The confirmation hearing of the Revised Plan commenced in the Bankruptcy Court at the end of April 2025. The confirmation hearing was then adjourned by the Bankruptcy Court to allow the relevant parties to address and resolve certain specific legal issues raised during the hearings. Amendments to the Revised Plan were filed in June 2025, September 2025 and January 2026 (the "New Revised Plan") to address the resolution of these specific legal issues. The New Revised Plan reflects in particular, among other changes, (i) the voluntary dismissal by Imerys Talc Italy of its Chapter 11 case which was approved by the Bankruptcy Court in July 2025, (ii) the clarification of the terms applicable for the treatment of certain future "Foreign Claims" (if any), as that term is defined in the New Revised Plan (the "Potential Foreign Claims"), and (iii) an agreement to fund the defense of Potential Foreign Claims against the North American Talc Subsidiaries following the emergence from the Chapter 11 cases up to an additional amount of USD4.0 million.

In accordance with the new schedule of the proceedings in the Chapter 11 cases, the confirmation hearings of the New Revised Plan took place at the beginning of February 2026 before the Bankruptcy Court and its final decision is now expected in the following weeks. Subject to the confirmation of the New Revised Plan by the Bankruptcy Court, this ruling must then be reviewed and affirmed by another relevant U.S. Federal District Court of Delaware. These judicial decisions may also be subject to potential appeals from third parties.

Under the terms and conditions of the settlement with the Group as embedded in the Plan and restated in the New Revised Plan, the Group's contribution consists of (i) a minimum cash payment of USD75.0 million, (ii) the proceeds from the sale of the assets of the North American Talc Subsidiaries at a price of USD223.0 million, and (iii) certain other components further outlined in the New Revised Plan. These commitments primarily include certain insurance assets, financing of minor unsecured trade claims (USD5.0 million), and certain excess administrative costs of the Chapter 11 process incurred by the North American Talc Subsidiaries up to a maximum of USD15.0 million. In addition to this Group's contribution, the New Revised Plan provides for a complementary funding by Imerys USA for the defense of Potential Foreign Claims (up to USD4.0 million) and under a related separate agreement, for the reimbursement of certain specific outside legal fees (USD1.4 million) of a single law firm representing plaintiffs against the North American Talc Subsidiaries.

On the basis of the New Revised Plan and the current state of the Chapter 11 process, at the date the Group's 2025 financial results were approved, Executive Management reviewed with the help of independent third-party experts and reiterated its prior estimate of the risk related to the resolution of the Chapter 11 procedure and the forecast financial impact for the Group. A provision of €250.0 million was initially accrued in Imerys' 2018 consolidated financial accounts, bearing in mind that the North American Talc Subsidiaries have been deconsolidated since February 13, 2019.

On December 31, 2025, the provision recognized in the Imerys financial statements, which amounted to USD117.1 million (i.e. €99.7 million at 2025 closing rate), was considered appropriate to cover the expected financial impact of the New Revised Plan for the Group.

Expected timing of future payments. The following table presents the discounted value of future cash outflows required to settle the obligations included in other provisions:

(€ million)	2026-2030	2031-2040	2041 and beyond	**Total**
Product warranties	0.8	-	-	0.8
Environmental and dismantling obligations	29.0	48.6	26.5	104.2
Mining sites restoration	42.1	48.5	37.1	127.7
Legal, social and regulatory risks	153.3	-	-	153.3
Other provisions	**225.3**	**97.1**	**63.6**	**386.0**

Discount rates. Discount rates integrate the time value of money (iBoxx AA Corporate Bonds) and monetary inflation at the date of future payments. The following assumptions are applied to the major monetary zones:

	2025			2024		
	EUR	GBP	USD	EUR	GBP	USD
Time value of money – environment and dismantling	4.0%	4.9%	5.3%	3.2%	5.1%	5.5%
Time value of money – mining sites restoration	3.9%	5.0%	5.3%	3.2%	5.2%	5.4%
Inflation	2.0%	3.0%	2.4%	2.1%	3.5%	2.4%

1 Of which, in 2024, -€58.0 million with respect to the business serving the paper market (note 1).

2 +€0.1 million in 2025 and -€0.1 million in 2024, both with respect to the business serving the paper market (note 1).

26.3. Contingent liabilities and disputes

Following Imerys' sale of a group of assets serving the paper market in Europe, America and Asia to the investment fund Flacks Group finalized on July 5, 2024 (note 1), two proceedings were initiated.

One was brought by Imerys in December 2024 in the US with a view to obtaining the settlement of a portion of the sale price that remained unpaid. Imerys was successful at trial. Flacks has appealed the decision and the appeal process is ongoing.

The other was brought in February 2025 by Artemyn Minerals France (acquisition vehicle for Flacks Group) against Imerys before the Paris court of economic affairs (Tribunal des activités économiques de Paris), seeking compensation for various damages allegedly suffered following the sale. Imerys intends to reject all of the claims brought by Artemyn, which face a number of obstacles both in fact and in law.

Note 27. Financial liabilities

27.1. Categories of financial liabilities

The following tables analyze the value of financial instruments with respect to consolidated liabilities. The categories used to present the carrying amounts of financial instruments are explained in note 15.

The totals distinguish between operational hedge derivatives (hedge of operational currency risk and energy price risk) and financial hedge derivatives (hedge of financing currency risk, interest rate risk and conversion of financial statements risk).

Financial hedge derivatives are used to calculate net financial debt (note 27.2 – Reconciliation of net financial debt).

Since they correspond to the amount of cash to be paid, carrying amounts represent fair value for all instruments except bonds.

The tables are followed by an analysis of the difference between carrying amounts and fair value. The fair value of listed bonds is directly observable as it corresponds to the market value at the end of the reporting period (level 1 fair value). The fair value of unlisted bonds including accrued interest is calculated by a model using observable data, i.e. a revised valuation of discounted future contractual flows (level 2 fair value).

Reverse factoring

A reverse factoring program was introduced for the first time in 2025, for a limited number of Group entities, allowing suppliers who wish to receive an advance payment to do so by assigning their receivables before the due date. After an analysis of the main characteristics of this program, these debts were maintained as trade payables. The Group has thus verified that their characteristics have not been substantially altered and, in particular:

- the Group's payment terms are in accordance with local market and industry practices;
- the terms of the contract with the supplier are not linked to the existence of the reverse factoring program;
- the supplier retains full discretion in its choice of whether or not to assign its receivable.

The amount of trade payables included under the reverse factoring program and presented within trade payables amounted to €3.9 million at December 31, 2025 (i.e. 1.1% of trade payables).

Virtual Power Purchase Agreements (vPPAs)

As part of its decarbonization commitments, Imerys signed two renewable power purchase agreements (vPPAs) in April and August 2025 in the United States and Spain with French developers.

The following table summarizes their main characteristics:

Location	Partner power producer	Energy	Annual volume	Target coverage of operational electricity consumption needs	Expected start date	Agreement term
US	Akuo	Solar	153 GWh	30% in the United States	2026	15 years
Spain	ENGIE	Solar	198 GWh	24% in continental Europe	2026	10 years

These agreements, which are without physical delivery and provide for cash settlement based on the difference between the agreement price and the market price, have two components: the purchase of green certificates and an embedded derivative within the meaning of IFRS 9. These derivatives are recognized on the balance sheet at fair value (level 3, as the model used is based in part on non-observable data); changes in these instruments are recognized in financial income (loss).

At December 31, 2025, the impacts of the change in fair value of the vPPAs for the year amounted to income of €2.5 million (note 15).

27.2. Cash flows related to financial liabilities

Change in instruments related to financing activities

The Consolidated Statement of Cash Flows analyzes the change in "Cash and cash equivalents" broken down across three categories: operating activities, investing activities and financing activities. In the following tables, "Cash flow from financing activities" is presented in the "Cash changes" column, in accordance with their source positions in the Consolidated Statement of Financial Position.

In 2025, "Cash flow from financing activities" represented a net cash outflow of €90.9 million, including €288.7 million broken down in the following table arising from changes in liabilities from financing activities. The main components driving this change are a bond issue (€600.0 million), reimbursement of a bond issue (-€253.5 million) and the reimbursement of lease liabilities (-€52.9 million).

			Non-cash changes

1 Including reclassification to/from assets held for sale.

2 Since 2025, presentation of financial derivatives only.

In 2024, "Cash flow from financing activities" represented a net cash outflow of -€748.8 million, including -€551.3 million broken down in the following table arising from changes in liabilities from financing activities. The main components driving this change include the reimbursement of a bond issue (€500.0 million) and the reimbursement of lease liabilities (€54.7 million).

As a reminder, in 2024, the Group opted to present interest paid in net cash flows related to financing activities (previously in net cash flows related to operating activities), see note 5.2.

Reconciliation of net financial debt

Gross financial debt includes the non-current and current portion of "Borrowings and financial debt" and "Lease liabilities" as well as derivative financial assets and liabilities hedging debt risks.

Net financial debt reflects Imerys' net position on the market and with financial institutions. It is used to manage the Group's financial resources, in particular to calculate covenants with which Imerys has to comply as part of the financing agreements entered into with financial markets (note 27.5 – Borrower's liquidity risk).

Net financial debt corresponds to the total financing liabilities subscribed on the market and with financial institutions in the form of bonds, bank credits and bank overdrafts, minus cash, cash equivalents and other current financial assets.

Although offset in the calculation of net financial debt, overdrafts and surplus cash are presented separately on the Statement of Financial Position, either in the form of bank overdrafts or cash, in accordance with the agreements signed between Imerys and its bank counterparties. In general, these agreements stipulate that the various accounts opened at the bank counterparties remain as debit or credit balances, without any offset. However, some netting agreements exist within the Group in order to achieve a single position with certain bank counterparties across a given scope. A single position is organized by the entity heading the netting scope, either directly through its own bank account, or indirectly through an investment made at the bank counterparty that is credited in the form of loans to the entities within the scope.

Direct netting is practiced on agreements in force in Europe and the US, while indirect netting is applied in China.

The following table presents the link between net financial debt and the Consolidated Statement of Financial Position with a distinction between non-derivative and derivative financial instruments.

Derivative financial instruments included in the calculation of net financial debt correspond to financing hedge assets and liabilities since they are part of the future cash outflows of this aggregate (note 27.5 – Borrower's liquidity risk). Operational hedge instruments (note 27.4 – Derivative instruments in the financial statements) are not included in the calculation of net financial debt.

The amount of cash and cash equivalents held by the Group includes a balance of €1.9 million at December 31, 2025 (€3.4 million at December 31, 2024) not available for Imerys S.A. and its subsidiaries under exchange control legislation. Cash equivalents were composed of €309.5 million in short-term deposits and similar investments (€320.7 million at December 31, 2024).

Other financial assets were mainly composed of €372.0 million in investment securities (€2.0 million at December 31, 2024).

(€ million)	Notes	2025	2024
Borrowings and financial debt – non-current		2,038.7	1,693.1
Lease liabilities – non-current		102.4	110.3
Borrowings and financial debt – current		16.9	19.9
Lease liabilities – current		49.0	49.6
Financing hedge instruments – liabilities	27.1	4.2	9.1
Financing hedge instruments – assets	24.1	(1.0)	(4.7)
Gross financial debt		**2,210.2**	**1,877.3**
Other financial assets		(376.5)	(5.5)
Cash and cash equivalents, net of bank overdrafts		(442.4)	(596.9)
Net financial debt		**1,391.3**	**1,274.9**

(€ million)	2025	2024
Opening net financial debt	**(1,274.9)**	**(1,118.4)**
Change in net financial debt excl. exchange rate effects	(152.8)	(122.8)
Reclassification to/from liabilities related to assets held for sale[1]	0.3	2.6
Exchange rate effects	36.1	(36.3)
Change in net financial debt	**(116.4)**	**(156.5)**
Closing net financial debt	**(1,391.3)**	**(1,274.9)**

1 At December 31, 2025, +€0.3 million with respect to the business serving the paper market, and at December 31, 2024, -€0.3 million with respect to the business serving the paper market and +€2.9 million with respect to the bauxite production business.

27.3. Other debts

(€ million)	2025	2024
Non-current liabilities		
Income tax payable	0.1	0.1
Debt on assets	1.5	0.2
Tax debt	-	0.1
Social security debt	2.9	10.6
Other	4.8	7.5
Total	**9.2**	**18.5**
Current liabilities		
Debt on assets	64.2	86.3
Tax debt	27.1	31.9
Social security debt	161.7	177.3
Contract liabilities	2.2	2.6
Other	38.5	46.4
TOTAL	**293.7**	**344.6**

Contract liabilities correspond to the value of goods and services to be transferred after the end of the reporting period as part of agreements signed with customers (note 8) for which compensation is due before the transfer of the good or service. Of the €9.3 million of goods and services to be transferred at December 31, 2025 (€9.6 million at December 31, 2024), €7.1 million of trade payables had been received (€7.0 million at December 31, 2024) and €2.2 million was still outstanding (€2.6 million at December 31, 2024).

27.4. Derivatives

Derivatives management principles

The use of derivatives is governed by a policy defined and implemented by the Group Treasury Department and periodically presented to the Board of Directors. The policy specifies that derivatives are exclusively used to hedge risks related to operating transactions (transactional currency risk and energy price risk), foreign investments (conversion of financial statements risk) and financing (transactional currency risk and interest rate risk). Imerys does not take any speculative position.

Derivatives are negotiated centrally by the Group Treasury Department on over-the-counter markets with the highest rated banking institutions. Imerys prohibits its entities from subscribing derivatives directly outside the Group, except to comply with local legal or regulatory requirements.

The application of this policy to currency risk (transactional currency and conversion of financial statements), interest rate risk and energy price risk is detailed in note 27.5.

Accounting policy

Derivatives are recognized at the transaction date, i.e. the date at which the hedging contract is agreed, in non-current and current assets and liabilities by maturity and that of underlying transactions.

Derivatives are initially measured at fair value and subsequently re-measured at the end of each period in line with market conditions. The fair value including accrued interest of derivatives is measured by a model using observable data, i.e. prices at the closing date provided by third parties active on financial markets (level 2 fair value).

These values are adjusted for counterparty credit risk and the Group's own credit risk. Therefore, when the market value of a derivative is positive (derivative asset), its fair value includes the probability of counterparty default (Credit Value Adjustment or CVA). When the market value of a derivative is negative (derivative liability), its fair value includes the probability of Imerys defaulting (Debit Value Adjustment or DVA). These adjustments are measured using the spread of bonds outstanding on the secondary market, as issued by Imerys and its counterparties (level 2 fair value).

The sole purpose of these instruments is to hedge the financial risks to which the Group is exposed. However, only those that meet hedge accounting criteria undergo the accounting treatment described below. All hedge accounting transactions are documented in reference to the hedging strategy by identifying the risk hedged, item hedged, hedging instrument, hedging relationship and method used to measure the hedge effectiveness. The measurement of hedge effectiveness is reviewed at the end of each reporting period.

The recognition of hedge derivatives may vary depending upon their designation as a fair value hedge, a cash flow hedge or a hedge of a net investment in foreign operations (notes 15, 16 and 27.5).

Any change in fair value of a derivative that is not eligible for hedge accounting is recognized in financial income (loss).

Fair value hedges. When changes in the fair value of a recognized asset or liability or an unrecognized firm commitment are likely to impact profit or loss, they may be hedged using a fair value hedge.

The hedged item and hedging instrument are both re-measured against profit or loss at the end of each reporting period. The impact in profit is limited to the ineffective portion of the hedge (note 15).

Cash flow hedge. Cash flow hedges cover adverse changes in the cash flow of a recognized asset or liability or a highly probable future transaction, if these changes are likely to impact profit or loss.

At the end of each reporting period, the effective portion of the hedge and any fluctuations in the time value of options or forward points of forward contracts are recognized in equity. The ineffective portion is recognized in profit or loss. When the transaction is recognized, the items previously recognized in equity are reclassified in profit when the hedged item is recognized (note 15).

If a derivative is de-designated, i.e. hedge accounting is voluntarily discontinued, the effective portion of the hedge previously recognized in equity is amortized in operating income or financial income (loss), depending on the nature of the hedged item, and the change in fair value after the de-designation date is recognized in financial income (loss).

Hedge of a net investment in foreign operations. Currency fluctuations generated by net assets held by the Group in foreign currencies may be hedged (note 27.5 – Conversion of financial statements risk).

At the end of each reporting period, the effective portion of the hedge is recognized in equity and the ineffective portion in profit or loss. The effective portion in equity is reclassified in other operating income and expenses only when control over a consolidated business is lost or interest in a business under significant influence is reduced.

The ineffective portion of operational hedge instruments is recognized in current operating income. The ineffective portion of financing hedge instruments is recognized in financial income (loss).

Changes in the fair value of financial instruments that do not qualify for hedge accounting are immediately recognized in other financial income (expenses) (note 15).

In the Consolidated Statement of Cash Flows, the cash flows of derivatives are presented in the same levels as the cash flows of the underlying transactions.

Derivatives in the financial statements

Assets and liabilities. Derivatives recognized in assets and liabilities are presented by type of risk hedged, i.e. currency risk, interest rate risk, energy price risk and conversion of financial statements risk, in notes 24.1 and 27.1.

At December 31, 2025, no legally enforceable right existed to offset the amounts recognized above. Imerys intends neither to settle the net amount, nor to realize the asset and settle the liability simultaneously. However, in accordance with applicable framework agreements, any default of Imerys or one of its counterparties would settle their outstanding transactions on a net basis. The total of all positions that would be offset in the event of default would reduce total derivative financial assets and liabilities by €8.1 million at December 31, 2025 (€9.2 million at December 31, 2024).

Equity. As part of its strategy to manage currency, interest rate and energy price risks, Imerys holds derivatives to hedge certain future purchases and sales in foreign currencies, as well as part of its floating rate financing and part of its future energy consumption, particularly in the US, UK and France. These positions are considered cash flow hedges.

The following table presents the amounts before income taxes recognized in equity in this respect as well as the reclassifications to profit or loss. Details of these reclassifications to underlying income and expenses are presented in note 15.

Cash flow hedges are further outlined in the context of managing currency, interest rate and energy price risks in note 27.5.

(€ million)	Transactional currency risk	Interest rate risk	Energy price risk	**Total**
Balance at January 1, 2024	**7.4**	**0.0**	**(24.9)**	**(17.5)**
Continuing hedges	*7.4*	-	*(24.9)*	*(17.5)*
Effective portion of hedges	(11.3)	-	3.9	(7.4)
Recognized in equity	**(11.3)**	**0.0**	**3.9**	**(7.4)**
Continuing hedges	(0.8)	-	30.3	29.5
Reclassified to profit or loss	**(0.8)**	**0.0**	**30.3**	**29.5**
Balance at December 31, 2024	**(4.7)**	**0.0**	**9.2**	**4.6**
Continuing hedges	*(4.7)*	-	*9.2*	*4.6*
Effective portion of hedges	18.5	(0.1)	(27.6)	(9.2)
Recognized in equity	**18.5**	**(0.1)**	**(27.6)**	**(9.2)**
Continuing hedges	(7.5)	-	3.7	(3.9)
Reclassified to profit or loss	**(7.5)**	**0.0**	**3.7**	**(3.9)**
Balance at December 31, 2025	**6.3**	**(0.1)**	**(14.8)**	**(8.5)**
Continuing hedges	*6.3*	*(0.1)*	*(14.8)*	*(8.5)*

27.5. Managing risk arising from financial assets

Transactional currency risk

Description of the risk. Transactional currency risk is the risk whereby a cash flow denominated in foreign currency may deteriorate due to unfavorable fluctuations in its cross-entry in functional currency.

Risk management. The transactions performed by the Group's entities are accounted for, wherever possible, in the functional currency of the entity that carries out the transaction.

The following table presents the impact of a change in foreign exchange rates on the underlying items of net financial debt, i.e. before foreign exchange derivatives at December 31, 2025. The analysis involves simulating both a decrease (lower case) and an increase (higher case) in 2025 foreign exchange rates (note 29) (actual 2025).

(€ million)	Lower case	**Actual 2025**	Higher case
Foreign exchange rates	(10.0)%	-	10.0%
Net financial debt	1,395.1	1,391.3	1,387.5

When it is not possible to record a transaction in the functional currency of the entity, the transactional currency risk may be hedged on an individual basis using currency forwards, swaps or options. These instruments are used to hedge highly probable forecast transactions and are considered cash flow hedges. At December 31, 2025, Imerys held €205.5 million in transactional currency risk hedges at nominal value (€178.9 million at December 31, 2024).

The following table presents the amount before income taxes recognized in equity within the translation reserve as well as reclassifications to profit or loss.

(€ million)	**2025**	**2024**
Balance at the beginning of the period	**(4.7)**	**7.4**
Recognized in equity	18.5	(11.3)
Reclassified to profit or loss	(7.5)	(0.8)
Balance at the end of the period	**6.3**	**(4.7)**
of which reclassification to profit or loss expected within 12 months	*6.3*	*(4.7)*

The following table presents the impact of a change in foreign exchange rates on the portfolio of derivatives held at December 31, 2025 with respect to highly probable future purchases and sales in foreign currencies. The analysis involves simulating both a decrease (lower case) and an increase (higher case) in 2025 foreign exchange rates (note 29) (actual 2025). The impact of changes in the effective portion of cash flow hedges is measured in equity while the impact of changes in the ineffective portion of cash flow hedges and non-hedge derivatives is measured through profit or loss.

(€ million)	Lower case	**Actual 2025**	Higher case
Foreign exchange rates	(10.0)%	-	10.0%
Effective portion in equity at the closing date	3.0	6.3	8.9
Ineffective portion in profit or loss for the year	-	-	-

Interest rate risk

Description of the risk. Interest rate risk is the risk whereby interests due on financial debt may deteriorate due to a rise in market interest rates.

Risk management. Managing interest rate risk aims to guarantee the medium-term cost of net financial debt. Net financial debt is calculated in a report that records the financial debt of each entity with details of its components and characteristics. Reviewed each month by the Financial Department and each quarter by the Board of Directors, the report makes it possible to monitor the debt situation and adapt the management strategy where necessary. The management strategy is drawn up by the Group Treasury Department and approved every year by the Financial Department and the Board of Directors.

As part of this process, the Group Treasury Department works with the highest rated banking institutions and obtains financial data and pricing from information providers. The Group's strategy focuses on obtaining finances mainly in euros, which is the most accessible fixed-rate financial resource. Medium-term fixed-rate bond issues may be converted to floating rates using interest rate swaps.

The following table presents the impact of a change in interest rates on the interest expense generated by the underlying items of net financial debt, i.e. before interest rate derivatives at December 31, 2025. The analysis involves simulating both a decrease (lower case) and an increase (higher case) in 2025 interest rates (actual 2025).

(€ million)	Lower case	**Actual 2025**	Higher case
Interest rate	(0.5)%	-	0.5%
Net financial debt expense	(59.3)	(56.5)	(53.5)

In 2025, unlike in 2024, Imerys entered into derivative instruments (caps) to hedge part of its variable-rate debt (note 27.1). These instruments are classified as cash flow hedges. The nominal value of the instruments held for this purpose as of December 31, 2025 is €210.0 million.

The following table presents the amounts before income taxes recognized in equity in this respect as well as the reclassifications to profit or loss.

(€ million)	**2025**	**2024**
Balance at the beginning of the period	**-**	**-**
Recognized in equity	(0.1)	-
Reclassified to profit or loss	-	-
Balance at the end of the period	**(0.1)**	**-**
of which reclassification to profit or loss expected within 12 months	-	-

The following table presents a breakdown of net financial debt between floating and fixed rate by currency at December 31, 2025.

(€ million)	EUR	USD	GBP	Other foreign currencies	**Total**
Debt at fixed rate	**1,874.0**	**39.3**	**11.5**	**17.7**	**1,942.5**
Debt at fixed rate on issue	2,134.0	39.3	11.5	17.7	2,202.5
Fixed-for-floating swap	(260.0)	-	-	-	(260.0)
Debt at floating rate	**(964.4)**	**317.6**	**121.2**	**(25.5)**	**(551.1)**
Debt at floating rate on issue	4.5	-	-	3.3	7.8
Net cash and investment securities	(708.9)	(31.6)	0.2	(78.6)	(818.9)
Fixed-for-floating swap	260.0	-	-	-	260.0
Currency swap	(520.0)	349.1	121.0	49.8	0.0
Net financial debt at December 31, 2025	**909.6**	**356.9**	**132.7**	**(7.8)**	**1,391.3**

The following table presents a breakdown of interest rate hedging transactions by foreign currency at December 31, 2025.

(€ million)	EUR	USD	GBP	Other foreign currencies	**Total**
Exposure at floating rate before hedging	**(964.4)**	**317.6**	**121.2**	**(25.5)**	**(551.1)**
Fixed rate hedges	-	-	-	-	0.0
Swap at average rate of	-	-	-	-	-
Capped rate hedges	(210.0)	-	-	-	(210.0)
Cap at average rate of	2.40%	-	-	-	-
Exposure at floating rate after hedging	**(1,174.4)**	**317.6**	**121.2**	**(25.5)**	**(761.1)**

Energy price risk

Description of the risk. Energy price risk is the risk whereby the cash outflow in relation to energy purchases may deteriorate due to a rise in its market price. Imerys is exposed to the price risk of energy used in the production cycle of its activities, mainly natural gas, electricity and, to a lesser extent, coal.

Risk management. To manage energy price risk, Imerys sources its energy from a variety of geographical locations and sources. The Group looks to pass on any energy price increases in the selling price of its products.

Furthermore, Imerys has centralized price risk management for natural gas and electricity in Europe and the US. The Group Treasury Department is responsible for implementing the framework and resources needed for the single management strategy, which includes the appropriate use of financial instruments available in the market.

The Group has research programs on alternative energy sources as well as projects to reduce energy consumption under the supervision of a Group Energy Supervisor. Furthermore, energy managers have been appointed across the Group.

The energy price risk is hedged using forward and option contracts. These instruments are considered cash flow hedges. At December 31, 2025, Imerys held €196.0 million in energy price risk hedges at nominal value (€117.0 million at December 31, 2024).

The following table presents the amounts before income taxes recognized in equity in this respect as well as the reclassifications to profit or loss.

(€ million)	**2025**	**2024**
Balance at the beginning of the period	**9.2**	**(24.9)**
Recognized in equity	(27.6)	3.9
Reclassified to profit or loss	3.7	30.3
Balance at the end of the period	**(14.8)**	**9.2**
of which reclassification to profit or loss expected within 12 months	*(9.4)*	*9.2*

The following table summarizes the main energy price risk hedge positions at December 31, 2025.

	Net notional amounts (in MWh)	Maturity
Underlying position	17,532,236	<60 months
Management transactions	5,273,432	<60 months

The following table presents the impact of a change in natural gas, electricity and Brent prices on the portfolio of derivatives held at December 31, 2025 with respect to highly probable future purchases of natural gas, electricity and Brent crude. The analysis involves simulating both a decrease (lower case) and an increase (higher case) in 2025 natural gas, electricity and Brent prices (actual 2025). The impact of changes in the effective portion of cash flow hedges is measured in equity while the impact of changes in the ineffective portion of cash flow hedges and non-hedge derivatives is measured through profit or loss.

(€ million)	Lower case	**Actual 2025**	Higher case
Natural gas, electricity and Brent prices	(10.0)%	-	10.0%
Effective portion in equity at the closing date	(18.4)	(14.8)	(11.1)
Ineffective portion in profit or loss for the year	-	-	-

Borrower's liquidity risk

Description of the risk. Borrower's liquidity risk is the risk whereby Imerys would not be in a position to meet the repayment obligations of its financial liabilities.

To assess the exposure of the Group to this risk, the following table presents maturity on issue at December 31, 2025. The maturity of lease liabilities presented below represents future cash outflows for the lease liability measured across a reasonably certain lease term (note 21 – Accounting policy).

	<1 year		1-5 years		>5 years		
(€ million)	Capital	Interest	Capital	Interest	Capital	Interest	**Total**
Non-derivative financial liabilities	**48.6**	**67.2**	**1,227.0**	**207.3**	**952.8**	**70.5**	**2,573.3**
Eurobond/EMTN/Sustainability-Linked Bonds	-	61.5	1,143.5	195.7	900.0	51.0	2,351.7

Trade payables	349.1	-	-	-	-	-	349.1
Other debts	293.7	-	9.2	-	-	-	302.9
Hedge derivatives	**3.1**	**0.0**	**4.4**	**0.0**	**1.0**	**0.0**	**(8.5)**
Operational hedge instruments – liabilities	13.9	-	6.2	-	1.1	-	21.1
Operational hedge instruments – assets	(10.8)	-	(1.8)	-	(0.1)	-	(12.7)
Future cash outflows	**(123.3)**	**67.2**	**1,240.4**	**207.3**	**956.0**	**70.5**	**2,418.0**

The maturities of the net financial debt after interest rate swaps are as follows:

(€ million)	<1 year	1-5 years	>5 years	**Total**
Debt at fixed rate	**54.6**	**1,212.9**	**675.0**	**1,942.5**
Debt at fixed rate on issue	54.6	1,212.9	935.0	2,202.5
Fixed-for-floating swap	-	-	(260.0)	(260.0)
Debt at floating rate	**(811.2)**	**0.0**	**260.0**	**(551.2)**
Debt at floating rate on issue	7.8	-	-	7.8
Net cash and other current financial assets	(818.9)	-	-	(818.9)
Fixed-for-floating swap	-	-	260.0	260.0
Net financial debt	**(756.6)**	**1,212.9**	**935.0**	**1,391.3**

Risk management. Imerys is required to maintain a covenant attached to certain bilateral facilities, the terms and conditions of which are as follows:

- purpose: general corporate financing requirement;
- covenant compliance obligations: consolidated net financial debt excluding IFRS 16 lease liabilities/ consolidated equity shall, in accordance with the terms of related financing agreements, be less than or equal to 1.60 at the end of each reporting period for annual consolidated financial statements. At December 31, 2025, the ratio worked out at 0.47 (0.34 at December 31, 2024);
- absence of any collateral in favor of lenders.

Failure to comply with the above obligations in any of the related financing agreements could lead to the available amount being canceled and the corresponding financial debt becoming immediately due, upon demand of the lender(s) in question. Other than with two exceptions, the Group's financing agreements do not provide for any cross default if a mandatory covenant is breached. At December 31, 2025, Imerys had a long-term rating of Baa3, stable outlook (Baa3, stable outlook at December 31, 2024) from Moody's and a rating of BBB-, stable outlook (BBB-, stable outlook at December 31, 2024) from S&P.

In November 2025, Imerys issued a €600.0 million bond with a coupon of 4% and maturity of November 21, 2032. At the same time, a redemption offer was launched for the bond maturing on January 15, 2027 with a nominal value of €600.0 million. €256.5 million was redeemed and canceled as a result of this transaction. The nominal value outstanding for this bond is €343.5 million.

On August 1, 2025, Imerys updated its Euro Medium Term Note (EMTN) program with the Financial Industry Regulatory Authority in Luxembourg *(Commission de Surveillance du Secteur Financier)*. The program amounted to €3.0 billion and is approved to issue notes similar to ordinary bonds with maturities from one month to 30 years. At December 31,2025, outstanding securities amounted to €1,243.5 million (€900.0 million at December 31, 2024).

Imerys also has a short-term negotiable debt securities program (NEU CP) capped at €1,000.0 million (€1,000.0 million at December 31,2024) rated P-3 by Moody's (P-3 at December 31, 2024). At December 31, 2025, outstanding short-term negotiable securities amounted to €0.0 million (€0.0 million at December 31, 2024).

In 2022, Imerys introduced a medium-term negotiable debt securities program (NEU MTN) with the Banque de France, capped at €300.0 million (€300.0 million at December 31, 2024). No securities were issued in either 2025 or 2024. At December 31, 2025, Imerys had access to €960.0 million in bilateral facilities (€1,010.0 million at December 31, 2024), a portion of which secures the short-term negotiable securities issued, in accordance with the Group's financial policy.

Moreover, having in 2023 further underscored its commitment in its sustainable development policy by linking its financing strategy to its sustainability ambition, on November 29, 2023, the Group completed an issue of bonds indexed to a sustainable development objective (Sustainability-Linked Bonds) for a principal amount of €500.0 million. These bonds, due to mature on November 29, 2029, bear an annual coupon of 4.75% and are admitted to trading on the regulated market of the Luxembourg Stock Exchange. Issued in accordance with the Sustainability-Linked Bond Principles as published by the International Capital Markets Association (ICMA), these instruments, through their framework, are indexed to a target to reduce greenhouse gas emissions by 32.7% by 2028 (tCO_2e emitted) from a 2021 base year, as approved by the Science Based Targets initiative (SBTi).

This includes Scope 1 emissions (direct emissions from sources owned or controlled by Imerys) and Scope 2 emissions (indirect emissions from the production of electricity, heat or steam imported or purchased by the Group). Failure to comply with these targets at December 31, 2028 could lead to the payment of penalties corresponding to 75 basis points of the principal amount for the 2028 target.

At December 31, 2025, Imerys had achieved a cumulative reduction in the tCO_2e emitted of 28.3% compared with 2021 levels (28.3% at December 31, 2024).

On May 14, 2021, the Group also completed an issue of bonds indexed to its sustainable development objectives (Sustainability-Linked Bonds) for a principal amount of €300.0 million. These bonds, due to mature on July 15, 2031, bear an annual coupon of 1.00% and are admitted to trading on the regulated market of the Luxembourg Stock Exchange. Issued in accordance with the Sustainability-Linked Bond Principles as published by the International Capital Markets Association (ICMA), these instruments are indexed to a target to reduce greenhouse gas emissions by 22.9% in 2025 and 36.0% in 2030 as a proportion of revenue (tCO_2e / € million) considering 2018 as the base year, as approved by the Science Based Targets initiative (SBTi).

Failure to comply with these targets at December 31, 2025 and/or at December 31, 2030 could lead to the payment of penalties corresponding to 25 basis points of the principal amount for the 2025 target and/or 50 basis points of the principal amount for the 2030 target.

At December 31, 2025, Imerys had reduced the tCO_2e emitted per million euros of revenue by 27.2% compared with 2018 levels (31.6% at December 31, 2024).

This performance therefore allows the Group to confirm the achievement of its intermediate target of reducing the intensity of its greenhouse gas emissions by 22.9% (Scopes 1 and 2) relative to its revenue (tCO2/€M), excluding any application of a coupon penalty mechanism in 2026.

Market liquidity risk

Description of the risk. Market liquidity risk is the risk whereby a non-confirmed financial resource (short-term negotiable securities (NEU CP), bank facility and accrued interest, or other debts and facilities) would not be renewed.

Risk management. Imerys tends to use financial resources to adjust its financing capabilities, which exist either as financial debt that has been drawn or financing commitments granted by the highest rated banking institutions.

Medium-term financial resources provided by bilateral facilities may be used over very short drawing periods (between one and 12 months) while remaining available over longer maturities (five years).

The Group's financial resources amounted to €3,003.5 million at December 31, 2025 (€2,710.0 million at December 31, 2024).

Imerys manages the value of financial resources through regular comparison with the amount drawn down in order to measure available funds to which the Group may have access.

The robustness of financial resources is assessed on the basis of their amounts and average maturity as presented in the following table:

	2025	2024
Financial resources by maturity *(€ million)*		
Maturity within Y+1	130.0	170.0
Maturity between Y+2 and Y+6	2,273.5	2,240.0
Maturity between Y+7 and +	600.0	300.0
Total	**3,003.5**	**2,710.0**
Financial resources by nature *(€ million)*		
Bond resources	**2,043.5**	**1,700.0**
Eurobond/EMTN/Sustainability-Linked Bonds	2,043.5	1,700.0
Private placements	-	-
Bank resources	**960.0**	**1,010.0**
Miscellaneous bilateral facilities	960.0	1,010.0
Total	**3,003.5**	**2,710.0**
Average maturity of financial resources *(in years)*		
Bond resources	4.3	3.9
Bank resources	3.0	2.7
TOTAL	**3.9**	**3.5**

The following table measures the available financial resources after repayment of financing from uncommitted resources. It measures the actual exposure of Imerys to an illiquidity crisis on both financial and banking markets.

At December 31, 2025, available financial resources after repayment of uncommitted resources corresponded to €793.3 million (€832.8 million at December 31, 2024), which gives the Group substantial room for maneuver, guarantees financial stability and helps to mitigate any going concern risk.

	2025			2024		
(€ million)	Resources	Utilization	Available	Resources	Utilization	Available
Bonds	2,043.5	2,043.5	0.0	1,700.0	1,700.0	0.0
Short-term negotiable securities	-	-	0.0	-	-	0.0
Committed bank facilities	960.0	-	960.0	1,010.0	-	1,010.0
Bank facilities and accrued interest	-	16.4	(16.4)	-	19.7	(19.7)
Other debts and facilities	-	150.3	(150.3)	-	157.6	(157.6)
TOTAL	**3,003.5**	**2,210.2**	**793.3**	**2,710.0**	**1,877.2**	**832.8**

Conversion of financial statements risk

Description of the risk. Conversion of financial statements risk is a form of currency risk whereby the value in euros of the financial statements of a foreign operation may deteriorate due to an unfavorable change in the foreign exchange rate of the functional currency of said operation.

Risk management. Imerys hedges part of its net investments in foreign operations by loans specifically allocated to financing the operations in the long term and by controlling the proportion of its financial debt denominated in foreign currencies.

The exchange rate differences generated by the loans and borrowings qualified as hedges of net investments in foreign operations are recognized in equity (note 30 – Translation reserve) so as to neutralize, to a certain extent, the translation gains or losses on hedged net investments.

At December 31, 2025, the borrowings and exchange rate swaps taken out to hedge net investments in foreign entities included: USD452.5 million, CHF63.4 million, GBP71.0 million and SGD28.0 million (USD452.3 million, CHF61.2 million, GBP71.0 million and SGD150.5 million at December 31, 2024).

The following table presents financial debt before and after the impact of these foreign currency swaps.

	2025			2024		
(€ million)	Before currency swap	Currency swap	After currency swap	Before currency swap	Currency swap	After currency swap
EUR	2,138.5	(520.0)	1,618.5	1,791.4	(424.8)	1,366.6
USD	39.3	349.1	388.4	38.6	396.6	435.2
GBP	11.5	121.0	132.5	21.1	88.3	109.4
Other foreign currencies	21.0	49.8	70.9	26.1	(60.0)	(33.9)
TOTAL	**2,210.3**	**0.0**	**2,210.3**	**1,877.2**	**0.0**	**1,877.2**

At December 31, 2025, the portion of financial debt in each foreign currency, after swaps, was as follows:

(€ million)	EUR	USD	GBP	Other foreign currencies	**Total**
Gross financial debt	1,618.5	388.4	132.5	70.9	2,210.3
Net cash and investment securities	(708.9)	(31.6)	0.2	(78.6)	(818.9)
Net financial debt at December 31, 2025	**909.6**	**356.9**	**132.7**	**(7.8)**	**1,391.3**

The following table presents the impact of a change in foreign exchange rates on the portfolio of currency swaps held at December 31, 2025 with respect to hedges of net investments in foreign operations. The analysis involves simulating both a decrease (lower case) and an increase (higher case) in 2025 foreign exchange rates (note 30) (actual 2025). The impact of changes in the effective portion of hedges of net investments in foreign operations is measured in equity while the impact of changes in the ineffective portion of hedges of net investments in foreign operations and non-hedge derivatives is measured in profit or loss.

(€ million)	Lower case	**Actual 2025**	Higher case
Foreign exchange rates	(10.0)%	-	10.0%
Effective portion in equity at the closing date	(276.9)	(215.1)	(164.6)
Ineffective portion in profit or loss for the year	-	-	-

NOTE TO THE CONSOLIDATED STATEMENT OF CASH FLOWS

Note 28. Cash flows

The following table is intended to help users of the financial statements reconcile the amounts presented in the Consolidated Statement of Cash Flows and the amounts presented in the notes to the financial statements.

(€ million)	Notes	2025	2024
Consolidated Statement of Cash Flows			
Net increase in amortization, depreciation and impairment		**854.9**	**301.5**
Increase in amortization – intangible assets	*20*	*29.1*	*26.6*
Increase in depreciation – property, plant and equipment	*21*	*275.0*	*265.9*
Impairment loss (reversal of impairment loss) recognized in profit or loss, trade and other receivables	*24.2*	*16.3*	*(7.0)*
Impairment loss (reversal of impairment loss) recognized in profit or loss, inventories		*(1.8)*	*(2.3)*
Impairment – goodwill	*19*	*469.4*	*-*
Impairment – intangible assets	*20*	*27.2*	*1.0*
Impairment – property, plant and equipment	*21*	*39.8*	*17.4*
Reversal of impairment – intangible assets and property, plant and equipment		*-*	*(0.1)*
Change in provisions		**(24.0)**	**(52.4)**
Net change in provisions for employee benefits – Current operating income	*26.1*	*(4.4)*	*(1.1)*

Net change in provisions for employee benefits – Closed plans	*26.1*	*(8.4)*	*(48.5)*
Normative return on assets of defined benefits plans	*26.1*	*(39.2)*	*(35.2)*
Unwinding of defined employee benefit liabilities	*26.1*	*41.4*	*39.9*
Increase in other provisions and effect of the change in discount rate	*26.2*	*32.1*	*44.9*
Change in adjusted provisions for the cost of intangible assets and property, plant and equipment		*(3.1)*	*(4.5)*
Use of other provisions	*26.2*	*(29.6)*	*(36.4)*
Reversals of unused portions of other provisions	*26.2*	*(14.5)*	*(14.7)*
Unwinding of other provisions	*26.2*	*2.1*	*3.1*
Gains (losses) on non-current asset disposals		**0.7**	**321.7**
Income from asset disposals	*12*	*(1.1)*	*7.5*
Income from disposals of consolidated businesses	*14*	*1.8*	*314.1*
Income from non-recurring asset disposals	*14*	*0.1*	*(0.1)*
Other adjustments		**100.9**	**18.8**
Share-based payments		*11.1*	*11.9*
Net interest income and expense		*56.5*	*31.4*
Fair value losses (gains)		*(3.2)*	*0.3*
Other adjustments for non-cash items		*36.5*	*(24.8)*
Change in working capital requirement		**(52.0)**	**20.0**
Decrease (increase) in inventories		*(5.7)*	*(43.7)*
Decrease (increase) in trade receivables		*12.2*	*13.7*
Increase (decrease) in trade payables		*(32.3)*	*33.5*
Changes in other receivables and debts		*(26.1)*	*16.5*
Acquisitions of intangible assets and property, plant and equipment, net of change in payables on acquisitions		**(316.5)**	**(364.1)**
Change in payables on acquisitions of intangible assets and property, plant and equipment		*(20.0)*	*(11.8)*
Acquisitions of intangible assets	*20*	*(67.9)*	*(72.1)*
Acquisitions of property, plant and equipment	*21*	*(231.7)*	*(284.6)*
Change in adjusted provisions for the cost of intangible assets and property, plant and equipment		*3.1*	*4.5*
Proceeds from disposals of intangible assets and property, plant and equipment		**13.8**	**2.4**
Net carrying amount of intangible assets disposed of	*20*	*11.7*	*6.3*
Net carrying amount of property, plant and equipment disposed of	*21*	*1.1*	*3.6*
Income (loss) from asset disposals	*12*	*1.1*	*(7.5)*
Income from non-recurring asset disposals	*14*	*(0.1)*	*0.1*
Change in receivables on disposals of intangible assets and property, plant and equipment		*-*	*(0.1)*
Dividends paid		**(123.3)**	**(116.5)**
Dividends paid to shareholders of the parent company		*(122.9)*	*(114.5)*
Dividends paid to minority shareholders		*(0.4)*	*(0.8)*
Change in payables on dividends		*-*	*(1.1)*

OTHER INFORMATION

Note 29. Main consolidated entities

Accounting policy

Imerys consolidates the financial statements of the entities it controls, i.e. those over which the Group has power, is exposed to variable yields and has the ability to exercise its power to influence company policy. Their assets, liabilities, income and expenses contribute to the various items in the consolidated financial statements. Intra-group transactions are eliminated. An entity's losses are allocated to non-controlling interests in proportion to the interest held, even if the result presents a negative balance.

Where there is no impact on control, changes in interest are recognized in equity. In the absence of sufficient detail in existing standards and interpretations, Executive Management considers that any commitment entered into by Imerys with the intent to acquire shares from non-controlling interests is recognized as a liability measured at the fair value of the commitment against a derecognition of these interests. Any difference between the fair value of the liability and the carrying amount of the non-controlling interests is recognized in equity. Subsequent changes in the fair value of debt are recognized in equity, Group share.

When, at the end of the reporting period, it is highly probable that non-current assets or groups of directly related assets and liabilities will be disposed of, they are designated as non-current assets or groups of assets held for sale. Disposal is considered highly probable if, at the end of the reporting period, a plan to sell them at a reasonable price given their fair value has been initiated to identify a buyer and definitively conclude the disposal within a maximum of one year. Executive Management makes judgments to assess the highly probable nature of the transaction.

Non-current assets or groups of assets held for sale are presented in separate items in the assets and liabilities on the Statement of Financial Position, separately from the remaining continuing operations, at the reporting date and without any comparative information provided for previous years. At the date on which they are designated as non-current assets or groups of assets held for sale, they cease to be amortized or depreciated and are measured either at their carrying amount or their fair value less costs to sell, whichever is lower.

Non-current assets or groups of assets that are to be closed rather than sold are considered non-current assets to be discontinued and not held for sale.

When non-current assets or groups of assets held for sale or to be scrapped are allocated to a separate main line of business and are to be abandoned as part of a single coordinated plan, they are categorized as discontinued operations and their related flows are disclosed separately in the Income Statement and Statement of Cash Flows at the reporting date and in the comparative information provided for previous years.

As non-current assets or groups of assets held for sale remain under the Group's control until the sale date, intra-group transactions involving these assets and other continuing operations are eliminated from the Statement of Financial Position and the Income Statement, with the exception in the Income Statement of transactions involving the discontinued operations that will continue after the date control is separated from continuing operations. This presentation, which has no impact on the amount of consolidated net income, enables users of the financial statements to measure the impact of discontinued operations on other continuing operations.

Executive Management makes judgments to identify transactions that will continue after the date at which control over discontinued operations is separated from continuing operations.

2025 scope of consolidation

The following table presents the main consolidated entities in 2025. The percentages of interest are identical to the percentages of control, unless otherwise indicated. The Group holds no unconsolidated structured entity.

Note 30. Translation of foreign currencies

Accounting policy

The consolidated financial statements of Imerys are presented in euros. The main consolidated entities (note 29) use the local currency as their functional currency.

The accumulated impact of translating the financial statements of foreign operations is recognized in equity within the translation reserve. Assets and liabilities of foreign operations are translated at the exchange rate at the end of the reporting period and their income and expenses at the average exchange rate for the year.

Non-monetary assets and liabilities from transactions in foreign currencies are measured at the exchange rate of the day or the average rate for the month of the transaction.

With the exception of derivative financial instruments, monetary assets and liabilities from transactions in foreign currencies are measured at the exchange rate at the end of the reporting period. The corresponding exchange rate differences are recognized in other financial income (expenses) (note 15) except for those generated by monetary assets and liabilities from net investments in foreign operations and their hedges, which are recognized in equity within the translation reserve (note 27.5 – Conversion of financial statements risk).

Upon disposal of a foreign operation, the accumulated impact of translating financial statements and hedges is recognized in other operating income and expenses with the proceeds from the disposal of the business (note 14).

Exchange rate

The following table presents the exchange rates applied to translate the financial statements of the main consolidated entities at December 31, 2025 (note 29).

		2025		2024	
(€1 =)	Foreign currencies	Closing	Average	Closing	Average

1 Of which in 2024, €301.6 million with respect to the disposal of the businesses serving the paper market (note 1).

Note 31. Related parties

Related parties outside Imerys

Imerys has related party relationships with The Desmarais Family Residuary Trust, held by the Desmarais family (Canada), and Eagle Capital S.A. (Belgium), controlled by the Frère family (Belgium). These entities are the ultimate controlling parties of Imerys. Through their joint venture Parjointco, they jointly control the Belgian group Groupe Bruxelles Lambert (GBL), which controls Belgian Securities Sàrl (Luxembourg), a shareholder of Imerys, through GBL Verwaltung S.A. (Luxembourg). In this respect, GBL is considered a related party of Imerys. Imerys is not involved in any transactions with these related parties.

Joint ventures and associates

Transactions with joint ventures and associates are not material.

Key management personnel of Imerys

The executives qualifying as related parties at December 31, 2025 are the 12 members of the Board of Directors, including the two employee-representative directors (12 members at December 31, 2024) and the nine members of the Executive Committee, including the Chief Executive Officer (nine members at December 31, 2024).

In accordance with the acquisition agreement concluded between Imerys, S&B GP, Blue Crest and K and R Holdings Sàrl on November 5, 2014 and subsequently amended, PropCo2, an entity affiliated with Blue Crest (which holds 5.90% of the voting rights in Imerys, in which Paris Kyriacopoulos, a director of Imerys, is Chairman), must reimburse Imerys Industrial Minerals Greece S.A., which owns land in the name and on behalf of this entity, for the expenses it incurred in relation to its ownership of this land. In 2025, this €11,000 commitment was considered a related party transaction. No amount was reimbursed in 2024 or 2025. At December 31, 2025, €64,000 had been accrued by Imerys under this commitment.

Compensation and similar benefits granted to these related parties are presented in the following table:

		2025		2024	
(€ million)	Notes	Expense	Liability	Expense	Liability
Short-term benefits	1	(6.9)	2.6	(7.1)	2.8
Directors' compensation	2	(0.6)	0.4	(0.7)	0.3
Post-employment benefits	3	(0.2)	0.6	(0.2)	0.6
Contributions to defined contributions plans		(0.6)	-	(0.6)	-
Termination benefits		-	-	(0.5)	-
Share-based payments	4	(4.5)	-	(4.5)	-
TOTAL		**(12.8)**	**3.6**	**(13.6)**	**3.7**

Note 1. Short-term benefits. These amounts include the fixed part of the compensation paid for the year as well as the variable part also due for the year, but paid in the subsequent year.

Note 2. Directors' compensation. These amounts correspond to the attendance fees paid to the members of the Board of Directors.

Note 3. Post-employment benefits. These amounts include in particular post-employment defined benefits plans available to the main executives of the Group's entities in France who meet the eligibility criteria. They are recognized for the beneficiaries qualifying as related parties, some of whom are among the above-mentioned executives.

Note 4. Share-based payments. These amounts correspond to expenses recognized with respect to Imerys share options and free shares granted to related parties.

Post-employment benefits for Imerys employees

The post-employment benefit plans to which Imerys employees are entitled are deemed to be related party agreements. The amount of the contributions to external funds recognized as an expense in 2025 amounted to €16.6 million (€60.2 million in 2024), mainly including €12.0 million for Imerys UK Pension Fund Trustees Ltd, United Kingdom (€12.3 million in 2024) and €0.0 million for Comerica, United States (€43.4 million in 2024).

FCPE Imerys Actions

The corporate mutual fund holding Imerys shares, known as FCPE Imerys Actions, is managed by BNP Paribas Asset Management SAS and overseen by a Supervisory Board of eight members made up of four shareholder representatives and four Imerys representatives. As Imerys, together with the shareholders, exercises joint control over FCPE Imerys Actions, the fund is deemed to be a related party. The amounts recognized in 2024 and 2025 for FCPE Imerys Actions are immaterial.

Note 32. Commitments

To the best of Imerys' knowledge, other than contracts agreed (i) in the ordinary course of business, including contracts covering operating rights for mineral reserves and resources, (ii) as part of an acquisition or disposal of assets or companies already completed or announced or (iii) in relation to the financing operations mentioned in the present Universal Registration Document, no major contracts have been signed by any Group's company in the two years prior to the date the present Universal Registration Document was filed that are currently still in force and contain provisions imposing any obligations or commitments likely to have a material impact on the Group's business, financial position or cash flow.

Nevertheless, in the ordinary course of its business, Imerys is liable to third parties for obligations, often subject to conditions or subsequent events that do not (or only partially) meet the criteria for recognizing liabilities but may impact the future financial position. Obligations that have not resulted in the recognition of any provision are designated hereinafter by the term commitments.

Identified in accordance with applicable accounting standards, the Group's material commitments (in terms of materiality and probability), both given and received, are presented in the following tables. When a business is recognized as an asset held for sale or a discontinued operation at the closing date, the commitments presented below include commitments relating to these businesses.

COMMITMENTS GIVEN

(€ million)	Notes	2025	2024
Mineral leases and services on lease contracts	1	5.7	4.3
Commitments relating to operating activities	2	177.9	168.4
Cash-related commitments	3	26.2	29.0
Other commitments	4	103.1	137.4
TOTAL		**312.8**	**339.1**

Note 1. Mineral leases and services on lease contracts. The remaining off-balance sheet items are limited to contracts outside the scope of IFRS 16 "Leases", in particular mineral leases and commitments to purchase services related to leases.

Note 2. Commitments relating to operating activities. These commitments correspond to firm purchase commitments made by Imerys as part of purchase contracts for goods, services, energy and freight. Energy supply commitments (mainly electricity and gas) amounted to €34.2 million at December 31, 2025 (€17.9 million at December 31, 2024).

Note 3. Cash-related commitments. These commitments correspond to letters of credit as well as sureties, guarantees, mortgages and pledges obtained by Imerys from financial institutions in order to guarantee operating cash requirements in favor of customers.

Note 4. Other commitments. This item encompasses all commitments given that are not mentioned above, including seller warranties and price adjustment clauses given by the Group upon business disposals.

COMMITMENTS RECEIVED

(€ million)	Notes	2025	2024
Operating leases	1	23.2	25.6
Commitments relating to operating activities	2	44.6	58.3
Cash-related commitments	3	4.9	-
Available financial resources	4	960.0	1,010.0
Other commitments	5	78.3	82.6
TOTAL		**1,111.0**	**1,176.5**

Note 1. Operating leases. Operating lease commitments correspond to future rent payments on leases in which Imerys is the lessor.

Note 2. Commitments relating to operating activities. These commitments correspond to firm purchase commitments made by customers in favor of Imerys as part of sales contracts for goods and services.

Note 3. Cash-related commitments. These commitments correspond to letters of credit as well as sureties, guarantees, mortgages and pledges obtained by certain suppliers from their financial institutions, in order to guarantee operating cash requirements in favor of Imerys.

Note 4. Available financial resources. These commitments correspond to the amount of available financial resources after the repayment of financing from uncommitted resources (note 27.5 – Market liquidity risk).

Note 5. Other commitments. This item encompasses all the commitments received not mentioned above, including €78.3 million at December 31, 2025 (€82.6 million at December 31, 2024) in seller warranties and price adjustment clauses in favor of the Group upon business acquisitions.

Note 33. Audit fees

The following table presents the breakdown of fees awarded to Deloitte & Associés (DA) and PricewaterhouseCoopers Audit (PwC) by the type of service rendered. "Audit related services and other non-audit services" correspond to services other than statutory audit services as defined in French legal and regulatory texts, various tax services and services provided when conducting agreed procedures, issuing various declarations and auditing consolidated, social, environmental and societal information.

Note 34. Subsequent events

The annual consolidated financial statements at December 31, 2025 were approved by the Board of Directors at its meeting held on February 19, 2026.

In February 2026, the Group announced that *Banque des Territoires*, acting on behalf of the French government, was investing in the EMILI project, acquiring a €50 million minority stake (note 1).

No other material events have occurred between the reporting date and the date of the Board of Directors' meeting.

Highlights of the year

On November 21, 2025, the Group issued a new bond with a nominal amount of €600 million, maturing in 2032, at an annual interest rate of 4%. This issue was used in part to partially repay an existing bond issued in 2017, for an amount of €256.5 million.

Imerys S.A. signed a Virtual Power Purchase Agreement (VPPA) on August 5, 2025, for an expected total production of 198,500 MWh per year over 10 years. This VPPA contract makes it possible to secure the supply of Guarantees of Origin (GO) which are purchased centrally by Imerys S.A. on behalf of the Group's European subsidiaries responsible for the energy consumption covered.

Faced with a multitude of disputes brought against them in the United States under their former operations, in February 2019 the Group's North American talc subsidiaries (the "North American Talc Subsidiaries") filed for Chapter 11 bankruptcy protection under the US Bankruptcy Code. This procedure suspended all ongoing litigation and prevented new actions from being brought against them in connection with their talc operations, in order to allow the negotiation, under the aegis of the competent Federal Court of the State of Delaware ("Bankruptcy Court") of a settlement with the respective representatives of the current, and potential future, complainants (the "Plan"). This Plan is intended, in particular, to settle all existing and future liabilities related to the past operations of the North American Talc Subsidiaries by transferring them to a trust that will be specifically created for this purpose and by protecting those who contribute to this Plan against any risks associated with these liabilities.

The latest draft Plan was submitted in January 2026 for approval by the Bankruptcy Court. In particular, it incorporates the settlement agreement reached with the Group and to which the Company is a party. Pursuant to this agreement, the settlement indemnity charged to the Company would amount to USD18.75 million, or €15.9 million (out of a total amount provisioned for the Group of USD117.1 million, or €99.7 million).

This commitment, the execution of which remains subject to final judicial approval of the Plan, has been covered by a provision for the full amount, i.e. €15.9 million, in the accounts for the financial year.

Accounting principles and policies

Imerys S.A. presents its annual financial statements in accordance with the accounting principles and policies established by the General Accounting Plan, as required by ANC Regulation No. 2014-03 issued by France's national accounting standards board on June 5, 2014 and amended by ANC Regulation No. 2022-06 of November 4, 2022. French generally accepted accounting principles were applied using a conservative approach in accordance with the following fundamental assumptions: going concern, consistent accounting policies from one year to the next and independence of financial years and in accordance with the general rules for the preparation and presentation of annual financial statements. The generally applied methodology uses the historical cost method for the items recognized in the financial statements.

The financial current accounts previously presented as Loans and receivables related to investments and Financial debt are, as of January 1, 2025, reclassified respectively as Other receivables (note 7) and Other debts (note 12). This reclassification has no impact on the income statement or on equity.

Application of ANC Regulation No 2022-06 on the modernization of the General Accounting Plan

A) Impact of the change in accounting policies on the main items for the 2025 financial year

The annual financial statements for the 2025 financial year have been drawn up in accordance with the general policies established by the General Accounting Plan, resulting from ANC Regulation No.°2022-06 adopted by France's national accounting standards board on November 4, 2022, amending ANC Regulation No.°2014-03. The final regulation, approved by order of December 26, 2023, which entered into force on January 1, 2025, essentially concerns the modernization of the model financial statements, a new presentation of the information in the notes to the financial statements, an updated definition and presentation of the Exceptional income (loss), along with the elimination of the expense transfer technique. According to French rules, a change in accounting regulations is qualified as a change in accounting policy.

The effects of this change in policy from the start of the 2025 financial year are described below.

1) Exceptional income (loss)

From January 1, 2025, in accordance with article 513-5 of the General Accounting Plan, Exceptional income (loss) includes:

- revenues and expenses directly related to a major and non-recurring event that would not have been recorded in the absence of this event;
- accounting entries exclusively of tax origin, such as excess tax depreciation;
- changes in accounting policies recognized in profit or loss, where their treatment in equity is excluded due to tax provisions;
- corrections of errors, with the exception of those relating to entries initially charged directly to equity.

This change results in the classification into current income of transactions that, prior to the application of the new regulation, were recognized by nature as Exceptional income (loss). In 2025, €25 million in Proceeds from disposals of intangible assets and property, plant and equipment (€11.2 million in 2024), which had been allocated to Exceptional income (loss) prior to the implementation of ANC Regulation No. 2022-06 as of January 1, 2025, are now presented in Operating income (loss). Similarly, in 2025, €25 million from the Carrying amount of intangible assets and property, plant and equipment disposed of (€11.2 million in 2024), which had been allocated to Exceptional income (loss) prior to the implementation of ANC Regulation No.°2022-06 as of January 1, 2025, are now presented in Operating income (loss).

The Income from disposals of financial fixed assets and the Carrying amount of financial fixed assets must be presented in Financial income (loss) rather than in Exceptional income (loss). Imerys S.A. already applied this policy prior to the introduction of Regulation No. 2022-06. The net impact is immaterial.

2) Transfer of expenses

The abolition of the expense transfer technique results in the classification of transactions that, prior to the application of the new regulation, were recognized under "Amortization, depreciation, write-downs and provisions and transfer of expenses", in other items of income or expenses. As of December 31, 2024, transfers of expenses were zero. As of December 31, 2025, the issuance cost related to the new bond, amounting to €2.3 million, were recorded in the balance sheet assets under "Bond issuance cost" and amortized on a straight-line basis over the duration of the corresponding bonds. This method was retained by Imerys S.A. in the framework of the application of ANC Regulation No. 2022-06 as of January 1, 2025 on the modernization of financial statements.

B) Presentation of the comparative column (2024 financial year)

Reclassifications and regroupings have been made in the comparative column "12-31-2024", between lines in the balance sheet or income statement, to comply with the new format for the financial statements. The main presentation reclassifications in the comparative column are:

- intangible assets in progress (€21.3 million) are grouped together with advances and down payments (zero balance);
- provisions (€39.9 million), previously presented on a single line, are broken down into provisions for risks (€35 million) and provisions for expenses (€4.9 million);
- the "Prepaid expenses" line is moved up to lie between "Receivables" and "Marketable securities";
- transfers of operating expenses are presented in "Amortization, depreciation, write-downs and provisions".

C) Balance sheet and income statement for the year ended December 31, 2024, as approved and published

NOTES TO THE INCOME STATEMENT

Note 1. Operating income (loss)

(€ thousands)	**2025**	2024	Change
Operating revenue	176,617	157,448	19,169
Operating expenses	(221,135)	(196,126)	(25,009)
Operating income (loss)	**(44,518)**	**(38,678)**	**(5,840)**

In 2025, Operating income consisted of €143.8 million from Group services, €7 million from miscellaneous re-invoicing and €0.2 million from guarantee fees. It also consisted of €25 million in Proceeds from disposals of intangible assets and property, plant and equipment, which had been allocated to Exceptional income before the implementation of ANC Regulation No. 2022–06 as of January 1, 2025.

Revenue of €151 million includes Export sales for €105 million and sales in France for €46 million.

The change in Operating expenses is mainly due to the item Carrying amount of intangible assets and property, plant and equipment disposed of, amounting to €25 million, which had been allocated to Exceptional income before the implementation of ANC Regulation No. 2022-06 as of January 1, 2025. The change is also explained by an increase in Provisions (**note 11**) of €24 million and a decrease in Purchases and external services of €19.8 million.

Purchases and external services break down as follows:

(€ thousands)	**2025**	**2024**
Leasing and service charges	9,096	8,469
Purchases of non-inventory items	(292)	(178)
Staff and services re-invoiced by the Group	31,887	37,634
IT services	12,452	12,919
Fees[1]	28,300	40,716
Travel and entertainment	2,486	2,664
Telecommunications expenses	2,368	3,022
Insurance	1,648	1,623
Other services (Subscriptions, transport, documentation)	1,063	1,933
Purchases and external services	**89,008**	**108,802**

1 The item Fees decreased by €12.4 million, mainly due to the decrease in consulting fees related in particular to the proposed sale of the business serving the paper market.

Other expenses break down as follows:

(€ thousands)	**2025**	**2024**
Royalties and concessions: patents and licenses	5,962	4,135
Attendance fees	707	658
Miscellaneous operating expenses	1,040	22
Penalties	221	0
Other expenses	**7,930**	**4,814**

Note 2. Financial income (loss)

(€ thousands)	2025	2024
Financial income	**473,767**	**534,378**
From subsidiaries and affiliates[1]	358,247	393,636
From other investment securities and receivables on non-current assets[1]	40,180	46,481
Commodity hedging products[1]	16,533	39,440
Other interests and similar income[1]	21,377	43,505
Reversal of provisions and impairment losses	7,188	4,012
Positive exchange rate differences	26,613	1,339
Income from disposals of financial fixed assets	286	866
Net income from disposals of investment securities and cash instruments	3,342	5,100
Financial expenses	**(127,751)**	**229,204**
Increase in amortization, depreciation and provisions	(9,354)	(38,393)
Commodity hedging charges[2]	(17,542)	(38,969)
Similar interests and expenses[2]	(99,463)	(129,489)
Negative exchange rate differences	(807)	(21,921)
Carrying amount of fixed financial assets disposed of	(585)	(431)
Net expenses on disposals of investment securities and cash instruments	0	0
Financial income (loss)	**346,016**	**305,174**
1 Of which revenue related to controlled entities	407,543	474,675
2 Of which expenses related to controlled entities	35,036	58,550

Revenue from subsidiaries and affiliates amounted to €358.2 million, down €35.4 million on 2024, relating to a decline in dividends paid by Mircal in 2025. Imerys S.A. manages the currency risk related to changes in directly or indirectly held foreign net assets, as well as that resulting from loans and advances granted to subsidiaries and affiliated entities under cash pooling agreements, by adjusting the proportion of its debt denominated in foreign currencies. In 2025, Imerys S.A. recognized in this respect a net foreign exchange gain of €25.8 million (compared with a €20.6 million net foreign exchange loss in 2024). Increases and decreases in financial provisions are presented in note 11.

Imerys S.A. also manages, for the Group, the risk associated with fluctuations in the prices of raw materials used in its industrial processes.

Note 3. Exceptional income (loss)

(€ thousands)	2025	2024
Proceeds from disposals of intangible assets and property, plant and equipment	0	11,240
Carrying amount of intangible assets and property, plant and equipment disposed of	0	(11,240)
Increase in provisions	0	(1,570)
Other exceptional expenses	0	(3)
Exceptional income (loss)	**0**	**(1,573)**

In 2025, Exceptional income is zero because no income or expenses are directly related to an event considered to be major and exceptional, and there are no records related to tax transactions (i.e. excess tax depreciation), error corrections or changes in accounting method that would not be recorded in equity.

In 2024, Exceptional income included Proceeds from disposals of intangible assets and property, plant and equipment for €11.2 million, and the Carrying amount of intangible assets and property, plant and equipment disposed of for €11.2 million. These items are now presented in Operating income (loss). In 2024, Exceptional income (loss) also included provisions of €1.6 million.

Note 4. Income tax

(€ thousands)	2025	2024
Tax on long-term capital gains	-	-
Income tax	15,730	14,703
TOTAL	**15,730**	**14,703**

BREAKDOWN OF TAX EXPENSES

(€ thousands)	Profit or loss before tax	Tax	Profit or loss after tax
Current income	301,498	0	301,498
Exceptional income (loss)		0	0
Impact of tax consolidation		15,730	15,730
Total	**301,498**	**15,730**	**317,228**

In accordance with the terms of the tax consolidation agreements signed by each Imerys group company in France, the tax expense or income recognized in the accounts of Imerys S.A. is made up of:

- the tax expense of Imerys S.A., calculated on a stand-alone basis; and
- the net amount of additional expenses and income resulting from tax consolidation.

In this respect, Imerys S.A. recognized income of €15.7 million in 2025 (€14.7 million in 2024).

In 2025, Imerys S.A. recorded a loss of €42.1 million on a stand-alone basis. Imerys S.A. carried forward losses on a stand-alone basis for a cumulative amount of €1,535.8 million at December31, 2025 (€1,541.6 million at December 31, 2024).

06

Tax credits

Imerys S.A. centralizes the following tax credits for the tax consolidation group:

(€ thousands)	2025	2024
Research tax credit	22,921	18,526
Total	**22,921**	**18,526**

Deferred tax

The deferred tax position is due to temporary differences in the treatment of certain items of revenue and expenses between tax rules and accounting rules. In accordance with French generally accepted accounting principles, decreases and increases in the future tax expense resulting from such differences are not recognized but must be disclosed as follows:

(€ thousands)	2025	2024
Deferred tax assets (decrease in the future tax expense)	3,658	2,518
Deferred tax liabilities (increase in the future tax expense)	783	1,577

The tax rate applied for 2025 is 25.83% (same as for 2024).

The bases for the deferred tax assets and liabilities mainly consist of unrealized translation gains and losses as well as provisions for vacation pay and pensions that are deductible the following year.

NOTES TO THE BALANCE SHEET

Note 5. Change in intangible assets and property, plant and equipment

Intangible assets

This item mainly includes:

- Software recognized at its acquisition cost or production cost (including acquisition expenses);
- Development costs that are capitalized if they meet the specific conditions for capitalization.

Software and licenses acquired by the Company are recognized in the balance sheet at their acquisition cost or production cost (including acquisition expenses).

IT solutions are capitalized if they meet the following six criteria, in accordance with article 212-3 of the PCG (Plan Comptable Général – General Accounting Plan):

- Technical feasibility of the project;
- Intention to complete the project;
- Capacity to use it or sell it;
- Generation of future revenues;
- Sufficient resources to complete, use or sell the product;
- Capacity to reliably measure the costs.

Property, plant and equipment

Property, plant and equipment are measured at acquisition cost or contribution value.

Depreciation methods are representative of economic depreciation; therefore, no excess tax depreciation was recognized as a liability on the balance sheet.

(€ thousands)	Useful life	Amount 12/31/2024	Increases	Decreases	Transfer	**Amount 12/31/2025**

Net carrying amount: property, plant and equipment		**2,209**	**1,478**	**0**	**0**	**3,688**

In 2025, Imerys S.A. continued to invest in its management IT systems (OPERA project), which are amortized over a period of 8 years using the straight-line method. In 2025, €26.7 million of fixed assets relating to this project were transferred to the balance sheet; of which €25.6 million was transferred to Imerys S.A.'s subsidiaries (Asia, USA, Europe).

Note 6. Change in the value of investments

Equity investments and other financial investments are recorded in the balance sheet at their acquisition cost excluding incidental costs or their contribution value.

The Company has opted to recognize acquisition expenses in the cost price of these investments.

At each reporting date, the asset value is determined on the basis of the value in use or the market value, depending on which is higher.

The value in use is calculated according to a mixed approach based on the net carrying amount and the restated net asset value.

Any unrealized gains included in the restated net asset value can be estimated on the basis of cash flow projections and profitability aggregate multiples.

The main assumptions used are:

- A long-term growth rate;
- A discount rate according to the business area and region concerned.

Where the fair value exceeds the carrying amount recorded on the balance sheet, the latter is not modified.

If this is not the case, an impairment of equity interests is recognized.

Investments in foreign currencies are not remeasured at the closing exchange rate. Unrealized losses from fluctuations in foreign currencies in which long-term investments are denominated are not intended to be realized. Therefore, unrealized foreign exchange losses are not in themselves sufficient to systematically justify a write-down.

The total gross amount of equity investments amounted to €4,500 million as at December 31, 2025 (€4,610 million as at December 31, 2024).

(€ thousands)	Gross amount 12/31/2024	Increases	Decreases	Transfer	**Gross amount 12/31/2025**

Total impairment of investments	**(34,000)**	**0**	**0**	**(34,000)**

Note 7. Receivables, accruals and deferred income

A provision for impairment is recognized in respect of receivables when the current value, determined with regard to the risk of non-recovery, is lower than the carrying amount.

Receivables in foreign currencies are translated at the closing exchange rate. The difference resulting from this translation is recorded under unrealized translation gains or losses. In the absence of hedging, an unrealized loss results in the booking of a provision for risks under liabilities.

(€ thousands)	Gross amount	Maturity in less than 1 year	Maturity from 1 to 5 years	Maturity beyond 5 years
Loans and receivables related to investments	**520,634**	**24,187**	**299,420**	**197,027**

Total	**864,419**	**360,522**	**305,741**	**198,157**

1 Other receivables include €4.4 million in bond issuance premiums, reversed on a straight-line basis over the duration of the corresponding bonds.

2 The financial current accounts previously presented as Loans and receivables related to investments are, as of January 1, 2025, reclassified as Other receivables (see Accounting principles and policies). They amount to €193 million in gross value in 2025.

3 Prepaid expenses mainly comprise purchases of external services.

4 Bond issuance costs are reversed on a straight-line basis over the life of the corresponding bonds.

5 Unrealized translation gains and losses derive from remeasuring loans and receivables in foreign currencies at the closing exchange rate and valuation adjustments on cash instruments.

Loans and receivables related to investments

Loans and receivables are valued at their nominal value. All of these items are written down where there is a risk of non-recovery.

The gross amount of loans and receivables related to investments decreased by €86.5 million, mainly for Imerys USA, Imerys Ceramics France, and Imerys Lithium France.

Loans and receivables related to direct investments correspond to loans granted to directly held entities (note 6). Loans and receivables related to other Group subsidiaries are governed by loan agreements and concern subsidiaries of the Group.

(€ thousands)	Amount 12/31/2024	Net increase	Net decrease	Reclassification as Other receivables[1]	**Gross amount 12/31/2025**
Loans and receivables related to direct investments	341,345		(41,310)		300,035

Total impairment	**(23,403)**	**(831)**	**0**	**7,577**	**(16,657)**
Loans and receivables related to equity investments (net)	**776,769**	**(831)**	**(86,501)**	**(185,460)**	**503,977**

1 The financial current accounts previously presented as Loans and receivables related to investments are, as of January 1, 2025, reclassified as Other receivables (see Accounting principles and policies). They amount to €185 million in net value in 2025, compared to €183 million in 2024.

Note 8. Other financial investment

At end-2025, Other financial investment totaled €14.8 million, down €2.8 million compared with the position at December 31, 2024. This heading consists of the following items:

(€ thousands)	Gross amount 12/31/2024	Increases	Decreases	**Gross amount 12/31/2025**
Collateral, deposits and guarantees	18	1,550		1,568
Treasury shares	17,654		(4,378)	13,276
Other non-consolidated investments	5		(5)	0
Total other financial investments	**17,677**	**1,550**	**(4,383)**	**14,844**

Treasury shares

When the Company buys back its own shares, they are recognized at their acquisition cost as treasury shares, under other financial investments, if they are not specifically bought back to stabilize the stock market price or intended for employees.

When their acquisition cost is higher than their average market price of the last month of the financial year, a provision for impairment is recognized in respect of these shares, except for those that are to be canceled. Treasury shares bought back to stabilize the share price on the market or to be used for employee share plans are classified as marketable securities.

(€ thousands)	Write-downs at 12/31/2024	Increase	Decrease	**Write-downs at 12/31/2025**
Treasury shares	173	217	(173)	217
Total impairment of financial fixed assets	**173**	**217**	**(173)**	**217**

Note 9. Marketable securities and cash instruments

Money market funds are recognized at their acquisition cost. Their value in use is assessed at the last known redemption price for money market funds. Unrealized losses result in a write-down and unrealized gains are not recognized.

Treasury shares acquired with the express objective of being subsequently allocated to employees are recorded under *"marketable securities"*.

When the acquisition cost is higher than the average market price of the last month of the financial year, an impairment provision is recognized in respect of the shares concerned, except for those intended for employees and allocated to determined plans, the latter being subject to a provision for risks as they are intended to cover performance share plans and stock options.

In 2025, term accounts amounting to €370 million were subscribed, generating €0.6 million in interest.

NUMBER OF SHARES MAKING UP THE SHARE CAPITAL

	2025	2024
Number of shares outstanding at the beginning of the period	**84,940,955**	**84,940,955**
Capital increase		
Capital decrease		
Number of shares outstanding at the end of the period	**84,940,955**	**84,940,955**

Imerys' fully paid-up share capital amounted to €169,881,910 divided into 84,940,955 shares, each with a par value of €2.

At December 31, 2025:

- parent company shareholders' equity amounted to €3,011 million (€2,817.0 million at December 31, 2024) on the basis of which the Board of Directors has proposed a dividend of €0.75 per share (€1.45 in 2024);
- 1,293,750 free shares were granted to certain employees and executive corporate officers that have not been exercised or not yet vested, which represents 1.50% of the share capital of Imerys S.A. after dilution (1.43% of the share capital after dilution at December 31, 2024);
- after transactions made throughout the year to purchase, sell, cancel or transfer shares, Imerys S.A. held 548,663 Imerys shares (527,416 shares at December 31, 2024).

Part of the Group's financing is secured through debt instruments, issued on the condition of compliance with a ratio related to the amount of consolidated shareholders' equity, and is subject to banking covenants defined on the basis of consolidated financial statement aggregates.

The share capital has not changed and the number of voting rights did not undergo any significant change between December 31, 2025 and February 19, 2026, i.e. the date on which the annual financial statements at December 31, 2025 were approved by the Board of Directors.

CHANGE IN TREASURY SHARES

(€ thousands)	2025	2024
Gross value of treasury shares at January 1	**17,947**	**16,524**
Disposals (acquisitions) of treasury shares	9,805	14,915

Capital decrease by canceling treasury shares		
Gross value of treasury shares at December 31[1]	**15,393**	**17,947**

1 At December 31, 2025, treasury shares were recognized under other financial investments for €13.3 million and under marketable securities for €2.1 million.

Note 11. Write-downs and provisions

11.1. Provisions for risks and expenses

Accounting policy

Provisions for risks and expenses are recorded in the case of an obligation to a third party where it is likely or certain that this obligation will result in an outflow of resources that can be reliably measured to the third party with no equivalent compensation expected from said third party.

Contingent liabilities are not recognized but are disclosed in the notes to the financial statements, unless the probability of an outflow of resources is very low.

Provisions for risks

Provisions for risks cover identified risks and are determined as follows:

- provisions for management risks include ongoing disputes relating to recurring operations;
- provisions for tax risks concern disputes with the tax authorities;
- provisions for restructuring relate to restructuring plans that have been officially approved and initiated before the end of the reporting period;
- provisions for the risk of fluctuations in the value of certain equity investments are determined in accordance with the latest financial information available taking into account the outlook for the future; in particular, a provision is booked in the case of a residual risk on a subsidiary once all the corresponding assets have been written down;
- provisions for risks relating to free share grants are determined according to their maturity, on the basis of the opening share price at the date of their allocation to the plan or, if the shares have not been purchased before the end of the reporting period, at the share price at that date, in accordance with CNC Recommendation No. 2014-03 issued by France's national accounting standards commission.

When a performance share plan is set up via the grant of existing shares, a provision is recognized. It is based on an estimate of the final number of shares definitively allocated using assumptions for employee turnover and the achievement of economic and/or financial performance targets to which allocations of these shares are contingent and proportionate. This provision is calculated based on the weighted average price of the treasury shares at the end of the financial year for the part covered by treasury shares. The provision is valued at market price for commitments not covered by treasury shares. As the grant of performance shares or shares contingent on the condition of ongoing employment constitutes a compensation component, this provision is recognized in staff expenses in the case of Company beneficiaries. The commitment relating to the Group's other beneficiaries is provided for in full as soon as the shares are awarded and is recharged to the subsidiaries concerned. These items constitute components of Operating income (loss). Increases and decreases in provisions and expenses for employer contributions are presented in staff expenses.

Provisions for expenses

Provisions for expenses include:

- provisions for the refurbishment of the company headquarters;
- provisions for complementary pension plans and retirement benefits for former employees;
- the retirement indemnities expense, calculated using the Projected Unit Credit Method.

(€ thousands)	Amount at the beginning of the year	Increases			Decreases: Reversals for the financial year [1]			Amount at the end of the year

1 No reversal of unused provisions in 2025.

As head of the Group, Imerys S.A. recognizes provisions for management risk, specifically in relation to future performance share grants. In 2025, a €3 million net provision for risks was set aside in view of future performance share grants with respect to shares not yet acquired. A provision of €6.1 million has been allocated for management risks.

In 2025, a provision for charges labeled "Talc dispute provision – Chapter 11" in relation to the Group's North American talc subsidiaries was set aside for €15.9 million (see details in Highlights of the year).

Increases in financial provisions relate to the impairment of equity interests in SB Minerals Participations. The write-down of loans and receivables related to investments relates to the loans granted by Imerys S.A. to its Ukrainian subsidiaries due to the geopolitical context.

11.2. Contingent liabilities and disputes

Following Imerys' sale of a group of assets serving the paper market in Europe, the US and Asia to the investment fund Flacks Group finalized on July 5, 2024, two proceedings were initiated.

One was brought by Imerys in December 2024 in the US with a view to obtaining the settlement of a portion of the sale price that remained unpaid. Imerys was successful at trial. Flacks has appealed the decision and the appeal process is ongoing.

The other was brought in February 2025 by Artemyn Minerals France (acquisition vehicle for Flacks Group) against Imerys before the Paris court of economic affairs (Tribunal des activités économiques de Paris), seeking compensation for various damages allegedly suffered following the sale. Imerys intends to reject all of the claims brought by Artemyn, which face a number of obstacles both in fact and in law.

11.3. Future employee benefits

The defined benefit plans include both retirement benefits awarded in accordance with the collective bargaining agreement applicable to the metalworking industry, and complementary retirement plans, which have not taken on any new active beneficiaries since 2008. The Company assesses its provision for the retirement indemnities expense using the Projected Unit Credit Method.

In accordance with ANC recommendation No. 2013-02, the Company has recognized past service costs immediately in profit and loss and determined the return on plan assets at a discount rate set to calculate the current value of the commitment.

The provision for future employee benefits is calculated using the following assumptions:

	Pension plans	Other long-term employee benefits
Discount rate	3.7%	3.7%
Expected rate of salary increases	3.0%	3.0%
Annual turnover rate:		
– Managers and non-managers under 30 years old	8.4%	8.4%
– Managers and non-managers between 30 and 39 years old	5.7%	5.7%
– Managers and non-managers between 40 and 49 years old	4.0%	4.0%
– Managers and non-managers between 50 and 55 years old	2.3%	2.3%
– Managers and non-managers over 55 years old	0.0%	0.0%

Note 12. Debt, accruals and deferred income

Debt in foreign currencies is translated at the closing exchange rate. The difference resulting from this translation is recorded under unrealized translation gains or losses. In the absence of hedging, an unrealized loss results in the booking of a provision for risks under liabilities.

(€ thousands)	Amount	Maturity in less than 1 year	Maturity from 1 to 5 years	Maturity beyond 5 years
Financial debt	2,195,426	43,811	1,251,615	900,000
Other debts[1]	691,221	691,221	-	-
Deferred income	-	-	-	-
Unrealized translation gains	79,191	79,191	-	-
Total	**2,965,838**	**814,223**	**1,251,615**	**900,000**

1 Other debts include intra-group debt, €18.4 million of which relates to tax consolidation in France and €3.1 million to trade payables.

Commission due and external costs incurred in connection with new borrowings, which are recognized in "Bond issuance cost", are spread on a straight-line basis over the term of the borrowings.

Bond redemption premiums are amortized on a straight-line basis over the term of each bond.

The financial current accounts previously presented in Financial debt are, as of January 1, 2025, reclassified as Other debts. They represent €670 million in 2025 compared to €1,211 million in 2024.

Fixed-rate bonds are included in Financial debt and break down as follows:

				Interest rate		
Nominal amount *(in million)*	Currency	Maturity	Listing	Nominal	Effective rate	Carrying amount
500.0	EUR	11/29/2029	Listed	4.75%	4.82%	501.0
343.5	EUR	01/15/2027	Listed	1.50%	1.63%	348.0
300.0	EUR	03/31/2028	Listed	1.88%	1.92%	304.0
300.0	EUR	07/15/2031	Listed	1.00%	1.07%	300.4
600.0	EUR	11/21/2032	Listed	4.00%	4.04%	601.1
Total at December 31, 2025 *(€ million)*						**2,054.5**

1 The carrying amount is the principal plus interest, less issuance premiums.

The carrying amount is the principal plus interest, less issuance premiums.

The Group's various bank overdrafts do not provide any security or guarantee to the benefit of the lending banks. The following table presents the breakdown of financial debt by foreign currency:

(€ thousands)	Amount
EUR	2,110,905
GBP	4,187
MXN	19,248
USD	59,971
Other foreign currencies	1,114
Total	**2,195,426**

The following table analyzes financial debt by type and maturity:

(€ thousands)	Amount	Maturity in less than 1 year	Maturity from 1 to 5 years	Maturity beyond 5 years
Bonds	2,043,500		1,143,500	900,000

(€ thousands)	Accrued income	Accrued charges
Operating	**15,455**	**11,002**

1 Accrued income consists essentially of the re-invoicing of free shares for €14.5 million.

OTHER INFORMATION

Note 14. Derivatives

Management principles

As the holding company of the Imerys group, Imerys S.A. implements the Group's risk management strategy relating to the financial market risks identified within the Group: currency risk, interest rate risk and energy price risk. Derivatives subscribed by Imerys S.A. are intended solely to hedge the financial risks to which the Group is exposed. Derivatives are negotiated centrally by the Group Treasury Department on over-the-counter markets with the highest rated banking institutions. Imerys prohibits its entities from subscribing derivatives directly with entities outside the Group.

Accounting policy

A derivative qualifies as a hedge if it is the subject of documentation identifying the hedged item, the type of hedging instrument, the type of risk hedged, the hedging relationship and the method used to assess its effectiveness. At the time of subscription, the nominal value of the derivative is recognized in off-balance sheet commitments (note 16 – Commitments on interest rate risk). Realized and unrealized interest coupons are recognized symmetrically with the hedged item in the income statement.

Isolated open position. Any derivative that does not meet the documentation criteria of a simple hedge is classified as an isolated open position. This designation applies in particular to derivatives subscribed to hedge currency risk (swaps, forwards and options) and energy price risk (swaps and options).

At the time of subscription, the nominal value of the derivative is recognized in off-balance sheet commitments (note 16 – Commitments on currency risk, Commitments on energy price risk). Subsequently, the fair value of derivatives is measured as follows:

- As regards currency risk, the value of derivatives measured at the closing exchange rate is aggregated with the value of the underlying assets (loans and borrowings in foreign currencies) in a comprehensive foreign exchange position, calculated by currency or strongly correlated currencies. The resulting unrealized exchange rate gains and losses are recognized separately in accruals and deferred income – in assets for unrealized exchange rate losses (note 7) and in liabilities for unrealized exchange rate gains (note 12). A provision is recognized to fully cover unrealized exchange rate losses (note 11).
- As regards energy price risk, the value of derivative instruments measured at the closing price is aggregated into a comprehensive commodity position calculated for all energy sources. A provision is recognized to fully cover unrealized losses (note 11).

Fair value

The following table presents the derivatives held by Imerys S.A. at the end of the reporting period for interest rate risk (simple hedging) as well as foreign exchange and energy price risks (isolated open positions).

	2025				
	Derivative assets		Derivative liabilities		Net
(€ million)	External	Internal	External	Internal	
Currency risk (forwards, swaps, options)	**8.2**	**1.4**	**1.8**	**7.7**	**0.2**

Forward derivatives	0.0	0.0	2.3	0.0	(2.3)
Options derivatives	0.3	0.0	0.0	0.0	0.3
Energy price risk (swaps, options)	**5.0**	**19.6**	**19.8**	**5.6**	**(0.8)**
Forward derivatives	5.0	19.6	19.8	5.6	(0.8)
Options derivatives	0.0	0.0	0.0	0.0	0.0
Total	**13.5**	**21.0**	**23.9**	**13.3**	**(2.7)**

Note 15. Tax consolidation

Since 1993, Imerys S.A. and some of its French subsidiaries have been taxed in accordance with Article 223-A of the French Tax Code (Code général des impôts) on group tax consolidation. The Imerys Diatomite Saint-Bauzile & Riom entity entered the scope of tax consolidation in 2025 and the Imerys Lithium France entity exited it. At December 31, 2025, the tax consolidation scope included the following 21 entities:

- Ardoisières d'Angers
- Imertech
- Imerys S.A.
- Imerys Aluminates SA
- Imerys Ceramics France
- Imerys Diatomite Saint-Bauzile & Riom
- Imerys Filtration France
- Imerys Beyrede
- Imerys PCC France
- Imerys Minéraux France
- Imerys Clerac
- Imerys Glomel
- Imerys Greenelle One
- Imerys Greenelle Two
- Imerys Services
- Imerys Tableware France
- Imerys Talc Europe SAS
- Imerys Talc Luzenac France
- Imerys Aluminates Corporate SAS
- Mircal
- Parimetal

Relationships within the tax group, headed by Imerys S.A., are governed by an agreement that sets out the following principles:

- each entity in the tax group recognizes in its accounts the amount of tax that it would have paid on a stand-alone basis;
- all additional liabilities arising as a result of tax consolidation are recognized by Imerys S.A., which benefits from any savings resulting from consolidation.

Note 16. Off-balance sheet commitments

Endorsements, sureties and guarantees

At December 31, 2025, the amount of confirmed, non-utilized and available multi-currency bilateral credit lines granted to Imerys and maturing between 2026 and 2030 totaled €960 million.

The following table presents the amount of commitments received and given for endorsements, sureties and guarantees to equity investments (direct investment), subsidiaries (indirect investment) and other entities:

COMMITMENTS GIVEN

(€ thousands)	Equity investments	Other controlled companies	Other	Total
Endorsements, sureties and guarantees	33,425	181,234	1,182	215,841

Type of transaction	Warranties given
Cash warranty	215,841
Seller warranty	70,090

Commitments on currency risk

The following table presents the breakdown of net forward purchase and sale commitments by foreign currency at December 31, 2025 (the equivalent value in thousands of euros is presented in the two right-hand columns):

These transactions were entered into to hedge the currency risk generated by intra-group funding and investments in foreign currencies.

Commitments on interest rate risk

As part of the management of interest rate risk, Imerys S.A. held interest rate swaps at a nominal amount of €260 million as at December 31, 2025.

Commitments on energy price risk

Imerys S.A. signed a Virtual Power Purchase Agreement (VPPA) on August 5, 2025, for an expected total production of 198,500 MWh per year over 10 years. This VPPA contract makes it possible to secure the supply of Guarantees of Origin (GO) which are purchased centrally by Imerys S.A. on behalf of the Group's European subsidiaries responsible for the energy consumption covered.

The following table presents the positions taken (outside the Group) at December 31, 2025 to hedge energy price risk:

	Net notional amounts *(MWh)*	Maturity
Underlying position	17,532,236	<60 months
Management transactions	5,273,432	<60 months

Note 17. Items recognized in more than one line on the balance sheet (net value)

6.3 Statutory auditors' reports

6.3.1 Statutory auditors' report on the consolidated financial statements

For the year ended December 31, 2025

To the annual general meeting

IMERYS

43 quai de Grenelle

75015 PARIS

This is a translation into English of the statutory auditors' report on the financial statements of the Company issued in French and it is provided solely for the convenience of English-speaking users. This statutory auditors' report includes information required by European regulation and French law, such as information about the appointment of the statutory auditors or verification of the management report and other documents provided to shareholders. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

Opinion

In compliance with the engagement entrusted to us by the general meeting, we have audited the accompanying consolidated financial statements of Imerys ("the Group") for the year ended December 31, 2025.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as of December 31, 2025, and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union.

The audit opinion expressed above is consistent with our report to the Audit Committee.

Basis for Opinion

Audit Framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Statutory Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report.

Independence

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (*code de commerce*) and the French Code of Ethics (*code de déontologie*) for statutory auditors, for the period from January 1st, 2025, to the date of our report and specifically we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No 537/2014.

Justification of Assessments - Key Audit Matters

In accordance with the requirements of Articles L.821-53 and R.821-180 of the French Commercial Code (*code de commerce*) relating to the justification of our assessments, we inform you of the key audit matters relating to risks of material misstatement that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period, as well as how we addressed those risks.

These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on specific items of the consolidated financial statements.

Measurement of the recoverable amount of goodwill

Notes 1, 19 & 22 of the consolidated financial statements

Risk identified

The carrying value of goodwill on the balance sheet amounts to € 1 347.3 million as of December 31, 2025. Such goodwill is subject to impairment testing as described in Note 22 of the notes to the consolidated financial statements.

An impairment test of goodwill is carried out every 12 months at the end of the period. During the year, management reviews any indicator of impairment for group of CGUs. As soon as facts indicating that a group of CGUs may be impaired, management performs an impairment test at an interim date. As of December 31, 2025, a goodwill impairment of € 467.4 million was recognized on the RAC CGU (Refractories, Abrasives & Construction), as described in Notes 1 and 22 to the notes to the consolidated financial statements.

An impairment test consists in comparing the carrying value of the assets in the scope of IAS 36 with its recoverable amount, corresponding to the highest amount between its value in use, estimated based on discounted future cash flows and its fair value less cost to sell.

We considered the measurement of the recoverable amount of goodwill to be a Key Audit Matter for the following reasons:

- the amount of goodwill is material in the consolidated financial statements;
- the sensitivity of the tests carried out to certain major data and assumptions and to management's judgments. These data and assumptions include in particular the levels of expected organic growth underlying the projected cash flows, the perpetual growth rates and the discount rates.

Our response

Our audit procedures mainly consisted in:

- reviewing the process implemented by management to measure the recoverable amount of goodwill and to assess the principles and methods for determining the recoverable amounts of the groups of CGUs to which the goodwill is allocated ;
- assessing, with the support of our valuation experts:
  - the reasonableness of the cash flow projections relating to each group of CGUs compared to the economic and financial context in which they operate ;
  - the consistency of these cash flow projections with the budget and medium-term plan as presented by management to the Board of Directors, taking into account the market outlook and the risks related to climate change and with external studies related to the markets served by the group ;
  - the relevance of the measurement models used, the reasonableness of hypothesis applied to the projected cash flows, mainly long-term growth rate and discount rates, with regards to market analyses, the consensus of the main players and the economic environment of countries in which the Group operates. We also verified the arithmetical accuracy of these models and their consistency with the main source data.

We have also assessed the appropriateness of the information disclosed in note 22 to the consolidated financial statements and verified the arithmetical accuracy of sensitivity analyses performed by management.

Valuation of provisions for the industrial sites dismantling and mining sites restoration

Note 26.2 of the consolidated financial statements

Risk identified

As described in note 26.2 to the consolidated financial statements, Imerys is subject to different regulatory requirements relating to the restoration of its mines as well as industrial sites dismantling obligations.

Provisions have been recognized on the balance sheet for this purpose, for an amount of € 219.8 million as of December 31, 2025 (€ 127.7 million for mining site restoration and € 92.1 million for dismantling obligations).

The calculation of these provisions requires management's judgement and relies on assumptions to:

- estimate the useful life of the mines and industrial sites ;
- evaluate the restoration and dismantling obligation costs and the respective implementation timetables, depending on each site's specificities and local regulatory requirements ;
- determine the discount and inflation rates applied to forecasted costs.

Management also relies on in-house experts to determine the main assumptions, and the expected impacts, where applicable, of regulatory changes.

The valuation of provisions for industrial sites dismantling and mining sites restoration obligations are therefore considered to be a Key Audit Matter given the high level of management judgement required for their determination.

Our response

We performed a critical review of restoration and dismantling obligations, as well as provisions recorded, and disclosures provided. Our work mainly consisted in:

- Examining the procedures implemented by management to identify, assess and account for these provisions and have performed certain specific tests on a sampling of operating entities. As part of those tests:
  - We have examined the competence of the in-house experts used by the Group;
  - We have assessed the appropriateness of the method adopted and analyzed the reasonableness of the cost estimates with respect to applicable legal, regulatory or contractual requirements;
  - We have assessed, with the support of our valuation experts, the relevance of the models used, the discount and inflation rates applied, in light of market practices, and verified their arithmetical accuracy and their consistency with the main source data.
- Analyzing, for the other entities, the changes in provisions to identify any possible inconsistencies with respect to our understanding of the relevant site restoration or dismantling programs.
- Verifying that Note 26.2 to the Group consolidated financial statements contains the appropriate disclosures on the restoration and dismantling obligations.

Assessment of the financial impacts relating to the talc litigation

Note 26.2 of the consolidated financial statements

Risk identified

Certain Group subsidiaries have been involved in litigations related to the talc business in the United States.

In February 2019, the North American talc subsidiaries exposed to these disputes filed for Chapter 11 bankruptcy protection. Under this procedure, even though the Group remains the legal owner of the relevant entities, Imerys lost its economic control over these entities to the benefit of creditors under the bankruptcy court's supervision. Therefore, they were removed from the Group's consolidation scope on February 13, 2019.

In May 2020, the North American talc subsidiaries and claimants' representatives filed a jointly proposed reorganization plan (the "Plan") which was approved by the Judge in January 2021. During this process, in October 2020, an agreement was concluded with Magris Resources for the sale of North American talc assets for a purchase price of USD 223 million and the sale was closed in February 2021.

The Plan was submitted to the vote of claimants but failed to obtain the required 75% favorable majority vote at the end of 2021. A new revised plan ("the Revised Plan") has been filed in 2025 and approved on January 5, 2025, by more than 90% of the claimants and creditors of the subsidiaries concerned. Your group has therefore achieved the legally required approval threshold.

The Revised Plan entered the confirmation process before the Bankruptcy Court in April 2025. Following the court's request for certain clarifications regarding the terms of the Revised Plan, the relevant parties decided to suspend the confirmation hearings in order to negotiate further amendments to the Revised Plan.

After Imerys Talc Italy's voluntary withdrawal from its Chapter 11 proceedings in July 2025 and additional negotiations among all relevant parties, a final version of the Revised Plan was filed with the court in January 2026 (the "New Revised Plan"). This New Revised Plan reflects (i) Imerys Talc Italy's voluntary withdrawal from its Chapter 11 proceedings, (ii) the redefinition of the "Potential Foreign Claims" in response to the clarifications requested by the Bankruptcy Court, and (iii) a commitment to fund defense costs related to such Potential Foreign Claims, subject to a maximum additional contribution of USD 4 million.

The confirmation hearings of the New Revised Plan before the Bankruptcy Court took place in early February 2026. Subject to approval of the New Revised Plan by the Bankruptcy Court, its decision will be submitted for confirmation to the Federal Court of the State of Delaware. These judicial decisions will remain subject to potential appeals by third parties. As of December 31, 2025, the balance of the provision recognized in respect of these litigations amounts to € 99.7 million.

The assessment of a provision depends on management's judgment of making a reliable estimate of the resulting obligation and all the related costs, where necessary. Considering the material financial impacts for the Group and the decisive nature of the judgments and estimates made by management to assess the potential liability, we considered the assessment of this provision to be a Key Audit Matter.

Our response

We assessed the reasonableness of the provision recorded in the balance sheet, based on:

- The declaration of the official results of the votes on this Revised Plan registered with the court on January 5, 2025
- The New Revised Plan filed in January 2026
- Extracts from the minutes of the Group's various Board of Directors' meetings, featuring the exchanges relating to this talc dispute in the US and the Chapter 11 proceedings
- Inquiries with management, especially with the Group General Counsel

We obtained confirmation from the external legal advisors representing the Company in connection with the Chapter 11 proceedings of its North American subsidiaries that the provision reflected a reasonable estimate of the net financial impact for the Group arising from the potential resolution of these proceedings.

We assessed the appropriateness of the information disclosed in the note 26.2 to the consolidated financial statements with 'IAS 37 "Provisions, contingent liabilities and contingent assets".

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verification required by laws and regulations of the Group's information given in the management report of the Board of Directors.

We have no matters to report as to their fair presentation and their consistency with the consolidated financial statements.

Report on Other Legal and Regulatory Requirements

Format of presentation of the consolidated financial statements intended to be included in the annual financial report

We have also verified, in accordance with the professional standard applicable in France relating to the procedures performed by the statutory auditor relating to the annual and consolidated financial statements presented in the European single electronic format, that the presentation of the consolidated financial statements intended to be included in the annual financial report mentioned in Article L.451-1-2, I of the French Monetary and Financial Code (*code monétaire et financier*), prepared under the responsibility of Chief Executive Officer, complies with the single electronic format defined in the European Delegated Regulation No 2019/815 of 17 December 2018. As it relates to consolidated financial statements, our work includes verifying that the tagging of these consolidated financial statements complies with the format defined in the above delegated regulation.

Based on the work we have performed, we conclude that the presentation of the consolidated financial statements intended to be included in the annual financial report complies, in all material respects, with the European single electronic format.

We have no responsibility to verify that the consolidated financial statements that will ultimately be included by your company in the annual financial report filed with the AMF are in agreement with those on which we have performed our work.

Appointment of the Statutory Auditors

We were appointed as statutory auditors of Imerys by the Annual General Meeting held on May 5 2003 for Deloitte & Associés and May 10, 2022 for PricewaterhouseCoopers Audit.

As at December 31, 2025, Deloitte & Associés and PricewaterhouseCoopers Audit were in the twenty-third year and the fourth year of total uninterrupted engagement, respectively.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Company or to cease operations.

The Audit Committee is responsible for monitoring the financial reporting process and the effectiveness of internal control and risks management systems and where applicable, its internal audit, regarding the accounting and financial reporting procedures.

The consolidated financial statements were approved by the Board of Directors.

Statutory Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Objectives and audit approach

Our role is to issue a report on the consolidated financial statements. Our objective is to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As specified in Article L.821-55 of the French Commercial Code (*code de commerce*), our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Company.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- Identifies and assesses the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the consolidated financial statements.
- Assesses the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the consolidated financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein.
- Evaluates the overall presentation of the consolidated financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtains sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. The statutory auditor is responsible for the direction, supervision and performance of the audit of the consolidated financial statements and for the opinion expressed on these consolidated financial statements.

Report to the Audit Committee

We submit a report to the Audit Committee which includes in particular a description of the scope of the audit and the audit program implemented, as well as the results of our audit. We also report, if any, significant deficiencies in internal control regarding the accounting and financial reporting procedures that we have identified.

Our report to the Audit Committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period and which are therefore the key audit matters that we are required to describe in this report.

We also provide the Audit Committee with the declaration provided for in Article 6 of Regulation (EU) N° 537/2014, confirming our independence within the meaning of the rules applicable in France such as they are set in particular by Articles L.821-27 to L.821-34 of the French Commercial Code (*code de commerce*) and in the French Code of Ethics (*code de déontologie*) for statutory auditors. Where appropriate, we discuss with the Audit Committee the risks that may reasonably be thought to bear on our independence, and the related safeguards.

6.3.2 Statutory auditors' report on the financial statements

(For the year ended December 31, 2025)

To the annual general meeting

IMERYS

43 quai de Grenelle

75015 Paris

This is a translation into English of the statutory auditors' report on the financial statements of the Company issued in French and it is provided solely for the convenience of English-speaking users. This statutory auditors' report includes information required by European regulation and French law, such as information about the appointment of the statutory auditors or verification of the management report and other documents provided to shareholders. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

Opinion

In compliance with the engagement entrusted to us by the general meeting, we have audited the accompanying financial statements of Imerys for the year ended December 31, 2025.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the company as of December 31, 2025 and of the results of its operations for the year then ended in accordance with French accounting principles.

The audit opinion expressed above is consistent with our report to the audit committee.

Basis for opinion

Audit framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "*Statutory auditors' responsibilities for the audit of the financial statements*" section of our report.

Independence

We conducted our audit engagement in compliance with the independence requirements of the French Commercial Code (*Code de commerce*) and the French Code of Ethics for Statutory Auditors (*Code de déontologie de la profession de commissaire aux comptes*) for the period from January 1st, 2025 to the date of our report, and specifically we did not provide any prohibited non audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014.

Emphasis of matter

We draw your attention to the note "Application of ANC Regulation No. 2022-06 relating to the modernization of the French General Chart of Accounts" in the notes to the annual financial statements, which describes the impacts related to the change in accounting methods arising from the first-time application of ANC Regulation No. 2022-06. Our opinion is not modified in respect of this matter.

Justification of Assessments - Key Audit Matters

In accordance with the requirements of Articles L.821-53 and R.821-180 of the French Commercial Code (*Code de commerce*) relating to the justification of our assessments, we bring your attention to the key audit matters relating to risks of material misstatement that, in our professional judgment, were of most significance in the audit of the financial statements of the current period, as well as our responses to those risks.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon. We do not provide a separate opinion on specific elements, accounts or items of the financial statements.

Valuation of equity interests

Notes 6 and 24 of the statutory financial statements

Risk identified

Equity interests, appearing on the balance sheet as of December 31, 2025 for a net amount of 4,466,198 thousand euros, represent the most significant balance sheet item. They are recognized on their entry date at acquisition cost

At each period-end closing, the fair value is determined based on the higher of value in use and market value. Value in use is calculated according to a mixed approach based on the accounting net assets and revalued net asset. Any unrealized capital gain included in the revalued net asset value may be estimated based on cash flow projections and multiples of profitability indicators. The main assumptions used are a long-term growth rate and a discount rate determined according to the segment and region.

Where the fair value exceeds the carrying amount recorded on the balance sheet, the latter is not modified. Otherwise, an impairment of equity interests is recorded. The estimate of the value in use of these securities requires management to exercise its judgment in its choice of items to consider according to the type of equity interests concerned. Such items may correspond to historical items such as equity, or forward-looking items such as profitability outlook and the economic situation.

Competition and the economic environment confronted by certain subsidiaries as well as the geographical location of some of them can lead to a decrease in their activity and a deterioration in their operating income. In this context and because of uncertainties inherent to certain items and specifically the probability of attaining forecasts, we considered the valuation of equity interests based on a value in use to be a key audit matter.

Our response

Our audit procedures mainly consisted in:

- assessing the valuation methods used by management;
- reconciling the retained equity with the source data from the accounts of the subsidiaries concerned and reviewing any adjustments made and the documentation underlying such adjustments;
- reviewing the correct determination of (i) value in use on the basis of the methods chosen by management and (ii) possible impairment and in particular:
  - obtaining cash flow forecasts for the entities concerned prepared by management and assessing their consistency with forecast data from the budget;
  - verifying the consistency of the assumptions adopted with the economic environment on the accounts closing and preparation dates;
  - reconciling the value resulting from cash flow forecasts adjusted for the amount of indebtedness of the entity with the net carrying amount of the securities on the balance sheet.
- reviewing the appropriateness of the disclosures in the following notes to the financial statements: Note 6 "Changes in equity interests" and Note 24 "Information on subsidiaries and affiliates".

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

Information given in the management report and in the other documents addressed to shareholders on the financial position and the financial statements

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report of the board of directors and in the other documents addressed to shareholders with respect to the financial position and the financial statements.

We attest that the board of directors' report on corporate governance contains the information required by Articles D.441-6 of the French Commercial Code.

Report on corporate governance

We attest that the board of directors' report on corporate governance contains the information required by Articles L L.225-37-4, L.22-10-10 and L. 22-10-9 of the French Commercial Code.

Concerning the information presented in accordance with the requirements of Article L. 22-10-9 of the French Commercial Code relating to remuneration and benefits received by corporate officers and any other commitments made in their favor, we have verified its consistency with the financial statements, or with the underlying information used to prepare these financial statements and, where applicable, with the information obtained by your company from companies controlled by it that are included in the scope of consolidation. Based on this work, we attest the accuracy and fair presentation of this information.

With respect to the information relating to items that your Company considered likely to have an impact in the event of a takeover bid or exchange offer, provided pursuant to Article L. 22-10-11 of the French Commercial Code, we have agreed this information to the source documents communicated to us. Based on these procedures, we have no observations to make on this information.

Other information

In accordance with French law, we have verified that the required information concerning the identity of the shareholders and holders of the voting rights has been properly disclosed in the management report.

Other legal and regulatory verifications or information

Format of presentation of the financial statements intended to be included in the annual financial report

We have also verified, in accordance with the professional standard applicable in France relating to the procedures performed by the statutory auditor relating to the annual and consolidated financial statements presented in the european single electronic format, that the presentation of the financial statements intended to be included in the annual financial report mentioned in Article L.451-1-2, I of the French Monetary and Financial Code (*code monétaire et financier*), prepared under the responsibility of Chief Executive Officer, complies with the single electronic format defined in the European Delegated Regulation No. 2019/815 of December 17, 2018.

Based on the work we have performed, we conclude that the presentation of the financial statements intended to be included in the annual financial report complies, in all material respects, with the european single electronic format.

We have no responsibility to verify that the financial statements that will ultimately be included by your company in the annual financial report filed with the AMF are in agreement with those on which we have performed our work.

Appointment of the statutory auditors

We were appointed statutory auditors of Imerys by the Annual General Meeting held on May 5, 2003 for Deloitte & Associés and May 10, 2022 for PricewaterhouseCoopers Audit.

As at December 31, 2025 Deloitte & Associés and PricewaterhouseCoopers Audit were in the twenty-third year and the fourth year of total uninterrupted engagement, respectively.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with French accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the company or to cease its operations.

The audit committee is responsible for monitoring the financial reporting process and the effectiveness of internal control and risk management systems and, where applicable, its internal audit, regarding the accounting and financial reporting procedures.

The financial statements have been approved by the Board of Directors.

Statutory auditors' responsibilities for the audit of the financial statements

Objective and audit approach

Our role is to issue a report on the financial statements. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L.821-55 of the French Commercial Code, our statutory audit does not include assurance on the viability of the company or the quality of management of the affairs of the company.

As part of an audit in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- assesses the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, we modify our opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Report to the audit committee

We submit a report to the audit committee which includes in particular a description of the scope of the audit and the audit program implemented, as well as significant audit findings. We also bring to its attention any significant deficiencies in internal control regarding the accounting and financial reporting procedures that we have identified.

Our report to the audit committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the financial statements of the current period and which are therefore the key audit matters. We describe these matters in the audit report.

We also provide the audit committee with the declaration referred to in Article 6 of Regulation (EU) no. 537/2014, confirming our independence pursuant to the rules applicable in France as defined in particular by Articles L.821-27 to L.821-34 of the French Commercial Code and in the French Code of ethics for statutory auditors. Where appropriate, we will discuss with the audit committee the risks that may reasonably be thought to bear on our independence, and the related safeguards.

6.3.3 Statutory Auditors' Special Report on Regulated Agreements with Third Parties

For the year ended December 31, 2025

This is a free translation into English of the Statutory Auditors' special report on regulated agreements with third parties that is issued in the French language and is provided solely for the convenience of English-speaking readers. This report on regulated agreements should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France. It should be understood that the agreements reported on are only those provided by the French Commercial Code and that the report does not apply to those related party transactions described in IAS 24 or other equivalent accounting standards.

IMERYS

43, quai de Grenelle

75015 Paris, France

To the Shareholders of Imerys,

In our capacity as statutory auditors of your Company, we hereby report on regulated agreements with third parties.

It is our responsibility to inform you, based on information provided to us, of the characteristics and principal terms and conditions as well as the reasons justifying the interest for your Company of those agreements of which we have been informed or which we discovered at the time of our engagement, without expressing an opinion on their usefulness and appropriateness or seeking to identify other agreements. It is your responsibility, pursuant to Article R.225-31 of the French Commercial Code (*code de commerce*), to assess the benefits resulting from the conclusion of these agreements prior to their approval.

Furthermore, it is our responsibility, where applicable, to inform you in accordance with Article R.225-31 of the French Commercial Code relating to the performance, during the past fiscal year, of the agreements already approved by the annual shareholders' meeting.

We conducted the procedures we deemed necessary in accordance with professional guidance issued by the French statutory auditors' institute (*Compagnie nationale des commissaires aux comptes*) relating to this type of engagement. These procedures consisted in verifying that the information provided to us is consistent with the documentation from which it has been extracted.

Agreements submitted for approval to the Shareholders' Meeting:

Agreements authorized and entered into during the fiscal year under review

We hereby inform you that we were not informed of any agreements authorized and entered into in the course of the year to be submitted to the Shareholders' Meeting for approval in accordance with Article L.225-38 of the French Commercial Code.

Agreements already approved at a Shareholders' Meeting:

Agreements approved in prior fiscal years that remained in effect during the fiscal year under review:

We hereby inform you that we have not been notified of any agreements previously approved by the Shareholders' Meeting, whose implementation continued during the year ended December 31, 2025.

Agreements approved during the fiscal year under review:

We were informed of the continuation of the following agreement, already approved by the combined shareholders' meeting held on 13 May 2025, on the basis of the special report of the statutory auditors dated 5 March 2025, and which was not implemented during the past financial year.

Amendment to the S&B acquisition contract (the "Acquisition Contract"):

Person concerned:

Mr Paris Kyriacopoulos, director of your Company, who also serves as Chairman and director of Blue Crest Holding S.A.

Nature & purpose :

Your Board of Directors, at its meeting held on 10 December 2024, reviewed the terms of an amendment to the share purchase agreement for the S&B group entered into on 5 November 2014 between your Company and S&B Minerals S.A., S&B Minerais Finance GP S.à r.l., S&B Minerais Holdings S.à r.l. and Blue Crest Holding S.A. (the "Acquisition Agreement"), it being specified that S&B Minerais Finance GP S.à r.l. and S&B Minerais Holdings S.à r.l. merged into S&B Minerals S.A., which was renamed K&R SA, and that K&R SA subsequently merged into Blue Crest Holding S.A., which is their sole successor.

This amendment, entered into on 10 February 2025, is intended to extend by ten years the deadline for finalizing the transfer of certain real estate assets in Greece in accordance with the terms and conditions set out in the Acquisition Agreement, thereby preserving the parties' original intent.

INFORMATION ABOUT THE COMPANY AND ITS SHARE CAPITAL

7.1 Information about Imerys 457

7.2 Relations with shareholders 461

7.2.1 General information 461
7.2.2 Imerys stock market information 462

7.3 Share capital and shareholding 464

7.3.1 Share capital 464
7.3.2 Changes in share capital over the past five years 464
7.3.3 Financial authorizations 465
7.3.4 Share buybacks 466
7.3.5 Securities not representing share capital 468
7.3.6 Shareholding 468

7.4 Factors that could have an impact in the event of a public offer 471

7.5 Dividends 472

7.6 Parent company/ Subsidiary organization 473

7.7 Statutory Auditors 475

7.8 Related party agreements and assessment procedure for standard agreements 476

The details included in this chapter regarding the terms and conditions of shareholders' participation in the Shareholders' General Meeting (see Section 7.1), the financial authorizations currently in force (see paragraph 7.3.3), the factors that could have an impact in the event of a public offer (see Section 7.4) and the assessment process to which related party agreements are subject (see Section 7.8) form an integral part of the Corporate Governance Report. This report, the cross-reference table for which can be found in Chapter 9, was approved by the Board of Directors on February 19, 2026. Chapter 4 and Chapter 8 include all the other essential information of the Corporate Governance Report.

7.1 Information about Imerys

Corporate name

Imerys

Registered office and Company website

43, quai de Grenelle, 75015 Paris, France.

Telephone: +33 (0)1 49 55 63 00

The Company website can be accessed at *www.imerys.com.*[1]

Incorporation date and term

Imerys was incorporated on April 22, 1880.

An extension to the Company's term was approved by the Shareholders' General Meeting held on May 3, 2017 until May 3, 2116 (article 5 of the by-laws).

Registration and Legal Entity Identifier

The Company is registered at the Paris Trade and Companies Registry under number 562 008 151.

Its N.A.F. code (French industry classification) is 7010Z. Its Legal Entity Identifier (LEI) is 54930075MZSSIB2TGC64.

Legal form

Imerys is a French Public Limited Company (Société Anonyme) with a Board of Directors (Conseil d'Administration) governed by French law.

07

Timeline – Key dates

The Group was originally formed as a mining and metallurgy business. Initially, its core business involved extracting and processing non-ferrous metals. Numerous acquisitions led the Group to withdraw from the metallurgy of non-ferrous metals to focus on industrial minerals.

In the early 1970s, united under the name Imetal, the Group acquired the French company Huguenot Fenal, marking its entry into the clay roof tile market. It then purchased Copperweld Corporation (US), a company specialized in steel production and metals processing.

In 1985, the Group made its first material investment in refractory minerals and ceramics with the acquisition of Damrec (France). It then structured its business around three sectors: Building Materials, Industrial Minerals and Metals Processing. This reorganization was part of the Group's later withdrawal from non-ferrous metallurgy activities.

From 1990, the Group began to focus heavily on developing industrial minerals[2], entering the markets for kaolin (Dry Branch Kaolin Company, US), calcium carbonate (Georgia Marble, US), refractory minerals (C-E Minerals, US), monolithic refractories (Plibrico, Luxembourg), ball clays (Ceratera, France), ceramic bodies (KPCL, France), graphite (Stratmin Graphite, Canada and Timcal, Switzerland) and technical ceramics (Imerys Kiln Furniture, France). Through its Timcal subsidiary (North America, Europe, Asia) acquired in 1994, Imerys became a leading supplier of technical applications for high performance graphite.

In 1999, the Group became one of the world's leading producers[3] of white pigments following the acquisition of industrial mineral specialist English China Clays plc (ECC, UK). It then strengthened its presence in kaolin resources by acquiring Rio Capim Caulim SA. (Brazil) and continued to grow its industrial base in refractory minerals with the acquisitions of Transtech and Napco (US) and Rhino Minerals (South Africa). By acquiring ECC and consequently divesting from Copperweld (US) and ECC's specialty chemicals business (Calgon, US), the Group focused on processing industrial minerals. To reflect this development, Imetal changed its name to Imerys.

Since then, Imerys has kept developing by continually growing its range of products, extending its geographic network into high-growth areas and expanding into new markets.

From 2000 to 2002, Imerys added new minerals to its portfolio, including halloysite (New Zealand China Clays, New Zealand), clays and feldspar (K-T Clay, US and Mexico). The Group increased its carbonate resources in South America (Quimbarra, Brazil), Asia (Honaik, Malaysia) and France (AGS-BMP's carbonate activity). The takeover of the world's leading producer of corundum (fused alumina and bauxite): Treibacher Schleifmittel (Austria), was followed by further acquisitions in the sector in Brazil, China, the Czech Republic and Germany. By acquiring local kaolin producer MRD-ECC (Thailand), the Group increased its presence in the Asian market for applications designed mainly for the sanitaryware industry.

In early 2005, Imerys became the leading European supplier of monolithic refractories following the acquisition of Lafarge Réfractaires Monolithiques. The merger of these activities with Plibrico, acquired a few years earlier, led to the creation of a new entity, Calderys. In July, Imerys acquired World Minerals (US), a leading producer of filtration and performance minerals, which introduced diatomite and perlite into the Group's activities. The year ended with the acquisition of Denain Anzin Minerals, providing the Group with deposits of feldspar, mica, quartz and kaolin in Europe.

From 2006 to 2008, the Group continued to grow, acquiring calcined clay specialists AGS (France) and Vatutinsky (Ukraine), extensive reserves of high-quality white marble in China, Malaysia and Vietnam as well as Europe, and several feldspar mines across the world including: Jumbo Mining (India), The Feldspar Corporation (US) and others in Turkey. The acquisition of ACE, the leading monolithic refractory company in India, took Calderys to a new level, further reinforced by the acquisitions of B&B (South Africa) and Svenska Silikaverken A.B. (Sweden). Imerys added fused zircon (a mineral for the refractory, technical ceramics and automotive markets) to its portfolio, becoming the world's leading provider with the successive acquisitions of UCM Group plc (UK) and Astron China.

1 The information published on the Company website does not form part of the Universal Registration Document, except where it is incorporated by reference in this document.
2 Industrial minerals: non-metallic and non-combustible rocks or minerals, mined and processed for industrial purposes.
3 Throughout the Universal Registration Document, the information on market positions corresponds to assessments made by Imerys on the basis of its market knowledge, or is derived from trade publications.

The perlite businesses were bolstered in South America with the acquisition of Perfiltra (Argentina). The acquisitions of Kings Mountain Minerals, Inc. (North Carolina, US) and Suzorite Mining, Inc. (Quebec, Canada) added high-quality mica to the Group's mineral portfolio.

In 2010, the acquisition of Pará Pigmentos SA increased the Group's kaolin resources in Brazil.

In 2011, Imerys acquired the Luzenac Group and became the world's leading talc processing company. A production unit was inaugurated in Andersonville (Georgia, US) to manufacture ceramic proppants, used to keep fractures open in unconventional oil and gas exploration. Through "The Quartz Corp SAS", a joint venture created with the Norwegian group Norsk Mineral A.S, the Group was able to meet the increasing demand for high-purity quartz in the semiconductor and photovoltaic markets. The Group extended the production capacity of its calcium carbonate plant in Malaysia and the Miyagi plant in Japan, which was rebuilt after the tsunami.

In 2012, the Group strengthened its operations in Brazil, extending its product range for the paint, polymer and rubber markets with the acquisition of Itatex and a refractory bauxite deposit from the Vale Group.

In 2013, several acquisitions were made by the Group's businesses: PyraMax Ceramics LLC. and its ceramic proppant manufacturing plant, Goonvean (UK) and its kaolin reserves in Cornwall, and local feldspar producer Ceraminas (Thailand) Co. Ltd. To support soaring demand in the mobile energy sector, the Group doubled capacity at the Willebroek carbon black plant (Belgium). The lime production plant in Dorésopolis (Brazil) was completed and put into production. Arefcon BV (Netherlands), Indoporlen (Indonesia) and Tokai (Japan) were brought into the Group's Monolithic Refractories division. The disposal of Imerys Structure (brick walls, partitions and flues) to Bouyer Leroux group (France) was finalized.

In 2014, the acquisition of Termorak (Finland) strengthened the Group's expertise in designing and installing refractory materials for the petrochemical and thermal industries. The Group expanded its geographical footprint in natural calcium carbonate with the integration of Kinta Powdertec Sdn Bhd (Malaysia). An applied R&D center opened in Japan to support the Group's major local graphite and carbon black customers. The result of a joint venture with Al Zayani Investments, the fused alumina production plant in Bahrain went into production after construction began in 2012. It represented Imerys' first industrial base in the Middle East, enabling the Group to gain a foothold in the region. At the same time, the Group disposed of four calcium carbonate paper plants in Europe and the US as well as a production plant in Tunisia, and it permanently closed the Ardoisières d'Angers site (France).

In 2015, Imerys acquired the S&B Group, the world's leading producer of steel casting fluxes, wollastonite and perlite-based solutions and the leading European supplier of bentonite. The Group also acquired the Precipitated Calcium Carbonate divisions (Austria, France, Germany and UK) of the Solvay Group, Europe's leading producer of fine and ultrafine PCC, which is used as a functional additive in specialty applications (polymers, paints, hygiene, health and beauty), and the Matisco Development Group (France), a company specialized in metal profile manufacturing.

In 2016, Imerys stepped up its development strategy by signing an agreement to acquire the Kerneos group, a leading global expert in high-performance calcium aluminate-based binders. The Group also purchased the specialty alumina business from the Alteo group (France and Germany) and completed its geographical coverage of monolithic refractories by acquiring the industrial production site SPAR (US), and extending its service offer with the acquisition of Fagersta Eldfasta (Sweden).

In 2017, Imerys completed its acquisition of the Kerneos group initiated in 2016. A major year in the rollout of Imerys' strategy, 2017 also saw the completion of several further acquisitions, allowing the Group to broaden its specialty offering and continue to develop its presence in countries such as Brazil, China and India.

In 2018, Imerys completed the disposal of its Roofing division to the private equity fund Lonestar.

In 2019, Imerys disposed of its ceramic proppants business (IOS) in the US and its plastics recycling business (Imerplast) in the UK. The Company acquired certain assets from EDK (a leading producer of Ground Calcium Carbonate) in Brazil, as well as a 65% stake in Shandong Luxin Mount Tai, the foremost producer of abrasive grains in China.

In 2020, Imerys acquired a 60% majority stake in the Haznedar group (Turkish supplier of high-quality refractory bricks and monolithic products), a 100% stake in Cornerstone and American Garden Perlite (horticulture and industrial grade perlite mining and transformation in the US), a 75.9% stake in Sunward (manufacturer of high-grade monolithic refractories and refractory bricks in Taiwan and Asia) and a 100% stake in Hysil (major manufacturer of calcium silicate blocks in India). Imerys also disposed of its Kaolin business in Australia.

In 2021, Imerys inaugurated its European Research & Development center for performance minerals in Toulouse, fitted with specialist equipment for the polymer, ceramics, building materials, filtration, health and food markets. Imerys also announced the Group was increasing its production capacity of carbon black in its Willebroek plant (Belgium) in order to meet growing demand in special conductive additives, in particular for lithium-ion batteries. The Group disposed of its 50% stake in Fiberlean Technologies in Werhahn (Germany), as well as four cellulose microfibrils production facilities for customers in the paper and board markets in France, India and the US. Furthermore, Imerys began the process to dispose of its non-strategic natural graphite assets in Namibia and Lac des Iles (Canada). Early 2022, Imerys disposed of its US-based kaolin assets serving the paper and board markets in North America.

In 2022, Imerys announced it was launching a major project mining lithium at its Beauvoir facility (Allier, France), which has produced kaolin for ceramics since the end of the 19th century. Once implemented, this project will assist France and the European Union in bringing about their energy transition. In 2022, the Group also announced two major disposals of some of its assets serving the paper market and the High Temperature Solutions business area. These transactions fall within the Group's strategic plan for 2023-2025, presented to investors in November 2022. The Group also pledged to adopt new SBTi (*Science-Based Targets Initiative*) objectives aligned with the 1.5°C trajectory. As such, the Group is seeking to cut its CO_2 emissions by 42% in absolute terms (tCO_2) by 2030, with 2021 serving as the base year.

In 2023, Imerys announced the completion of the disposal of the High Temperature Solutions business, representing a key stage in its long-term development strategy and its ambitions in terms of value creation and helping to refocus the Group on mineral-based specialty solutions. Imerys also announced the entry into a number of strategic partnerships, particularly one with E.ON relating to the construction of an energy recovery facility in Willebroek, one with TotalEnergies relating to the production of renewable energy at a site in California and one with Vinci Construction relating to the development of sustainable construction solutions. Imerys and British Lithium also announced their partnership to accelerate the development of the UK's largest lithium deposit. In the environmental field, Imerys adopted new SBTi (Science-Based Targets Initiative) objectives aligned with the 1.5°C trajectory, reducing its Scope 1 and 2 CO2 emissions by 42% in absolute terms (tCO2eq) and its Scope 3 emissions by 25% by 2030, with 2021 serving as the base year. These targets have been approved by the SBTi initiative.

In 2024, Imerys announced the creation of a new business area, "Solutions for Energy Transition", to reflect the growing contribution to the Group's financial performance of these critical minerals. such as high-purity quartz, graphite and carbon black. The Group also announced the completion of the disposal of its paper market assets to a US investment company. After this disposal, Imerys took another key step in its repositioning on long-term growth markets and its ambitions in terms of value creation. Imerys also announced that the EMILI lithium mining project was recognized as a project of major national interest. Having considered the recommendations made in the report of the public debate organized by the National Commission for Public Debate from March 11 to July 31, 2024, Imerys has confirmed its intention to continue with the EMILI project and is studying several proposals with a view to making an investment decision in 2027. Furthermore, regarding the Chapter 11 proceedings of north American talc entities, the US Federal Court has approved their proposed reorganization plan and has authorized submission to a vote by the creditors and claimants involved.

In 2025, Imerys completed the acquisition of the European diatomite and perlite assets of Chemviron, a subsidiary of the Calgon Carbon Corporation, thereby strengthening its European presence in these areas, as well as its portfolio of filtration and life sciences products. Imerys signed an agreement to acquire SB Mineraçao and expand its industrial footprint in Brazil. This company specializes in the production of ground calcium carbonate. The EMILI project was recognized as a strategic project for the European Union, having previously been recognized as a project of major national interest. Finally, the Group's commitment to climate leadership was once again commended by CDP Corporate Climate, which awarded it an A score, and by Ecovadis, which awarded it a gold medal, placing the Group among the top 4% of companies rated by Ecovadis globally.

Regulatory environment

Although they do not operate in an industry subject to specific regulation that may materially affect their business, the Group's companies must comply with a great number of national and regional laws and regulations due to the nature of their work (particularly mining and natural resources) and their industrial operations.

Corporate purpose (article 3 of the by-laws)

Imerys is the parent company of an industrial trading group that is the world's leading supplier of mineral-based specialty solutions for industry.

Under the terms of article 3 of the by-laws, "The Company's purpose, in France and overseas, is:

- the research, acquisition, farmout, sale and operation of mines and quarries, of any kind whatsoever;
- the processing, transformation and trading of any minerals, metals, organic or non-organic materials and mineral substances, as well as their by-products and alloys;
- the manufacturing of any product in which minerals, metals, organic or non-organic materials and mineral substances are used;
- the purchase, acquisition, operation, concession, sale and full or partial, temporary or permanent handover, of any patents, certificates or licenses pertaining to the aforementioned purposes;
- the creation, acquisition, sale and concession of any buildings, plants, means of transportation and energy sources;
- the participation in any country in any mining, quarrying, commercial, industrial and maritime operations to promote or develop the Company's own industries and businesses, through the creation of new companies, alliances, joint ventures or otherwise; and, generally, any mining, quarrying, commercial, industrial, maritime, real estate, personal property and financial operations related directly or indirectly, in whole or in part, to any of the purposes specified above or any other similar or related purposes.

Financial year (article 28 of the by-laws)

The financial year spans a 12-month period that begins on January 1 and ends on December 31 of each year.

Board of Directors (articles 12 and 14 of the by-laws)

The Company is managed by a Board of Directors composed of at least three but no more than eighteen members, subject to certain exceptions permitted by law.

Directors are appointed or renewed by the Ordinary Shareholders' General Meeting, which may remove them at any time. Directors are appointed for a three-year term of office. In accordance with legal provisions, the number of directors over the age of 70 may not exceed one third of all directors in office. In the event that this limit should be exceeded, the oldest director shall automatically be deemed to have resigned. The Board of Directors also includes one or several employee-representative directors, in accordance with current legal provisions.

Furthermore, the Board of Directors may appoint up to two non-voting observers for a three-year term, who may or may not already be Imerys shareholders.

For further details regarding the powers, structure and operating procedures of the Board of Directors, see Chapter 4, Section 4.1 of the Universal Registration Document.

Shareholders' General Meetings (articles 21 and 22 of the by-laws)

Convening

Shareholders' General Meetings are convened under the terms and conditions provided by current legal provisions and are held at the registered office or any other place specified in the notice of meeting.

Admission

All shareholders have the right to take part in Shareholders' General Meetings – whether in person or by proxy – simply by providing proof of their identity and share ownership by means of either registering shares, or providing a share certificate proving the registration of bearer shares. These formalities must be completed in accordance with the deadlines set out in the notice of meeting. Shareholders may also, by decision of the Board of Directors indicated in the notice of meeting, take part in General Meetings and vote through video conference and/or by any other means of communication under the conditions provided by current legal provisions.

Exercising voting rights

All documents specified by articles R. 225-81 and R. 225-83 of the French Commercial Code, including a postal or proxy voting form, are sent to shareholders on request. This form can only be effectively taken into account if it is completed in accordance with current legal provisions and returned to the registered office or to the address given in the notice of meeting. Moreover, any shareholder may, by decision of the Board of Directors indicated in the notice of meeting, receive and return the voting form by post, proxy, e-mail or by any other means of communication, under the terms and conditions provided by current legal provisions.

Double voting rights

Shares held in registered form under the name of the same shareholder for at least two years carry double voting rights. This right is provided by article 22 of the by-laws and aims to reward the Company's loyal shareholders. Double voting rights are also granted to new free shares in the event of a capital increase, if the old shares also carried this right. The double voting right ceases automatically when a registered share is converted to a bearer share or is transferred, except in cases of collateral assignment, transfer as life interest, inheritance or family bequest. Finally, double voting rights may be canceled by decision of an Extraordinary Shareholders' General Meeting after having obtained the prior authorization of the Special General Meeting of the holders of this right.

Restriction of voting rights

None.

Publicly available documents

The by-laws, minutes of Shareholders' General Meetings, statutory and consolidated financial statements, Statutory Auditors' Reports and all documents that must be made available to shareholders may be accessed via the Company's registered office or on the Company's website (*www.imerys.com* – Finance – Shareholders' corner).

7.2 Relations with shareholders

7.2.1 General information

Imerys takes special care of its shareholders, ensuring they are regularly informed about changes in its business, strategy, investments, earnings and outlook. This is reflected in the various communication tools that are made available to involve shareholders in the life of the Group, such as:

- the website *www.imerys.com*, which enables shareholders to keep up to date in real time with changes in the Group and share prices, including a specific section dedicated to individual shareholders, where they can find the "Shareholders' Guide";
- a Letter to shareholders published several times a year, detailing the Group's news, earnings and outlook;
- the Universal Registration Document, including the Integrated Report, the Annual Financial Report and the Management Report, which itself includes the Sustainability Report and the Corporate Governance Report, as well as the Half-Year Financial Report;
- a direct phone number and a dedicated e-mail address.

All these documents are published in both English and French and are sent electronically to every holder of registered or bearer shares who wishes to receive them regularly.

The Group will publish its quarterly results on the following dates:

April 29, 2026	Q1 2026 Results
July 29, 2026	H1 2026 Results
October 29, 2026	Q3 2026 Results

The Financial Communication and Investor Relations department is headed by Cyrille Arhanchiague and reports to the Group Finance function:

- Telephone: +33 (0)6 07 16 67 26
- e-mail: *finance@imerys.com*

Imerys also informs the financial community and individual shareholders about the Company's business through financial announcements published in the press (print and/or web format) whenever results are published and the annual Shareholders' General Meeting is held.

Through the intermediary of Uptevia, in charge of share registry services, Imerys provides holders of shares in registered form with an online service that allows them to consult their share portfolio via the secure website *https://www.investor.uptevia.com*. The website gives shareholders access to the prices and characteristics of the shares in their portfolio, their recent transactions as well as the availability of their stocks and the attached voting rights. It also contains all documentation concerning the annual Shareholders' General Meeting and gives them the option to vote online ahead of the day.

Imerys maintains regular, open and transparent relations with the entire financial, institutional and socially responsible investment community through individual meetings, industry conventions and conference calls.

Imerys share registry services are provided by Uptevia:

90-110 Esplanade du Général de Gaulle

92931 Paris-La Défense Cedex

Telephone: 0 800 007 535

e-mail: *ct-contact@uptevia.com*

Uptevia is more specifically at the service of registered shareholders (excluding employee shareholders) to provide support and manage their Imerys shares.

7.2.2 Imerys stock market information

Imerys shares are listed on Euronext Paris and are eligible for the deferred settlement service (Service à Règlement Différé – SRD) (ISIN code FR 0000120859-Mnemo NK). Imerys is included in the CAC MD (mid 60) index within the SBF 120, which represents the 120 largest stocks listed on Euronext Paris (in terms of market capitalization, free float and trading volumes), as well as in the CAC Basic Materials index. Since November 2, 2009, Imerys shares have been listed on the SBF 120 under the general mining sector ("55102000 General Mining" according to ICB classification).

The Group also places great importance on the ratings of non-financial rating agencies (see Chapter 3, Section 1.1.3.2 of the Universal Registration Document).

No shares belonging to any subsidiary of Imerys are traded on a stock exchange.

7.3 Share capital and shareholding

7.3.1 Share capital

Share capital at December 31, 2025

Imerys' fully-paid up share capital at December 31, 2025 totaled €169,881,910, made up of 84,940,955 shares with a par value of €2, including 51,638,043 that carried double voting rights pursuant to article 22 of Imerys' by-laws. In total, 136,578,998 theoretical voting rights were attached to outstanding shares. Taking into account the 548,663 treasury shares held by the Company at December 31, 2025 (see paragraph 7.3.4 of this chapter), the total number of net voting rights attached to outstanding shares was 136,030,335 at that date.

Taking into account the 1,293,750 free shares granted to certain employees and executive corporate officers and not yet exercised or acquired at December 31, 2025, the maximum potential dilution of the share capital was 1.52% at this date (i.e. a nominal amount of €2,587,500).

No stock options are outstanding since December 31, 2022.

The Imerys share capital has not changed since this date.

Pledges

The Company has not pledged any directly registered shares.

7.3.2 Changes in share capital over the past five years

Over the past five years, the following changes have occurred in the number of shares and the Company's share capital:

Full year	Transaction	Nominal change in capital *(€)*	Additional paid-in capital/ Issue premium *(€)*	Number of shares created	Par value *(€)*	Company capital *(€)*	Number of shares that make up the capital
2021	N/A**	0	0	0	2	169,881,910	84,940,955
2022	N/A**	0	0	0	2	169,881,910	84,940,955
2023	N/A**	0	0	0	2	169,881,910	84,940,955
2024	N/A**	0	0	0	2	169,881,910	84,940,955
2025	N/A**	0	0	0	2	169,881,910	84,940,955

* At December 31.
** The number of shares and share capital has not changed over the past five years.

7.3.3 Financial authorizations

Treasury share purchase by the Company *(Shareholders' General Meeting of May 13, 2025, 15th resolution)*	November 12, 2026 (18 months)	10% of outstanding shares at January 1, 2025 (representing 8,494,095 shares)	792,135 shares (i.e. 0.93% of share capital)
Share capital decrease by canceling treasury shares *(Shareholders' General Meeting of May 13, 2025, 25th resolution)*	July 12, 2027 (26 months)	10% of the capital per 24-month period	None
Issue of shares and securities			
Issue of shares or securities conferring entitlement to capital with pre-emptive subscription rights *(Shareholders' General Meeting of May 13, 2025, 16th resolution)*	July 12, 2027 (26 months)	Capital: €75 million Debt securities: €1 billion, the amount issued being included in the Overall Cap	None
Issue of shares or securities conferring entitlement to capital without pre-emptive subscription rights, but with, where applicable, a priority period granted by the Board of Directors open to the public *(Shareholders' General Meeting of May 13, 2025, 17th resolution)*	July 12, 2027 (26 months)	Capital: €15 million Debt securities: €1 billion, the amount issued being included in the Overall Cap and Sub-Cap	None
Issue of shares or securities conferring entitlement to capital through private placements without pre-emptive subscription rights granted to qualified institutional buyers or a limited number of investors *(Shareholders' General Meeting of May 13, 2025, 18th resolution)*	July 12, 2027 (26 months)	10% of the capital at the issue date, the amount issued being included in the Overall Cap and Sub-Cap	None
Increase in the number of shares to be issued in the event of excess demand for issued shares or securities conferring entitlement to capital with or without pre-emptive subscription rights *(Shareholders' General Meeting of May 13, 2025, 19th resolution)*	July 12, 2027 (26 months)	15% of the initial issue, the amount issued being included in the Overall Cap and, where applicable, the Sub-Cap	None
Issue of shares or securities conferring entitlement to capital in consideration for contributions in kind made up of shares or securities conferring entitlement to capital *(Shareholders' General Meeting of May 13, 2025, 20th resolution)*	July 12, 2027 (26 months)	Capital: 10% of capital per year Debt securities: €1 billion, the amount issued being included in the Overall Cap and Sub-Cap	None
Capital increase paid up by capitalizing retained earnings, profits, additional paid-in capital or issue premiums *(Shareholders' General Meeting of May 13, 2025, 21st resolution)*	July 12, 2027 (26 months)	€75 million the amount issued being included in the Overall Cap	None
Overall cap for share capital increases and issues of debt securities with or without pre-emptive subscription rights *(Shareholders' General Meeting of May 13, 2025, 22nd resolution)*	July 12, 2027 (26 months)	Capital: €75 million represents the maximum common cap set in the 16th to the 21st resolutions (the "**Overall Cap**") Capital: €15 million represents the common cap applicable to issues without pre-emptive subscription rights (the "**Overall Sub-Cap**")	-
Issues granted to employees and corporate officers			
Issue of shares or securities conferring entitlement to capital reserved for Group employees who are members of a Company or Group savings plan *(Shareholders' General Meeting of May 13, 2025, 23rd resolution)*	July 12, 2027 (26 months)	3% (or 0.5% for executive corporate officers) of the capital at the issue date, the amount issued being included in the Overall Cap	None
Free Imerys share grant to employees and corporate officers or certain categories among them *(Shareholders' General Meeting of May 13, 2025, 24th resolution)*	July 12, 2028 (38 months)		None

SUMMARY OF THE FINANCIAL AUTHORIZATIONS FOR WHICH RENEWALS HAVE BEEN SUBMITTED FOR APPROVAL AT THE ORDINARY SHAREHOLDERS' GENERAL MEETING OF MAY 12, 2026

The following table presents the financial authorizations submitted to the approval of the Ordinary Shareholders' General Meeting of May 12, 2026.

√ For further details see Chapter 8, Section 8.2.7 of the Universal Registration Document.

Type of authorization	Expiration and term of the authorization	Maximum nominal amount authorized
Share buyback and cancellation of shares		
Treasury share purchase by the Company *(Ordinary Shareholders' General Meeting 15th resolution)*	November 12, 2027 (18 months)	10% of outstanding shares at January 1, 2026 (representing 8,494,095 shares)

7.3.4 Share buybacks

Legal framework of share buyback programs implemented in 2025

The Ordinary and Extraordinary Shareholders' General Meeting held on May 13, 2025 renewed for a period of 18 months, i.e. until November 12, 2026, the authorization previously granted to the Board of Directors by the Ordinary Shareholders' General Meeting held on May 14, 2024. In accordance with articles L. 22-10-62 et seq. of the French Commercial Code, this authorization enables the Company to buy back its own shares within the limit of 10% of the shares existing and outstanding at January 1, 2025, representing 8,494,095 shares, and within the limit of a total investment of €721,998,075. It was also decided at the same Shareholders' General Meeting that the number of shares that may be held by the Company, directly or indirectly at any time, may not exceed 10% of its share capital or 5% of the total number of shares making up the share capital if the shares were acquired by the Company with a view to holding them before using them at a later date as payment for or in consideration of a merger, demerger or contribution. Lastly, the maximum acquisition price was set at €85 per share.

On May 13, 2025, in accordance with article L. 22-10-62 paragraph 3 of the French Commercial Code, the Board of Directors delegated full powers for the purposes of purchasing Company shares to the Chief Executive Officer, within the conditions and limits set by the Shareholders' General Meeting.

Transactions carried out in 2025 [1]

In accordance with article L. 225-211 of the French Commercial Code, the following transactions were carried out as part of the Company's share buyback programs in force in 2025.

On April 1, 2021[2], the Company concluded with Exane a liquidity agreement, which complies with decision No. 2021-01 made by the French Financial Markets Authority (Autorité des marchés financiers – AMF) on June 22, 2021. It was assigned on October 23, 2023 to BNP Paribas Arbitrage (which since became BNP Financial Markets) (the "**Liquidity Agreement**"). The following transactions were completed in 2025 as part of the Liquidity Agreement:

- 427,135 shares were purchased on the market at an average weighted price of €30.932; and
- 423,829 shares were sold on the market at an average weighted price of €31.388.

Furthermore, on June 4, 2025, the Company granted a share purchase agreement to an investment services firm ("**PSI**"), in accordance with Regulation (EU) No 596/2014, Commission Delegated Regulation (EU) No 2016/1052, articles 241-1 et seq. of the AMF's General Regulation and the AMF's guidelines on trading by issuers in their own shares and stabilization measures, which expired on the date of completion of the buyback program, i.e. July 25, 2025 (the "**Purchase Agreement**"). Under the Purchase Agreement, 365,000 of the Company's shares were purchased on the market between June 4, 2025 and July 25, 2025 at an average weighted price of €27.9015.

Treasury shares held at December 31, 2025

Taking into account:

- the balance of treasury shares held at December 31, 2024, representing 527,416 shares;
- the delivery in 2025 of 347,059 vested shares to the beneficiaries of performance share grants (for further details, see Chapter 4, Section 4.3.3 of the Universal Registration Document);
- 427,135 shares purchased and 423,829 shares sold under the Liquidity Agreement in 2025;
- 365,000 shares purchased under the Purchase Agreement;
- the balance of treasury shares held at the end of the reporting period totaled 548,663. These shares, which have a par value of €2, represented approximately 0.65% of share capital at December 31, 2025.

It should be noted that:

- the transactions carried out by the Company in 2025 as part of its share buyback programs were made in full and without opening any buying or selling positions;
- the Company does not use derivatives as part of its share buyback programs;
- taking into account the shares bought back within the framework of the Purchase Agreement, the Company incurred trading fees of €6,589.59 and paid €40,736.16 in financial transaction tax.

1 All prices and amounts are given excluding fees and commission.
2 As updated on January 24, 2022, taking effect retroactively from July 1, 2021.

Details of the share buyback program put forward for renewal

As the authorization granted to the Board of Directors by the Ordinary and Extraordinary Shareholders' General Meeting held on May 13, 2025 expires on November 12, 2026, shareholders will be asked to renew it at the Ordinary Shareholders' General Meeting to be held on May 12, 2026 for a further period of 18 months, i.e. until November 12, 2027 (see Chapter 8, paragraph 8.2.7 of the Universal Registration Document).

The buyback program put forward for renewal at the Ordinary Shareholders' General Meeting held on May 12, 2026 was drawn up in accordance with articles L. 22-10-62 et seq. of the French Commercial Code, Regulation (EU) No 596/2014 of the European Parliament and of the Council of April 16, 2014 on market abuse, and articles 241-1 to 241-7 of the AMF's General Regulation.

Purpose of the share buyback program

The purpose of the program is to enable the Company to buy back its own shares, primarily so as to:

- cancel the shares at a later date to reduce the Company's share capital;
- implement and cover stock option plans and/or free share grants, as well as any shares granted under employee share ownership plans set up by the Company (or assimilated plans), or with respect to profit-sharing programs for current employees, former employees and/or corporate officers of the Company and/or any related companies as defined by articles L. 225-180, L. 225-197-2 and L. 233-16 of the French Commercial Code, within the current legal framework or ad hoc plans set up by the Company;
- grant or exchange shares purchased, in particular, on exercise of rights or issue of shares or securities redeemable, convertible, exchangeable or otherwise exercisable for shares of the Company;
- maintain the liquidity of the market through an investment services firm acting in the name and on behalf of the Company, under a liquidity agreement, it being specified that for the calculation of the 10% cap on purchases set out above, the number of shares bought back should be considered net of any shares sold within the duration of the authorization;
- hold them before using them at a later date as payment for or in consideration of external growth operations; and
- more generally, operate for any other purpose that is or may come to be authorized by law, and/or implement any market practice that is or may come to be authorized by the AMF.

Maximum proportion of capital, maximum number and characteristics of shares, maximum purchase price

The number of shares that could be purchased under the agreement cannot exceed 8,494,095 shares, representing 10% of shares issued and outstanding at January 1, 2026 (or 5% of the total number of shares making up the share capital if the shares were acquired by the Company with a view to holding them before using them at a later date as payment for or in consideration of a merger, demerger or contribution). Buybacks concern Imerys shares (ISIN code FR0000120859) listed on Euronext Paris. The purchase price may not exceed €85 per share, representing a maximum total investment of €721,998,075.

Buyback conditions

Shares are purchased on the market or over the counter and by any means, including through block transfers and with the use or exercise of any financial instrument, financial agreement or derivative, and at any time, except during a public offer for the Company's shares.

7.3.5 Securities not representing share capital

On May 13, 2025, as the decision to issue ordinary bonds falls within the authority of the Board of Directors, in accordance with article L. 228-40 of the French Commercial Code, the Board of Directors delegated full powers to the Chief Executive Officer for the purposes of carrying out such issues and deciding their conditions, in particular for the Company's EMTN program, within the period of one year and a maximum nominal amount per year of €1.5 billion and a maximum nominal amount per operation of €600 million. At its meeting of May 12, 2026, the Board of Directors will consider renewing this delegation to the Chief Executive Officer.

7.3.5.1 *Euro Medium term Note* (EMTN) program

The Company's EMTN program, amounting to €3 billion, was renewed on August 1, 2025 for a period of one year. The base prospectus has been submitted to the Financial Sector Supervisory Commission in Luxembourg (*Commission de Surveillance du Secteur Financier*). It is available on the Company website.

7.3.5.2 Bond issues

In order to optimize and extend the maturity of its debt, in November 2025, the Company made an investment in unsecured senior bonds of €600 million, accompanied by a cash buyback offer of €256.5 million, for some of its outstanding bonds maturing on January 15, 2027, bearing a coupon of 1.50% and amounting to €600 million. The outstanding amount of existing bonds now stands at €343.5 million.

Issue date	Coupon	Nominal amount of the issue (in currency) (€ million)	EMTN	Features	Additional draws/ partial redemptions (in currency) (million)	Nominal amount of outstanding balance at December 31, 2025 (in currency) (million)	Maturity
2017	1.5%	600	EMTN		256.5	343.5	01/15/2027
2016	1.875%	300	EMTN		-	300	03/31/2028

**Sustainability-Linked Bond = issue linked to sustainable development goals*

These transactions increased the average maturity of Imerys' bond profile to 4.4 years, compared to 3.4 years at the end of June 2025.

7.3.6 Shareholding

7.3.6.1 Breakdown of share capital and voting rights over the past three years

The following changes in the breakdown of share capital and voting rights have occurred over the past three years:

	At December 31, 2023				At December 31, 2024				At December 31, 2025			
	Number of shares	% of share capital	Voting rights attached[1]	% of voting rights[2]	Number of shares	% of share capital	Voting rights attached[1]	% of voting rights[2]	Number of shares	% of share capital	Voting rights attached[1]	% of voting rights[2]
Belgian Securities Sarl	46,341,270	54.56	92,682,540	68.06	46,341,270	54.56	92,682,540	68.03	46,341,270	54.56	92,682,540	67.86
Blue Crest Holding SA	4,314,260	5.08	8,096,242	5.95	4,314,260	5.08	8,060,772	5.92	4,314,260	5.08	8,060,772	5.90
Group employees	1,196,536	1.41	1,883,838	1.38	1,617,433	1.90	2,572,049	1.89	1,160,200	1.37	1,836,603	1.34
Treasury shares	507,121	0.60	507,121	0.37	527,416	0.62	0	0.39	548,663	0.65	0	0.40
Public float	32,581,768	38.35	33,015,822	24.24	32,140,576	37.84	32,391,299	23.78	32,576,562	38.35	33,450,420	24.49
Total	84,940,955	100	136,185,563	100	84,940,955	100	135,706,660	100	84,940,955	100	136,030,335	100

1 In accordance with article 22 of the Company by-laws, shares held in registered form for over two years carry double voting rights.
2 Percentages are calculated on the basis of the theoretical voting rights existing at December 31 of each year.

7.3.6.2 Crossing of statutory thresholds

No disclosures were made to the Company to report a threshold being crossed in 2025 and up to the date the Universal Registration Document was filed.

To the best of Imerys' knowledge, no shareholder other than those mentioned in paragraph 7.3.6.1 of this chapter either directly or indirectly held more than 5% of the Company's share capital or voting rights at the date this Universal Registration Document was filed.

Shareholders are reminded that the Imerys by-laws do not contain any clauses requiring disclosures to be made when thresholds are crossed, other than those required by law. Any shareholder, whether acting alone or in concert, whose ownership exceeds or drops below one of the thresholds for the Company's capital and/or voting rights provided by current legal provisions must comply with the provisions of articles L. 233-7 et seq. of the French Commercial Code and article 223-14 of the AMF's General Regulation.

7.3.6.3 Control of the Company and shareholders' agreement

Control of the Company

Given the number of voting rights held, the Company is legally controlled by Belgian Securities Sàrl, which itself is controlled, via GBL Verwaltung (Luxembourg), by Groupe Bruxelles Lambert ("**GBL**") and indirectly by the Frère and Desmarais families through the company Parjointco (for further details, see the organization chart in paragraph 7.3.6.6 of this chapter). Nevertheless, the Company does not believe there is a risk such control could be exerted abusively. The Company and its Board of Directors have always considered protecting shareholder interests to be of great importance and consistently make every effort to comply with governance rules and best practice, as demonstrated, in particular, by the number of independent members sitting on the Board of Directors and its committees as well as the independent chair of the Company and three of its committees (for further details on the structure of the Board of Directors and its committees, see Chapter 4, paragraph 4.1.1 of the Universal Registration Document).

Shareholders' agreement

On November 5, 2014, GBL, Belgian Securities BV (which since became Belgian Securities Sàrl) and Blue Crest Holding SA ("**Blue Crest**") entered into a shareholders' agreement with respect to their direct or indirect shareholding in the Company, which was updated by riders on March 17, 2015 and December 23, 2021.

Governed by Luxembourg law, the agreement currently includes the following conditions:

- joint tag-along rights granted by GBL to Blue Crest, in the event that GBL transfers Imerys shares to a third party, causing its interest to fall below 40% of Imerys' capital;
- a pre-emptive right granted to GBL to purchase any Imerys shares that Blue Crest may wish to sell;
- a right for Blue Crest to be represented on the Board of Directors. As such, as long as Blue Crest holds at least 3% of Imerys shares, a person nominated by Blue Crest will sit on the Imerys Board of Directors. This director will also sit on the Strategy and Sustainability Committee and will be invited to attend (without being a member) meetings of the Audit Committee.

The shareholders' agreement will remain in force until one of the following situations arises:

- Blue Crest comes to directly or indirectly hold less than 50% of the 3,728,308 shares created in consideration for the share transfer completed on February 26, 2015;
- the agreement is terminated by GBL, which it would be authorized to do if Blue Crest's current controlling shareholders were to change or no longer directly or indirectly hold 100% of capital in Blue Crest;
- GBL's direct or indirect interest in Imerys was to fall below 40%; and
- on January 15, 2027, if any of the parties sends the other parties a letter informing them that they wish to terminate the agreement before December 15, 2025 (or before December 15 of the previous year with respect to subsequent years). If no such letter is sent by any of the parties, the agreement will be automatically renewed for another year.

It should be noted that the shareholders' agreement does not constitute a concert party as defined in articles L. 233-10 and L. 233-10-1 of the French Commercial Code. A copy of the agreement (as it currently stands) was sent to the AMF and the Company on December 24, 2021 (the AMF decision and information No. 221C3611 dated December 24, 2021 are both available on the AMF website: www.amf-france.org).

At the date this Universal Registration Document was filed, the Company had not been made aware of any other agreement between its shareholders, nor of any agreement that, if implemented, could trigger a change of control.

7.3.6.4 Employee shareholders

At December 31, 2025, Group employees held 1.37% of outstanding share capital and 1.34% of theoretical voting rights in the Company, particularly through operations intended to promote employee share ownership (see paragraph 7.3.1 of this chapter).

Details of the various long-term incentive plans, including past stock option and performance share grants, are presented in Chapter 4, paragraph 4.3.3.

7.3.6.5 Identification of bearer shareholders

As part of the procedure set out in articles L. 228-2 et seq. of the French Commercial Code, and in accordance with its by-laws, the Company carried out a survey at the end of March 2025 to identify identifiable bearer shares conferring, immediately or at a later date, voting rights at its Shareholders' General Meetings.

7.3.6.6 Group shareholding structure

The diagram presented below represents the relationships between Imerys shareholders by share capital and theoretical voting rights at December 31, 2025 (see paragraph 7.3.1 of this chapter).

Parjointco is a company governed by Belgian law whose registered office is located at avenue Marnix 24, 1000 Brussels (Belgium). It is jointly owned and controlled by the Desmarais family (Canada) and the Frère family (Belgium).

Pargesa SA is a company governed by Swiss law whose registered office is located at 11, Grand-Rue, CH-1204 Geneva (Switzerland).

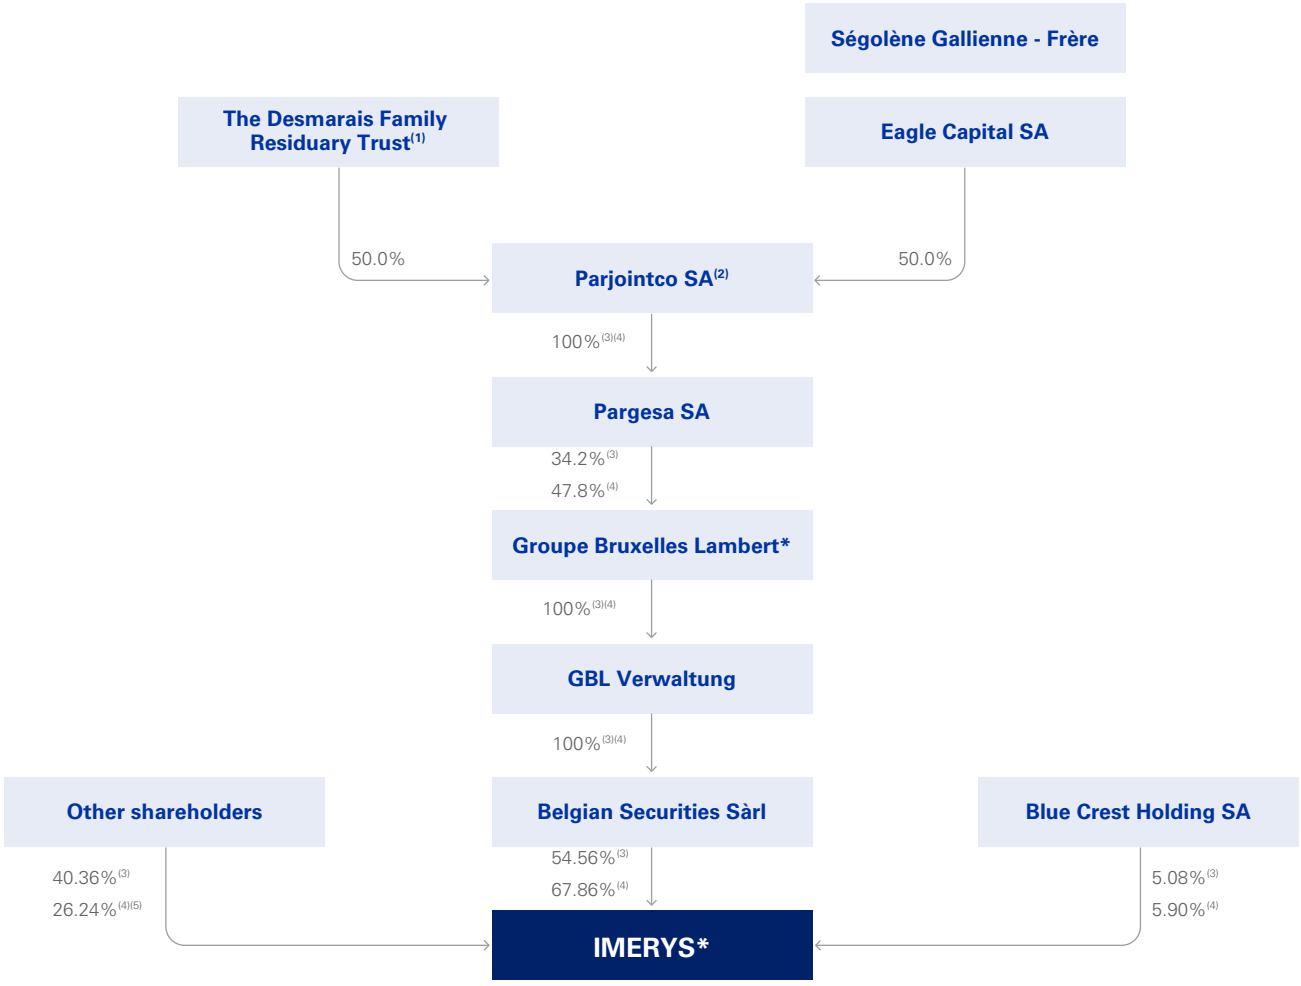

Groupe Bruxelles Lambert is a company governed by Belgian law whose registered office is located at avenue Marnix 24, 1000 Brussels (Belgium).

For any additional information concerning the shareholding of Groupe Bruxelles Lambert, refer to GBL's 2025 Annual Report.

Belgian Securities Sàrl is a company governed by Luxembourg law whose registered office is located at 19-21 route d'Arlon, 8009, Strassen (Luxembourg).

GBL Verwaltung SA is a company governed by Luxembourg law whose registered office is located at 19-21 route d'Arlon, 8009, Strassen (Luxembourg).

Blue Crest Holding SA is a company governed by Luxembourg law whose registered office is located at 19, rue Eugène Ruppert, L-2453 Luxembourg (Luxembourg). It is owned and controlled by the Kyriacopoulos family (Greece).

* Listed company
1 Trustees of a trust established upon the death of Paul G. Desmarais benefitting certain members of the Desmarais family
2 Joint control and action over GBL shared by the Power and Frère groups
3 Shareholding
4 Voting rights
5 Including suspended voting rights for treasury shares.

7.4 Factors that could have an impact in the event of a public offer

It should be noted that no specific mechanism has been set up by the Company.

Structure of the share capital – direct or indirect investments in the share capital – shareholders' agreements

Information regarding the Company's share ownership (structure of the share capital, threshold crossings and control of the Company) appears in **Section 7.3 of this chapter.**

Restrictions on voting rights and transfers of shares or agreements of which the Company is aware

See paragraph 7.3.6.3 of this chapter.

Holders of shares carrying specific control rights

The Company by-laws state that shares held in registered form by the same shareholder for over two years carry double voting rights **(see Section 7.1 of this chapter)**.

Control mechanisms applied to employee shareholding schemes

None.

Agreements between shareholders known by the Company that could lead to restrictions of share transfers and voting rights

See paragraph 7.3.6.3 of this chapter.

Specific rules governing the appointment or replacement of directors and amendments to the Company by-laws

None.

Powers of the Board of Directors, in particular regarding issues of shares or share buybacks

The terms and conditions of share buybacks are set out in **paragraphs 7.3.3 and 7.3.4 of this chapter**.

It should be noted that when the financial authorizations and delegations of authority were submitted for renewal at the Ordinary and Extraordinary Shareholders' General Meeting held on May 13, 2025, shareholders excluded the option for the Board of Directors to buy back shares or use the delegations of authority granted to it during a public offer for the Company's shares.

Agreements that may be amended or terminated in the event of a change of control of the Company

Among the Company's main financing agreements **(see note 27.5 to the consolidated financial statements published in Chapter 6, paragraph 6.1.2 of the Universal Registration Document)** some may contain a clause that provides for early reimbursement, under certain conditions and on the Company's initiative, in the event of a change of control.

Joint venture agreements entered into by the Company's subsidiaries generally include an exit clause in the event of a change of control.

Agreements including compensation clauses to be paid to members of the Board of Directors or employees if they resign or are dismissed without genuine or serious cause or if their contract is terminated as a result of a public offer

The terms and conditions applicable to compensation payable to corporate officers for termination of office are detailed in **Chapter 4, Section 4.3 of the Universal Registration Document**.

7.5 Dividends

Imerys bases the distribution of dividends on the consolidated current net income recorded in the financial year in question. The allocation of income is determined in accordance with current legal and regulatory provisions, as detailed in article 30 of the Company by-laws (published on its website www.imerys.com – Group – Governance).

In accordance with the provisions of article 243 *bis* of the French Tax Code, the dividends paid in respect of the last three financial years were as follows:

	2024	2023	2022
Current net income, per share	€3.10	€2.86	€3.28
Net dividend per share	€1.45	€1.35	€3.85*
Gross dividend per share	€1.45	€1.35	€3.85*
Number of shares carrying dividend rights	84,778,300	84,849,996	84,852,296
Total net payout	**€123 million**	**€114.6 million**	**€326.7 million**

* The dividend paid in respect of the 2022 financial year was €3.85 per share, equating to an ordinary dividend of €1.50 per share and an exceptional dividend linked to the disposal of the High Temperature Solutions business of €2.35 per share.

As a general rule, Imerys does not distribute interim dividends. Dividends are paid once a year following the Shareholders' General Meeting held to approve the management and financial statements for the previous financial year. The Shareholders' General Meeting may grant to each shareholder, for all or part of the dividend being distributed, or where applicable for interim dividends, the option to choose between payment of the dividend in cash or in shares.

Dividends that have not been claimed within five years after the dividend payment date are time-barred. Unclaimed dividends are paid to the French State in the first 20 days of January of the year following the expiration of the period of limitation.

7.6 Parent company/ Subsidiary organization

At December 31, 2025, the Group was made up of 206 companies based in 52 countries (the main consolidated entities of the Group are listed in note 29 to the consolidated financial statements published in Chapter 6, paragraph 6.1.2 of the Universal Registration Document). The Group's organizational structure is detailed in Chapter 1, Section 1.3 of the Universal Registration Document.

Imerys is the Group's holding company and therefore does not directly carry out any industrial or business activity. The Company's assets are mainly made up of the investments it holds directly in certain Group subsidiaries.

√ For further details about the subsidiaries directly controlled by the Company, see note 24 to the statutory financial statements published in Chapter 6, paragraph 6.2.2 of the Universal Registration Document.

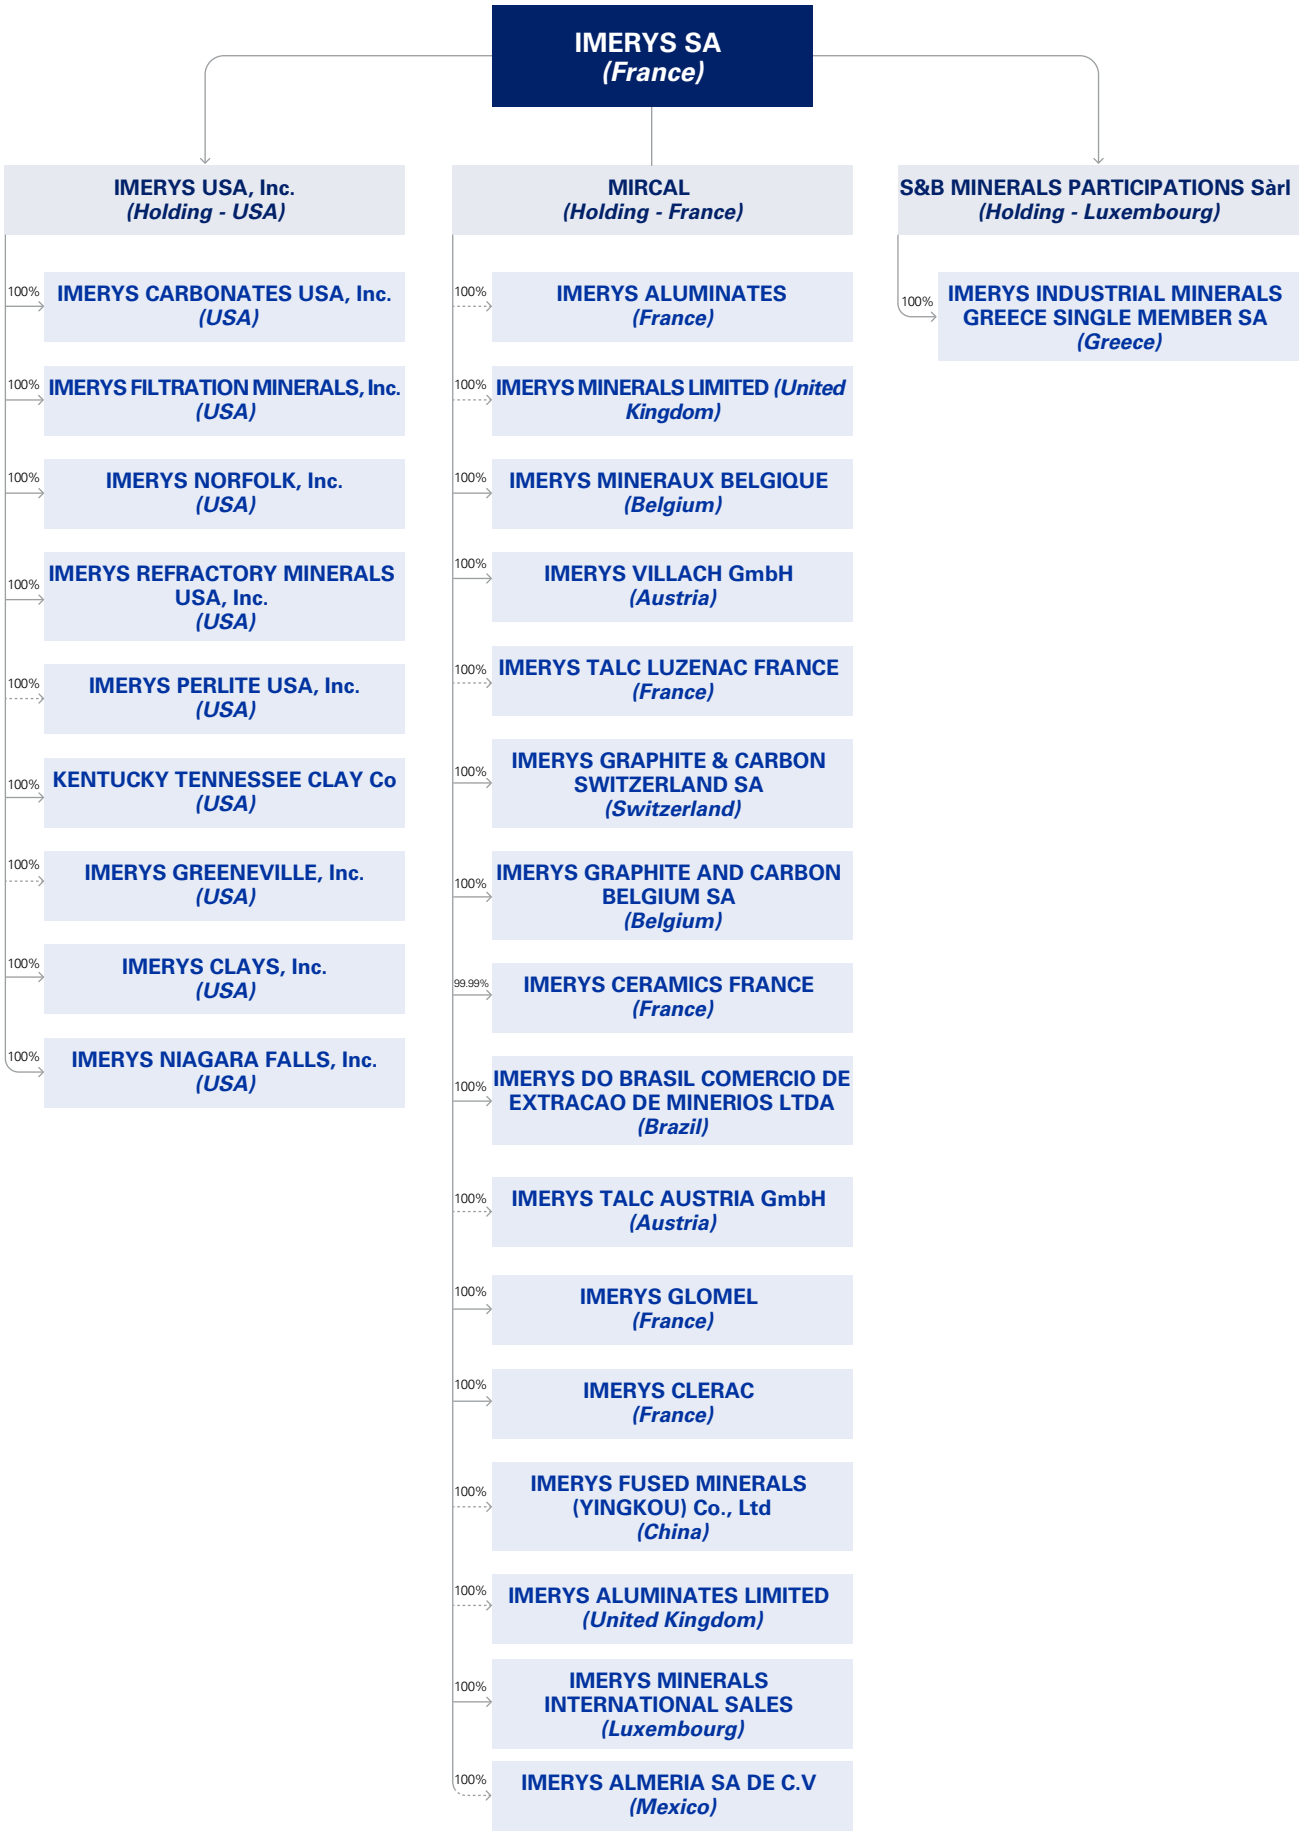

Imerys, along with certain local holding companies, provides all their subsidiaries with general support and expertise in the following areas in particular:

- Purchasing;
- Insurance;
- Audit;
- Communication;
- Accounting & Financial Control;
- Environment, Health & Safety;
- Operational Excellence;
- Tax.
- Geology;
- Information Technology;
- Innovation, Research & Development;
- Legal;
- Industrial Projects;
- Intellectual Property;
- Human Resources;
- Strategy;
- Mineral Transformation Processes;
- Cash Management.

These services include: support and advice in ad-hoc requests from its subsidiaries, as well as more general studies and analyses or even recommendations or suggested preventive measures.

Compensation for these services is determined on the basis of the costs incurred by Imerys and its local holding companies. These costs are allocated to the subsidiaries that benefit from the services, either in proportion to their total revenue compared to the total revenue of their operating segment or in proportion to the number of their employees. In addition, external costs incurred specifically on behalf of a subsidiary along with the cost of seconding employees to a subsidiary are allocated to that subsidiary separately. In 2025, the Company invoiced a net total amount of approximately €143.8 million for services provided to its subsidiaries. Furthermore, Imerys charges subsidiaries a fee to use the Imerys brand. Imerys is also the parent company of the tax consolidation group for the Group's companies based in France where more than 95% of the share capital is held by Imerys (see note 15 to the statutory financial statements published in Chapter 6, paragraph 6.2.2 of the Universal Registration Document).

The simplified organization chart presented below illustrates the main operating entities of the Group whose gross revenue exceeded €50 million at December 31, 2025.

7.7 Statutory Auditors

Principal Statutory Auditors [1]

Deloitte & Associés

represented by Nadia Laadouli

6, place de la Pyramide, 92908 Paris-La Défense, France

first appointed by the Ordinary and Extraordinary Shareholders' General Meeting held on May 5, 2003 and most recently re-appointed for a period of six years by the Ordinary Shareholders' General Meeting held on May 10, 2022, which will come to an end following the 2028 Ordinary Shareholders' General Meeting called to approve the financial statements for the year ended December 31, 2027.

PricewaterhouseCoopers Audit

represented by Pierre-Olivier Etienne

63, rue de Villiers, 92208 Neuilly-sur-Seine, France

first appointed by the Ordinary Shareholders' General Meeting held on May 10, 2022 for a period of six years, which will come to an end following the 2028 Ordinary Shareholders' General Meeting called to approve the financial statements for the year ended December 31, 2027.

Alternate Auditors

Since the Shareholders' General Meeting held on May 10, 2022, the Company no longer has any alternate auditors, in accordance with the provisions of article L. 823-1-I, paragraph 2 of the French Commercial Code and the Company's by-laws.

Statutory Auditors to certify the sustainability information

Deloitte & Associés

represented by Catherine Saire

6, place de la Pyramide, 92908 Paris-La Défense, France

first appointed by the Ordinary Shareholders' General Meeting held on May 14, 2024 for a period of four years, which will come to an end following the 2028 Ordinary Shareholders' General Meeting called to approve the financial statements for the year ending December 31, 2027.

PricewaterhouseCoopers Audit

represented by Pierre-Olivier Etienne

63, rue de Villiers, 92208 Neuilly-sur-Seine, France

first appointed by the Ordinary Shareholders' General Meeting held on May 14, 2024 for a period of four years, which will come to an end following the 2028 Ordinary Shareholders' General Meeting called to approve the financial statements for the year ending December 31, 2027.

1 Deloitte & Associés and PricewaterhouseCoopers Audit are members of the Auditors' Regional Company of Versailles (Compagnie régionale des Commissaires aux comptes de Versailles).

7.8 Related party agreements and assessment procedure for standard agreements

Charter on related party and standard agreements (conventions libres)

On July 25, 2019 the Company's Board of Directors adopted a charter on related party agreements and standard agreements, which sets out the procedure to assess standard agreements and identify any related party agreements that require prior approval from the Board. The Charter is published on the Company website (www.imerys.com).

In accordance with article L. 22-10-10 6° of the French Commercial Code, the charter defines the notions of "standard agreement", details the criteria taken into account in the assessment of such agreements, lists the agreements that are presumed to ordinarily be conducted in the standard course of business, identifies the people responsible for the assessment process and describes the conditions under which the annual assessment is conducted by the Board. The Board thereby assesses the categorization of agreements as concluded with related parties (given the criteria set out in the aforementioned charter).

Related party agreements in 2025

At its meeting on February 19, 2026, the Board of Directors conducted its annual review of related party and standard agreements for 2025, in accordance with the aforementioned charter.

As stated in the Statutory Auditors' special report, reproduced in paragraph 6.3 of Chapter 6 and further explained in paragraph 8.2.2 of Chapter 8, a related party agreement was concluded on February 10, 2025 and approved by the 2025 Shareholders' General Meeting concerning an amendment to the S&B group acquisition contract entered into on November 5, 2014 between Imerys and S&B Minerals SA, S&B Minerals Finance GP Sàrl, S&B Minerals Holdings Sàrl and Blue Crest Holding SA. This related party agreement continued into 2025.

No other related party agreements were concluded in 2025 and no agreement concluded in previous years was no longer or newly considered to be a related party agreement.

ORDINARY SHAREHOLDERS' GENERAL MEETING OF MAY 12, 2026

8.1 Agenda for the Ordinary Shareholders' General Meeting 479

8.2 Presentation of the resolutions by the Board of Directors 480

8.2.1 2025 financial year – Annual financial statements and appropriation of profit 480

8.2.2 Related party agreements 481

8.2.3 Compensation policies applicable to corporate officers in 2026 481

8.2.4 Components of compensation paid or granted to corporate officers in 2025 481

8.2.5 Structure of the Board of Directors 486

8.2.6 Relocation of registered office 487

8.2.7 Share buyback program 487

8.2.8 Powers to carry out formalities 488

8.3 Draft resolutions submitted to the Ordinary Shareholders' General Meeting 489

At its meeting of February 19, 2026, the Board of Directors drew up the agenda and resolutions that will be submitted to the Ordinary Shareholders' General Meeting of May 12, 2026.

8.1 Agenda for the Ordinary Shareholders' General Meeting

1) Approval of the Company's management and statutory financial statements for the year ended December 31, 2025
2) Approval of the consolidated financial statements for the year ended December 31, 2025
3) Appropriation of profit and setting the dividend with respect to the financial year ended December 31, 2025
4) Statutory Auditors' special report governed by article L. 225-40 of the French Commercial Code
5) Approval of the compensation policy applicable to the Chairman of the Board of Directors with respect to the 2026 financial year
6) Approval of the compensation policy applicable to the Chief Executive Officer with respect to the 2026 financial year
7) Approval of the compensation policy applicable to members of the Board of Directors with respect to the 2026 financial year
8) Approval of the information relating to the compensation of corporate officers with respect to the financial year ended December 31, 2025, presented in article L. 22-10-9 I of the French Commercial Code
9) Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chairman of the Board of Directors with respect to the financial year ended December 31, 2025;
10) Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chief Executive Officer with respect to the financial year ended December 31, 2025
11) Re-appointment of Stéphanie Besnier as a director
12) Re-appointment of Véronique Saubot as a director
13) Ratification of the cooptation of Johannes Huth as a director
14) Appointment of Michael Ogrinz as a director
15) Ratification of the relocation of the Company's registered office
16) Authorization to be granted to the Board of Directors to enable the Company to buy back its own treasury shares
17) Powers to carry out formalities.

8.2 Presentation of the resolutions by the Board of Directors

The resolutions submitted for your approval are as follows: resolutions 1 to 17 are ordinary resolutions.

Pursuant to the provisions of articles L. 225-37, L. 22-10-8, L. 22-10-9, L. 225-37-4, L. 22-10-10, L. 225-100 and L. 22-10-34 of the French Commercial Code, paragraphs 8.2.3 to 8.2.5 form an integral part of the Corporate Governance Report.

8.2.1 2025 financial year – Annual financial statements and appropriation of profit

Shareholders are invited to approve the Company's annual financial statements **(first resolution)** and the Group's consolidated financial statements **(second resolution)** for the year ended December 31, 2025.

These financial statements, along with the financial structure, business and results of the Group and the Company for the previous financial year, as well as various items of information required by current laws and regulations, are published in Chapter 5 (Comments on 2025) and Chapter 6 (Financial statements) of the Universal Registration Document.

The shareholders approve the total amount of charges and expenses, as defined in article 39, paragraph 4 of the French Tax Code, which corresponded to €226,317 over the previous financial year. No tax was incurred on these expenses.

Shareholders are then called upon to approve the appropriation of the Company's distributable profit for 2025 **(third resolution)**. The Company's distributable profit totaled €1,265,618,878.71, representing €316,968,227.87 in net profit plus €948,650,650.84 in retained earnings (without any allocation to the legal reserve, which already represents 10% of the Company's share capital). The Board of Directors recommends paying an ordinary dividend in cash of €0.75 per share.

The total dividend payout will be adjusted to take into account the difference between the number of shares eligible for the dividend at the ex-dividend date and the 84,940,955 shares making up the Company's capital at December 31, 2025. Consequently, the amount allocated to retained earnings will be determined on the basis of the total actual dividend payout.

Pursuant to the provisions of article 243 *bis* of the French Tax Code, individual shareholders domiciled for tax purposes in France may benefit from a 40% tax allowance on the proposed dividend for 2025, as stipulated in article 158-3-2° of the French Tax Code, subject to the taxpayer opting for their income from movable property to be taxed according to the progressive income tax bands set out in article 200-A-2 of that Code.

Dividends paid in respect of the past three financial years were as follows:

Financial year ending:	12/31/2024	12/31/2023	12/31/2022**
Net dividend per share	€1.45*	€1.35*	€3.85*
Number of shares carrying dividend rights	84,778,300	84,849,996	84,852,296
Total net payout	**€122.9 million**	**€114.5 million**	**€326.7 million**

** Fully eligible for the 40% tax allowance for individual shareholders domiciled in France for tax purposes stipulated in article 158-3-2° of the French Tax Code, subject to the taxpayer opting to be taxed according to the progressive income tax bands.*

*** The dividend paid in respect of the 2022 financial year was €3.85 per share, equating to an ordinary dividend of €1.50 per share and an exceptional dividend linked to the disposal of the High Temperature Solutions business of €2.35 per share.*

The ex-dividend date will be May 20, 2026 and the dividend will be paid on May 22, 2026.

8.2.2 Related party agreements

Pursuant to the provisions of article L. 225-40 of the French Commercial Code, shareholders are asked to approve the Statutory Auditors' special report on related party agreements governed by articles L. 225-38 et seq. of that Code and published in Chapter 6, Section 6.3 of the Universal Registration Document **(fourth resolution)**.

Shareholders are also informed that at its meeting held on February 19, 2026 and in accordance with legal requirements and its internal charter on related party agreements and on standard agreements (see Chapter 7, Section 7.8 of the Universal Registration Document), the Board of Directors reviewed all related party agreements in place.

The Board of Directors noted that:

- a related party agreement, entered into on February 10, 2025, had been the subject of a Statutory Auditors' special report, which was approved by the 2025 Shareholders' General Meeting. The agreement concerned an amendment to the S&B group acquisition contract entered into on November 5, 2014, between Imerys and S&B Minerals SA, S&B Minerals Finance GP Sàrl, S&B Minerals Holdings Sàrl. and Blue Crest Holding SA;
- no other related party agreements were concluded in 2025 and no agreement concluded in previous years was no longer or newly considered to be a related party agreement; and
- no related party agreements entered into in previous years and already approved by the Shareholders' General Meeting continued to apply in 2025.

8.2.3 Compensation policies applicable to corporate officers in 2026

Pursuant to the provisions of article L. 22-10-8 of the French Commercial Code, shareholders are asked to approve the compensation policies applicable to the Chairman of the Board of Directors **(fifth resolution)**, Chief Executive Officer **(sixth resolution)** and members of the Board of Directors **(seventh resolution)** with respect to the 2026 financial year, which protect the Company's corporate interests, contribute to its long-term success and reflect its business strategy.

To strengthen the shareholder dialog, the Board of Directors held a series of discussions with institutional investors and proxy advisors at the end of November 2025. These exchanges were attended by the Chairman of the Board of Directors or the Chair of the Appointments and the Compensation Committees, alongside the Secretary of the Board and Group General Counsel, the Group's Chief Human Resources Officer and the Investor Relations and Financial Communication team.

These meetings fostered a constructive dialog on governance and compensation within the Company and helped inform the work of the Compensation Committee and the Board of Directors.

As such, at its meeting of February 19, 2026, the Board of Directors wished to make a number of targeted adjustments to the compensation policy for the Chief Executive Officer to make it clearer and more closely aligned with the Group's long-term strategy. Such adjustments include:

- refocusing the ESG criteria taken from the Group's SustainAgility roadmap to clarify these criteria and reduce any overlap between those included in the annual variable compensation and those included in the long-term variable compensation. Such refocusing is in line with market practices, as the variable compensation schemes of senior managers of CAC 60 companies are typically based on a limited number of performance conditions,
- adding *Total Shareholder Return* (TSR) as a new relative performance condition measured against a defined peer group when evaluating long-term performance.

Details of the shareholder dialog and the compensation policies applicable to corporate officers (Chairman of the Board of Directors, Chief Executive Officer and members of the Board of Directors) with respect to the 2026 financial year are set out in Chapter 4, Section 4.3 of the Universal Registration Document.

8.2.4 Components of compensation paid or granted to corporate officers in 2025

8.2.4.1 Information on components of corporate officer compensation in 2025 (eighth resolution)

Pursuant to the provisions of article L. 22-10-34 I of the French Commercial Code, shareholders are asked to approve the information set out in article L. 22-10-9 I of that Code, which includes in particular details of 2025 compensation awarded to all corporate officers, as well as the mean average and median salary ratio between workers and executive corporate officers. This information forms part of the Corporate Governance Report and is presented in Chapter 4, Section 4.3 of the Universal Registration Document.

8.2.4.2 Components of compensation paid or granted with respect to the financial year ended December 31, 2025 to the Chairman of the Board of Directors, Patrick Kron (ninth resolution)

Patrick Kron has held the office of Chairman of the Board of Directors since June 25, 2019.

Components of compensation subject to approval	Amount paid in the previous financial year	Amount granted in the previous financial year or equivalent accounting value	Details
Fixed compensation	€400,000	€400,000	Gross annual fixed compensation granted with respect to 2025 and paid in 2025: €400,000 (unchanged since 2022) √ For further details, see Chapter 4, paragraph 4.3.2.1 of the Universal Registration Document.

8.2.4.3 Components of compensation paid or granted with respect to the financial year ended December 31, 2025 to the Chief Executive Officer, Alessandro Dazza (tenth resolution)

Alessandro Dazza has held the office of Chief Executive Officer since February 17, 2020.

Components of compensation subject to approval	Amount paid in the previous financial year	Amount granted in the previous financial year or equivalent accounting value	Details
Annual fixed compensation	€920,000	€920,000	Gross annual fixed compensation granted with respect to 2025 and paid in 2025: €920,000 (unchanged since 2023) √ For further details, see Chapter 4, paragraph 4.3.2.1 of the Universal Registration Document.
Annual variable compensation	€1,147,862	€809,600	Annual variable compensation for 2024: The annual variable compensation for 2024, set at €1,147,862 by the Board of Directors at its meeting of February 20, 2025 and paid in 2025, following the approval by the Shareholders' General Meeting of May 13, 2025. Annual variable compensation for 2025: At its meeting of February 19, 2026 and based on the recommendations of the Compensation Committee, the Board of Directors considered the extent to which the Chief Executive Officer had met the quantifiable and individual criteria set for 2025 in order to determine the amount of variable compensation payable for the financial year. The quantifiable criteria relating to financial performance for 2025, weighted at 65% of annual variable compensation, were tied to adjusted EBITDA and free operating cash flow targets (before strategic capital expenditure), accounting for 32.50%, respectively. The quantifiable criteria relating to ESG performance for 2025, weighted at 15% of annual variable compensation, were taken from the SustainAgility roadmap and tied to: – improving the Group's Safety Culture Maturity to Level 3.3 across all Business Areas by the end of 2025; – increasing the occupational health global improvement action plan achievement rate to 75% by the end of 2025 – increasing the score of the Diversity & Inclusion Index to 100% by the end of 2025; – keeping the number of women in the Executive Committee above 30% by the end of 2025; – assessing Imerys' portfolio according to the sustainability criteria to cover at least 75% (by revenue) by the end of 2025; – ensuring that at least 75% of the Group's New Product Developments are scored as 'SustainAgility Solutions' (A+ or A++) by the end of 2025; – improving the external sustainability rating of the Group by 7% compared to the 2022 assessment by the end of 2025; – improving water management by ensuring that 100% of priority sites comply with new water reporting obligations by the end of 2025; – reducing the impact on biodiversity by fulfilling the act4nature commitments and conducting biodiversity audits on the 20 priority sites by the end of 2025; – reducing the Group's Scopes 1 & 2 greenhouse gas emissions (in tCO2eq) by 42% from 2021, the base year, in alignment with a 1.5°C trajectory by the end of 2030.

Components of compensation subject to approval	Amount paid in the previous financial year	Amount granted in the previous financial year or equivalent accounting value	Details

Individual criteria, weighted at 20% of annual variable compensation, were in particular tied to:

- finalizing the settlement related to the Chapter 11 process of the Group's former North American talc entities,
- assessing strategic options for the Group, including a transformation,
- continuing organic growth and integrating new acquisitions, and
- continuing to develop the "Solutions for Energy Transition" business line.

Calculation procedures:

The target value of annual variable compensation is set at 110% of annual fixed compensation. Annual variable compensation can thus vary between 0% and 165% of annual fixed compensation. For each criterion, the Board of Directors, on the recommendation of the Compensation Committee, sets:

- the threshold below which no variable compensation is paid;
- the target level of variable compensation due when each objective is achieved; and
- the maximum ceiling of variable compensation due when each objective is achieved.

Attainment of targets:

The Board of Directors assessed the level of achievement of the quantifiable financial performance criteria based on the budget targets for 2025. These budget targets are not made public for confidentiality reasons. Accordingly, the Board found that the two criteria were partially met.

With regard to the level of achievement of the quantifiable criteria relating to ESG performance, the Board assessed the level of performance for the criteria in line with the objectives set for 2025, which are identical to the Group's commitments. In this regard, the Board noted that all the objectives met or exceeded the target with the exception of the criteria relating to the Diversity & Inclusion Index and improving water management.

With regard to individual criteria, the Board of Directors acknowledges the Group's resilience and strategic focus during a year characterized by a complex macroeconomic environment and challenging market dynamics. Imerys made significant strides, particularly in the Solutions for Energy Transition business area.

Strategic portfolio management remained a key pillar of the year's performance. The Group continued its expansion through value-creating bolt-on acquisitions. Furthermore, the lithium projects' advancement underscores management's commitment to positioning Imerys at the forefront of the global energy transition. The Board notes that the Chapter 11 process for the North American talc entities progressed well in 2025, with the confirmation hearing concluded in February 2026. Additionally, given headwinds in all main end markets, the Group implemented proactive commercial initiatives to gain market share while maintaining disciplined pricing and continuous cost management.

Overall, the Board recognizes management's ability to maintain a strong focus on strategic execution and operational discipline. This, combined with exceptional sustainability performance that exceeded established targets, continues to strengthen the Group's fundamental position and its readiness to capitalize on future market recoveries.

As a result, the annual variable compensation awarded to Alessandro Dazza in respect of 2025 came to €809,600 (gross). This amount reflects the achievement of 95% of quantifiable criteria relating to financial performance resulting in a payout rate of 69 %, 121% of quantifiable criteria relating to ESG performance and 83% of qualitative individual criteria. This results in an annual variable compensation corresponding to 80% of the annual variable compensation target for 2025.

This sum will be paid to Alessandro Dazza, subject to the approval of the tenth resolution submitted to the Shareholders' General Meeting of May 12, 2026.

The Company does not have the option of asking for this variable compensation to be returned.

√ For further details, see Chapter 4, paragraph 4.3.2.1 of the Universal Registration Document.

Components of compensation subject to approval	Amount paid in the previous financial year	Amount granted in the previous financial year or equivalent accounting value	Details
Multi-annual variable compensation	N/A	N/A	No decision was made to award multi-annual variable compensation (in cash) with respect to 2025.
Exceptional compensation	N/A	N/A	No decision was made to award exceptional compensation with respect to 2025.
Stock options, performance shares and any other long-term benefit	N/A	€2,092,645 (accounting value of performance shares granted in 2025 under IFRS 2)	Performance shares At its meeting held on May 13, 2025 and based on the recommendations of the Compensation Committee, the Board of Directors decided to grant Alessandro Dazza 85,000 performance shares, representing approximately 0.1% of the Company's share capital. This grant was made pursuant to the compensation policy approved by the Ordinary and Extraordinary Shareholders' General Meeting of May 13, 2025 (6th resolution) and the authorization granted by the Ordinary and Extraordinary Shareholders' General Meeting of May 10, 2023 (24th resolution). The shares are subject to the same financial performance conditions as those applicable to the 2025 General Performance Share Plan offered to the Group's executive directors. These conditions were linked to: – the Group's current net income (50%); – its free operating cash flow (35%); – and the following ESG criteria (15%) taken from the Group's SustainAgility sustainable development roadmap: improving the Group's Safety Culture Maturity across all Business Areas; increasing the score of the Diversity & Inclusion Index; assessing Imerys' portfolio according to the sustainability criteria; improving the external sustainability rating of the Group; reducing the impact on biodiversity by fulfilling the act4nature commitments and conducting biodiversity audits on priority sites; reducing the Group's Scopes 1 & 2 greenhouse gas emissions (in tCO2eq) by 42% compared to 2021, the base year, in line with a 1.5°C trajectory by the end of 2030 (based on a % linear annual reduction to 2030). No other benefit/long-term incentive was granted in 2025. Performance shares that vested in 2025 It should be noted that, during the 2025 financial year, 72,457 performance shares (valued for accounting purposes at €1,982,477) awarded under the May 2022 performance plan vested for Alessandro Dazza. The 2022 plan vested in May 2025 with a level of achievement of 96.61%. √ For further details, see Chapter 4, paragraph 4.3.3.
Severance package	N/A	N/A	Termination benefit Alessandro Dazza would be due severance pay in the event of a change in control, strategy or a major disagreement over these issues. The amount paid with respect to this package would be subject and proportionate to performance conditions – as detailed below – over a three-year period prior to departure. In the event the term of office exceeds two years, the severance package may not exceed two years' annual compensation (average variable and fixed compensation for the last two full financial years). Should he leave within the first two financial years, the amount of variable compensation taken into account will reflect the sum of the variable components paid over the period, divided by the number of years in office. The performance conditions applicable to the severance package include: – free operating cash flow: ◦ if free operating cash flow is positive across each of the past three financial years (or each year in office if the time served is less than three years), 100% of the severance pay would be due, ◦ if free operating cash flow is positive in two of the past three financial years (or for over two thirds of the number of years spent in office if the time served is less than three years), 66% of the severance pay would be due, ◦ if free operating cash flow is positive in one of the past three financial years (or for over one third of the number of years spent in office if the time served is less than three years), 33% of the severance pay would be due, ◦ if free operating cash flow is negative across each of the past three financial years (or each year in office if the time served is less than three years), no severance pay would be due;

Components of compensation subject to approval	Amount paid in the previous financial year	Amount granted in the previous financial year or equivalent accounting value	Details
			– current operating income: ◦ if Group current operating income, calculated at constant scope and exchange rates, falls by over 20% per year over the last three years in office prior to departure, the severance package calculated above would be reduced by 50%, ◦ if Group current operating income, calculated at constant scope and exchange rates, falls by over 25% per year over the last three years in office prior to departure, no severance pay would be due. No compensation would be due if Alessandro Dazza voluntarily steps down and is soon able to claim retirement benefits or if he is dismissed for gross or serious misconduct. The termination benefit and non-compete indemnity would be capped at 24 months of (gross) annual fixed compensation plus the average of the last two years of (gross) variable compensation for the Chief Executive Officer, calculated on the date of termination of his term of office. **√ For further details, see Chapter 4, paragraph 4.3.2 of the Universal Registration Document.** <u>Non-compete indemnity</u> The Chief Executive Officer is subject to a non-compete period of six months following the date at which his duties as Chief Executive Officer are terminated. The Board of Directors reserves the right to decide whether or not to enforce this clause (and thus payment of the associated compensation). In the event it is enforced, the Chief Executive Officer will receive the equivalent of six months of annual fixed compensation (gross) plus half of the annual variable compensation (gross) for the financial year prior to departure. No compensation will be due if the Chief Executive Officer opts to claim retirement benefits. The termination benefit and non-compete indemnity would be capped at 24 months of (gross) annual fixed compensation plus the average of the last two years of (gross) variable compensation for the Chief Executive Officer, calculated on the date of termination of his term of office. √ For further details, see Chapter 4, paragraph 4.3.2 of the Universal Registration Document.
Complementary pension plan	N/A	N/A	Alessandro Dazza benefits from complementary defined contribution pension plans as defined in article 83 (awarded to certain executive directors in the Group) and the pay-as-you-go pension plan as defined in article 82, to which the Company makes contributions of 5% of his annual fixed compensation. See below for details of the related contributions (*Benefits in kind*).
Directors' compensation	N/A	N/A	-
Benefits in kind	€68,765	€68,765	These benefits include individual complementary pension arrangements and contributions for social security coverage for company directors and managers (GSC-type).

8.2.5 Structure of the Board of Directors

As part of the changes to the governance of GBL, the Company's controlling shareholder, the ratification of the cooptation of Johannes Huth, Managing Director of GBL, which took place on September 30, 2025, is submitted for approval at the next Shareholders' General Meeting. After having served on the Board for 16 years, Ian Gallienne, now Chairman of GBL, will step down from his position as Director on this same occasion.

It was also decided to adjust GBL's representation on the Board by reducing the number of Directors appointed based on its proposal from three to two. The appointment of Michael Ogrinz will therefore be submitted to a shareholder vote, following the resignation of Martin Doyen from his duties as Director, effective as of that same date.

Furthermore, as Annette Messemer informed the Board of Directors of her wish not to seek reappointment, and taking into account the terms of office expiring on this occasion, the Board of Directors, at its meeting held on February 19, 2026 and having considered the opinion of the Appointments Committee:

- decided to submit for approval at the Shareholders' General Meeting the renewal for a term of three years, i.e. until the Shareholders' General Meeting held in 2029 to approve the financial statements for the year ended December 31, 2028, of the directorships of Stéphanie Besnier **(eleventh resolution)** and Véronique Saubot**(twelfth resolution)**;
- decided to submit for approval at the Shareholders' General Meeting, for the remainder of the term of office of his predecessor, i.e. until the Shareholders' General Meeting held in 2028 to approve the financial statements for the year ended December 31, 2027, the ratification of the cooptation of Johannes Huth as director **(thirteenth resolution)**. This cooptation took place following the resignation of Nicolas Gheyssens from his duties as a director of the Company;
- decided to submit for approval at the Shareholders' General Meeting, for a term of three years, i.e. until the Shareholders' General Meeting held in 2029 to approve the management and financial statements for the year ended December 31, 2028, the appointment of Michael Ogrinz as a new director (**fourteenth resolution**).

Information and details of the careers of the directors and the director-candidate whose re-appointment, ratification of the cooptation and appointment are being submitted to a vote at the Shareholders' General Meeting are published in Chapter 4, paragraph 4.1.2 of the Universal Registration Document.

The Board of Directors believed that:

- the re-appointment of Stéphanie Besnier would be in the Company's interests, given, in particular, her recognized expertise in finance and Corporate Governance. Her active contribution to the work of the Board and the Committees of which she is a member represent a major asset for the conduct of the Group's business;
- the re-appointment of Véronique Saubot would also be in the Company's interests, in particular due to her contribution to the work of the Board, the Strategy and Sustainability Committee and the Audit Committee. Her experience, particularly in the areas of sustainable development and digital transformation, represents an asset in terms of supporting the Group's strategic orientations. Her commitment and knowledge of the Group's challenges mean she contributes meaningfully to the quality of discussions and to the continuity of the Board's work;
- the ratification of the cooptation of Johannes Huth would be in the Group's interests given his experience as an executive manager and his recognized expertise in international private equity, particularly in Europe and the United States. Johannes Huth brings his first-class strategic vision, which takes into account value creation and the long-term interests of the Company and its shareholders. This proposed appointment takes into account the Company's controlling shareholding; and
- the appointment of Michael Ogrinz would be in the Group's interests by bringing in-depth expertise in investments in France and in the industrial sector. After working at Goldman Sachs and JP Morgan, Michael Ogrinz notably headed the Paris office of Advent International, a leading investment fund. This proposed appointment takes into account the Company's controlling shareholding.

At the proposal of the Appointments Committee, in accordance with the principles applied by the Company to determine the independent status of its directors, and after assessing their individual situations, the Board of Directors recognized the independent status of Stéphanie Besnier and Véronique Saubot but did not recognize the independent status of Johannes Huth and Michael Ogrinz (for further details, see Chapter 4, paragraph 4.1.1 of the Universal Registration Document). These proposals also comply with the applicable requirements regarding gender balance within the Board of Directors.

Consequently, at the end of the Shareholders' General Meeting of May 12, 2026 and subject to approval of the above proposals, the Board of Directors will be made up of eight people, three of whom are women and five of whom are independent (i.e. 62.5%), as well as two employee-representative directors. In detail, the Board will be composed as follows:

Expiration of term of office	Name	Independent member
2029	Stéphanie Besnier	Yes
	Michael Ogrinz	No
	Véronique Saubot	Yes
2028	Johannes Huth	No
	Lucile Ribot	Yes
2027	Laurent Favre	Yes
	Patrick Kron	Yes
	Paris Kyriacopoulos	No
2026	Bruno Reysset, employee-representative director appointed by the France Group Committee	N/A
	Carlos Perez, employee-representative director appointed by the European Works Council	

In view of the reduction in the size of the Board of Directors at the end of the next Shareholders' General Meeting from ten to eight directors (excluding employee-representative directors) and in accordance with the Company's by-laws, the term of office of the employee-representative director appointed by the European Works Council, which is due to expire in October 2026, will not be renewed at the end of its term.

8.2.6 Relocation of registered office

In accordance with the provisions of the by-laws, the Board of Directors submits the relocation of the Company's registered office for ratification by the Shareholders' General Meeting **(fifteenth resolution)**. This decision is part of an effort to provide the Group with a modernized, sustainable working environment that is fully aligned with its values. The new headquarters is intended to provide a space that fosters collaboration, innovation, and cross-functional teamwork. The Board of Directors has decided to move the registered office previously located at 43, quai de Grenelle, 75015 Paris to 7-11, quai André Citroën, 75015 Paris, with effect from September 1, 2026. The by-laws will be amended accordingly.

8.2.7 Share buyback program

The authorization to buy back the Company's shares granted to the Board of Directors for an 18-month period by the Ordinary and Extraordinary Shareholders' General Meeting of May 13, 2025 will expire on November 12, 2026. Shareholders are therefore asked to renew the authorization at the present meeting, in accordance with current provisions **(sixteenth resolution)**.

For further details about the way in which the Company implemented its share buyback programs in 2025, see **Chapter 7, paragraph 7.3.4 of the Universal Registration Document**.

This authorization enables the Board of Directors to purchase a maximum of 10% of Company shares outstanding at January 1, 2026 (i.e. 8,494,095 shares) mainly for the purpose of:

- canceling the shares at a later date to reduce the Company's share capital;
- implementing and covering free share grants, as well as any shares granted under employee share ownership plans set up by the Company (or assimilated plans), or with respect to profit-sharing programs for current employees, former employees and/or corporate officers of the Company and/or any related companies as defined by articles L. 225-180, L. 225-197-2 and L. 233-16 of the French Commercial Code, within the current legal framework or ad hoc plans set up by the Company;
- granting or exchanging shares purchased, in particular, on exercise of rights or issue of shares or securities redeemable, convertible, exchangeable or otherwise exercisable for shares of the Company;
- maintaining the liquidity of the market through an investment services firm acting in the name and on behalf of the Company, under a liquidity agreement, it being specified that for the calculation of the 10% cap on purchases set out above, the number of shares bought back should be considered net of any shares sold within the duration of the authorization;
- holding them before using them at a later date as payment for or in consideration of external growth operations; and
- more generally, operating for any other purpose that is or may come to be authorized by law or regulations, and/or implementing any market practice that is or may come to be authorized by the AMF.

The number of shares that may be held, directly or indirectly at any time, may not exceed 10% of the Company's share capital or 5% of the total number of shares making up the share capital if the shares were acquired by the Company with a view to holding them before using them at a later date as payment for or in consideration of a merger, demerger or contribution. Furthermore, the purchase price may not exceed €85 per share, representing a maximum total investment of €721,998,075.

Shares may be purchased by any means, including block transfers and with the use of derivatives, at any time except during a public offer for the Company's shares.

The share buyback program, details of which are set out in **Section 7.3.4 of Chapter 7** of the Universal Registration Document, was drawn up in accordance with articles L. 22-10-62 et seq. of the French Commercial Code, Regulation (EU) no. 596/2014 of the European Parliament and of the Council of April 16, 2014 on market abuse, and articles 241-1 to 241-7 of the AMF's General Regulation.

8.2.8 Powers to carry out formalities

As in previous years, the last resolution grants all necessary powers to carry out legal formalities arising from the Shareholders' General Meeting **(seventeenth resolution)**.

8.3 Draft resolutions submitted to the Ordinary Shareholders' General Meeting

First resolution

Approval of the Company's management and statutory financial statements for the year ended December 31, 2025

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered both the Board of Directors' Report and the Statutory Auditors' Report on the annual financial statements, the shareholders approve the financial statements for the year ended December 31, 2025 as presented, as well as the transactions reflected in them and referred to in the reports.

In accordance with article 223 *quater* of the French Tax Code, the shareholders approve the total amount of charges and expenses, as defined in article 39, paragraph 4 of said Code, which corresponded to €226,317 over the previous financial year. No tax was incurred on these expenses.

Second resolution

Approval of the consolidated financial statements for the year ended December 31, 2025

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered both the Board of Directors' Report and the Statutory Auditors' Report on the Group's consolidated financial statements, the shareholders approve the consolidated financial statements for the year ended December 31, 2025 as presented, as well as the transactions reflected in them and referred to in the reports.

Third resolution

Appropriation of profit and setting the dividend with respect to the financial year ended December 31, 2025

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Board of Directors' Report, the shareholders:

– acknowledge that the Company recorded a profit in the previous financial year of:	€316,968,227.87
– plus retained earnings of:	€948,650,650.84
– that there is no requirement to make any allocation to the legal reserve, which already represents 10% of the Company's share capital:	N/A
– representing a total distributable amount of:	€1,265,618,878.71
– decide to pay a dividend of €0.75 with respect to 2025 to the holders of each of the 84,940,955 shares making up the share capital at December 31, 2025, representing a distribution of:	€63,705,716.25
– and allocate the balance to retained earnings, which now amount to:	€1,201,913,162.46

– The payment of €0.75 per share corresponds to an ordinary dividend paid wholly in cash.

– The shareholders decide that the difference between the number of shares eligible for the dividend at the ex-dividend date and the 84,940,955 shares making up the share capital at December 31, 2025 will lead to an adjustment to the total actual dividend payout. The amount allocated to retained earnings will be determined on the basis of the dividend actually paid.

– The ex-dividend date will be May 20, 2026 and the dividend will be paid on May 22, 2026. In accordance with article 243 *bis* of the French Tax Code, individual shareholders domiciled for tax purposes in France may benefit from a 40% tax allowance, as stipulated in article 158-3-2° of the French Tax Code, subject to the taxpayer opting for their income from movable property to be taxed according to the standard progressive income tax bands set out in article 200-A-2 of that Code. The shareholders acknowledge that the dividends paid with respect to the previous three financial years were as follows:

Financial year ending:	12/31/2024	12/31/2023	12/31/2022**
Net dividend per share	€1.45*	€1.35*	€3.85*
Number of shares carrying dividend rights	84,778,300	84,849,996	84,852,296
Total net payout	€122.9 million	€114.5 million	€326.7 million

* Fully eligible for the 40% tax allowance for individual shareholders domiciled in France for tax purposes stipulated in article 158-3-2° of the French Tax Code, subject to the taxpayer opting to be taxed according to the progressive income tax bands.

** The dividend paid in respect of the 2022 financial year was €3.85 per share, equating to an ordinary dividend of €1.50 per share and an exceptional dividend linked to the disposal of the High Temperature Solutions business of €2.35 per share.

Fourth resolution

Statutory Auditors' special report governed by article L. 225-40 of the French Commercial Code

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings, having considered both the Board of Directors' Report and the Statutory Auditors' special report prepared in accordance with the provisions of article L. 225-40 of the French Commercial Code, the shareholders approve the special report and all the items covered therein.

Fifth resolution

Approval of the compensation policy applicable to the Chairman of the Board of Directors with respect to the 2026 financial year

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve the compensation policy applicable to the Chairman of the Board of Directors of the Company with respect to the 2026 financial year, as detailed in Chapter 4, Section 4.3 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-8°II of that Code.

Sixth resolution

Approval of the compensation policy applicable to the Chief Executive Officer with respect to the 2026 financial year

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve the compensation policy applicable to the Chief Executive Officer of the Company with respect to the 2026 financial year, as detailed in Chapter 4, Section 4.3 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-8°II of that Code.

Seventh resolution

Approval of the compensation policy applicable to members of the Board of Directors with respect to the 2026 financial year

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve the compensation policy applicable to members of the Company's Board of Directors with respect to the 2026 financial year, as detailed in Chapter 4, Section 4.3 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-8 II of that Code.

Eighth resolution

Approval of the information relating to corporate officer compensation in 2025 as defined in article L. 22-10-9 I of the French Commercial Code

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve all the components of compensation granted to corporate officers with respect to the 2025 financial year set out in article L. 22-10-34 I. of the French Commercial Code, as detailed in Chapter 4, Section 4.3 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-9°I of that Code.

Ninth resolution

Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chairman of the Board of Directors with respect to the financial year ended December 31, 2025

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chairman of the Board of Directors with respect to the financial year ended December 31, 2025, as detailed in Chapter 4, Section 4.3 and Chapter 8, Section 8.2.4 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-34 II of that Code.

Tenth resolution

Approval of the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chief Executive Officer with respect to the financial year ended December 31, 2025

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Corporate Governance Report governed by article L. 225-37 of the French Commercial Code, the shareholders approve the fixed, variable and exceptional components of the total compensation and benefits in kind paid or granted to the Chief Executive Officer with respect to the financial year ended December 31, 2025, as detailed in Chapter 4, Section 4.3 and Chapter 8, Section 8.2.4 of the Company's 2025 Universal Registration Document, in accordance with the provisions of article L. 22-10-34 II of that Code.

Eleventh resolution

Re-appointment of Stéphanie Besnier as a director

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings, having considered the Board of Directors' Report and acknowledged that the directorship of Stéphanie Besnier expires at the close of this Shareholders' General Meeting, the shareholders decide to re-appoint her as a director for a term expiring at the end of the Shareholders' General Meeting to be held in 2029 to approve the financial statements for the year ending December 31, 2028, in accordance with the provisions of the by-laws.

Twelfth resolution

Re-appointment of Véronique Saubot as a director

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings, having considered the Board of Directors' Report and acknowledged that the directorship of Véronique Saubot expires at the close of this Shareholders' General Meeting, the shareholders decide to re-appoint her as a director for a term expiring at the end of the Shareholders' General Meeting to be held in 2029 to approve the financial statements for the year ending December 31, 2028, in accordance with the provisions of the by-laws.

Thirteenth resolution

Ratification of the cooptation of Johannes Huth as a director

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Board of Directors' Report, the shareholders decide to ratify the cooptation of Johannes Huth as a director of the Company, for a term expiring at the end of the Shareholders' General Meeting to be held in 2028 to approve the financial statements for the year ending 2027, in accordance with the provisions of the by-laws.

Fourteenth resolution

Appointment of Michael Ogrinz as a director

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Board of Directors' Report, the shareholders decide to appoint Michael Ogrinz as a director of the Company for the first time, for a term expiring at the end of the Shareholders' General Meeting to be held in 2029 to approve the financial statements for the year ending December 31, 2028, in accordance with the provisions of the by-laws

Fifteenth resolution

Ratification of the relocation of the registered office

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings and having considered the Board of Directors' Report, the shareholders ratify, in accordance with the provisions of Article 4 of the Company's by-laws, the decision of the Board of Directors to relocate the registered office, and notes that the aforementioned article will state as of September 1, 2026: "The registered office is located at 7-11 quai André Citroën, 75015 Paris".

Sixteenth resolution

Authorization to be granted to the Board of Directors to enable the Company to buy back its own treasury shares

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings, having considered the Board of Directors' Report and in accordance with the provisions of articles L. 22-10-62 of the French Commercial Code, Regulation (EU) No. 596/2014 of the European Parliament and of the Council of April 16, 2014 on market abuse, articles 241-1 to 241-7 of the AMF's General Regulation and authorized market practices, the shareholders:

1) grant the Board of Directors, or any representative duly empowered in accordance with the law, an authorization to purchase the Company's shares in order to:
    - cancel the shares at a later date by reducing the Company's share capital in accordance with the authorization provided for in the twenty-fifth resolution approved by the Shareholders' General Meeting of May 13, 2025;
    - implement and cover stock purchase option plans and/or free share grants, as well as any shares granted under shareholding plans set up by the Company (or assimilated plans), or with respect to profit-sharing for current employees, former employees and/or corporate officers of the Company and/or any related companies in accordance with articles L. 225-180 and L. 233-16 of the French Commercial Code, within the legal framework in force or ad hoc plans set up by the Company,
    - grant or exchange shares purchased, in particular, on exercise of rights or issue of shares or securities redeemable, convertible, exchangeable or otherwise exercisable for shares of the Company,
    - maintain the liquidity of the market through an investment services firm acting in the name and on behalf of the Company, under a liquidity agreement, it being specified that for the calculation of the 10% cap on purchases set out in paragraph 2 of this resolution, the number of shares bought back should be considered net of any shares sold during the term of the authorization,
    - hold them before using them at a later date as payment for or in consideration of external growth operations, and
    - more generally, operate for any other purpose that is or may come to be authorized by law or regulations, and/or implement any market practice that is or may come to be authorized by the AMF.

Shares may be purchased, sold, transferred or exchanged at any time, except during a public offer for the Company's shares, in accordance with applicable regulations, on the market or over the counter and by any means, including through block transfers and with the use or exercise of any financial instrument, financial contract or derivative;

2) set the following limits within which the Board of Directors may use this authorization:
   - the number of shares that may be purchased cannot exceed 10% of the shares issued and outstanding at January 1, 2026, i.e. 8,494,095 shares (or 5% of the total number of shares making up the share capital if the shares were acquired by the Company with a view to holding them before using them at a later date as payment for or in consideration of a merger, demerger or contribution),
   - the number of shares the Company may hold, whether directly or indirectly at any time, may not exceed 10% of the Company's share capital,
   - the price at which shares are purchased may not exceed €85,
   - consequently, the Company's total investment in share buybacks may not exceed €721,998,075;
3) decide that, if the par value of the shares changes, the capital is increased by capitalizing reserves or granting free shares, or in the event of a stock split or reverse stock split, the aforementioned maximum investment available for share buybacks and the maximum number of shares able to be repurchased will be adjusted by the ratio between the number of shares that made up the capital before the operation and the number after the operation. The Board of Directors will also have the power to adjust the maximum unit price in order to take account of the impact of these transactions on the share price;
4) grant this authorization for a period of 18 months from the date of this Shareholders' General Meeting, which supersedes the unused portion of any authorizations previously granted to the Board of Directors regarding share buybacks;
5) grant full powers to the Board of Directors, or any representative duly empowered in accordance with the law, to implement this authorization and, in particular, place any and all buy and sell orders, sign any and all sale, exchange or transfer agreements, file any statements with the AMF or any other organization, make any adjustments provided for above, reallocate where authorized any shares purchased for one of the objectives of the share buyback program to another one or several other objectives, even shares bought under previous authorized programs, carry out all other formalities, and generally do everything necessary to implement this authorization.

Seventeenth resolution

Powers to carry out formalities

Deliberating in accordance with the rules of quorum and majority applicable to Ordinary Shareholders' General Meetings, the shareholders give full powers to the bearer of an extract or copy of the minutes of the present Shareholders' General Meeting to carry out any and all filing and publication

9.1 Person responsible for the Universal Registration Document

Alessandro Dazza, Chief Executive Officer.

9.2 Person responsible for the financial information

Pierre Lebreuil, Chief Financial Officer.

9.3 Declaration by the person responsible for the Universal Registration Document, including the Annual Financial Report

I declare that the information contained in this Universal Registration Document is, to the best of my knowledge, consistent with the facts and contains no omission likely to affect its import.

I declare that, to the best of my knowledge, the annual and consolidated financial statements have been prepared in accordance with applicable accounting standards and give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and all the companies included in the consolidation scope and that the management report contained in this Universal Registration Document and listed in the cross-reference table in section 9.5.2, provides a true and fair view of the evolution, results and financial position of the Company and of all the companies included in the consolidation scope, as well as a description of the main risks and uncertainties to which they are exposed, and that it has been prepared in accordance with the applicable sustainability reporting standards.

Paris, March 19, 2026

Alessandro Dazza

Chief Executive Officer

9.4 Information included in the Universal Registration Document by reference

Pursuant to article 19 of Regulation (EU) 2017/1129 of the European Parliament and of the Council of June 14, 2017, the following information is incorporated by reference in the present Universal Registration Document:

- With respect to the financial year ending December 31, 2024, the consolidated financial statements, annual financial statements, the related Statutory Auditors' Reports, the Statutory Auditors' special report on related party agreements and the Management Report published in chapter 6 – Financial Statements (pages 320 to 405 and pages 406 to 425), chapter 6 – Reports on the fiscal year 2024 (pages 426 to 435) and in section 9.5.2 (page 503), respectively, of the 2024 Universal Registration Document filed with the AMF on 26 March 2025 under number 25-0161 available on the Company's website (*https://www.imerys.com/public/2025-03/Imerys-Document-d-Enregistrement-Universel-DEU-2024.pdf*)
- With respect to the financial year ending December 31, 2023, the consolidated financial statements, annual financial statements, the related Statutory Auditors' Reports, the Statutory Auditors' special report on related party agreements and the Management Report published in chapter 6 – Financial Statements (pages 230 to 314 and pages 315 to 334), chapter 6 – Reports on the fiscal year 2023 (pages 335 to 344) and in section 9.5.2 (page 387), respectively, of the 2023 Universal Registration Document filed with the AMF on 26 March 2024 under number 24-0183 available on the Company's website *(https://www.imerys.com/public/2024-03/Imerys_DEU_2023_FR_26_mars_2024_.pdf)*.

Any information included in these prior-year universal registration documents and not in the present Universal Registration Document is either of no relevance to investors or mentioned in another part of the Universal Registration Document.

The information published on the websites linked in the present document does not form part of the Universal Registration Document, except where it is incorporated by reference. Therefore, it has not been reviewed or approved by the AMF.
